[Alfred, Lord Tennyson](#) - Alfred Tennyson 2012-04-26

Tennyson was one of the true great Victorian poets - much of his work is known throughout the world: 'Theirs not to reason why, theirs but to do and die' 'Tis better to have loved and lost than never to have loved at all' His genius is expressed through the precision and delicacy of the language of his lyrical poems. Some of his words were engraved in the 2012 Olympic village and his early poetry was a major influence on and inspiration for the Pre-Raphaelite Brotherhood. Tennyson initially declined a baronetcy - indeed, he wrote a substantial amount of unofficial political poetry. To this day, he remains one of Britain's most popular poets. 'No man ever got very high by pulling other people down... Don't knock your friends. Don't knock your enemies. Don't knock yourself'

*Dying to Be Thin While Trying to Fit in* - Monique Callahan 2018-10-22

"And once the Storm is over you won't remember how you made it through, how you managed to Survive. You won't even be sure whether the Storm is really over. But one thing is certain. When you come out of the Storm, you won't be the same person that walked in. That's what this Storm is about." Haruki Murakami This book contains the accounts of Monique Callahan's Trials and Tribulations with the "Glorified Bariatric Surgery." Walk with her as she describes what is to be the one of the most Heroine Journeys that she has ever had to take.

Monique is a survivor of four surgeries and six hospital stays that almost took her Life. She describes in detail the pain, the countless hospital stays, and fighting for her life! She struggled with obesity her entire life and has tried her hand at many different weight loss interventions. Although weight loss was successful, gaining it back was always the end result. Monique never opted to have weight loss surgery due to the biased reviews and now regrets ever having it done in the first place. Because of her struggles, Monique wants to bring awareness and educate others thinking about having Bariatric Surgery. She desires to become a Life Coach educating others on the healthier way of losing weight by first retraining the mind to let go of what it has been accustomed to. She believes that Obesity is more of a mental illness more than anything else. Once the mind is aligned with the body the process of losing weight becomes easier. Monique states that had she known some of the issues that she is facing at this time, she may have declined the surgery if she was able. This book is a MUST READ for those contemplating Bariatric Surgery and gives insight and helpful information on her accounts, that the physicians leave out during their consultation. Monique is still battling issues that stem from the surgery but, continues to reach out and help others on their quest to lose weight permanently. While she has lost a tremendous amount of weight, the hardships she has had to face to get where she is today overwhelms any success that she should be celebrating. With God and her family by her side she is determined to get the word out and help others along the way!

Secret Language of Eating Disorders - Peggy Claude-Pierre 1997

Advance praise for Peggy Claude-Pierre and THE SECRET LANGUAGE OF EATING DISORDERS "Peggy's work begins where attachment to the limiting obstacles of theory end. She has brought back from the dead many young lives the world deemed hopeless. Each living success at the Montreux Clinic is a testament to the energy in

her commitment. There are many who possess the title of 'doctor' who have never come close to Peggy's incredible example of the selfless healer. It is true the lights of Montreux are on twenty-four hours a day, as is Peggy Claude-Pierre, the brightest of them all." -- Craig T. Pratt, M.D., chief, Division of Addiction Medicine, Grant-Riverside Methodist Hospitals "Peggy has gone beyond the surface of eating disorders to discover their true causes and then present a valid and proven healing path. In this extremely constructive book, she offers incredible insights into the mind of the sufferer and the myths of eating disorders. It is a map to guiding professionals, families, and victims through the maze of eating disorders. Peggy's message has given me renewed faith that we can become a community of helpers and healers." -- Keith J. Karren, Ph. D., department chair, Health Science, Brigham Young University "Our daughter was an anorexic blessed with a strong, loving therapist and a multidisciplinary Eating Disorders Unit whose members fought for and cared for her. Yet the right medication, the appropriate treatment, and outside experts did not work. Peggy Claude-Pierre is a warrior-- ferocious and relentless-- whose work has rescued a decade of sufferers. The Talmud states, 'If you save one life, you save humanity.' This story, for me, is one of a battle using intelligence, feeling, focus on empirically verified treatment principles, delicate balancing of a complex residential environment, and definable goals to save one life at a time. Amazingly, Peggy is making my daughter a warrior too." -- Edward Feller, M.D., F.A.C.P., clinical associate professor of medicine, Brown University School of Medicine. "Peggy Claude-Pierre has created a paradigm shift in the way we view and treat anorexia. Peggy has shifted the focus of care from that of controlling the symptoms of disordered eating to healing the negativity that would otherwise plague the individual for the rest of his or her life. Through unconditional love and continual support, she enables people with anorexia to begin the journey of self-discovery by guiding them out of the cave of self-loathing and despair into a world of promise and hope. When I first met Peggy, we were both on a mission: hers, to save all the children with anorexia, and mine, to find someone to save my daughter. I have developed the utmost respect for Peggy, for I realize that she has translated 'the secret language of anorexia.' Now, it is up to us to use the knowledge she has revealed." -- Daniel J. Smith, M.D.

Euthanasia is Not the Answer - David Cundiff 2012-12-06

Instances of euthanasia or mercy killing date back to antiquity. However, it is only recently that the unprecedented grassroots efforts to legalize euthanasia have begun building. "Terminal Illness, Assistance with Dying," a California ballot initiative for the November 1992 election, might for the first time in modern history legalize euthanasia and assisted suicide by physicians. Similar initiatives are planned in other states. To vote intelligently, citizens in California and throughout the United States need to learn who is likely to request euthanasia or assisted suicide, and why. How we care for the terminally ill eventually affects us all. In over half of all deaths, a chronic disease process such as cancer or congestive heart failure leads to a terminal phase that may last for days, weeks, or months. Most people are more afraid of the suffering associated with this terminal phase than they are afraid of dying itself. When polled, most Americans tell us they would prefer to die at home, surrounded by loved ones, rather than in a hospital receiving high-tech tests and treatments until the last. Yet the majority of people, even those with terminal illnesses, die in the hospital. What factors in our culture and health care system have led to this dichotomy? Unrelieved suffering is also the primary reason for euthanasia requests.

**Dying to be Thin** - Nikki Grahame 2010

Say the name Nikki Grahame and most people will remember the bubbly, highly strung and hugely entertaining Big Brother 7 contestant. Since leaving the Big Brother house, she has forged a successful career for herself in presenting and writing. Yet Nikki isn't just another reality television contestant, and her life story is not like any other you will ever read. From the age of eight until she was nineteen, Nikki battled anorexia nervosa but few cases have been quite as extreme as hers. Aged just eight and weighing just under 45 pounds, Nikki was

diagnosed as anorexic. For the next eight years, she was in and out of institutions--seven in total--during which time she attempted suicide twice and had to be sedated up to four times a day so that she could be force-fed. At one point, she was sedated for fourteen days while doctors sewed a tube into her stomach, through which she was fed in order to get her weight out of the critical range. The lengths that she went to avoid eating and find ways to exercise excessively shocked doctors who have worked in the field for years. As Nikki says, "I've always wanted to be the best at everything I do, so I had to be the best anorexic--and I was." This compelling book tells the story of an incredible journey.

**Dying to be Thin** - Ira M. Sacker 1987

- Claire Broad 2019-09-10

A fresh and thoroughly modern take on Afterlife communication. Claire Broad is known as the Honest Medium, in *What the Dead are Trying to Teach* Claire shares invaluable insights into life after death gained through her own experience, whilst also drawing on the most up-to-date scientific studies on consciousness. As a young child, Claire experienced psychic phenomena, as she grew older her experiences and the communications she received became stronger, resulting in Spirit teachers making their presence known and guiding her. Naturally analytical and now an adult, Claire was forced to question the validity of her experiences against the common academic opinion surrounding survival after physical death and embarked upon a life long quest for the truth. In her refreshingly down to earth, honest and open manner, Claire shares personal stories to bring comfort and hope to many whilst highlighting findings from consciousness studies that challenge our understanding of the world and encourage us to consider our true nature and full potential. Claire teaches us why we may have confidence there is life after death, how we can heal and awaken spiritually through the therapeutic practice of mediumship and most importantly what we can learn from those already on the other side in order to make the most of this life whilst we are here. By the end of this compelling book, readers will have an understanding that we all have a natural connection to the spirit world and will have gained tips and tools to deepen this connection; that death is an illusion; that our loved ones can visit us after their passing and that we can learn to recognise the signs; that genuine mediumship is a therapeutic practice and why visiting a medium is nothing to be feared; that spirit guides gently support us all; that it is natural for a child to display psychic ability and what you can do to support a child that does; that there is scientific research to support the validity of mediumship and psychic ability and that it is possible to seek evidence for survival as well as keeping faith.
