The Deceptive Brain - Robert L. Taylor M.D. 2021-10-29

Preposterous as it sounds, we are not who we seem to be. Not even close. At the heart of this misperception is our deep-seated conviction of free choice. Based on emerging neurobehavioral science findings, *The Deceptive Brain* makes the case for human experience as a narrative illusion—an executive summary of sorts—that emerges from an incredibly complex brain. *The Deceptive Brain* drills down on what this finding means for the way we blame and punish, and presents a bold alternative approach to criminal justice based on blameless responsibility.
Erewhon, Or, Over the Range - Samuel Butler 1921

Philosophy, Psychiatry and Neuroscience - Edward M. Hundert 1990

The traditional separation of philosophy, psychiatry, and neuroscience into distinct academic disciplines has led to several discrete approaches to the mind. In an in-depth discussion of major theories from all of these, and related, disciplines, the author progressively reveals fundamental links between these previously unconnected approaches to human thought and experience. The result is a single, unified theory, perhaps the first to integrate all these fields of thought.

Erewhon - Samuel Butler 1980

Erewhon é uma das grandes utopias do século XIX, várias vezes comparada às Viagens de Gulliver, de Jonathan Swift. Profundamente marcado pelas ideias de Darwin, Samuel Butler começou a escrevê-la em 1863, na Nova Zelândia, e acabou por publicá-la anonimamente em Março de 1872, já em Inglaterra. O título da obra é também o nome de um país descoberto pelo protagonista da história. Percebe-se que Butler terá feito uso da sua experiência da Nova Zelândia, e que algumas das paisagens aqui descritas têm a ver com aquelas que ele próprio terá conhecido naquele arquipélago do Pacífico. Contudo, o que verdadeiramente ele visava era satirizar diversos aspectos da sociedade vitoriana do seu tempo. A sua primeira edição esgotou-se em apenas três semanas.

Erewhon Or Over the Range - Samuel Butler Butler 2018-05-24

Erewhon or Over the Range By Samuel Butler Butler Samuel Butler's irreverent satire, 'Erewhon', castigates the hypocrisy of both religion and conventional social mores, and pours scorn on the unthinking acceptance that makes such beliefs possible. In *Erewhon* (an anagram of 'Nowhere') 'normal' behaviour consists of hospitalizing fraudsters and chastising the sick; of disregarding genius and praising the insane. Erewhonians are described as "meek and long-suffering, easily led by the nose, and quick to offer up common sense at the shrine of logic" - pointed criticism of both Victorian society and contemporary 'politically-correct' repression. Butler's imaginative tale sparkles with wit and prescient insights: his discussion of the dangers posed by increasingly intelligent machines has more relevance today than when it was first written over 130 years ago. We are delighted to publish this classic

book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience. *Erewhon or Over the Range*, By Samuel Butler Butler, *The Cradle of Erewhon* - Joseph Jones 2014-07-03

In 1859, Samuel Butler, a young Cantabrigian out of joint with his family, with the church, and with the times, left England to hew out his own path in New Zealand. At the end of just five years he returned, with a modest fortune in money and an immense fortune in ideas. For out of this self-imposed exile came *Erewhon*, one of the world's masterpieces of satire, which contained the germ of Butler's intellectual output for the next twenty years. *The Cradle of Erewhon* is an examination and interpretation of the special ways in which these few crucial years affected Butler's life and work, particularly *Erewhon* and *Erewhon Revisited*. It shows us Butler the sheep farmer, explorer, and mountain climber, as well as Butler the newcomer to "The Colonies," accepting—and accepted by—his intellectual peers in the unpioneerlike little city of Christchurch, sharpening and disciplining his mind through his controversial contributions to the Christchurch Press. But more importantly, the book suggests the depth to which New Zealand penetrated the man and reveals new facets of influence hitherto

unnoticed in Erewhon and Erewhon Revisited. The Southern Alps ("Oh, Wonderful! Wonderful! so lonely and so solemn"), the perilous rivers and passes, the character and customs of the Maoris—all these blend to afford new insights into a complex book. Butler was not the first to create an imaginary world as asylum from the harsh realities of this one (Vergil did the same in the Eclogues), nor was he the first, even in his own time, to protest against the machine as the enslaver of man, but his became the clearest and the freshest voice. On the biographical side, *The Cradle of Erewhon* offers new evidence for reappraising the man who for so long has been a psychological and literary puzzle. Why, for instance, did he repudiate his first-born book, *A First Year in Canterbury Settlement*? And why, once safely away from the entanglements of London, did he voluntarily return to them? Answers to these and other Butlerian riddles are suggested in the engrossing account of the satirist's sojourn in the Antipodes.

If you meet George Herbert on the road, kill him - Justin Lewis-Anthony

2013-01-17

Priestly ministry in the Church of England needs a radical rethink... George Herbert died in 1633. His legacy continues. His poems are read and sung, and his parish ministry remains the model for the Church of England's understanding of how and where and why its priests should minister. But there is a problem. The memory of Herbert celebrated by the Church is an inaccurate one, and, in its inaccuracy, is unfair on Herbert himself and his successors in the ordained ministry. This is a book of the long view. It sets out to assess realistically the context of Herbert's life and to explore the difficulties of parish life today. By examining the status and role of parish clergy since Herbert's time and today, it draws on the work of historians, social anthropologists, psychologists and theologians, and presents their ideas in a readable and passionate style. It argues that the future strength of parochial ministry will be found in a recovery of historic, renewed understandings of priestly ministry, and concludes by outlining more sustainable patterns of practice for the future. In a climate of uncertainty for the future of the church, it will be an encouragement for priest and people, and welcomed by both.

A tour of the multiple usages and systems that each historic period puts forth in the name of communication. This genealogy maps the many means by which humans interact - from cataloguing others, to asserting power over them, to working together with them to build new forms of community. Included are topics such as the elaboration of warfare as a logistic; the rise of professional societies of propaganda and national propagation; the history of universal expositions and world fairs; the birth of documentary and film out of physiological investigations in the 19th century; the development of press and the popular novel; and the origins of American social science. The history runs from the circuits of exchange to the circulation of goods, people and messages, from the construction of railroads to the emergence of long-distance communication. The author brings a clarifying perspective to the ideologies and theories that accompany these transformations.
