The Burns Supper Companion - Nancy Marshall 2022-12-15

In 1801, some five years after Robert Burns' death, nine of his friends sat down to dinner in what is now known as Burns Cottage in Alloway to celebrate his extraordinary life and to give thanks for his friendship. Over the years the informal theme from that evening has developed into the ritual known as Burns Night. This best-selling book is the essential guide for anyone intending to hold or attend a Burns Night of any size. In addition to setting out the order of events for the evening, the Burns Supper Companion also offers fascinating insights into the traditions surrounding Burns Night. Nancy Marshall has spent a large part of her life living and working in Edinburgh. She read English Literature and Medieval History at Edinburgh University, going on to write widely about Scottish song and the poems and songs of Robert Burns.

Oil Firing for Kitchen Ranges and Steam Boilers (Classic Reprint) - E. C. Bowden-Smith 2017-11-07

Excerpt from Oil Firing for Kitchen Ranges and Steam Boilers The principal object now in view is to give a brief description of the combustion of heavy residues or fuel oil in a cooking range for culinary purposes. Some general remarks on the production of crude petroleum and fuel oil, together with other information relating thereto, is included, as, comparatively speaking, the average householder or hotel proprietor knows little or nothing of oil for firing purposes. Previous to the war, fuel oil had not been used in the kitchen as far as the author is aware, and it was entirely due to the great scarcity and high cost of coal, brought about by war conditions, that means were devised for firing kitchen ranges with similar residues to those that are used for firing purposes in the furnaces of steam generators. There are many excellent liquid-fuel burners on the market for steam-raising and other purposes, but neither in design nor method of application do they conform with the exacting requirements of the domestic kitchen, in simplicity, reliability, cleanliness, and range of power.
