Fighting Corruption in Eastern Europe and Central Asia The Istanbul Anti-Corruption Action Plan Progress and Challenges - OECD 2008-10-20

This volume analyses a broad range of anti-corruption measures recently implemented in Eastern Europe and Central Asia and identifies where interim progress has been achieved, and where further or reinforced action is needed.

Social impacts of oil palm in Indonesia - Tania Murray Li 2015-05-07

Oil palm plantations and smallholdings are expanding massively in Indonesia. Proponents highlight the potential for job creation and poverty alleviation, but scholars are more cautious, noting that social impacts of oil palm are not well understood. This report draws upon primary research in West Kalimantan to explore the gendered dynamics of oil palm among smallholders and

plantation workers. It concludes that the social and economic benefits of oil palm are real, but restricted to particular social groups. Among smallholders in the research area, couples who were able to sustain diverse farming systems and add oil palm to their repertoire benefited more than transmigrants, who had to survive on limited incomes from a 2-ha plot.

Transforming REDD+ - Angelsen, A. 2018-12-12

Constructive critique. This book provides a critical, evidence-based analysis of REDD+ implementation so far, without losing sight of the urgent need to reduce forest-based emissions to prevent catastrophic climate change. REDD+ as envisioned **Toward Climate-Resilient Development in Nigeria** - Raffaello Cervigni 2013-08-05

If not addressed in time, climate

change is expected to exacerbate Nigeria's current vulnerability to weather swings and limit its ability to achieve and sustain the objectives of Vision 20:2020 [as defined in <http://www.npc.gov.ng/home/doc.aspx?mCatID=68253>]. The likely impacts include:

- A long-term reduction in crop yields of 20–30 percent
- Declining productivity of livestock, with adverse consequences on livelihoods
- Increase in food imports (up to 40 percent for rice long term)
- Worsening prospects for food security, particularly in the north and the southwest
- A long-term decline in GDP of up to 4.5 percent

The impacts may be worse if the economy diversifies away from agriculture more slowly than Vision 20:2020 anticipates, or if there is too little irrigation to counter the effects of rising temperatures on rain-fed yields. Equally important, investment decisions made on the basis of historical climate may be wrong: projects ignoring climate change might be either under- or over-designed, with losses (in terms of excess capital costs or foregone revenues) of 20–40 percent of initial capital in the case of irrigation or hydropower. Fortunately, there is a range of technological and management options that make sense, both to better handle current climate variability and to build resilience against a harsher climate:

- By 2020 sustainable land management practices applied to 1 million hectares can offset most of the expected shorter-term yield decline; gradual extension of these practices to 50 percent of cropland, possibly combined with extra irrigation, can also counter-balance longer-term climate change impacts.
- Climate-smart planning and design of irrigation and hydropower can more than halve the risks and related costs of making the wrong investment decision. The Federal

Government could consider 10 short-term priority responses to build resilience to both current climate variability and future change through actions to improve climate governance across sectors, research and extension in agriculture, hydro-meteorological systems; integration of climate factors into the design of irrigation and hydropower projects, and mainstreaming climate concerns into priority programs, such as the Agriculture Transformation Agenda.

The Toyota Way Fieldbook - Jeffrey K. Liker 2005-10-19

The Toyota Way Fieldbook is a companion to the international bestseller The Toyota Way. The Toyota Way Fieldbook builds on the philosophical aspects of Toyota's operating systems by detailing the concepts and providing practical examples for application that leaders need to bring Toyota's success-proven practices to life in any organization. The Toyota Way Fieldbook will help other companies learn from Toyota and develop systems that fit their unique cultures. The book begins with a review of the principles of the Toyota Way through the 4Ps model-Philosophy, Processes, People and Partners, and Problem Solving. Readers looking to learn from Toyota's lean systems will be provided with the inside knowledge they need to Define the companies purpose and develop a long-term philosophy Create value streams with connected flow, standardized work, and level production Build a culture to stop and fix problems Develop leaders who promote and support the system Find and develop exceptional people and partners Learn the meaning of true root cause problem solving Lead the change process and transform the total enterprise The depth of detail provided draws on the authors combined experience of coaching and supporting companies in lean

transformation. Toyota experts at the Georgetown, Kentucky plant, formally trained David Meier in TPS. Combined with Jeff Liker's extensive study of Toyota and his insightful knowledge the authors have developed unique models and ideas to explain the true philosophies and principles of the Toyota Production System.

Data Analytics for Intelligent Transportation Systems - Mashrur Chowdhury 2017-04-05

Data Analytics for Intelligent Transportation Systems provides in-depth coverage of data-enabled methods for analyzing intelligent transportation systems that includes detailed coverage of the tools needed to implement these methods using big data analytics and other computing techniques. The book examines the major characteristics of connected transportation systems, along with the fundamental concepts of how to analyze the data they produce. It explores collecting, archiving, processing, and distributing the data, designing data infrastructures, data management and delivery systems, and the required hardware and software technologies. Users will learn how to design effective data visualizations, tactics on the planning process, and how to evaluate alternative data analytics for different connected transportation applications, along with key safety and environmental applications for both commercial and passenger vehicles, data privacy and security issues, and the role of social media data in traffic planning. Includes case studies in each chapter that illustrate the application of concepts covered Presents extensive coverage of existing and forthcoming intelligent transportation systems and data analytics technologies Contains contributors from both leading academic and commercial researchers Explains how to design

effective data visualizations, tactics on the planning process, and how to evaluate alternative data analytics for different connected transportation applications

Technology in Mathematics Teaching - Gilles Aldon 2019-07-01

This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

The Leader, The Teacher & You - Siong Guan Lim 2013-12-13

Former Head of the Singapore Civil Service Mr Lim Siong Guan now shares his diverse experiences and fresh insights on leadership in his exclusive new book, *The Leader, The*

Teacher & You. As a former Permanent Secretary in ministries, including the Ministry of Defence, the Prime Minister's Office and the Ministry of Finance, and former chairman of the Inland Revenue Authority of Singapore and the Singapore Economic Development Board, the indefatigable public servant has contributed greatly to Singapore's success, introducing innovative policies and practices at each turn, which have greatly enhanced drive and performance across the board. Most notably, he is known for his pursuit of excellence, especially in spearheading the Public Service for the 21st Century (PS21) movement, to develop organizational excellence. From Singapore's early years of government to its emergence as a prosperous metropolis, Lim has served the nation tirelessly through the years. In *The Leader, The Teacher & You*, Lim puts forth a fresh take on the notion of leadership as other-centered, with the focus on enabling others to be the best they can be. This noble vision of leadership is elaborated and built upon through the sharing of his experiences, in particular the memorable lessons and deep-seated convictions he has had while serving under Mr Lee Kuan Yew, Singapore's first Prime Minister, and Dr Goh Keng Swee, Singapore's First Deputy Prime Minister. Different types of leadership, such as personal and position leadership are touched upon as the author encourages leaders to take an active role in empowering those they lead and spurring them on to excellence. Coming from a man who has helmed many distinguished organizations, Mr Lim's insights on core values essential for organizational excellence are also not to be missed. The book offers practical and down-to-earth advice for leaders in all walks of life. For leaders who genuinely care for the

people they lead and hope to make a difference in their lives, this book will be a crucial guide. Contents: The Teacher: My Teachers Opportunities and Obligations Learning by Doing Systems for Success Governance and PS21 Culture and Values The Leader: Leadership The Pursuit of Excellence Position Leadership Personal Leadership Challenges: Be Yourself Be the Best That You Can Be Build Your Life with Pride and Dignity Learn by Doing Think ... and Think Again Pursue Excellence Constantly Learn to be a Part of an Orchestra Constantly Prepare for the Future Know Where You Want to Get to Choose to See the Best in Others Empathise with Others Believe that There is a Better Way Readership: Professional, academic, student and lay public interested in the topic of leadership and governance. Key Features: The book is written by a prominent author, the former head of the Singapore Civil Service, who served in government under the founding fathers of Singapore, and lived through the economic and social transformation of Singapore from independence The book introduces a new take on leadership ("other-centred leadership") and excellence ("being the best you can be") The book provides new insight into the foundational beliefs and values that make for strong nations and organizations, where success and survival are two sides of the same coin Keywords: Leader; Teacher; Leadership; Potential; Influence; Best; PS21 Reviews: "Everyone – regardless of profession – will benefit from reading this uniquely designed and highly original book. It is full of human insights, and it has a deep understanding of successful leadership, an appreciation of selflessness as the key to our collective future, an awareness of history's relevance to our lives and an unflinching emphasis on

excellence. Siong Guan Lim is one of the most outstanding public servants in any country, and after finishing this book, you will know why.” Senator Bill Bradley Former U.S. Senator and a Managing Director at Allen & Co. United States of America “The Leader, The Teacher & You is a riveting and thoughtful study on leadership based on theory, principles, and experience by a former Head of the Civil Service and one of Singapore's most successful and admired public servants, Siong Guan Lim. It should be read by every student of politics and public policy, and anyone who aspires to play a leadership role. The book which as the author says is ‘part biography, part commentary, and part exposition,’ is loaded with insights into how to work with people, deal with reality, motivate an organization, achieve results, anticipate change, and ensure relevance of the organization. For those who have long puzzled over how Singapore has been able to achieve so much with so little and in short time, it is public servants such as Siong Guan Lim who have made the partnership between the civil service and the elected politicians so fruitful. Through his fascinating account of how he started in his first job as an engineer in the Sewerage Department, went on to be the Principal Private Secretary to Prime Minister Lee Kuan Yew, worked with Deputy Prime Minister and Minister of Defence Dr Goh Keng Swee, and became successively Permanent Secretary of Defence, Education, and Finance, he recounts the crucial mentorship and inspiration provided by Singapore's leaders. He thoroughly examines what true leadership is all about. Lim moved on to become Chairman of Singapore's Economic Development Board and then Group President of GIC Private Limited, the

wealth fund of Singapore. I have not read such a clear analysis of the function of leadership written so succinctly and in such practical terms. It should be on the required reading list of university courses not only in Singapore, but major universities everywhere.” Professor Chan Heng Chee Chairman, Lee Kuan Yew Centre for Innovative Cities Singapore University of Technology and Design Singapore “The Leader, The Teacher & You makes us aware that what we do is not just for ourselves, but also for future generations. It is full of a wisdom born of a vast experience and a propensity to take the long view, while remaining acutely relevant for the immediate. Siong Guan Lim is the consummate teacher and role-models the title of the book. While there are suggestions on how to skim through selectively, I would encourage readers to read the whole book to get the true gist of the thinking that has helped to make civil servants people that count in our nation.” Mrs Belinda Charles Dean, Academy of Principals Singapore “A remarkable book ... after I started reading it I simply couldn't put it down. It has great insights, is fun to read, and deserves to be widely read. It is full of practical wisdom for a wide range of people – from full time mums to business leaders. It sets out a framework for leaders based on values and culture, but also on lessons learned by having to take tough decisions. Siong Guan Lim had an outstanding career in the development of Singapore. The ability, motivation, and vision of the author and his colleagues are clearly one reason why Singapore and Lee Kuan Yew were so successful. Because of this, the book is a great insight to understanding the phenomenon of Singapore.” Lord Griffiths of Fforestfach Vice Chairman, Goldman Sachs International

UK “Siong Guan Lim has led and managed at the most senior levels of the Singaporean government. Any leader would love to have him at his/her side, advising, counselling, provoking, and reminding. We cannot have him with us in person, but we do have this book that extracts the lessons that he has garnered from his many years of experience. We are fortunate that he has chosen to share his wisdom in writing. I have used some of his wisdom in my Harvard Kennedy School course on Effective Implementation for more than ten years. It has stood the test of time. Now, with the advent of the book, I will borrow even more from him. My students and I are grateful.” Mr Francis Hartmann Adjunct Lecturer in Public Policy and Originator of the Kennedy School course on Effective Implementation Harvard Kennedy School of Government USA “Academics often think of themselves as being like monks in a monastery, each person being responsible only for themselves and advancing their own careers. This book by Siong Guan Lim shows what real leadership can do to collectively achieve far more than can be done individually. This book contains the lessons and reflections of an outstanding practitioner of the art of leadership. Siong Guan Lim served in many senior positions of the Singapore Civil Service with great distinction and effectiveness. The fact that he was moved repeatedly from one senior position to another is a testament to his ability. In a society dedicated to promotion on the basis of merit, he was clearly meritorious. The book contains many important lessons and challenges based on what the author has learned and practiced himself. As he points out himself, the true testament of a leader is to look at what remains after he is gone. By that measure he did exceptionally well since the

Singaporean public service and Ministry of Defence are models of efficiency and effectiveness. He points out that organizations need to change in good times and in good time so that they are not overtaken by the future. He clearly succeeded in the ones that he ran. I trust that the current leadership in these organizations will take his lessons to heart. Relative to other books I have read on leadership, this is one of the best. It is full of practical wisdom, insights and challenges. The focus on values as critical is what I have observed in the organizations I have led. I could not put it down once I started reading it. I would put it as a must read for any leader of an organization of any size. I certainly intend to use it in my leadership challenges.” Professor Daniel Hastings Cecil and Ida Green Education Professor of Aeronautics and Astronautics and Engineering Systems Massachusetts Institute of Technology (MIT), and Director/ Chief Executive Officer of Singapore-MIT Alliance for Research and Technology United States of America “This book is truly unique: it is written and packaged like the numerous self-help books on leadership with tips and challenges, but its objective is not to teach someone how to get ahead and be successful by learning leadership techniques. At its heart is a simple and yet profound message – that to lead, one has to inspire people to aspire beyond themselves. Messages like ‘at the heart of every human being is a desire for meaning and purpose in life’ is a call for true values-based leadership, and a selflessness that is reflected by the book's fundamental premise: to be a good leader, one has to be a great teacher. Through examples from his own very public record of service to the nation and written in a way that is very accessible to young people,

Siong Guan Lim is himself a teacher-leader. The one message that resonates through the book is his observation that 'time passes and people die, but principles and values are what live on.' Young Singaporeans should absorb the book's messages into their daily lives, and by so doing they will become the selfless teacher-leaders, which Siong Guan Lim is the best example of." Mr Ho Kwon Ping and Ms Claire Chiang Founders, Banyan Tree Hotels and Resorts Singapore "We live in a wicked world. The conventional wisdom is that, in order to succeed, one has to be ruthless and unprincipled. Siong Guan Lim's extraordinary success is proof that a man with deep religious convictions and high moral principles can be a successful leader. What is Siong Guan Lim's leadership style? He is a leader with a tough mind and a warm heart, a leader who teaches and develops those who are members of his team. This is a wise and inspiring book." Professor Tommy Koh Chairman, Centre for International Law, National University of Singapore Singapore "As a life-long student of philosophy, I have been struck how scarce wisdom is in our world, even though it has been revered throughout the ages. This is why Siong Guan Lim's book is special. It is probably one of the wisest books I have read about the Singapore experience. At the same time, its principles have universal applicability. Hence, I have no doubt that every reader will benefit from reading it. And the world will become a better place if his wise insights are universally applied." Professor Kishore Mahbubani Dean of the Lee Kuan Yew School of Public Policy, National University of Singapore, and author of The Great Convergence: Asia, the West, and the Logic of One World Singapore "Siong Guan Lim's book is a fascinating and uplifting read. He evolves an

original exposition on the many facets of leadership from his more than 30 years of distinguished public service to Singapore. I recommend it as essential reading for managers be they placed in the private or public sector. Of greatest relevance to me personally was 'Part I: The Teacher' culminating in the chapter on 'Culture and Values' – valuable for those of us leading organizational change and development. Siong Guan's conviction that today's challenges demand values-driven solutions resonates sharply and persuasively. This book is organized to lovingly teach you how to lead yourself and your people to be the best that everyone can be." Mr Philip Ng Chief Executive Officer, Far East Organization, and Chairman of the Singapore University of Technology and Design Board of Trustees Singapore "An extensive collection of great quotations and life principles by Siong Guan Lim has provided me with personal inspiration and valuable professional insights as a CEO of a company whose continued success depends on its people. As every principle is intelligently articulated, reading this book will surely motivate and encourage all leaders." Mr Takeshi Niinami Chief Executive Officer of Lawson, Inc. Japan "The Leader, The Teacher & You: Leadership Through The Third Generation is a reflective account on teacher leadership by Siong Guan Lim, a former top civil servant with an illustrious career. Unlike many other books on the subject, he imparts thoughtful advice and perceptive lessons on leadership through easy to understand anecdotes and quotes from distinguished leaders such as Singapore's founding fathers Mr Lee Kuan Yew and the late Dr Goh Keng Swee. This is an essential read for anyone looking to make a positive impact in the lives of others,

regardless of age, background, or occupation. His advice is applicable to people from all walks of life, whether one is a civil servant, a business leader or a student." Dr Stephen Riady Executive Chairman OUE Limited Singapore "This book captures much of what is important in life from a leadership perspective. Having lived in Singapore and having been a regular visitor since the early 1990's, I have added much to my understanding of why the country has been so successful. A country run by leaders at all levels who exhibit the aspects of great leadership captured here, who really are 'catalysts for change,' and who never stop trying to be the best they can be, has every reason to be successful ... and this works in the private sector too!" Mr John G Rice Vice Chairman, General Electric, and President & Chief Executive Officer of GE Global Growth and Operations USA "This is an extraordinarily valuable book. Siong Guan Lim and Joanne Lim have managed to do the unusual, which is to create a narrative that is both educational and readable. The writers have elegantly drawn out important experiences and learnings from Siong Guan's long and varied career, and have made them memorable. But this is more than a story of a remarkable career and personal journey but the context, the development of a country whose primary asset is its people, means that the insights are endorsed by the success of a nation." Sir John Rose Chairman, Holdingham Group, and former Chief Executive Officer, Rolls Royce Inc. UK "One of the most insightful books in German literature is the novel The Buddenbrooks of Thomas Mann. It describes the decline of a family. Again and again looking at dynasties or business houses, we witness the seemingly unavoidable descent from great heights of success to failure. How can this be

prevented? The answer is selfless and competent leadership! The young look for role models and guidance, which can only be provided by elders who by their achievements and their life show them that there are lofty goals worth striving for. Read this book for ideas and ideals." Mr Urs Schoettli Consultant on Asian Affairs and former Asia Correspondent of Neue Zürcher Zeitung (Switzerland) in Beijing, Hong Kong, Delhi, and Tokyo "Siong Guan Lim has been at the helm of many organizations critical in the transformation of Singapore into an economic powerhouse, from the civil service to the Economic Development Board to GIC, the fund manager for Singapore's foreign reserves. As autobiographical as it is motivational, The Leader, the Teacher, and You is a must-read for executives, public servants, and students of East Asian development. Yet the wisdom of its general insights, as well as the humility with which they are delivered, will be an inspiration for any reader." Dr Toni Schönenberger Chief Executive Officer, UBS Wolfsberg, and Chairman, stars Foundation Board Switzerland "The transformation of Singapore has often been credited to the leadership of its succession of Prime Ministers. However, behind them are other leaders who do the actual grunt work and make things happen. This book tells the remarkable story of one such man, Siong Guan Lim, the son of a taxi driver, starting his career as a sewerage engineer and rising to be the Head of the Civil Service, having served as Principal Private Secretary to the Prime Minister, as well as Permanent Secretary for the Defence, Education, and Finance Ministries along the way. And today he sits as Group President of one of the largest global sovereign wealth funds. There are fascinating insights into the way he led innovative changes in the

government departments he served. After three decades, there are countless nuggets of wisdom here for us to learn from. There are many things that I admire about Siong Guan – his appetite for learning, courage to accept new appointments, his ability to lead wholesale management changes, and so on. But most of all I admire his humility, his empathy, and his ability to encourage and inspire others to do the best they can. Reading his story made me wish I had worked for such a leader and mentor.” Dato Dr Kim Tan Chairman, SpringHill Management Ltd. UK “Siong Guan Lim was Head of the well-known Singapore Civil Service. His book is full of aphorisms that are aimed primarily at the empowerment of people in a large complex organization and the role of an enlightened leadership. He ends the book with a quote from Laozi – ‘As for the best leaders, people do not notice their existence.’ The entire civil service of Singapore could do very well for themselves, but more importantly for Singaporeans, by taking a refresher course through reading this book. Civil servants today must take the risks of constructive change. The lessons of the book could prevent the stasis that dominant ruling parties undergo as witnessed with the KMT in Taiwan and the LDP in Japan.” Dr Tommy Tan Chief Executive Officer, TC Capital Singapore “One learns how to do something, but one can also do in order to learn. This is a book by a dedicated Singapore civil servant who did both by following able leaders who were also great teachers. Drawing lessons from a lifetime's work, he offers advice to all those who wish to succeed in serving their society with integrity.” Professor Wang Gungwu Chairman of the East Asian Institute and University Professor, National University of Singapore Singapore “This book was written by

my good friend Siong Guan Lim based on his observations and experience in his public career since 1969. It reflects his lifestyle, wisdom, life, and beliefs. With keen insight, he describes the behaviour of human groups, for example, by using the image of GESE in a thoughtful and persuasive way. While each society may need a slightly different type of leader, there are some basic requirements that make a superior leader. Some leaders, while they are leading their people, are brilliant and exemplary with a clear vision for the future. But once they leave, the group may face an abrupt slowdown or even chaos. Siong Guan clearly states that such leaders are not the best ones. Not leading from the front, nor from the side, nor from behind, but ‘from within’ is what makes the best leader, he writes. There is so much truth in his statement that the leader must seek to be like the teacher, where the true measure of success is how well the student can surpass the teacher. Siong Guan and I are involved in sharing ideas on lessons for leaders of the future generation. I find his thoughts and contributions to be highly original and instructive.” Mr Hiroshi Watanabe Chief Executive Officer/ Executive Managing Director Japan Bank for International Co-operation Japan “Siong Guan Lim has written an outstanding book, and he has done this because he is an outstanding man. Lim has been on the frontlines of Singapore's rapid development over the past forty years providing vital leadership in defence, education, finance, the Prime Minister's Office, and as Head of the Civil Service. He captures the leadership lessons from his mentors – some of the founding fathers of Singapore – and the leadership lessons born of direct experience building a world-class public service. Few practitioners in

the art of leadership and governance have had the experience that Lim has had, and few would be able to reflect on that experience and generate such an amazing guidebook for anyone serious about leadership and change. If you want to raise your institution, your government, or your nation to the next level of performance, then this book is for you." Mr Dean Williams Lecturer in Public Policy, Center for Public Leadership Harvard Kennedy School of Government USA "The dearth in courageous moral leadership in our world today has left many political and economic institutions weakened and compromised. In this book, Siong Guan offers us tried and tested truths on leadership that he personally embodied throughout his time with the Singaporean Government Civil Service, Economic Development Board, and GIC. We have much to learn from him!" Tan Sri Dr Francis Yeoh Managing Director YTL Group of Companies Malaysia "An invaluable guide to the heart, soul, and guts of leadership from that rarest of breeds: a true Servant Leader who, in the words of Singapore's Prime Minister, 'established an unbroken record of understanding Singapore's challenges and developing a vision of how the Public Service should respond to these challenges' over an outstanding, 44-year career directly managing key areas of our nation's tumultuous and miraculous transformation. Having worked under his teacher-leader mentorship, I can testify to both the personal genuineness and organizational effectiveness of Mr Lim's remarkable mastery of that most difficult of management arenas: leading excellence, innovation, and change from the front as a boss, from the side as a comrade, from behind as a mentor, and finally from within as a lasting source of inspiration." Mr

Yeoh Lam Keong Social commentator and former GIC Chief Economist Singapore "Although The Leader, the Teacher & You relates Lim's 37 years as a civil servant in Singapore, the lessons apply universally to all sorts of readers. Hong Kong readers, including businessmen, should find useful lesson in this book." Sunday Morning Post, Hong Kong

The Cambridge Handbook of Personality Psychology - Philip J. Corr
2020-09-03

Research on personality psychology is making important contributions to psychological science and applied psychology. This second edition of The Cambridge Handbook of Personality Psychology offers a one-stop resource for scientific personality psychology. It summarizes cutting-edge personality research in all its forms, including genetics, psychometrics, social-cognitive psychology, and real-world expressions, with informative and lively chapters that also highlight some areas of controversy. The team of renowned international authors, led by two esteemed editors, ensures a wide range of theoretical perspectives. Each research area is discussed in terms of scientific foundations, main theories and findings, and future directions for research. The handbook also features advances in technology, such as molecular genetics and functional neuroimaging, as well as contemporary statistical approaches. An invaluable aid to understanding the central role played by personality in psychology, it will appeal to students, researchers, and practitioners in psychology, behavioral neuroscience, and the social sciences.

How I Became a Quant - Richard R. Lindsey 2011-01-11

Praise for How I Became a Quant "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, How I

Became a Quant details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected

paths they have followed from the halls of academia to the front lines of an investment revolution.

Enterprising Ideas: - World Intellectual Property Organization 2021-04-29

This publication introduces startups to IP. Through step-by-step guidance, useful case studies and simple checklists, it illustrates how small *Guide to the Investment Regimes of the APEC Member Economies* - 2007

The Indigo Book - Christopher Jon Sprigman 2017-07-11

Realising REDD+ - Arild Angelsen 2009-01-01

REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to

previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

Childhood Acute Lymphoblastic

Leukemia - Ajay Vora 2017-04-21

This book provides a comprehensive and up-to-date review of all aspects of childhood Acute Lymphoblastic Leukemia, from basic biology to supportive care. It offers new insights into the genetic predisposition to the condition and discusses how response to early therapy and its basic biology are utilized to develop new prognostic stratification systems and target therapy. Readers will learn about current treatment and outcomes, such as immunotherapy and targeted therapy approaches. Supportive care and management of the condition in resource poor countries are also discussed in detail. This is an indispensable guide for research and laboratory scientists, pediatric hematologists as well as specialist nurses involved in the care of childhood leukemia.

Data Bases and Data Base Systems Related to NASA's Aerospace Program - 1983

Sociology in Today's World - Brian Furze 2014

Sociology in Today's World explores why sociology is important and relevant to everyday life. It teaches students how to think sociologically,

not just what to think, and shows how sociology can help us make sense of our lives. It comprehensively covers key aspects and current issues in Australian and New Zealand society, whilst emphasising the importance of diversity and a global perspective.

Permissions, A Survival Guide - Susan M. Bielstein 2010-06-15

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white-hot horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unspools the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of "takes" that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does "fair use" really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who

has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, Permissions, A Survival Guide is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

Hindsight, Insight, Foresight: Thinking About Security in the Indo-Pacific - Alexander L. Vuving
2020-09-30

Hindsight, Insight, Foresight is a tour d'horizon of security issues in the Indo-Pacific. Written by 20 current and former members of the faculty at the Daniel K. Inouye Asia-Pacific Center for Security Studies, its 21 chapters provide hindsight, insight, and foresight on numerous aspects of security in the region. This book will help readers to understand the big picture, grasp the changing faces, and comprehend the local dynamics of regional security.

State of Food and Agriculture - Food and Agriculture Organization
2017-01-12

Unless action is taken now to make agriculture more sustainable, productive and resilient, climate change impacts will seriously compromise food production in countries and regions that are already highly food-insecure. The Paris Agreement, adopted in December 2015, represents a new beginning in the global effort to stabilize the climate before it is too late. It recognizes the importance of food security in the international response to climate change, as reflected by many countries prominent focus on the agriculture sector in their planned contributions to adaptation and mitigation. To help

put those plans into action, this report identifies strategies, financing opportunities, and data and information needs. It also describes transformative policies and institutions that can overcome barriers to implementation. The State of Food and Agriculture is produced annually. Each edition contains an overview of the current global agricultural situation, as well as more in-depth coverage of a topical theme."

Fostering Integrity in Research - National Academies of Sciences, Engineering, and Medicine 2018-01-13
The integrity of knowledge that emerges from research is based on individual and collective adherence to core values of objectivity, honesty, openness, fairness, accountability, and stewardship. Integrity in science means that the organizations in which research is conducted encourage those involved to exemplify these values in every step of the research process. Understanding the dynamics that support "or distort" practices that uphold the integrity of research by all participants ensures that the research enterprise advances knowledge. The 1992 report Responsible Science: Ensuring the Integrity of the Research Process evaluated issues related to scientific responsibility and the conduct of research. It provided a valuable service in describing and analyzing a very complicated set of issues, and has served as a crucial basis for thinking about research integrity for more than two decades. However, as experience has accumulated with various forms of research misconduct, detrimental research practices, and other forms of misconduct, as subsequent empirical research has revealed more about the nature of scientific misconduct, and because technological

and social changes have altered the environment in which science is conducted, it is clear that the framework established more than two decades ago needs to be updated. Responsible Science served as a valuable benchmark to set the context for this most recent analysis and to help guide the committee's thought process. Fostering Integrity in Research identifies best practices in research and recommends practical options for discouraging and addressing research misconduct and detrimental research practices. Fire, Smoke, and Haze - S. Tahir Qadri 2001
This publication, a joint effort of ADB and the Association of Southeast Asian Nations (ASEAN), brings together the current knowledge about land and forest fires, examines their causes and impacts with particular reference to Southeast Asia, and suggests what could happen in the future.

Technology and Innovation Support Centers (TISCs) - Enhancing innovation through knowledge and expertise - World Intellectual Property Organization 2011
Technology and Innovation Support Centers (TISCs) are designed to provide innovators in developing countries with access to locally based, high quality technology information services and other related services.

Doing Global Science - InterAcademy Partnership 2016-03-01

An essential introduction to the responsible conduct of science in today's interconnected world This concise introductory guide explains the values that should inform the responsible conduct of scientific research in today's global setting. Featuring accessible discussions and ample real-world scenarios, *Doing Global Science* covers proper conduct, fraud and bias, the researcher's responsibilities to society, communication with the public, and much more. The book places special emphasis on the international and highly networked environment in which modern research is done, presenting science as an enterprise that is being transformed by globalization, interdisciplinary research projects, team science, and information technologies. Accessibly written by an InterAcademy Partnership committee comprised of leading scientists from around the world, *Doing Global Science* is required reading for students, practitioners, and anyone concerned about the responsible conduct of science today. Provides practical guidance and instructions for doing scientific research in today's global setting Covers everything from responsible conduct to communication with the public Features numerous real-world scenarios drawn from an array of disciplines and national contexts Focuses on issues commonly encountered in international collaborations Written by a panel of leading experts from around the world An essential guide for practicing scientists and anyone concerned about fostering research integrity Cotton Production - Khawar Jabran 2019-08-05
Provides a comprehensive overview of the role of cotton in the economy and cotton production around the world This book offers a complete look at the world's largest fiber crop:

cotton. It examines its effect on the global economy—its uses and products, harvesting and processing, as well as the major challenges and their solutions, recent trends, and modern technologies involved in worldwide production of cotton. Cotton Production presents recent developments achieved by major cotton producing regions around the world, including China, India, USA, Pakistan, Turkey and Europe, South America, Central Asia, and Australia. In addition to origin and history, it discusses the recent advances in management practices, as well as the agronomic challenges and the solutions in the major cotton producing areas of the world. Keeping a focus on global context, the book provides sufficient details regarding the management of cotton crops. These details are not limited to the choice of cultivar, soil management, fertilizer and water management, pest control, cotton harvesting, and processing. The first book to cover all aspects of cotton production in a global context Details the role of cotton in the economy, the uses and products of cotton, and its harvesting and processing Discusses the current state of cotton management practices and issues within and around the world's cotton producing areas Provides insight into the ways to improve cotton productivity in order to keep pace with the growing needs of an increasing population Cotton Production is an essential book for students taking courses in agronomy and cropping systems as well as a reference for agricultural advisors, extension specialists, and professionals throughout the industry.

Moving Freight with Better Trucks - Organisation for Economic Co-operation and Development 2011-05-18
The purpose of this report is to

identify potential improvements in terms of more effective safety and environmental regulation for trucks, backed by better systems of enforcement, and to identify opportunities for greater efficiency and higher productivity. The report is based on a review of literature, consultation among stakeholders, and research and analysis from working group members. It also presents the results of a comprehensive benchmarking study of 39 truck configurations in operation around the world – from typical workhorse vehicles to very high capacity vehicles – and assesses their performance in terms of dynamic stability, productivity and impact on the infrastructure.

Proceedings of the International Conference on Big Data, IoT, and Machine Learning - Mohammad Shamsul Arefin 2021-12-03

This book gathers a collection of high-quality peer-reviewed research papers presented at the International Conference on Big Data, IoT and Machine Learning (BIM 2021), held in Cox's Bazar, Bangladesh, during 23–25 September 2021. The book covers research papers in the field of big data, IoT and machine learning. The book will be helpful for active researchers and practitioners in the field.

Complex, Intelligent and Software Intensive Systems - Leonard Barolli 2021-06-29

This book includes the proceedings of the 15th International Conference on Complex, Intelligent, and Software Intensive Systems, which took place in Asan, Korea, on July 1–3, 2021. Software intensive systems are systems, which heavily interact with other systems, sensors, actuators, devices, and other software systems

and users. More and more domains are involved with software intensive systems, e.g., automotive, telecommunication systems, embedded systems in general, industrial automation systems, and business applications. Moreover, the outcome of web services delivers a new platform for enabling software intensive systems. Complex systems research is focused on the overall understanding of systems rather than its components. Complex systems are very much characterized by the changing environments in which they act by their multiple internal and external interactions. They evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents, which is each time more characterized by the use of ontologies and their logical foundations build a fruitful impulse

for both software intensive systems and complex systems. Recent research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is very important factor for the future development and innovation of software intensive and complex systems. The aim of the book is to deliver a platform of scientific interaction between the three interwoven challenging areas of research and development of future ICT-enabled applications: Software intensive systems, complex systems, and intelligent systems.

Mapping research and innovation in the Republic of Rwanda - Lemarchand, Guillermo A. 2015-10-05
