Arthur Miller for the Twenty-First Century - Stephen Marino 2020-02-27

Arthur Miller for the Twenty-First Century: Contemporary Views of His Writings and Ideas brings together both established Miller experts and emerging commentators to investigate the sources of his ongoing resonance with audiences and his place in world theatre. The collection begins by exploring Miller in the context of 20th-century American drama. Chapters discuss Miller and Eugene O'Neill, Tennessee Williams, Edward Albee, David Mamet, and Sam Shepard, as well as thematic relationships between Miller's ideas and the explosion of significant women and African American dramatists since the 1970s. Other essays focus more directly on interpretations of Miller's individual works, not only plays but also essays and fiction, including a discussion of *Death of a Salesman* in China. The volume concludes by considering Miller and current cultural issues: his work for human rights, his depiction of American ideals of masculinity, and his anticipation of contemporary posthumanism.

English After RP - Geoff Lindsey 2019-02-26

This book concisely describes ways in which today's standard British English speech differs from the upper-class accent of the last century, Received Pronunciation, which many now find old-fashioned or even comic. In doing so it provides a much-needed update to the existing RP-based descriptions by which the sound system of British English is still known to many around the world. The book opens with an account of the rise and fall of RP, before turning to a systematic analysis of the phonetic developments between RP and contemporary Standard Southern British (SSB) in vowels, consonants, stress, connected speech and intonation. Topics covered include the anti-clockwise vowel shift, the use of glottal stops, 'intrusive r', vocal fry and Uptalk. It concludes with a Mini Dictionary of well over 100 words illustrating the changes described throughout the book, and provides a chart of updated IPA vowel symbols. This book is an essential resource for anyone interested in British pronunciation and sound change, including academics in phonetics, phonology, applied linguistics and English language; trainers of English teachers; English teachers themselves; teachers of voice and accent coaches; and students in those areas.

Climate Resilient Urban Areas - Rutger de Graaf-van Dinther 2020-12-17

This book describes the urgent challenge faced by cities worldwide to become resilient to climate change impacts. This challenge goes further than the ability to resist the impacts of extreme weather conditions. Coping with climate impacts and the ability to recover from them are equally important, as well as the capacity to adapt to the effects of climate change and the ability to transform the entire urban system. The book explores how the resilience journey for coastal cities in particular encompasses using scientific knowledge but also the knowledge of citizens and practitioners. Measures and strategies on different scales are needed, from national scale all the way down to neighbourhood, street level and building level. Representing the holistic nature of climate resilience, this collection contains unique insights from leading scientists and practitioners in areas of expertise such as engineering, social sciences and urban design. It will be a valuable resource for scholars, students, practitioners and policy makers interested in the development of resilient and sustainable urban environments.

Rebel Without A Clause - Sue Butler 2020-09-29

The English language is changing constantly. We invent new words and phrases, we mash up idioms, we mispronounce, misuse, misappropriate. Sue Butler has heard it all and is ready to defend and disagree with common usage. Veering from tolerance to outrage, she examines how the word sheila took a nose-dive after World War II, considers whether we should hunker or bunker down, and bemoans the emptiness of rhetoric. She shouts 'down with closure' as it leaps from the psychoanalyst's couch, explains why we've lost the plot on deceptively, untangles the manuka honey stoush, fathoms why the treatment of famous is infamous, and ponders whether you would, could or should ... Rebel without a Clause is a fascinatingly idiosyncratic romp through the world of words by lexicographer and former Macquarie Dictionary Editor, Sue Butler.

Picking Up: On the Streets and Behind the Trucks with the Sanitation Workers of New York City - Robin Nagle 2013-03-19

America's largest city generates garbage in torrents—11,000 tons from households

each day on average. But New Yorkers don't give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City's Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department's mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn't quite enough—so she joined the force herself. Driving the hulking trucks, she obtained an insider's perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City's four-hundred-year struggle with trash, and traces the city's waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as it's ever been. Throughout, Nagle reveals the many unexpected ways in which sanitation workers stand between our seemingly well-ordered lives and the sea of refuse that would otherwise overwhelm us. In the process, she changes the way we understand cities—and ourselves within them.

Revolution - Peter Ackroyd 2016-09-22

Revolution, the fourth volume of Peter Ackroyd's enthralling *History of England* begins in 1688 with a revolution and ends in 1815 with a famous victory. In it, Ackroyd takes readers from William of Orange's accession following the Glorious Revolution to the Regency, when the flamboyant Prince of Wales ruled in the stead of his mad father, George III, and England was – again – at war with France, a war that would end with the defeat of Napoleon at Waterloo. Late Stuart and Georgian England marked the creation of the great pillars of the English state. The Bank of England was founded, as was the stock exchange, the Church of England was fully established as the guardian of the spiritual life of the nation and parliament became the sovereign body of the nation with responsibilities and duties far beyond those of the monarch. It was a revolutionary era in English letters, too, a time in which newspapers first flourished and the English novel was born. It was an era in which coffee houses and playhouses boomed, gin flowed freely and in which shops, as we know them today, began to proliferate in our towns and villages. But it was also a time of extraordinary and unprecedented technological innovation, which saw England utterly and irrevocably transformed from a country of blue skies and farmland to one of soot and steel and coal.

The Free World - Louis Menand 2021-04-20

"An engrossing and impossibly wide-ranging project . . . In *The Free World*, every seat is a good one." –Carlos Lozada, *The Washington Post* "The *Free World* sparkles. Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The bar is set very high." –David Oshinsky, *The New York Times Book Review* | Editors' Choice One of *The New York Times*'s 100 best books of 2021 | One of *The Washington Post*'s 50 best nonfiction books of 2021 | A *Mother Jones* best book of 2021 In his follow-up to the Pulitzer Prize-winning *The Metaphysical Club*, Louis Menand offers a new intellectual and cultural history of the postwar years. The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the

acclaimed Pulitzer Prize-winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of "freedom" applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt's Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage's residencies at North Carolina's Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg's friendship with Lionel Trilling, James Baldwin's transformation into a Civil Right spokesman, Susan Sontag's challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America's once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

Higher Education in the Era of the Fourth Industrial Revolution - Nancy W. Gleason 2018-06-21

This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.
