Study on Medical Tourism Sector of India, Cardiac Incidence, Digital Marketing Tools - Ribhu Vashishtha 2019-02-04

The Summer Training Project Report "Designing a digital marketing campaign for the marketing of cardiac procedures in the international market for Fortis Escorts Heart Institute" is prepared as a result of 8 weeks' training at the company's corporate office. After reading many peer reviewed articles, research has been done on the boom of medical tourism sector in India, rise of cardiovascular diseases in the world and the relevance of digital marketing and social media in particular has been detected. Therefore, all this research work executed through primary research (interviews of people at Fortis Healthcare Ltd.) and secondary research (research and analysis work done on the internet) has been taken into account while devising the strategy for the digital campaign. This report outlines all this research and analysis work conducted during the internship, the strategy formulated for the campaign and finally the tasks performed and learnings obtained during the course of the internship. About the Campaign Objective: To design a digital marketing campaign for the marketing of cardiac procedures in the international market for Fortis Escorts Heart Institute. Strategy: The following media have been proposed for marketing of cardiac procedures through the digital campaign in the international market: 1. Blogs 2. Search Engine Optimization (SEO) 3. YouTube 4. Twitter 5. Facebook page 6. Facebook application 7. Facebook ads 8. Microsite 9. Dedicated Chat Service 10. Google AdWords 11. Google AdSense 12. Banner ads 13. Pinterest 14. Smartphone application 15. Video Testimonials (iii) Measure of effectiveness: Various methods have been proposed in the study to measure the success of the campaign, like Google Analytics, Adobe Digital Marketing Suite, Google Mobile App Analytics, etc. for measuring the traffic on website, microsite, blogs and mobile applications. Another measure is the calculation of the number of leads generated by the campaign. Timeline: The proposed duration for running this campaign is minimum 6 months and if the campaign proves to be successful, it can be continued for an indefinite period of time. Basically, it can be kept running till the time it remains effective, i.e. till the time it is successful in generating leads and improving the brand image of the organization.

The Future of Events & Festivals - Ian Yeoman 2014-08-13

The growth of events and festivals has been significant over the last decade and a wide range of skills are essential to ensure those events are successful. This requirement has been instrumental in stimulating the creation of more tertiary education opportunities to develop events management knowledge. As the discipline develops, knowledge requires direction in order to understand the changing advances in society. This is the first book to take a futures approach to understanding event management. A systematic and pattern-based understanding is used to determine the likelihood of future events and trends. Using blue skies scenarios to provide a vision of the future of events, not only capturing how the events industry is changing but also important issues that will affect events now as well as the future. Chapters include analysis of sustainability, security, impacts of social media, design at both mega event and community level and review a good range of different types of events from varying geographical regions. A final section captures the contributions of each chapter through the formation of a conceptual map for a future research agenda. Written by leading academics in the field, this ground breaking book will be a valuable reference point for educators, researchers and industry professionals.

Anti-Americanisms in World Politics - Peter J. Katzenstein 2011-06-15

Anti-Americanism has been the subject of much commentary but little serious research. In response, Peter J. Katzenstein and Robert O. Keohane have assembled a distinguished group of experts, including historians, polling-data analysts, political scientists, anthropologists, and sociologists, to explore anti-Americanism in depth, using both qualitative and quantitative methods. The result is a book that probes deeply a central aspect of world politics that is frequently noted yet rarely understood. Katzenstein and Keohane identify several quite different anti-Americanisms—liberal, social, sovereign-nationalist, and radical. Some forms of anti-Americanism respond merely to what the United States does, and could change when U.S. policies change. Other forms are reactions to what the United States is, and involve greater bias and distrust. The complexity of anti-Americanism, they argue, reflects the cultural and political complexities of American society. The analysis in this book leads to a surprising discovery: there are as many ways to be anti-American as there are ways to be American.

Managing Events - Liz Quick 2020-08-17

Combining the practical and academic aspects of event management this text presents an industry perspective, with real-life event examples and contemporary and relevant case studies. It provides lecturers with a useful platform to integrate key event topics into the learning environment. The book discusses the management process throughout the 'event cycle', from the pre-event planning stage; on-site delivery to the post event stage. The book is divided into 4 distinct phases, which are: The Event cycle; Before the event; Throughout the event and Beyond the event. Within each of these 4 sections, there are 2 or 3 separate chapters, each with their own objectives. The book discusses practical and operational elements, such as project management, marketing, sponsorship deals and risk assessment, that need to be put in place both before and during the event. The final section: Beyond the event, examines current and future event trends and issues, and discusses the various career paths that exist and the skills and qualifications required to gain employment and start a successful career in events. Each chapter profiles someone currently working within the events industry, and presents a scenario of a real event challenge they have faced in their work role, relevant to the chapter. Further viewpoints from a second event practitioner and academic are included, before the final outcome is presented, showing us in each case, how real life situations develop and are resolved in practice within the events industry. The feature Event Ethics explores a topical issue that should encourage lively discussion and the Did you know? section reveals an interesting and chapter-specific event fact. At the end of every chapter students can revise and extend their event knowledge with the list of Chapter Summary Questions, which help consolidate the learning outcomes. Additionally the Key Terms section explains any terminology used within the chapter. Each chapter concludes with a section called For the Classroom, featuring discussion points and activities based around the chapter content, as well as reference sources and suggested reading. Some of the forms and inserts used to contextualise the learning, will appear as weblinks for the students to download and use throughout.

Black Popular Music in Britain Since 1945 - Jon Stratton 2016-04-15

Black Popular Music in Britain Since 1945 provides the first broad scholarly discussion of this music since 1990. The book critically examines key moments in the history of black British popular music from 1940s jazz to 1970s soul and reggae, 1990s Jungle and the sounds of Dubstep and Grime that have echoed through the 2000s. While the book offers a history it also discusses the ways black musics in Britain have intersected with the politics of race and class, multiculturalism, gender and sexuality, and debates about media and technology. Contributors examine the impact of the local, the ways that black music in Birmingham, Bristol, Liverpool, Manchester and London evolved differently and how black popular music in Britain has always developed in complex interaction with the dominant British popular music tradition. This tradition has its own histories located in folk music, music hall and a constant engagement, since the nineteenth century, with American popular music, itself a dynamic mixing of African-American, Latin American and other musics. The ideas that run through various chapters form connecting narratives that challenge dominant understandings of black popular music in Britain and will be essential reading for those interested in Popular Music Studies, Black British Studies and Cultural Studies.

Douyin, TikTok, and China's Online Screen Industry - Chunmeizi Su 2023-09-22

TikTok has drawn attention from all over the world. Even if you have never used it before, you would still be familiar with its name. Many people have assumed that it is a US-generated platform, and normally awed at its real origin – a Chinese born and operated platform, a sister or parallel platform of Douyin. Because of the short-video platform-TikTok, and also its dispute with the US government, people have started to paying attention to what is really happening and changing in China. Two questions that hang over everyone's mind seem to be: why China? And why TikTok? This book attempted to answer the question of why short-video platforms such as TikTok—the most popular 'made in China' product of all the Chinese digital platforms—became a significant competitor on the global stage. This book explores the reasons behind the rise of short video platforms in China, with a focus on the sudden and unexpected success of TikTok and its parallel platform Douyin. Beginning with the historical development of China's online screen industry, the book goes on to investigate the ICT industry, its business models and impact on the screen industry, to unfold the reasons behind the domestic popularity of Douyin. It draws on a spectrum of sources including policy documents, industry reports and expert analysis, which is supplemented by interviews with key people in the field. It traces the changing dynamics of the Chinese online screen ecology, and shows how a mixture of technological, industrial and cultural factors contributed to the proliferation of short-video platforms in China. This engaging and topical book will be ideal reading for students and scholars of media and communication studies, platform studies, and political economy studies.

Approaches to Videogame Discourse - Astrid Ensslin 2019-05-02

The first significant collection of research in videogame linguistics, Approaches to Videogame Discourse features an international array of scholars in linguistics and communication studies exploring lexis, interaction and textuality in digital games. In the first section, "Lexicology, Localisation and Variation," chapters cover productive processes surrounding gamer slang (ludolects), creativity and borrowing across languages, as well as industry-, genre-, game- and player-specific issues relating to localization, legal jargon and slang. "Player Interactions" moves on to examine communicative patterns between videogame players, focusing in particular on (un)collaborative language, functions and negotiations of impoliteness and issues of power in player discourse. In the final section, "Beyond the 'Text'," scholars grapple with issues of multimodality, paratextuality and transmediality in videogames in order to develop and enrich multimodal

theory, drawing on key concepts from ludonarratology, language ideology, immersion and transmedia studies. With implications for meaningful game design and communication theory, *Approaches to Videogame Discourse* examines in detail how video games function as means and objects of communication; how they give rise to new vocabularies, textual genres and discourse practices; and how they serve as rich vehicles of ideological signification and social engagement.

The House of Silk - Anthony Horowitz 2011-11-01

For the first time in its one-hundred-and-twenty-five-year history, the Arthur Conan Doyle Estate has authorized a new Sherlock Holmes novel. Once again, *The Game's Afoot...* London, 1890. 221B Baker St. A fine art dealer named Edmund Carstairs visits Sherlock Holmes and Dr John Watson to beg for their help. He is being menaced by a strange man in a flat cap - a wanted criminal who seems to have followed him all the way from America. In the days that follow, his home is robbed, his family is threatened. And then the first murder takes place. Almost unwillingly, Holmes and Watson find themselves being drawn ever deeper into an international conspiracy connected to the teeming criminal underworld of Boston, the gaslit streets of London, opium dens and much, much more. And as they dig, they begin to hear the whispered phrase-the House of Silk-a mysterious entity that connects the highest levels of government to the deepest depths of criminality. Holmes begins to fear that he has uncovered a conspiracy that threatens to tear apart the very fabric of society. The Arthur Conan Doyle Estate chose the celebrated, #1 New York Times bestselling author Anthony Horowitz to write *The House of Silk* because of his proven ability to tell a transfixing story and for his passion for all things Holmes. Destined to become an instant classic, *The House of Silk* brings Sherlock Holmes back with all the nuance, pacing, and almost superhuman powers of analysis and deduction that made him the world's greatest detective, in a case depicting events too shocking, too monstrous to ever appear in print...until now.

Culturally Sustainable Social Robotics - M. Nørskov 2021-01-04

The subject of social robotics has enormous projected economic significance. However, social robots not only present us with novel opportunities but also with novel risks that go far beyond safety issues. It is a potentially highly disruptive technology which could negatively affect the most valuable parts of the fabric of human social interactions in irreparable ways. Since engineering educations do not yet offer the necessary competences to analyze, holistically assess, and constructively mitigate these risks, new alliances must be established between engineering and SSH disciplines, with special emphasis on the humanities (i.e. disciplines specializing in the analysis of socio-cultural interactions and human experience). The Robophilosophy Conference Series was established in 2014 with the purpose of creating a new forum and catalyzing the research discussion in this important area of applied humanities research, with focus on robophilosophy. Robophilosophy conferences have been the world's largest venues for humanities research in and on social robotics. The book at hand presents the proceedings of Robophilosophy Conference 2020: Culturally Sustainable Social Robotics, the fourth event in the international, biennial Robophilosophy Conference Series, which brought together close to 400 participants from 29 countries. The speakers of the conference, whose contributions are collected in this volume, were invited to offer concrete proposals for how the Humanities can help to shape a future where social robotics is guided by the goals of enhancing socio-cultural values rather than by utility alone. The book is divided into 3 parts; Abstracts of Plenaries, which contains 6 plenary sessions; Session Papers, with 44 papers under 8 thematic categories; and Workshops, containing 25 items on 5 selected topics. Providing concrete proposals from philosophers and other SSH researchers for new models and methods, this book will be of interest to all those involved in developing artificial 'social' agents in a culturally sustainable way that is also - a fortiori - ethically

responsible.

Small Electric Vehicles - Amelie Ewert 2021

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric vehicle (SEV) technologies, the market situation and main hindering factors for market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.

Different Histories, Shared Futures - Mobo Gao 2023-02-13

This book delves into the Australia-China relationship, which is currently at its worst since 1972, when the two countries first established a diplomatic relationship. Australia is seen by the US as its front-line ally in its fight in containing China. Derived from an international symposium organized by the editorial team and held in Adelaide, South Australia in September 2021, these essays are an attempt to offer some understanding and explanations for the deterioration of Sino-Australian ties. It is also an attempt to explore the ways by which the two countries can reach some common ground for the future. Despite our very different pasts, can we seek out a shared future together, a future that avoids a war, hot or cold, between a rising power of China and the incumbent US hegemon?

Thought Economics - Vikas Shah 2021-02-04

'Stimulating, intelligent and enjoyable discussions of the most important issues of our day.' STEVEN PINKER 'From entrepreneurs to athletes, and world leaders to entertainers, this is a fascinating collection of interviews with some of the world's most influential individuals.' MARK CUBAN 'Thought Economics is a fine rebuke to the soundbite culture; these interviews are driven by real curiosity, and there is a wealth of wisdom here.' EDWARD STOURTON _____ Since 2007, entrepreneur and philanthropist Vikas Shah has been on a mission to interview the people shaping our century. Including conversations with Nobel prizewinners, business leaders, politicians, artists and Olympians, he has been in the privileged position of questioning the minds that matter on the big issues that concern us all. We often talk of war and conflict, the economy, culture, technology and revolutions as if they are something other than us. But all these things are a product of us - of our ideas, our dreams and our fears. We live in fast-moving and extraordinary times, and the changes we're experiencing now, in these first decades of the twenty-first century, feel particularly poignant as decisions are made that will inform our existence for years to come. What started out as a personal interest in the mechanisms that inform our views of the world, and a passion for understanding, has grown into a phenomenal compilation of once-in-a-lifetime conversations. In this incredible collection, Shah shares some of his most emotive and insightful interviews to date.

How China Escaped Shock Therapy - Isabella M. Weber 2021-05-27

China has become deeply integrated into the world economy. Yet, gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism. This book uncovers the fierce contest about economic reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization—but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy, or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question: China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research, including interviews with key Chinese and international participants and World Bank officials as well as insights gleaned from

unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.
