ITER: The Giant Fusion Reactor - Michel Claessens 2019-10-17

This book provides for the first time an insider's view into ITER, the biggest fusion reactor in the world, which is currently being constructed in southern France. Aimed at bringing the "energy of the stars" to earth, ITER is funded by the major economic powers (China, the EU, India, Japan, Korea, Russia and the US). Often presented as a "nuclear but green" energy source, fusion could play an important role in the future electricity supply. But as delays accumulate and budgets continue to grow, ITER is currently a star partially obscured by clouds. Will ITER save humanity by providing a clean, safe and limitless source of energy, or is it merely a political showcase of cutting-edge technology? Is ITER merely an ambitious research project and partly a PR initiative driven by some politically connected scientists? In any case, ITER has already helped spur on rival projects in the US, Canada and the UK. This book offers readers a behind-the-scenes look at this controversial project, which France snatched from Japan, and introduces them to a world of superlatives: with the largest magnets in the world, the biggest cryogenic plant and tremendous computing power, ITER is one of the most fascinating, and most international, scientific and technological endeavours of our time.

If you own a car, especially a European one, you have Bosch components and systems. Covers:-Lambda closed-loop control for passenger car diesel engines-Functional description-Triggering signals

The Porsche 911 Book - Jürgen Lewandowski 2018

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose The Mercedes-Benz 300 SL Book has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

Nanotechnology - Stefan Sepeur 2008

The chemical nanotechnology is one of the special areas of nanotechnology. By varying the composition, shape, size or character of the surface, these nanoparticles can be shaped time and again into small building blocks, resulting in unprecedented scopes for material design. At this moment in time, the developments in the field of modern nanotechnology provide amazing success stories, such as the possibility for reconstructing surface structures for industrial materials that are demonstrated to us in nature. The reader will receive an overview of

coatings systems based on the application of chemical nanotechnology. Practitioners will be given an introduction to nanostructured coatings and experts will find the account of various silanebased materials useful.

The Wheat Rusts — Breeding for Resistance - Douglas R. Knott 2012-12-06

The idea for this book was conceived by the late Dr. Irvine A. Watson of the University of Sydney, and he developed the first outline. I was then invited by Dr. Watson to share in its writing. Unfortunately, shortly there after, recurring heart problems forced him to curtail his activities and withdraw from the project. He died before the book could be completed. Dr. Watson's intention was to produce a very practical book that would provide wheat breeders with all of the information necessary to breed successfully for resistance to the three wheat rusts: leaf rust, stem rust, and yellow rust. It was intended to be very specific in describing procedures to be used and at the same time provide all of the necessary theoretical background. I hope that I have been successful in meeting these objectives. The book assumes that the reader has some knowledge of plant pathology, genetics, and plant breeding. Extensive use has been made of the literature, but it was not possible to cite all of the papers on a given topic. In making a choice, an attempt was made to choose key papers or more recent papers that provided references to the earlier literature. Acknowledgements This book was written partly at the University of Saskatchewan and partly at the University of California, Davis, while I was on a sabbatical leave.

The Big Red Squirrel and the Little Rhinoceros - Mischa Damjan 2012-10-31

'A forgotten treasure!' - The Bookseller highlights A retro book with a real sixties feel, fondly remembered by many of today's parents. Beautifully illustrated by the great Ralph Steadman. An important message about being yourself, magically told. A beautifully imaginative gem from the 60's, brought bang up-to-date while maintaining a wonderful retro feel. Life in the forest is difficult for the small animals. The Squirrel, Mouse and Frog always have to be on the look-out for the big creatures, such as the Lion, Rhinoceros and Crocodile. But one day things magically change... the little

animals grow bigger and the large animals shrink. But is live really any easier for the Squirrel now that he is King of the forest? THE ILLUSTRATOR Ralph Steadman is a cartoonist and caricaturist famous for his illustrations for Punch, Private Eye, the Daily Telegraph, the New York Times and Rolling Stone and for his work with gonzo writer Hunter S Thompson. Titles include: Fear and Loathing in Las Vegas, The Joke's Over and editions of the classics Animal Farm and Alice in Wonderland.

Maserati At Heart - Ermanno Cozza 2018-10-02

In this book of over 500 pages Ermanno Cozza, the true historic memory of Maserati, passionately tells a story packed with behind the scenes truths - right up to today - that have never before been published. He covers half a century of the company's life, which he lived in close contact with the great motor racing champions, ingenious technicians, designers and, naturally, company life as well, of course, as the unforgettable cars. A carefully chosen collection of photographs and other illustrations complete this invaluable book. "Over 66 years have passed since I walked through the gates of Officine Alfieri Maserati (the Alfieri Maserati Workshops). It was in 1951, and in all that time I can truly say that Maserati took hold of my heart. The factory, the men and the cars have indelibly marked moments in my life. Today, many people consider me to be the living memory of Maserati and, in that way, take me back to those earlier days. In this book, I have tried to convey the excitement of living the Maserati legend so that, step by step, I cover the most important moments of my long and extraordinary experience: the excitement of participation, the joy and pain, the cars and the defeats, the ambitions and the professional difficulties. While I have always enjoyed good health, over the years I have been infected with the Maserati 'virus' of which I believe I have been a carrier all this time - and it is a virus of which I never want to be cured" Ermanno Cozza
