The Magic Faraway Tree: a New Adventure - Jacqueline Wilson 2023-05-25

Discover the Magic Faraway Tree and explore the amazing lands it can lead to, in an irresistible new story by bestselling author Jacqueline Wilson, set in this much-loved world. Milo, Mia and Birdy are on a countryside holiday when they wander into an Enchanted Wood. Among the whispering leaves, there is a beautiful tree that stands high above the rest. The Magic Faraway Tree is home to many remarkable creatures including a fairy called Silky, her best friend Moonface and more. Little Birdy is only too happy to find that fairies are real. Even her older brother and sister are soon won over by the magic of the Faraway Tree and the extraordinary places they discover above it, including the Land of Unicorns. But not every land is so much fun. Danger looms in the Land of Dragons. Will Moonface's magic work in time to save the

children? The Magic Faraway Tree by Enid Blyton was Jacqueline Wilson's own favourite book as a very young child. Now Britain's favourite contemporary children's author, creator of Hetty Feather and Tracy Beaker, revisits this glorious magical world, weaving a brand-new story perfect for the next generation of young readers. Discover the magic!

International Encyclopedia of Information and Library Science - John Feather 2003-09-02
The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the

economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

Quality of Life - Robert L. Schalock 1990

The book deals with the concept of quality of life for persons with mental retardation and developmental disabilities. Part I, "Quality of Life: Personal Perspectives," contains "A Dream for Myself" (Connie Martinez); "Reflections on My Quality of Life: Then and Now" (Nancy Ward); "Quality of Life versus Quality of Life Judgments: A Parent's Perspective" (Diane Crutcher); "My Sister Angie: A Sibling's Perspective" (Jeff Jacoby); "Quality of Life and the Individual's Perspective" (Steven Taylor and Robert Bogdan); and "Thinking about and Discussing Quality of Life" (David Goode). Part II deals with service delivery issues and contains: "Home Is the Place: Quality of Life for Young Children with Developmental Disabilities" (David Coulter); "Quality of Life from Childhood to Adulthood" (Jack Stark and Tammi Goldsbury); "Persons in Transition" (Orv Karan and others); "Quality of Life: Issues in Community Integration" (Kenneth Keith); "Quality of Work Life" (William Kiernan and Kari Knutson); "Growing Old with Dignity: On Quality of Life for Older Persons with a Lifelong Disability" (Matthew Janicki); and "Quality of Life and Lifestyle Outcomes: A Challenge for Residential Programs" (G. Thomas Bellamy and others). Part III contains four papers that discuss assessment and measurement issues, including: "Attempts to Conceptualize and Measure Quality of Life" (Robert Schalock); "Quality of Life from a Longitudinal Research Perspective" (Robert Edgerton); "Methodological Issues in Measuring the Quality of Life of Individuals with Mental Retardation" (Laird Heal and Carol Sigelman); and "Quality of Life of Persons with Severe or Profound Mental Retardation." Part IV, which discusses the future of quality of life as a concept and a principle, comprises five papers, including: "Quality of Life and Public Philosophy" (H.

Turnbull III and Gary Brunk); "A Lawyer's Perspective on Quality of Life" (Ruth Luckasson); "Quality Assurance: Challenges in a Decentralized System" (Valerie Bradley); "Measuring Quality of Life: Where Have We Been, Where Are We Going?" (James Conroy and Celia Feinstein), and "Where Do We Go from Here?" (Robert Schalock). (JDD)

The Afterlives of the Terror - Ronen Steinberg 2019-09-15

The *Afterlives of the Terror* explores how those who experienced the mass violence of the French Revolution struggled to come to terms with it. Focusing on the Reign of Terror, Ronen Steinberg challenges the presumption that its aftermath was characterized by silence and enforced collective amnesia. Instead, he shows that there were painful, complex, and sometimes surprisingly honest debates about how to deal with its legacies. As *The Afterlives of the Terror* shows, revolutionary leaders, victims' families, and ordinary citizens argued about accountability, retribution, redress, and commemoration. Drawing on the concept of transitional justice and the scholarship on the major traumas of the twentieth century, Steinberg explores how the French tried, but ultimately failed, to leave this difficult past behind. He argues that it was the same democratizing, radicalizing dynamic that led to the violence of the Terror, which also gave rise to an unprecedented interrogation of how society is affected by events of enormous brutality. In this sense, the modern question of what to do with difficult pasts is one of the unanticipated consequences of the eighteenth century's age of democratic revolutions.

The Vitamin A Story - B. Koletzko 2012-09-04

This book shows how vitamin A deficiency – before the vitamin was known to scientists – affected millions of people throughout history. It is a story of sailors and soldiers, penniless mothers, orphaned infants, and young children left susceptible to blindness and fatal infections. We also glimpse the fortunate ones who, with ample vitamin A-rich food, escaped this elusive stalker. Why were people going blind and dying? To unravel this puzzle, scientists around the world competed over the course of a century. Their persistent efforts led to the identification of vitamin A and its essential role in health. As a

primary focus of today's international public health efforts, vitamin A has saved hundreds of thousands of lives. But, we discover, they could save many more were it not for obstacles erected by political and ideological zealots who lack a historical perspective of the problem. Although exhaustively researched and documented, this book is written for intellectually curious lay readers as well as for specialists. Public health professionals, nutritionists, and historians of science and medicine have much to learn from this book about the cultural and scientific origins of their disciplines. Likewise, readers interested in military and cultural history will learn about the interaction of health, society, science, and politics. The author's presentation of vitamin A deficiency is likely to become a classic case study of health disparities in the past as well as the present.

Dragons: Father & Son - Alexandre Lacroix
2018-09-20

To prove to his father that he is a real dragon, young Drake is sent to the local village to cause some mischief and start a fire. But Drake has only ever breathed fire to roast a tasty caterpillar. How will he burn down a whole house? Or a school? Or even an old wooden shack? Has Drake got what it takes to make his father proud? A funny and moving story about the bonds between fathers and children, with fantastic illustrations and a positive, peaceful message - and all the magic and mayhem you'd hope for in a tale about dragons.

This book explains how an organization can measure and manage performance with the Balanced Scorecard methodology. It provides extensive background on performance management and the Balanced Scorecard, and focuses on guiding a team through the step-by-step development and ongoing implementation of a Balanced Scorecard system. Corporations, public sector agencies, and not for profit organizations have all reaped success from the

Balanced Scorecard. This book supplies detailed implementation advice that is readily applied to any and all of these organization types. Additionally, it will benefit organizations at any stage of Balanced Scorecard development. Regardless of whether you are just contemplating a Balanced Scorecard, require assistance in linking their current Scorecard to management processes, or need a review of their past measurement efforts, Balanced Scorecard Step by Step provides detailed advice and proven solutions.

The Prime of Miss Jean Brodie - Muriel Spark
2015-08-06

'Muriel Spark's most celebrated novel . . . This ruthlessly and destructively romantic school ma'am is one of the giants of post-war fiction' Independent 'A brilliantly psychological fugue' Observer The Prime of Miss Jean Brodie is Muriel Spark's most significant and celebrated novel, and remains as dazzling as when it was first published in 1961. Miss Jean Brodie is a teacher unlike any other, proud and cultured, enigmatic and freethinking; a romantic, with progressive, sometimes shocking ideas and aspirations for the girls in her charge. At the Marcia Blaine Academy she takes a select group of girls under her wing. Spellbound by Miss Brodie's unconventional teaching, these devoted pupils form the Brodie set. But as the girls enter their teenage years and they become increasingly drawn in by Miss Brodie's personal life, her ambitions for them take a startling and dark turn with devastating consequences.

Evolutionary Finance - B. Dowling 2005-08-10

The purpose of this book is to introduce the field of bioinformatics to financial modelling. It focuses on the way information informs price, and constructs a framework to explain information generation and the agglomeration process, enabling the reader to make more effective financial decisions. Based on all aspects of applied finance, this book uses informational analysis to help the reader understand the similarities between biomathematics and financial mathematics.

Essays of Schopenhauer - Arthur Schopenhauer 2015-11-20

When Schopenhauer was asked where he wished to be buried, he answered, "Anywhere; they will find me;" and the stone that marks his grave at

Frankfort bears merely the inscription "Arthur Schopenhauer," without even the date of his birth or death. Schopenhauer, the pessimist, had a sufficiently optimistic conviction that his message to the world would ultimately be listened to—a conviction that never failed him during a lifetime of disappointments, of neglect in quarters where perhaps he would have most cherished appreciation; a conviction that only showed some signs of being justified a few years before his death. Schopenhauer was no opportunist; he was not even conciliatory; he never hesitated to declare his own faith in himself, in his principles, in his philosophy; he did not ask to be listened to as a matter of courtesy but as a right—a right for which he would struggle, for which he fought, and which has in the course of time, it may be admitted, been conceded to him. Although everything that Schopenhauer wrote was written more or less as evidence to support his main philosophical thesis, his unifying philosophical principle, the essays in this volume have an interest, if not altogether apart, at least of a sufficiently independent interest to enable them to be considered on their own merits, without relation to his main idea. And in dissociating them, if one may do so for a moment (their author would have scarcely permitted it!), one feels that one enters a field of criticism in which opinions can scarcely vary. So far as his philosophy is concerned, this unanimity does not exist; he is one of the best abused amongst philosophers; he has many times been explained and condemned exhaustively, and no doubt this will be as many times repeated. What the trend of his underlying philosophical principal was, his metaphysical explanation of the world, is indicated in almost all the following essays, but chiefly in the "Metaphysics of Love," to which the reader may be referred. These essays are a valuable criticism of life by a man who had a wide experience of life, a man of the world, who possessed an almost inspired faculty of observation. Schopenhauer, of all men, unmistakably observed life at first hand. There is no academic echo in his utterances; he is not one of a school; his voice has no formal intonation; it is deep, full-chested, and rings out its words with all the poignancy of individual emphasis, without bluster, but with unfailing conviction. He was for his time, and for his country, an adept at literary

form; but he used it only as a means.

Syndromes of Corruption - Michael Johnston
2005-12-01

Corruption is a threat to democracy and economic development in many societies. It arises in the ways people pursue, use and exchange wealth and power, and in the strength or weakness of the state, political and social institutions that sustain and restrain those processes. Differences in these factors, Michael Johnston argues, give rise to four major syndromes of corruption: Influence Markets, Elite Cartels, Oligarchs and Clans, and Official Moguls. In this 2005 book, Johnston uses statistical measures to identify societies in each group, and case studies to show that the expected syndromes do arise. Countries studied include the United States, Japan and Germany (Influence Markets); Italy, Korea and Botswana (Elite Cartels); Russia, the Philippines and Mexico (Oligarchs and Clans); and China, Kenya, and Indonesia (Official Moguls). A concluding chapter explores reform, emphasising the ways familiar measures should be applied - or withheld, lest they do harm - with an emphasis upon the value of 'deep democratisation'.

Self-Reference - S.J. Bartlett 2012-12-06

Self-reference, although a topic studied by some philosophers and known to a number of other disciplines, has received comparatively little explicit attention. For the most part the focus of studies of self-reference has been on its logical and linguistic aspects, with perhaps disproportionate emphasis placed on the reflexive paradoxes. The eight-volume Macmillan Encyclopedia of Philosophy, for example, does not contain a single entry in its index under "self-reference", and in connection with "reflexivity" mentions only "relations", "classes", and "sets". Yet, in this volume, the introductory essay identifies some 75 varieties and occurrences of self-reference in a wide range of disciplines, and the bibliography contains more than 1,200 citations to English language works about reflexivity. The contributed papers investigate a number of forms and applications of self-reference, and examine some of the challenges posed by its difficult temperament. The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of

reflexivity, and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy, logic, language, and into the freedom, personality and intelligence of persons.

The Byzantine Background to the Italian Renaissance - Kenneth Meyer Setton 1956

Ethics for A-Level - Mark Dimmock 2017-07-31
What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Knowing about Genocide - Joachim J. Savelsberg 2021-03-30

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. This book is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem)—a collaboration of the Association of American Universities, the Association of University Presses, and the Association of Research Libraries—and the generous support of the University of Minnesota. Learn more at the TOME website, available at openmonographs.org. How do victims and perpetrators generate conflicting knowledge about genocide? Using a sociology of knowledge approach, Savelsberg answers this question for the Armenian genocide committed in the context of the First World War. Focusing on Armenians and Turks, he examines strategies of silencing, denial, and acknowledgment in everyday interaction, public rituals, law, and politics. Drawing on interviews, ethnographic accounts, documents, and eyewitness testimony, Savelsberg illuminates the social processes that drive dueling versions of history. He reveals counterproductive consequences of denial in an age of human rights hegemony, with implications for populist disinformation campaigns against overwhelming evidence.

Killing Hope - William Blum 2003-07-31

Is the United States a force for democracy? From

China in the 1940s to Guatemala today, William Blum presents a comprehensive study of American covert and overt interference, by one means or another, in the internal affairs of other countries. Each chapter of the book covers a year in which the author takes one particular country case and tells the story - and each case throws light on particular US tactics of intervention.

Striking a Balance - Sandra Coliver 1992

Lenses and Waves - Fokko Jan Dijksterhuis
2006-01-20

In 1690, Christiaan Huygens (1629-1695) published *Traité de la Lumière*, containing his renowned wave theory of light. It is considered a landmark in seventeenth-century science, for the way Huygens mathematized the corpuscular nature of light and his probabilistic conception of natural knowledge. This book discusses the development of Huygens' wave theory, reconstructing the winding road that eventually led to *Traité de la Lumière*. For the first time, the full range of manuscript sources is taken into account. In addition, the development of Huygens' thinking on the nature of light is put in the context of his optics as a whole, which was dominated by his lifelong pursuit of theoretical and practical dioptrics. In so doing, this book offers the first account of the development of Huygens' mathematical analysis of lenses and telescopes and its significance for the origin of the wave theory of light. As Huygens applied his mathematical proficiency to practical issues pertaining to telescopes - including trying to design a perfect telescope by means of mathematical theory - his dioptrics is significant for our understanding of seventeenth-century

relations between theory and practice. With this full account of Huygens' optics, this book sheds new light on the history of seventeenth-century optics and the rise of the new mathematical sciences, as well as Huygens' oeuvre as a whole. Students of the history of optics, of early mathematical physics, and the Scientific Revolution, will find this book enlightening.

A Visit From the Goon Squad - Jennifer Egan
2011-03-17

WINNER OF THE PULITZER PRIZE FOR FICTION
NEW YORK TIMES TOP 10 BOOKS OF 2010
Jennifer Egan's spellbinding novel circles the lives of Bennie Salazar, an ageing former punk rocker and record executive, and Sasha, the troubled young woman he employs. We first meet Sasha in her mid-thirties, on her therapist's couch in New York City, confronting her longstanding compulsion to steal. We meet Bennie at the melancholy nadir of his adult life - divorced, struggling to connect with his nine-year-old son, listening to a washed-up band in the basement of a suburban house. Although Bennie and Sasha never discover each other's pasts, the reader does, in intimate detail, along with the secret lives of a host of other characters whose paths intersect with theirs, over many years, in many places. With music pulsing on every page, this is a startling, exhilarating novel of self-destruction and redemption. Breathtaking work from one of our boldest writers. 'Irresistible. Fiction of the highest quality' Sunday Times 'Egan's precise, calm underwater prose is a persistent pleasure' Daily Telegraph 'Stories that defy narrative convention' Financial Times 'A must-read' Sunday Times

The Laser Disc Newsletter - 1996

The Central Intelligence Agency and Overhead Reconnaissance - Gregory Pedlow 2016-03-15
The CIA's 2013 release of its book *The Central Intelligence Agency and Overhead Reconnaissance 1954-1974* is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union,

Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The Formations of Modernity - Bram Gieben
1993-01-04

Formations of Modernity is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize modern societies, from their origins in early modern Europe to the nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu, Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.

A Nation in Making - Sir Surendranath Banerjea
1927

The Adam and Eve Story - Chan Thomas 1993
This is the Book of the Century! At LAST someone - this time a basic research scientist - has come forth with proof of cataclysms, which are worldwide supersonic inundations such as Noah's flood. They were discovered by great men such as Andre DeLuc, Baron Georges Cuvier and Guy de Dolomieu, and have remained unsolved mysteries ever since. Now the author takes you through thrilling solutions of finding the process of catclysms, their timetable, and the derivation of trigger, a 20-year search. Truly, CATACLYSMS

LEAVE NO ONE UNTOUCHED! He describes the next cataclysm in awesome detail plus the deterioration of civilization and the escalation of crime before the next cataclysm. It just so happens that the author's scientific prediction of the next cataclysm agrees with clairvoyants Nostradamus', Cayce's, and Scallion's predictions. Never before have facts been presented in such a spine-tingling, inspiring fashion; and never have so many secrets been unlocked in one book. This is the most stirring subject, written in the most intriguing, engrossing, and exciting style ever. You will remember this exceptional book for years! The Party - Barry Sheppard 2005

Challenge to Apollo - Asif A. Siddiqi 2000

The book received the Emme Award for Astronautical Literature at the March 20 2000 luncheon of the Goddard Memorial Symposium, sponsored by the American Astronautical Society. Named in honor of the first NASA Historian, Eugene Emme, the Emme award was created in 1982 to annually recognize an outstanding book that increases public understanding of the past and potential impact of the field of astronautics.

The Death and Life of Great American Cities - Jane Jacobs 2016-11-17

In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only

when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review Advice and Support - Ronald H. Spector 2015-10-14

"Advice and Support: The Early Years, 1941-1960" describes the activities of the U.S. Army in Vietnam during World War II, military advice and assistance to the French government during the immediate postwar years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, Ronald Spector's interesting book is a fitting introduction to the overall study of the conflict in Vietnam.

Branded Male - Mark Tungate 2008-02-03

The male market is exploding. Thanks to emerging social and cultural trends, men are becoming consumers to reckon with. In 1990 only 4% of men claimed to regularly use a skin care product. By 2015 the figure will have risen to 50%. Branded Male discusses the evolution of the male consumer and the desire of marketers to tap into the still underdeveloped male market. Crammed with facts and anecdotes, it analyzes how to effectively brand products and services for the male market. Using a typical modern male's weekday as a template and examining all the influences affecting him, Branded Male considers his exposure to brands and the ways marketers can exploit these channels, taking you through popular strategies for marketing to men. In his trademark style, Mark Tungate paints a portrait of the male consumer. From razor blades to beer, from aftershave to hotels, he finds out which marketing messages have the most impact on male wallets. Men's bank balances may never be the same again.

The World, the Text, and the Critic - Edward W. Said 1983

Argues that contemporary critics force works of literature to fit their theories and examines the

impact of Marxism, linguistics, psychoanalysis, and structuralism on literary criticism
