Sports and Riches - Kurt Weichert 2013-04

Back in the Game This sequel to SportsFan Chronicles proves that the more things change the more they stay the same. Best friends Kurt and Brian hit it big when they won the largest lottery jackpot in the country-half of it, anyway. They decided to combine their winnings with the other winner: Frank, their hated former boss. They reluctantly joined forces with their enemy in order to fulfill their lifelong dream of owning an NFL team. The good news is they're now

filthy rich. The bad news is they're still hundreds of millions of dollars short of the amount needed to purchase a team. Making huge business deals is their only option, and these guys are willing to invest in almost anything as long as it makes them more money, including reality shows, technology startups, and hilarious inventions. Their large windfall magnifies everything in their lives, especially the fun...at least when Victor isn't getting them beat up by jealous football players or when Bernie isn't screwing up their exercise video. Chuck's constant pranks and Alice (annoying best friend of Kurt's longtime love, Darci) keep Kurt on his toes. Even the reviled Frank and his underachieving nephew, Meathead, seem to be fitting in nicely. Things suddenly change when someone in their inner circle betrays them and compromises their chances of buying the football team. The depth of the betrayal is

stunning, but they take no time to analyze it. Instead they remap their path, try to overcome the obstacles, and move on in their own inimitable style of staunch friendship, ambition, and humor. The unexpected is no stranger to Kurt, but even he finds himself at a loss to explain the surprising turn of events and the shocking, too strange to be believed twist in the end.

David Vizard's How to Port and Flow Test Cylinder Heads - David Vizard 2012

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the

same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn

from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

How to Build Max-Performance Mopar Big Blocks - Andy Finkbeiner 2009

Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for

the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.

Ninety Percent of Everything - Rose George 2014-09-09

Eye-opening and compelling, the overlooked world of freight shipping, revealed as the

foundation of our civilization On ship-tracking Web sites, the waters are black with dots. Each dot is a ship; each ship is laden with boxes; each box is laden with goods. In postindustrial economies, we no longer produce but buy, and so we must ship. Without shipping there would be no clothes, food, paper, or fuel. Without all those dots, the world would not work. Yet freight shipping is all but invisible. Away from public scrutiny, it revels in suspect practices, dubious operators, and a shady system of "flags of convenience." And then

there are the pirates. Rose George, acclaimed chronicler of what we would rather ignore, sails from Rotterdam to Suez to Singapore on ships the length of football fields and the height of Niagara Falls; she patrols the Indian Ocean with an anti-piracy task force; she joins seafaring chaplains, and investigates the harm that ships inflict on endangered whales. Sharply informative and entertaining, *Ninety Percent of Everything* reveals the workings and perils of an unseen world that holds the key to our economy, our environment, and our very civilization.
