industry worldwide.

Country Life - 1991

Enriching Production -

Åke Sandberg 1995

This text aims to

present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

Imperial-Way Zen -

Christopher Ives

2009-07-08

During the first half of the twentieth century, Zen Buddhist leaders contributed actively to Japanese imperialism, giving rise to what has been termed "Imperial-Way Zen" (Kodo Zen). Its foremost critic was priest, professor, and activist Ichikawa Hakugen (1902–1986), who spent the decades following Japan's surrender almost single-handedly chronicling Zen's support of Japan's imperialist regime and pressing the issue of Buddhist war responsibility. Ichikawa focused his critique on the Zen approach to religious liberation, the political ramifications of Buddhist metaphysical

Downloaded from id-blockchain.idea.gov.vn on
by guest

constructs, the traditional collaboration between Buddhism and governments in East Asia, the philosophical system of Nishida Kitaro (1876–1945), and the vestiges of State Shinto in postwar Japan. Despite the importance of Ichikawa's writings, this volume is the first by any scholar to outline his critique. In addition to detailing the actions and ideology of Imperial-Way Zen and Ichikawa's ripostes to them, Christopher Ives offers his own reflections on Buddhist ethics in light of the phenomenon. He devotes chapters to outlining Buddhist nationalism from the 1868 Meiji Restoration to 1945 and summarizing Ichikawa's arguments about the causes of Imperial-Way Zen. After assessing Brian Victoria's claim that Imperial-Way Zen

was caused by the traditional connection between Zen and the samurai, Ives presents his own argument that Imperial-Way Zen can best be understood as a modern instance of Buddhism's traditional role as protector of the realm. Turning to postwar Japan, Ives examines the extent to which Zen leaders have reflected on their wartime political stances and started to construct a critical Zen social ethic. Finally, he considers the resources Zen might offer its contemporary leaders as they pursue what they themselves have identified as a pressing task: ensuring that henceforth Zen will avoid becoming embroiled in international adventurism and instead dedicate itself to the promotion of peace and human rights. Lucid and balanced in its

methodology and well grounded in textual analysis, Imperial-Way Zen will attract scholars, students, and others interested in Buddhism, ethics, Zen practice, and the cooptation of religion in the service of violence and imperialism.

The Strategy Book ePub eBook - Max Mckeown
2013-07-31

Thinking strategically is what separates

managers and leaders. Learn the fundamentals about how to create winning strategy and lead your team to deliver it. From understanding what strategy can do for you, through to creating a strategy and engaging others with strategy, this book offers practical guidance and expert tips. It is peppered with punchy, memorable examples from real leaders winning (and losing) with real world strategies. It can be read as a whole or you can dip into the easy-to-read, bite-size sections as and when you need to deal with a particular issue. The structure has been specially designed to make sections quick and easy to use – you'll find yourself referring back to them again and again.

How Asia Works - Joe Studwell 2013-03-28
Until the catastrophic economic crisis of the late 1990s, East Asia was perceived as a monolithic success story. But heady economic growth rates masked the most divided continent in the world - one half the most extraordinary developmental success story ever seen, the other half a paper tiger. Joe Studwell explores how policies ridiculed by economists created titans in Japan, Korea and Taiwan, and are now behind the rise of China, while the best advice the West could offer sold its allies in South-East Asia down the economic river. The first book to offer an Asia-wide deconstruction of success and failure in economic development, Studwell's latest work is provocative and iconoclastic - and

sobering reading for most of the world's developing countries. **How Asia Works** is a must-read book that packs powerful insights about the world's most misunderstood continent. **Air Conditioning Service Manual** - Intertec Publishing Corporation 1985

The Definitive Handbook of Business Continuity Management - Andrew Hiles 2010-11-22
With a pedigree going back over ten years, **The Definitive Handbook of Business Continuity Management** can rightly claim to be a classic guide to business risk management and contingency planning, with a style that makes it accessible to all business managers. Some of the original underlying principles remain the same – but much has changed. This is reflected in this

Downloaded from id-blockchain.idea.gov.vn on

radically updated third edition, with exciting and helpful new content from new and innovative contributors and new case studies bringing the book right up to the minute. This book combines over 500 years of experience from leading Business Continuity experts of many countries. It is presented in an easy-to-follow format, explaining in detail the core BC activities incorporated in BS 25999, Business Continuity Guidelines, BS 25777 IT Disaster Recovery and other standards and in the body of knowledge common to the key business continuity institutes. Contributors from America, Asia Pacific, Europe, China, India and the Middle East provide a truly global perspective, bringing their own insights and approaches to the

subject, sharing best practice from the four corners of the world. We explore and summarize the latest legislation, guidelines and standards impacting BC planning and management and explain their impact. The structured format, with many revealing case studies, examples and checklists, provides a clear roadmap, simplifying and demystifying business continuity processes for those new to its disciplines and providing a benchmark of current best practice for those more experienced practitioners. This book makes a massive contribution to the knowledge base of BC and risk management. It is essential reading for all business continuity, risk managers and auditors: none should be without it.

*Seven Contemporary Plays
from the Korean Diaspora
in the Americas* - Esther
Kim Lee 2012-08-21

By bringing the plays
together in this
collection, Esther Kim
Lee highlights the
themes and styles that
have enlivened Korean
diasporic theater in the
Americas since the
1990s. Some of the plays
are set in urban
Koreatowns. One takes
place in the middle of
Texas, while another
unfolds entirely in a
character's mind. Ethnic
identity is not as
central as it was in the
work of previous
generations of Asian
diasporic playwrights.

Automobiles of General Motors International Volume 3 - Louis F. Fourie 2016-12-27

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise.

Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from

Downloaded from id-blockchain.idea.gov.vn on
by guest

around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Business Maharajas - Gita Piramal 2000-10-14
The inside track to India's most powerful tycoons The eight business maharajas profiled here are among Asia's most powerful industrial tycoons, Their combined turnover runs into billions of rupees, and between them they employ some 650,000 people, while indirectly affecting the lives of millions more. Sip a cup of tea, drive to work, listen to music, build a house and the chances are that in these and a myriad other ways you are using products that they manufacture or

market. By any yardstick, the achievements of these men would rank among the great business stories of our time. How did these men build their enormous empires? What are their management secrets? How did they thrive and prosper even as others failed? What is their vision for the future? Top business writer and industry insider Gita Piramal draws on exhaustive interviews and in-depth research to discover the answers to these and related questions in her profiles of the men who will lead the country's push to become an industrial superpower in the 21st century.

Global Status Report on Road Safety 2018 - World Health Organization
2019-01-10

The Global status report on road safety 2018 launched by WHO in December 2018 highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians cyclists and motorcyclists in particular those living in developing countries. The report suggests that the price paid for mobility is too high especially because proven measures exist. Drastic action is needed

to put these measures in place to meet any future global target that might be set and save lives.

Car and Driver - 2002

Field & Stream - 1995-09
FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

The Origin of
Competitive Strength -

Akira Kawahara

2012-12-06

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old

student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

The Science and Technology of Materials in Automotive Engines - Hiroshi Yamagata 2005-08-29

The science and technology of materials in automotive engines provides an introductory text on the nature of the materials used in automotive engines. It focuses on reciprocating engines, both four and two stroke, with particular emphasis on their characteristics and the types of materials used in their construction. The book considers the engine in terms of each specific part: the cylinder, piston, camshaft, valves, crankshaft,

connecting rod and catalytic converter. The materials used in automotive engines are required to fulfil a multitude of functions. It is a subtle balance between material properties, essential design and high performance characteristics. The science and technology of materials in automotive engines describes the metallurgy, chemical composition, manufacturing, heat treatment and surface modification of these materials. It also includes supplementary notes that support the core text. The book is essential reading for engineers and designers of engines, as well as lecturers and graduate students in the fields of automotive engineering, machine design and materials science looking for a

concise, expert analysis of automotive materials. Provides a detailed introduction to the nature of materials used in automotive engines Essential reading for engineers, designers, lecturers and students in automotive engineering Written by a renowned expert in the field

Lean Thinking - James P. Womack 2013-09-26

Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and

more efficient. Now we are dealing with the recession of 2001 and the financial meltdown of 2002. So what happened to the exemplar firms profiled in Lean Thinking? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Taiichi Ohnos Workplace Management - Taiichi

Ohno 2012-12-13

COMMEMORATING THE 100th BIRTHDAY OF TAIICHI OHNO Businesses worldwide are successfully implementing the Toyota Production System to speed up processes, reduce waste, improve

Downloaded from id-blockchain.idea.gov.vn on
by guest

quality, and cut costs. While there is widespread adoption of TPS, there is still much to be learned about its fundamental principles. This unique volume delivers a clear, concise overview of the Toyota Production System and kaizen in the very words of the architect of both of these movements, Taiicho Ohno, published to mark what would have been his 100th birthday. Filled with insightful new commentary from global quality visionaries, Taiichi Ohno's Workplace Management is a classic that shows how Toyota managers were taught to think. Based on a series of interviews with Ohno himself, this timeless work is a tribute to his genius and to the core values that have made, and continue to make, Toyota one of the most successful manufacturers in the world. "Whatever

name you may give our system, there are parts of it that are so far removed from generally accepted ideas (common sense) that if you do it only half way, it can actually make things worse." "If you are going to do TPS you must do it all the way. You also need to change the way you think. You need to change how you look at things." -- Taiichi Ohno "This book brings to us Taiichi Ohno's philosophy of workplace management--the thinking behind the Toyota Production System. I personally get a thrill down my spine to read these thoughts in Ohno's own words." -- Dr. Jeffrey Liker, Director, Japan Technology Management Program, University of Michigan, and Author, The Toyota Way Based on a series of interviews with Taiicho Ohno, this unique volume delivers a clear,

Downloaded from id-blockchain.idea.gov.vn on

concise overview of the Toyota Production System and kaizen in the very words of the architect of both of these movements, published to mark what would have been his 100th birthday. INCLUDES INSIGHTFUL NEW COMMENTARY FROM: Fujio Cho, Chairman of Toyota Corporation Masaaki Imai, Founder of the Kaizen Institute Dr. Jeffrey Liker, Director, Japan Technology Management Program, University of Michigan, and author John Shook, Chairman and CEO of the Lean Enterprise Institute Bob Emiliani, Professor, School of Engineering and Technology, Connecticut State University Jon Miller, CEO of the Kaizen Institute

Practical Ship Design - D.G.M. Watson 2002-02-22

The ever-growing demand for commercial activities at sea has meant that ships are

rapidly developing and that the rules governing their construction and operation are changing. Practical Ship Design records these changes, their outcomes and the reasoning behind them. It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority. It provides coverage of cargo ships and passenger ships, tugs, dredgers and other service craft. It also includes concept design, detail design, structural design, hydrodynamics design, the effect of regulations, the preparation of specifications and matters of costs and economics. Drawing on the author's extensive practical experience, Practical Ship Design is likely to interest everybody involved in the design,

construction, repair and operation of ships.

Students and the most experienced professionals will all benefit from the book's vast store of design data and its conclusions and recommendations.

Ignition Systems for Gasoline Engines -

Michael Günther
2016-11-18

The volume includes selected and reviewed papers from the 3rd Conference on Ignition Systems for Gasoline Engines in Berlin in November 2016. Experts from industry and universities discuss in their papers the challenges to ignition systems in providing reliable, precise ignition in the light of a wide spread in mixture quality, high exhaust gas recirculation rates and high cylinder pressures. Classic spark plug ignition as well as alternative ignition

systems are assessed, the ignition system being one of the key technologies to further optimizing the gasoline engine.

Handbook of Sustainability in Additive Manufacturing -
Subramanian
Senthilkannan Muthu
2016-03-02

This book highlights the sustainability aspects of additive manufacturing (AM) in two separate volumes. It describes the details of this technology and its implications on the entire product life cycle sustainability, as well as embedded carbon and the further research needed to move this technology towards sustainable, mainstream production.

Sustainability is not new for any area of industry, including additive manufacturing, and there are currently a number of ongoing

research projects, both in industry and in academic institutions, that are investigating sustainability, embedded carbon and research activities which would need to be done in the future to move this technology towards sustainable mainstream production.
