Summarizing, Paraphrasing, and Retelling - Emily Kissner

2006

What's the big idea? That's a question students are asked all the time in papers, assessments, and standardized writing tests of every sort. Whether summarizing research sources or synopsisizing the plot of a two-hundred page novel, the ability to cut through extraneous details and describe the major themes and highlights of a text is key to success in school and in life. Until now, however, summarization has been difficult to teach and learn, but with *Summarizing, Paraphrasing, and Retelling*, you'll discover a powerful and practical way to teach these vital skills.

Summarizing, Paraphrasing, and Retelling is a slim, do-it-all guide that presents everything you need for teaching kids to separate out trivial items in their reading and then identify and communicate the main ideas and crucial details. Emily Kissner breaks summarization down into

smaller, more manageable skills—such as paraphrasing, writing synopses, retelling, and restating the main-idea—illustrating what good summarization looks like and how to adjust your teaching to fit your students' needs. She offers not only methods for individual and group instruction, but also handy, reproducible resources, such as assessment checklists, forms for group work, peer-response sheets, and sample passages for students to practice with. Best of all, Kissner's approach is a student-centered alternative to more traditional skill-and-drill preparations. Supported by research and tested in classrooms, *Summarizing, Paraphrasing, and Retelling* gives you both big ideas for powerful teaching and important particulars to help you plan instruction and analyze your students' progress. What's the big idea behind teaching summarizing? Read

Summarizing, Paraphrasing, and Retelling and find out.

Mary L. Hoch 2019-12-11

To address Common Core State Standards (CCSS) for reading and language,

today's educators strive to help their students develop higher-level understanding with challenging materials.

In this book, we share our method for implementing an integrated strategy

approach for helping

readers understand

expository text. This

approach can be used to accompany and extend text

structure instruction on the

five most commonly used expository text structures:

compare and contrast,

cause and effect, problem

and solution, description,

and sequence. Within this

approach, we designed a method for using key vocabulary in a way that helps readers think about the structure of the text. To aid in the development of higher-level understanding with challenging materials, this approach integrates other essential reading comprehension components that foster understanding, such as predicting and summarizing. The Structure Sort integrated approach embeds these essential strategies before, during, and after reading to empower students to make connections and build comprehension at all stages of reading.
