**The Struggle for the Soul of**

**Teacher Education - Kenneth M.**

Zeichner 2017-10-10

The Struggle for the Soul of Teacher Education is a much-needed exploration of the unprecedented current

controversies and debates over teacher education and professionalism. Set within the context of neo-liberal education reforms across the globe, the book explores how the current struggles over teaching and teacher education in the US came about, as well as reflections on where we should head in the future. Zeichner provides specific examples of work that moves teacher education toward greater congruency between ideals and practices, while outlining the basis for a new form of community-based teacher education, where universities and other program providers, local communities, school

districts, and teacher unions share responsibility for the preparation of teachers. Ultimately, Zeichner problematizes an uncritical shift to more practice and clinical experience, and discusses the enduring problems of clinical teacher education that need to be addressed for this shift to be educative. Readers are sure to gain insight on transforming teacher education so it more adequately addresses the need to prepare teachers capable of providing a high-quality education with access to a rich and broad curriculum, and culturally and community responsive teaching for everyone's children.

*Sociocultural Studies in  
Education* - Richard A Quantz  
2016-01-08

Sociocultural Studies in  
Education: Critical Thinking for  
Democracy fills a void in the  
education of educators and  
citizens in a democracy. It  
explores some of the  
fundamentals around which  
disagreements in education  
arise. It presents a process with  
which those new to these  
debates can understand often  
confusing and entwined sets of

facts and logics. This book  
leads the reader through some  
general concepts and  
intellectual skills that provide  
the basis for making sense out  
of the debates around public  
education in a democracy. This  
book can be seen as a primer  
on how to read texts about  
education. It acknowledges that  
good teachers must be not only  
trained to teach, but also  
educated about education. It  
presents the various themes  
and currents found within the  
arguments and narratives that  
people use to represent public  
education. It assumes that the  
more those interested in  
education know about how to  
see through the rhetoric, the

better they will be at discerning whose interests are served by which texts.

**Native Hoops** - Wade Davies 2020-01-30

A prominent Navajo educator once told historian Peter Iverson that "the five major sports on the Navajo Nation are basketball, basketball, basketball, basketball, and rodeo." The Native American passion for basketball extends far beyond the Navajo, whether on reservations or in cities, among the young and the old. Why basketball—a relatively new sport—should hold such a place

in Native culture is the question Wade Davies takes up in Native Hoops. Indian basketball was born of hard times and hard places, its evolution traceable back to the boarding schools—or “Indian schools”—of the early twentieth century. Davies describes the ways in which the sport, plied as a tool of social control and cultural integration, was adopted and transformed by Native students for their own purposes, ultimately becoming the “Rez ball” that embodies Native American experience, identity, and community. Native Hoops travels the continent, from Alaska to North Carolina, tying the rise of basketball—and

Native sports history—to sweeping educational, economic, social, and demographic trends through the course of the twentieth century. Along the way, the book highlights the toils and triumphs of well-known athletes, like Jim Thorpe and the 1904 Fort Shaw girl’s team, even as it brings to light the remarkable accomplishments of those whom history has, until now, left behind. The first comprehensive history of American Indian basketball, Native Hoops tells a story of hope, achievement, and celebration—a story that reveals the redemptive power of sport and the transcendent spirit of Native culture.

**Current Issues in Educational Policy and the Law** - Kevin G. Welner 2008-02-01

Educational policy controversies in the United States invariably implicate legal issues. Policy debates about testing and school choice, for example, cannot be disentangled from legal rights and mandates. The same is true for issues such as funding, campus safety, speech

and religion rights, as well as the teaching of immigrant students. Written for a general audience, this new twelve-chapter book explores these compelling educational policy issues through that legal lens, building an understanding of both law and policy. The book's editors are Kevin Welner, associate professor of educational policy at the University of Colorado at Boulder, and Wendy Chi, a doctoral candidate at Boulder. Both Welner and Chi are lawyers as well as educational scholars.

Rural Communities - Cornelia Butler Flora 2018-03-05

Communities in rural America are a complex mixture of peoples and cultures, ranging from miners who have been laid off in West Virginia, to Laotian immigrants relocating in Kansas to work at a beef processing

plant, to entrepreneurs drawing up plans for a world-class ski resort in California's Sierra Nevada. *Rural Communities: Legacy and Change* uses its unique Community Capitals framework to examine how America's diverse rural communities use their various capitals (natural, cultural, human, social, political, financial, and built) to address the modern challenges that face them. Each chapter opens with a case study of a community facing a particular challenge, and is followed by a comprehensive discussion of sociological concepts to be applied to understanding the case. This narrative, topical

approach makes the book accessible and engaging for undergraduate students, while its integrative approach provides them with a framework for understanding rural society based on the concepts and explanations of social science. This fifth edition is updated throughout with 2013 census data and features new and expanded coverage of health and health care, food systems and alternatives, the effects of neoliberalism and globalization on rural communities, as well as an expanded resource and activity section at the end of each chapter.
