The Partial Constitution - Cass R. Sunstein 1993  
Sunstein (jurisprudence, political science, U. of Chicago) asserts that, as it is currently interpreted, the Constitution is biased. He points to two contemporary mistakes: that Constitutional law posits the status quo as neutral and just (which, he argues, is not the case); and that the meaning of the Constitution is increasingly solely within the purview of the Supreme Court (which, he argues, is not what the founders intended.) The Mild Voice of Reason - Joseph M. Bessette 1997-06

In recent years, many Americans and more than a few political scientists have come to believe that democratic deliberation in Congress—whereby judgments are made on the merits of policies reflecting the interests and desires of American citizens—is more myth than reality. Rather, pressure from special interest groups, legislative bargaining, and the desire of incumbents to be reelected are thought to originate in American legislative politics. While not denying such influences, Joseph M. Bessette argues that the institutional framework created by the founding fathers continues to foster a government that is both democratic and deliberative, at least to some important degree. Drawing on original research, case studies of policymaking in Congress, and portraits of American lawmakers, Bessette demonstrates not only the limitations of nondeliberative explanations for how laws are made

but also the continued vitality of genuine reasoning on the merits of public policy. Bessette discusses the contributions of the executive branch to policy deliberation, and looks at the controversial issue of the proper relationship of public opinion to policymaking. Informed by Bessette's nine years of public service in city and federal government, *The Mild Voice of Reason* offers important insights into the real workings of American democracy, articulates a set of standards by which to assess the workings of our governing institutions, and clarifies the forces that promote or inhibit the collective reasoning about common goals so necessary to the success of American democracy. "No doubt the best-publicized recent book-length work on Congress is columnist George Will's diatribe in praise of term limits in which the core of his complaint is that Congress does not deliberate in its decision-making. Readers who are inclined to share that fantasy

would do well to consult the work of Joseph M. Bessette. He turns up massive amounts of material attesting to the centrality of deliberation in congressional life."—Nelson W. Polsby, *Presidential Studies Quarterly*

[Postscript on Insignificance](#) - Cornelius Castoriadis  
2011-02-24

Cornelius Castoriadis (1922-1997) was a philosopher,

social critic, political activist, practicing psychoanalyst and professional economist. His work is widely recognized as one of the most singular and important contributions to twentieth-century thought. In this collection of interviews, Castoriadis discusses some of his most important ideas with leading figures in the disciplines that play such a crucial part in his philosophical work: poetry, psychoanalysis, biology and mathematics. Available in English for the first time, these interviews provide a concise and accessible introduction to his work as a whole, allowing him to draw on the astounding breadth of his knowledge (ranging from political theory and sociology to ontology and the philosophy of science). They also render Castoriadis' cutting, polemical and entertaining style while displaying the originality and clarity of his primary concepts. Intellectually provoking, this timely collection shows how Castoriadis' polemics are sharp

and riveting, his conceptual manoeuvres rigorous and original, and his passion inspiring. This is an excellent introduction to one of Europe's most important intellectuals.

**Teacher Education for Change** - Josef Huber  
2011-01-01

What is the main role for teachers today? Why is the Council of Europe dealing with education, and teacher education in particular? How is educational thinking guided by visions of a future society desirable for all? How, in the midst of a fierce battle for curriculum time, can education for human rights, democracy and mutual understanding be embedded in the existing curricula? What are the values underlying our educational visions? The aim of this publication is to offer a few answers to these and many other questions. Above all, its purpose is to contribute to the ongoing debate, more necessary than ever, on the role of teachers and teacher

education in the broader context of teaching and learning for a sustainable democratic society.

### **Challenges of Security Sector Governance in West Africa** - Alan Bryden 2008

There is currently no comprehensive study of the

status of security sector governance in West Africa. Many efforts to understand governance of the security sector in Africa have been directed either at individual countries or at providing a general analysis of the state and security in Africa. This book is intended to contribute to confidence and peace-building through developing a better understanding of the challenges of security sector governance and generating practical policy recommendations based on work conducted by West African experts. It analyses the nature of security sector governance in each of the 16 West African states, provides an assessment of the effectiveness of governance mechanisms, in particular relating to democratic oversight of the security sector, and takes into account the regional and international dimensions to the issue.

*Jefferson and Palladio* - Guido Beltramini 2016-01-31

Thomas Jefferson (1743-1826), a cosmopolitan figure

with rural roots, was a master of the knowledge of his time. He drafted The Declaration of Independence (1776), and thus founded a new view of the proper relation between governed and government. Jefferson was the architect of the new America, not just in a political sense, but in a literal sense as well. Architecture had an important place in his personal and public agenda. A self-taught architect, Jefferson buildings are amongst America's most famous: Monticello, the Virginia State Capitol and the University of Virginia are the starting points of American classical architecture. Jefferson was guided by his admiration for Palladio's Four Books on Architecture, which provided him with key architectural forms and ideas. Palladio showed him how the admired building types of the ancient Romans could be adapted to modern purposes and provide a rational, harmonious framework for living and for building a new society. **Citizenship and Identity** - Engin F Isin 1999-09-08

Through a detailed introductory discussion of the relation between the civil and the political, and between recognition and representation, this book provides a comprehensive vocabulary for understanding citizenship. It uses the work of T H

Marshall to frame the critical interrogation of how ethnic, technological, ecological, cosmopolitan, sexual and cultural rights relate to citizenship. The authors show how the civil, political and social meanings of citizenship have been redefined by postmodernization and globalization.

**Investing in Cultural Diversity and Intercultural Dialogue** - Unesco 2009-01-01

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges

of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

**Real Democracy** - Frank M. Bryan 2010-03-15  
Relying on an astounding collection of more than three decades of firsthand research, Frank M. Bryan examines one of the purest forms of American democracy, the New England town meeting. At these meetings, usually held once a year, all eligible citizens of the town may become legislators; they meet in face-to-face assemblies, debate the issues on the agenda, and vote on them. And although these meetings are natural laboratories for democracy, very few scholars have systematically investigated them. A nationally recognized expert on this topic, Bryan has now done just that. Studying 1,500 town meetings in his home state of Vermont, he and his students recorded a staggering amount of data about

them—238,603 acts of participation by 63,140 citizens in 210 different towns. Drawing on this evidence as well as on evocative "witness" accounts—from casual observers to no lesser a light than Aleksandr Solzhenitsyn—Bryan paints a vivid picture of how real democracy works. Among the many fascinating questions he explores: why attendance varies sharply with town size, how citizens resolve conflicts in open forums, and how men and women behave differently in town meetings. In the end, Bryan interprets this brand of local government to find evidence for its considerable staying power as the most authentic and meaningful form of direct democracy. Giving us a rare glimpse into how democracy works in the real world, Bryan presents here an unorthodox and definitive book on this most cherished of American institutions.

**The War That Doesn't Say Its Name** - Jason K.

Stearns 2022-02

"The Congolese conflict has been dubbed a "forever war," a conflict that defies resolution. As of 2016, the Congo was experiencing its twentieth year of violent conflict, one of worst humanitarian calamities of our time and climbing the all-time charts. According to one study, 5.4 million people have died between 1998 and 2007 alone, largely from disease, though fighting and violence is ongoing to this day. This study aims to explain the most recent phases of the conflict, why it has lasted for so long, where diplomats and peacemakers have gone wrong in their approach to solving the violence, and how the Congo can help us understand contemporary armed conflict more broadly. Using the Congolese conflict as an illustrative case study, the author argues that three factors determine why conflicts there have persisted in some places while dwindling

elsewhere: the cohesion, political culture, and constituencies of the belligerents. He finds that the more fragmented the belligerents, the more protracted the conflict becomes, and as they shift to see the conflict as an end in itself and to perceive violence as an acceptable and necessary tool of politics, the longer the conflict lasts. Finally, he develops a theory for how social constituencies shape negotiations between belligerents and the government by providing guarantees, brokering contacts, and presenting commitment problems"--

**The Promise of Politics** - Hannah Arendt 2009-01-16  
After the publication of *The Origins of Totalitarianism* in 1951, Hannah Arendt undertook an investigation of Marxism, a subject that she had deliberately left out of her earlier work. Her

inquiry into Marx's philosophy led her to a critical examination of the entire tradition of Western political thought, from its origins in Plato and Aristotle to its culmination and conclusion in Marx. *The Promise of Politics* tells how Arendt came to understand the failure of that tradition to account for human action. From the time that Socrates was condemned to death by his fellow citizens, Arendt finds that philosophers have followed Plato in constructing political theories at the expense of political experiences, including the pre-philosophic Greek experience of beginning, the Roman experience of founding, and the Christian experience of forgiving. It is a fascinating, subtle, and original story, which bridges Arendt's work from *The Origins of Totalitarianism* to *The Human Condition*, published in 1958. These writings, which deal with the conflict between philosophy and politics, have never before been gathered and

published. The final and longer section of *The Promise of Politics*, titled “Introduction into Politics,” was written in German and is published here for the first time in English. This remarkable meditation on the modern prejudice against politics asks whether politics has any meaning at all anymore. Although written in the latter half of the 1950s, what Arendt says about the relation of politics to human freedom could hardly have greater relevance for our own time. When politics is considered as a means to an end that lies outside of itself, when force is used to “create” freedom, political principles vanish from the face of the earth. For Arendt, politics has no “end”; instead, it has at times been—and perhaps can be again—the never-ending endeavor of the great plurality of human beings to live together and share the earth in mutually guaranteed freedom. That is the promise of politics.

**Educating Children at Home** - Alan Thomas  
1998-01-01

With increasing numbers of parents choosing to educate their children at home, an opportunity

exists to explore education outside the school environment. Parents often discover that classroom approaches to teaching and learning do not easily translate into the home. As a result, some radically adjust their approach to educating their children, in some instances virtually abandoning any structured teaching or learning. Focusing on informal learning, this text examines in depth how children can acquire an education simply through everyday experiences. The text sets out to challenge fundamental assumptions about the nature of teaching and learning. Research has been drawn

from a wide cross-section of parents from 100 home-educating families.
