Online Music Distribution - How Much Exclusivity Is Needed? - Nikita Malevanny 2019-08-30

This book analyzes regulatory models established in the field of online music distribution, and examines their consistency with the overarching objectives of copyright law. In order to do so, the book takes a deep dive into the provisions of international treaties, EU Directives as well as the German and US copyright systems and case law. It subsequently scrutinizes the identified regulatory models from the standpoint of the copyright's objectives with regard to incentives, rewards, a level playing field, and dissemination. The Report: Mexico 2015 - Oxford Business Group 2016-11-11

Slow economic growth has characterised Mexico's economic performance for much of the past decade. Taking office in December 2012, the government of Enrique Peña Nieto set out to boost Mexico's competitiveness with a package of structural reforms affecting a number of sectors, including energy, telecommunications, tax, labour and education. The package's most eye-catching component was a constitutional reform designed to end decades of state monopoly in the oil and gas sector and attract investment from major international oil companies. Though low oil prices and a degree of nervousness over the potential effects of monetary tightening in the US have dampened initial investor and market enthusiasm over the reforms, the outlook for the Mexican economy remains stable, with demand from the US expected to support Mexican activity, despite low domestic demand and business confidence.

Options for Reducing the Deficit - United States. Congressional Budget Office 2013

"The Congress faces an array of policy choices as it confronts the dramatic increase in the federal government's debt over the past several years and the prospect of large annual budget deficits and further increases in that debt that are projected to occur in coming decades under current law. To help inform lawmakers about the budgetary implications of various approaches to changing federal policies, CBO periodically issues a compendium of policy options that would affect the federal budget as well as separate reports that include policy options in particular areas. This volume presents 103 options that would decrease federal spending or increase federal revenues over the next decade. Those options cover many areas, including defense, energy, Social Security, health care programs, other benefit programs, and provisions of the tax code. The budgetary effects identified for most of the options span the 10 years from 2014 to 2023 (the period covered by CBO's May 2013 baseline budget projections), although many of the options would have longer-term effects as well."

Federal Contracting - United States. Government Accountability Office 2019

The federal government obligated approximately \$507 billion on contracts in fiscal year 2017. Businesses, including federal contractors, pay billions of dollars in taxes each year. Some businesses, however, do not pay owed taxes, contributing to what is known as the tax gap. Federal contractors owe some of the taxes that contribute to the tax gap, and, since 2015, federal law prohibits agencies, under certain circumstances, from using appropriated funds to contract with those who have qualifying tax debt. The IRS also has authority to levy certain payments of contractors with qualifying federal tax debt. GAO was asked to review issues related to federal contractors and tax debt. Among other things, GAO examined whether, in calendar years 2015 and 2016, (1) selected federal agencies had control activities that ensured contractors' reported federal tax debts were considered before contract award and (2) the IRS levied selected federal contractors' payments. GAO is making 12 recommendations, including that selected agencies enhance controls for considering contractors' qualifying federal tax debt before awarding contracts and that the IRS evaluate options to obtain comprehensive contract-payment information.

United States Code - United States 2013

"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of

the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.
