France and the New Imperialism - Dr Bruno Charbonneau 2013-03-28

The role of French security policy and cooperation in Africa has long been recognized as a critically important factor

in African politics and international relations. The newest form of security cooperation, a trend which merges security and development and which is actively promoted by other major Western powers, adds to our understanding of this broader trend in African relations with the industrialized North. This book investigates whether French involvement in Africa is really in the interest of Africans, or whether French intervention continues to deny African political freedom and to sustain their current social, economic and political conditions. It illustrates how policies portrayed as promoting stability and development can in fact be factors of instability and reproductive mechanisms of systems of dependency, domination and subordination. Providing complex ideas in a clear and pointed manner, France and the New Imperialism is a sophisticated understanding of critical security studies.

Death by China - Peter Navarro 2011-05-05

The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal

products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of

operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story--including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

Fly Girls - P. O'Connell Pearson 2018-02-06
"A truly inspiring read." —Booklist (starred review) "A solid account of women's contributions as aviators during World War II." —Kirkus Reviews In the tradition of Hidden Figures, debut author Patricia Pearson offers a beautifully written account of the remarkable but often forgotten group of female fighter pilots who answered their country's call in its time of need during

World War II. At the height of World War II, the US Army Airforce faced a desperate need for skilled pilots—but only men were allowed in military airplanes, even if the expert pilots who were training them to fly were women. Through grit and pure determination, 1,100 of these female pilots—who had to prove their worth time and time again—were finally allowed to ferry planes from factories to bases, to tow targets for live ammunition artillery training, to test repaired planes and new equipment, and more. Though the Women Airforce Service Pilots lived on military bases, trained as military pilots, wore uniforms, marched in review, and sometimes died violently in the line of duty, they were civilian employees and received less pay than men doing the same jobs and no military benefits, not even for burials. Their story is one of patriotism, the power of positive attitudes, the love of flying, and

the willingness to serve others with no concern for personal gain.

King Leopold's Ghost - Adam Hochschild
2019-05-02

Winner of the Duff Cooper Prize, *King Leopold's Ghost* is the true and haunting account of Leopold's brutal regime and its lasting effect on a ruined nation. With an introduction by award-winning novelist Barbara Kingsolver. In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. While he did all this, he carefully constructed an image of himself as a deeply

feeling humanitarian. *King Leopold's Ghost* is the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity. 'All the tension and drama that one would expect in a good novel' - Robert Harris, author of *Fatherland*
Consensus - Roy MacLaren 1984

The Men of Brewster Place - Gloria Naylor 1999

Fifteen years ago, Gloria Naylor burst onto the American literary scene with *The Women of Brewster Place*. Now she has focused her attention on the other side of the story - the men of Brewster Place. Like

the women, they are committed to one another and to their community. Ben, who died in the first Brewster Place novel, is resurrected to narrate the tales of seven men and the women who love them. The complexity of their personal issues and how they are resolved leaves the reader with renewed hope and optimism.

Webb, James A. Stimson, Michael Moran and Ron Johnston. Praise for the previous edition: 'With a first-class set of contributors this well-written and accessible volume will be essential reading for all concerned with British elections, voting behavior and party politics.' - Pippa Norris, Harvard University
World History: Connections to Today - Elisabeth Gaynor Ellis 2003-12

World Civilizations - Peter N. Stearns 2007
With 83 additional outline and four-color maps, *World Civilizations: The Global Experience*, Fifth Edition, Atlas Edition, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography

and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of World Civilizations is to present a truly global history since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

History of Science, Philosophy and Culture in Indian Civilization: pt. 1. Science, technology, imperialism and war - Debi Prasad Chattopadhyaya 1999

Technologies of Speculation - Sun-ha Hong
2020-07-28

An inquiry into what we can know in an age of surveillance and algorithms Knitting together contemporary technologies of datafication to reveal a broader, underlying shift in what counts as knowledge, *Technologies of Speculation* reframes today's major moral and political controversies around algorithms and artificial intelligence. How many times we toss and turn in our sleep, our voluminous social media activity and location data, our average resting heart rate and body temperature: new technologies of state and self-surveillance promise to re-enlighten the black boxes of our bodies and minds. But

Sun-ha Hong suggests that the burden to know and to digest this information at alarming rates is stripping away the liberal subject that 'knows for themselves', and risks undermining the pursuit of a rational public. What we choose to track, and what kind of data is extracted from us, shapes a society in which my own experience and sensation is increasingly overruled by data-driven systems. From the rapidly growing Quantified Self community to large-scale dragnet data collection in the name of counter-terrorism and drone warfare, Hong argues that data's promise of objective truth results in new cultures of speculation. In his analysis of the Snowden affair, Hong demonstrates an entirely new way of thinking through what we could know, and the political and philosophical stakes of the belief that data equates to knowledge. When we simply cannot process all the data at our fingertips, he argues, we look past

the inconvenient and the complicated to favor the comprehensible. In the process, racial stereotypes and other longstanding prejudices re-enter our newest technologies by the back door. Hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all. *The Roman Empire* - Neville Morley 2010
Analyses the origins and nature of the Roman empire, and its continuing influence in discussions and debates about modern imperialism

Criticality, Teacher Identity, and (In)equity in English Language Teaching - Bedrettin Yazan 2018-03-26

This edited volume, envisioned through a postmodern and poststructural lens, represents an effort to destabilize the normalized "assumption" in the discursive field of English language teaching (ELT) (Pennycook, 2007), critically-oriented and otherwise, that identity, experience,

privilege-marginalization, (in)equity, and interaction, can and should be apprehended and attended to via categories embedded within binaries (e.g., NS/NNS; NEST/NNEST). The volume provides space for authors and readers alike to explore fluidly critical-practical approaches to identity, experience, (in)equity, and interaction envisioned through and beyond binaries, and to examine the implications such approaches hold for attending to the contextual complexity of identity and interaction, in and beyond the classroom. The volume additionally serves to prompt criticality in ELT towards reflexivity, conceptual clarity and congruence, and dialogue.

The Political Economy of Global Security - Heikki Patomäki 2007-11-28

What are the possibilities for and conditions

of global security in the 21st century? This book provides an innovative study of future wars, crises and transformations of the global political economy. It brings together economic theory, political economy, peace and conflict research, philosophy and historical analogy to explore alternatives for the future. Patomäki develops a bold, original and thought provoking political economy analysis of the late 20th century neo-liberalisation and globalisation and their real effects, which he describes as a 21st century version imperialism. In order for us to understand global security and to anticipate the potential threats and crises, he argues that a holistic understanding and explanation of history is necessary and demonstrates that a systematic causal analysis of structures and processes is required. Putting this theory into practice, Patomäki constructs a comparative explanatory model which traces the rise of

imperialism in the late 19th century and culminated in the First World War. He argues that even a partial return to the 19th century ideals and practices is very likely to be highly counterproductive in the 21st century world and could become a

recipe for a major global catastrophe. This book will be of interest to students and scholars of international relations, globalization studies, politics, economics and security studies.
