Using ICTs and blended learning in transforming technical and vocational education and training - Latchem, Colin 2017-04-17

**Linear Models in Statistics** - Alvin C. Rencher 2008-01-18

The essential introduction to the theory and application of linear models—now in a valuable new edition Since most advanced statistical tools are generalizations of the linear model, it is necessary to first master the linear model in order to move forward to more advanced concepts. The linear model remains the main tool of the applied statistician and is central to the training of any statistician regardless of whether the focus

is applied or theoretical. This completely revised and updated new edition successfully develops the basic theory of linear models for regression, analysis of variance, analysis of covariance, and linear mixed models. Recent advances in the methodology related to linear mixed models, generalized linear models, and the Bayesian linear model are also addressed. Linear Models in Statistics, Second Edition includes full coverage of advanced topics, such as mixed and generalized linear models, Bayesian linear models, two-way models with empty cells, geometry of least squares, vector-matrix calculus, simultaneous inference, and logistic and nonlinear regression. Algebraic, geometrical, frequentist, and Bayesian approaches to both the inference of linear models and the analysis of variance are also illustrated. Through the expansion of relevant material and the inclusion of the latest technological developments in the field, this book provides readers with the theoretical foundation to correctly interpret computer software output as well as effectively use, customize, and understand linear models. This modern Second Edition features: New chapters on Bayesian linear models as well as random and mixed linear models Expanded discussion of two-way models with empty cells Additional sections on the geometry of least squares Updated coverage of simultaneous inference The book is complemented with easy-to-read proofs, real data sets, and an extensive bibliography. A thorough review of the requisite matrix algebra has been added for transitional purposes, and numerous theoretical and applied problems have been incorporated with selected answers provided at the end of the book. A related Web site includes additional data sets and SAS® code for all numerical examples. Linear Model in Statistics, Second Edition is a must-have book for courses in statistics, biostatistics, and mathematics at the upper-undergraduate and graduate levels. It is also an invaluable reference for researchers who need to gain a better understanding of regression and analysis of variance.

Studio Thinking 2 - Lois Hetland 2015-04-24

" The first edition of this bestseller was featured in The New York Times and The Boston Globe for its groundbreaking research on the positive effects of art education on student learning across the curriculum. Capitalizing on observations and conversations with educators who have used the Studio Thinking Framework in diverse settings, this expanded edition features new material, including: The addition of Exhibitions as a fourth Studio Structure for Learning (along with Demonstration-Lecture, Students-at-Work, and Critique). Explanation and examples of the dispositional elements of each Habit, including skill, alertness (noticing appropriate times to put skills to use), and inclination (the drive or motivation to employ skills). A chart aligning Habits to the English Language Arts and Mathematics Common Core. Descriptions of how the Framework has been used inside and outside of schools in curriculum planning, teaching, and assessment across arts and non-arts disciplines. A full-color insert with new examples of student art. Studio Thinking 2 will help advocates explain arts education to policymakers, help art teachers develop and refine their teaching and assessment practices, and assist educators in other disciplines to learn from existing practices in arts education. Lois Hetland is professor and chair of art education at Massachusetts

College of Art and Design and senior research affiliate at Project Zero, Harvard Graduate School of Education. Ellen Winner is professor and chair of psychology at Boston College and a senior research associate at Project Zero. Shirley Veenemais is an instructor in visual arts at Phillips Academy in Andover, Massachusetts. Kimberly M. Sheridan is an assistant professor in the College of Education and Human Development and the College of Visual and Performing Arts at George Mason University. "Our decade of using the Studio Thinking Framework in California's schools positions us for success in this new era because of the foundation of reflective, creative, and critical thinking developed in our schools and districts." —From the Foreword to the Second Edition by Louise Music, Executive Director of Integrated Learning, Alameda County Office of Education, Hayward, CA "Studio Thinking[is] a vision not only of learning in the arts but what could be learning most anywhere." —From the Foreword to the First Edition by David N. Perkins, Professor of Education, Harvard Graduate School of Education, and Senior Co-Director of Harvard Project Zero Praise for the First Edition of Studio Thinking— "Winner and Hetland have set out to show what it means to take education in the arts seriously, in its own right." —The New York Times "This book is very educational and would be helpful to art teachers in promoting quality teaching in their classrooms." —School Arts Magazine "Studio Thinking is a major contribution to the field." —Arts & Learning Review "The research in Studio Thinking is groundbreaking and important because it is anchored in the actual practice of teaching artists.... The ideas in Studio Thinking continue to provide a vehicle with which to navigate and understand the complex work in which we are all engaged." —Teaching Artists Journal "Hetland and her colleagues reveal dozens of practical measures that could be adopted by any arts program, inside or outside of the school.... This is a bold new step in arts education." —David R. Olson, Professor Emeritus, University of Toronto "Will be at the top of the list of essential texts in arts education. I know of no other work in art education with this combination of authenticity and insight." —Lars Lindström, Stockholm Institute of Education "The eight studio habits of mind should become a conceptual framework for all preservice art education programs; this book should be read by all early and experienced art educators." —Mary Ann Stankiewicz, The Pennsylvania State University "
