Character Strengths and Virtues - Christopher Peterson 2004-04-08
"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which

exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

Katharine Whitney Curtis - Jordan
Whitney-Wei 2019-12-31

How do you invent an Olympic sport?
For Katharine Whitney Curtis, it took
the right idea, great talent, some
good timing, and the determination to
make it happen. The originator of
synchronized swimming as we know it
today, she even wrote the first book
on the subject in 1936. But there was
much more to her life and career.
After the start of World War II,
Curtis became a recreational director
in the American Red Cross and
followed the troops wherever the
course of war took them, serving
under Generals Patton and Eisenhower,
before becoming a director of travel
for the U.S. Army in Europe during
the Cold War. Unbound by fear or the
narrow expectations of society, this
was a woman who lived ahead of her
time, making things happen along the
way. As her first biography, this
book generously features Curtis's own
words, selected from more than 2,000
pages of letters, and contextualized
by her surviving friends and family
members.

How People Learn II - National
Academies of Sciences, Engineering,
and Medicine 2018-09-27

There are many reasons to be curious

about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Lion Karate Style - Peyman Adl Dousti Hagh 2014-11-10

It is possible to transform a human body into a total defensive military units like air - strike, infantry, and artillery. Particularly, there is a Russian artillery which is called 'katyusha' that causes 'barrage of artillery' at a time of combat. In Iran, the military term for barrage of artillery is called 'prepare fire'. It is used against advancing vanguard soldiers. In addition, one day, I was training myself and naturally came to a standing position which inspired me to develop a black belt system of barrage of artillery and developed concept of coordinated strikes. My face is looking on my right side shoulder, it means to expect the unexpected, and my right leg is avoiding the destabilization technique. I am in a state of total peace and have no intention of striking anyone. However, when a time arise, my body would become sharp like that holding knife and my limbs would become like katyusha in order to stop an aggression against me and to bring a peaceful resolution to a hostile confrontation between parties.

The Liberator - Alex Kershaw 2012-10-30

The untold story of the bloodiest and most dramatic march to victory of the Second World War—now a Netflix original series starring Jose Miguel Vasquez, Bryan Hibbard, and Bradley

James “Exceptional . . . worthy addition to vibrant classics of small-unit history like Stephen Ambrose’s *Band of Brothers*.”—Wall Street Journal Written with Alex Kershaw's trademark narrative drive and vivid immediacy, *The Liberator* traces the remarkable battlefield journey of maverick U.S. Army officer Felix Sparks through the Allied liberation of Europe—from the first landing in Italy to the final death throes of the Third Reich. Over five hundred bloody days, Sparks and his infantry unit battled from the beaches of Sicily through the mountains of Italy and France, ultimately enduring bitter and desperate winter combat against the die-hard SS on the Fatherland's borders. Having miraculously survived the long, bloody march across Europe, Sparks was selected to lead a final charge to Bavaria, where he and his men experienced some of the most intense street fighting suffered by Americans in World War II. And when he finally arrived at the gates of Dachau, Sparks confronted scenes that robbed the mind of reason—and put his humanity to the ultimate test.

Mindchamps Way, The: How To Turn An Idea Into A Global Movement - Joseph A Michelli 2019-06-27

How do a passion to create an education revolution and the business acumen to fuel rapid and spectacular global expansion co-exist within one organisation? Find out in *The MindChamps Way* ... In his latest insightful study of strategy and leadership, Joseph Michelli (#1 New York Times & Wall Street Journal Bestselling Author), shares the unique philosophy and the values-driven strategies of a dynamic organization, whose growing presence on the world stage has the potential to fundamentally shape the future of 'individuals, families, communities, countries, and education systems'

across the globe. The MindChamps Way demonstrates how combining a strong, 'big-picture' philosophy with a carefully planned and executed business strategy can inspire staff, clients and an unlikely range of interested stakeholders. Read how: *Safety and Security at Sports Grounds*
