Nature Inside - Penny Sparke 2021-02-02

The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary "living walls" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, Nature Inside explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant.

REDD+ on the ground - Erin O Sills 2014-12-24

REDD+ is one of the leading near-term options for global climate change mitigation. More than 300 subnational REDD+ initiatives have been launched across the tropics, responding to both the call for demonstration activities in the Bali Action Plan and the market for voluntary carbon offset credits.

[The REGTECH Book](#) - Janos Barberis 2019-08-06

The Regulatory Technology Handbook The transformational potential of RegTech has been confirmed in recent years with US\$1.2 billion invested in start-ups (2017) and an expected additional spending of US\$100 billion by 2020. Regulatory technology will not only provide efficiency gains for compliance and reporting functions, it will radically change market structure and supervision. This book, the first of its kind, is providing a comprehensive and invaluable source of information aimed at corporates, regulators, compliance professionals, start-ups and policy makers. The REGTECH Book brings into a single volume the curated industry expertise delivered by subject matter experts. It serves as a single reference point to understand the RegTech eco-system and its impact on the industry. Readers will learn foundational notions

such as: • The economic impact of digitization and datafication of regulation • How new technologies (Artificial Intelligence, Blockchain) are applied to compliance • Business use cases of RegTech for cost-reduction and new product origination • The future regulatory landscape affecting financial institutions, technology companies and other industries Edited by world-class academics and written by compliance professionals, regulators, entrepreneurs and business leaders, the RegTech Book represents an invaluable resource that paves the way for 21st century regulatory innovation.

Bedford's Tech Edge - 2002-07

A Foodie Afloat - Di Murrell 2020-07-28

A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A Foodie Afloat is the 2020 UK winner of the World Gourmand Cookbook Awards in the Food Tourism category.

[The Cycling Chef: Recipes for Getting Lean and Fuelling the Machine](#) - Alan Murchison 2021-03-04

'I can't think of a finer chef to have written a book on nutrition and diet for athletes' - Tom Kerridge 'Top meals from the Michelin-starred chef who is also a champion athlete... Catnip for the style-obsessed, Rapha-wearing aficionado' - The Times 'Alan's food is simple, yet tasty and powerful. He's been a key component for my training and racing.' - Alex Dowsett, World Tour rider, former World Hour Record Holder and national champion 'Alan has completely changed my perception of what an athlete's diet can look like.' - Elinor Barker, multiple world champion and Olympic gold medallist A must-have recipe book designed for cyclists of all levels, written by Alan Murchison - a Michelin-starred chef and champion athlete who now cooks for elite athletes. As a cyclist, you can have the most amazing diet, but if that isn't balanced with the

right training load, you can still end up piling on the pounds, which will slow you down. Michelin-starred chef and leading sports nutritionist Alan Murchison reveals how you can enjoy delicious, nutritionally balanced food and achieve sustainable long-term weight loss whilst positively impacting your cycling performance. A follow-up to Alan's award-winning *The Cycling Chef*, this is flavoursome food to get you lean and make you go faster.

This series contains the decisions of the Court in both the English and French texts.

13 Days - John Alan Lyde Caunter 2017-06-27

Captain Caunter from the Gloucestershire Regiment gives an account for his escape from Germany. He also tells of encounters and conversations he had with German prison guards and soldiers.

The Tetris Effect - Dan Ackerman 2016-09-01

21 February 1989. Three men fly into Moscow, representing software giants from Britain, America, and Japan. Each of them is determined to undercut the others in order to secure a technology so powerfully addictive it has brought the government department that created it to a standstill. In a country on the brink of seismic change, where spycraft is about to give way to cut-throat capitalism, Tetris has become the grand prize. Featuring corporate espionage, unmarked government organizations, courtroom drama and international conspiracies, the origin of the world's most popular video game is a gripping, fast-paced thriller of the highest order. Not only this, but it is also the tale of a one-in-a-million software start-up – a unique example of an idea, a product, and an era coming together at exactly the right moment. Tetris was perfectly (if accidentally) crafted to hit primal triggers in our minds and in Ackerman's hands its story is unputdownable.

IBM FlashSystem 9100 Architecture, Performance, and Implementation - Jon Tate 2020-12-02

IBM® FlashSystem 9100 combines the performance of flash and Non-Volatile Memory Express (NVMe) with the reliability and innovation of IBM FlashCore® technology and the rich features of IBM Spectrum™ Virtualize — all in a powerful 2U storage system. Providing intensive data driven multi-cloud storage capacity, FlashSystem 9100 is deeply integrated with the software-defined capabilities of IBM Spectrum Storage™, which allows you to easily add the multi-cloud solutions that best support your business. In this IBM Redbooks® publication, we discuss the product's features and planning steps, architecture, installation, configuration, and hints and tips.

Academic E-Books - Suzanne M. Ward 2015-11-15

Academic E-Books: Publishers, Librarians, and Users provides readers with a view of the changing and

emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Product Design and Life Cycle Assessment - Ireneusz Zbicinski 2006

AI and Learning Systems - Konstantinos Kyprianidis 2021-02-17

Over the last few years, interest in the industrial applications of AI and learning systems has surged. This book covers the recent developments and provides a broad perspective of the key challenges that characterize the field of Industry 4.0 with a focus on applications of AI. The target audience for this book includes engineers involved in automation system design, operational planning, and decision support.

Computer science practitioners and industrial automation platform developers will also benefit from the timely and accurate information provided in this work. The book is organized into two main sections comprising 12 chapters overall: •Digital Platforms and Learning Systems •Industrial Applications of AI

Urania - Camille Flammarion 2020-09-28

Was Urania a fair, blue-eyed maiden, a dream of spring, an innocent but inquisitive daughter of Eve? No; she was simply, as in days of yore, that one of the nine Muses who presided over astronomy, and whose celestial glance inspired and directed the chorus of the spheres; she was the angelic idea which soars above terrestrial dullness. She had not the disturbing flesh, nor the heart whose palpitations are communicated at a distance, nor the gentle ardor of human life; but she existed nevertheless in a sort of ideal world,—lofty and always pure,—and yet she was human enough in name and form to produce a strong and deep impression upon an adolescent soul, to arouse in that soul an indefinite, indefinable feeling of admiration,—almost of love. In his hours of solitude, and even through the intellectual labors with which the education of the day overloads his brain, a young man whose hand has never plucked the divine fruit from

the tree of Paradise, whose lips are still untouched, whose heart has not yet spoken, whose senses are beginning to awaken amid vague new aspirations, thrills with a presentiment of the divinity to which he is soon to sacrifice, and personifies beforehand in ever-varying forms the unknown being who floats through the airy fabric of his dreams. He wishes, longs to reach this unknown being, but dares not yet, perhaps may never dare, in the purity of his admiration, unless some helping hand come to his aid. If Chloe is not well informed, indiscreet and talkative Lycinion must take it upon herself to instruct Daphnis. Whatever tells us of the yet unknown attraction can charm, interest, delight, and captivate us. A cold engraving, showing the oval of a pure face, even an old-fashioned painting, a sculpture,—a sculpture especially,—awakens a new feeling in our hearts; the blood flows faster, or seems to stop; the idea crosses our reddening brow like a flash, and remains floating in our pensive mind. It is the beginning of desires, the beginning of life, the dawn of a beautiful summer day, harbinger of the sunrise. As for me, my first love, my adolescent passion, had, not for its object assuredly, but as a determining cause—a clock! It is rather odd, but so it is! Humdrum calculations used up all my afternoons from two until four; it was merely correcting observations, made the night before, of stars or planets by applying the reductions arising from atmospheric refraction, which itself depends on the height of the barometer and the temperature. These calculations are as simple as they are tiresome; they are made mechanically, by the help of prepared tables, while thinking of something else.

OECD Reviews of Evaluation and Assessment in Education Synergies for Better Learning An International Perspective on Evaluation and Assessment - OECD 2013-04-11

This report provides an international comparative analysis and policy advice to countries on how evaluation and assessment arrangements can be embedded within a consistent framework to improve the quality, equity and efficiency of school education.

MOST - Prof. Dr.-Ing. Andreas Grzempa 2012-01-01

MOST (Media Oriented Systems Transport) is a multimedia network technology developed to enable an efficient transport of streaming, packet and control data in an automobile. It is the communication backbone of an infotainment system in a car. MOST can also be used in other product areas such as driver assistance systems and home applications.

Clearing the Haze - M. D. Thurstone 2015-07-02

Often it is difficult for parents to recognize when their child is abusing alcohol, using illegal drugs, or in trouble with other substances that are hazardous to their health, safety, and wellbeing. Clearing the Haze is

a guide designed to help parents determine whether their child may have a substance problem and, if so, how to begin to address it. The book includes the voices and insight of experts in substance abuse counseling, young people in recovery, and parents who have lived the nightmare of adolescent addiction. The book moves readers through an overview of adolescent brain development, the warning signs of drug use and addiction, treatment options, what families should expect of therapy, the basics of productive communication, and the difficulties of dealing lovingly with addicted teens. The authors encourage families entering the 12th step of “giving back” to consider advocacy for smarter public policies surrounding drug access and addiction treatment. They also provide a list of resources parents may find useful. A necessary resource for every community, this book will help parents, teachers, friends, and others help kids who need help.

Responding to Financial Crisis - Adam S. Posen 2013

The Asian financial crisis of 1997–98 was devastating for the region, but policymakers at least believed that they gained a great deal of knowledge on how to prevent, mitigate, and resolve crises in the future. Fifteen years later, the Asian developing countries escaped the worst effects of the global crisis of 2008–10, in part because they had learned the right lessons from their own experience. In this important study, the Asian Development Bank and Peterson Institute for International Economics join forces to illuminate the contrast between Asia’s performance during the more recent crisis with its performance during its own crisis and the gap between what the United States and European Union leaders recommended to Asia then and what they have practiced on themselves since then. The overriding lessons emerging from the essays in this volume are that countries need to prepare for crises as if they cannot be prevented, make room for stabilization policies and deploy them rapidly when crises hit, and address the need for self-insurance globally if they can, or regionally if they must. Contributors include Simon Johnson, William R. Cline, Joseph E. Gagnon, Stephan Haggard, Masahiro Kawai, Peter Morgan, Donghyun Park, Arief Ramayandi, Kwanho Shin, Edwin M. Truman, Shahin Vallee, Changyong Rhee, and Lea Sumulong
