Indigenous and Decolonizing Studies in Education - Linda Tuhiwai Smith 2018-06-14

Indigenous and decolonizing perspectives on education have long persisted alongside colonial models of education, yet too often have been subsumed within the fields of multiculturalism, critical race theory, and progressive education. Timely and compelling, Indigenous and Decolonizing Studies in Education features research, theory, and dynamic foundational readings for educators and educational researchers who are looking for possibilities beyond the limits of liberal democratic schooling. Featuring original chapters by authors at the forefront of theorizing, practice, research, and activism, this volume helps define and imagine the exciting interstices between Indigenous and decolonizing studies and education. Each chapter forwards Indigenous principles - such as Land as literacy and water as life - that are grounded in place-specific efforts of creating Indigenous universities and schools, community organizing and social movements, trans and Two Spirit practices, refusals of state policies, and land-based and water-based pedagogies.

Nazis in the Metro - Didier Daeninckx 2014-03-25

A riveting novel of political intrigue, set on the Left Bank of Paris From France's leading political crime writer comes a novel that delves into the country's radical political movements on both the left and the right, in the wake of a brutal attack. When André Sloga, an apparently washed-up novelist with a history of baiting the system, is assaulted and left for dead in the basement of his apartment building, the freelance private eye Gabriel Lecouvreur takes on the case. The police consider it a robbery gone wrong, but Lecouvreur, a great reader who admires Sloga's books, thinks the matter runs deeper than that. And as he looks into it further, he discovers that Sloga had not in fact quit writing after he was dropped by his prestigious publishing house for his increasingly provocative novels. Instead, Sloga was at work on an explosive book that had led him into extremist political circles . . . until someone put a stop to it. Steeped in the real Paris, where graffiti, squats, and skinheads dominate the streets, Didier Daeninckx's Nazis in the Metro is a vivid portrait of a side of the city few foreigners see, wrapped in an utterly gripping mystery.

Tough, wily, dreamlike." -Seattle Times A decade after fleeing for his life, a man is pulled back to Argentina by an undying love. In 1976, Tomás Orilla is a medical student in Buenos Aires, where he has moved in hopes of reuniting with Isabel, a childhood crush. But the reckless passion that has long drawn him is leading Isabel ever deeper into the ranks of the insurgency fighting an increasingly oppressive regime. Tomás has always been willing to follow her anywhere, to do anything to prove himself. Yet what exactly is he proving, and at what cost to them both? It will be years before a summons back arrives for Tomás, now living as Thomas Shore in New York. It isn't a homecoming that awaits him, however, so much as an odyssey into the past, an encounter with the ghosts that lurk there, and a reckoning with the fatal gap between who he has become and who he once aspired to be. Raising profound questions about the sometimes impossible choices we make in the name of love, Hades, Argentina is a gripping, ingeniously narrated literary debut.

Broadband Services - Imrich Chlamtac 2005-06-14

Access to the Internet is an increasing problem in many areas of the world. As the

popularity and usefulness of the Internet increases on a daily basis, lack of access to the technology is putting many groups at a disadvantage in terms of better education, better jobs and even in terms of higher levels of civic participation. However, creating a network infrastructure to serve outlying communities and sectors of the population is not straight-forward. This book brings together all the aspects of the problem – technical, regulatory and economic - into one volume to provide a comprehensive resource. It describes the latest technological advances that allow cost-effective network infrastructures to be built, and places them in the context of the applications and services that the infrastructure will deliver. A section on business models and case studies from North American and Europe demonstrate that the solutions are economically and practically viable. This book is essential for anyone looking to gain an understanding of the issues and technology surrounding the access debate. It will be of particular relevance to network engineers/designers/planners at the incumbent operator companies charged with delivering broadband access to as yet unconnected regions. Governments and regulatory bodies will also find this a useful guide to the problems that they may face.

Germinal - Emile Zola 2020-11-11

Over the open plain, beneath a starless sky as dark and thick as ink, a man walked alone along the highway from Marchiennes to Montsou, a straight paved road ten kilometres in length, intersecting the beetroot fields. He could not even see the black soil before him, and only felt the immense flat horizon by the gusts of March wind, squalls as strong as on the sea, and frozen from sweeping leagues of marsh and naked earth. No tree could be seen against the sky, and the road unrolled as straight as a pier in the midst of the blinding spray of darkness.

Yann Tiersen - Kerber - Yann Tiersen 2021-07-01

(Piano Solo Songbook). "I think there is a similarity between the infinite big and the infinite smallness of everything," says Yann Tiersen. "It's the same experiment looking through a microscope as it is a telescope." Named after a chapel in a small village on the island of Ushant, Kerber marks a new chapter in critically-acclaimed composer Yann Tiersen's career. A chapter still true to Tiersen's nuanced and subtle approach but one that sets out with his most overtly electronic material to date. Beautifully textured, highly immersive and thoughtfully constructed, Tiersen creates an electronic world, providing an

environment in which the piano source exists. A sense of place has often been a central theme in Tiersen's work and here that is no different. Each track is tied to a place mapping out the immediate landscape that surrounds Tiersen's home, linking back to his thoughts on the possibilities of the infinite smallness. This official, exclusive folio is beautifully printed on high-quality, uncoated paper with striking graphic artwork. All seven pieces are presented for solo piano and follow an exclusive introduction to the project.

Caterpillar Club Survivor - Ross Smith Stagg 2007

Spitfire pilot Ross Smith Stagg was one of 33 Allied airmen to defend Darwin against Japanese invasion on May 2, 1943. As one of 14 pilots shot down or experience mechanical failure in the ensuing battle, he parachuted into the sea 18 km from land, 100 km southwest of Darwin in the Fogg Bay area. He reached the shore in a dinghy. For the next 15 days he trudged through inhospitable country in a futile attempt to return to Strauss airbase. What should have been a few days walk turned into his worst possible nightmare as he stumbled aimlessly through mosquito and crocodile infested swamps. "It was almost six days I'd been without sleep, apart from a short period of unconsciousness and those few moments before I fell out of that tree," he said. " I became demented by the cavalcade of mosquitoes and hallucinating badly". His experience was only to worsen - he waded halfway across a tidal river to be confronted by a large saltie. Darwin historian John Haslett help Stagg map the original route by retracing his steps, even managing to relocate an American Kittyhawk Stagg found crashed in the middle of nowhere.

Decolonizing Education - Marie Battiste 2019-01-31

Drawing on treaties, international law, the work of other Indigenous scholars, and especially personal experiences, Marie Battiste documents the nature of Eurocentric models of education, and their devastating impacts on Indigenous knowledge. Chronicling the negative consequences of forced assimilation, racism inherent to colonial systems of education, and the failure of current educational policies for Aboriginal populations, Battiste proposes a new model of education, arguing the preservation of Aboriginal knowledge is an Aboriginal right. Central

to this process is the repositioning of Indigenous humanities, sciences, and languages as vital fields of knowledge, revitalizing a knowledge system which incorporates both Indigenous and Eurocentric thinking.

Learning from Dynamic Visualization - Richard Lowe 2017-05-18

This volume tackles issues arising from today's high reliance on learning from visualizations in general and dynamic visualizations in particular at all levels of education. It reflects recent changes in educational practice through which text no longer occupies its traditionally dominant role as the prime means of presenting to-be-learned information to learners. Specifically, the book targets the dynamic visual components of multimedia educational resources and singles out how they can influence learning in their own right. It aims to help bridge the increasing gap between pervasive adoption of dynamic visualizations in educational practice and our limited understanding of the role that these representations can play in learning. The volume has recruited international leaders in the field to provide diverse perspectives on the dynamic visualizations and learning. It is the first comprehensive book on the topic that brings together contributions from both renowned researchers and expert practitioners. Rather than aiming to present a broad general overview of the field, it focuses on innovative work that is at the cutting edge. As well as further developing and complementing existing approaches, the contributions emphasize fresh ideas that may challenge existing orthodoxies and point towards future directions for the field. They seek to stimulate further new developments in the design and use of dynamic visualizations for learning as well as the rigorous, systematic investigation of their educational effectiveness. The volume sheds light on the complex and highly demanding processes of conceptualizing, developing, implementing dynamic visualizations in practice as well as the challenges relating to research application perspectives.

Let History into the Mathematics Classroom - Évelyne Barbin 2017-10-27

This book brings together 10 experiments which introduce historical perspectives into mathematics classrooms for 11 to 18-year-olds. The authors suggest that students should not only read ancient texts, but also should construct, draw and manipulate. The different chapters refer to ancient Greek, Indian, Chinese and Arabic mathematics as well as to contemporary mathematics. Students are introduced to well-known mathematicians—such as Gottfried Leibniz and Leonard Euler—as well as to less famous practitioners and engineers. Always, there is the attempt to associate the experiments with their scientific and cultural contexts. One of the main values of history is to show that the notions and concepts we teach were invented to solve problems. The different chapters of this collection all have, as their starting points, historic problems—mathematical or not. These are problems of exchanging and sharing, of dividing figures and volumes as well as engineers' problems, calculations, equations and congruence. The mathematical reasoning which accompanies these actions is illustrated by the use of drawings, folding, graphical constructions and the production of machines.

The Kanak Awakening - David A. Chappell 2013-10-31

In 1853, France annexed the Melanesian islands of New Caledonia to establish a convict colony and strategic port of call. Unlike other European settler-dominated countries in the Pacific, the territory's indigenous people remained more numerous than immigrants for over a century. Despite military conquest, land dispossession,

and epidemics, its thirty language groups survived on tribal reserves and nurtured customary traditions and identities. In addition, colonial segregation into the racial category of canaques helped them to find new unity. When neighboring anglophone colonies began to decolonize in the 1960s, France retained tight control of New Caledonia for its nickel reserves, reversing earlier policies that had granted greater autonomy for the islands. Anticolonial protest movements culminated in the 1980s Kanak revolt, after which two negotiated peace accords resulted in autonomy in a progressive form and officially recognized Kanak identity for the first time. But the near-parity of settlers and Kanak continues to make nation-building a challenging task, despite a 1998 agreement among Kanak and settlers to seek a "common destiny." This study examines the rise in New Caledonia of rival identity formations that became increasingly polarized in the 1970s and examines in particular the emergence of activist discourses in favor of Kanak cultural nationalism and land reform, multiracial progressive sovereignty, or a combination of both aspirations. Most studies of modern New Caledonia focus on the violent 1980s uprising, which left deep scars on local memories and identities. Yet the genesis of that rebellion began with a handful of university students who painted graffiti on public buildings in 1969, and such activists discussed many of the same issues that face the country's leadership today. After examining the historical, cultural, and intellectual background of that movement, this work draws on new research in public and private archives and interviews with participants to trace the rise of a nationalist movement that ultimately restored self-government and legalized indigenous aspirations for sovereignty in a local citizenship with its own symbols. Kanak now govern two out of three provinces and have an important voice in the Congress of New Caledonia, but they are a slight demographic minority. Their quest for nationhood must achieve consensus with the immigrant communities, much as the founders of the independence movement in the 1970s recommended.
