Language for Specific Purposes - Mary K. Long 2017-05-01

In the United States today there is lively discussion, both among educators and employers, about the best way to prepare students with high-level language and cross-cultural communication proficiency that will serve them both professionally and personally in the global environment of the twenty-first century. At the same time, courses in business language and medical language have become more popular among students. Language for Specific Purposes (LSP), which encompasses these kinds of courses, responds to this discussion and provides curricular models for language programs that build practical language skills specific to a profession or field. Contributions in the book reinforce those models with national survey results, demonstrating the demand for and benefits of LSP instruction. With ten original research-based chapters, this volume will be of interest to high school and university language educators, program directors, linguists, and anyone looking to design LSP courses or programs in any world language.

How to Measure Performance and Use Tests - Lynn Lyons Morris 1987-12

The "CSE Program Evaluation Kit" is a series of nine books intended to assist people conducting program evaluations. This volume, the seventh in the kit, provides an overview of a variety of approaches to measuring performance outcomes. It presents considerations in deciding what to measure and in selecting or developing instruments best suited to an evaluation's goals. Methods for ensuring validity and reliability are

also discussed. Chapter 1, "Measuring Performance for Program Evaluation: Preliminary Considerations," presents an overview of various strategies to systematically measure the attainment of performance objectives. Chapter 2, "Locating Existing Measures," describes the types of performance tests that might already be available, from commercially published instruments, curriculum embedded tests, and state- or local-mandated measures. Chapter 3, "Determining How Well a Test Fits the Program," provides assistance in determining the appropriateness of an existing instrument. Chapter 4, "Constructing a Test for Program Evaluation," describes the basic steps in developing a performance measure. Chapters 5, "Validity and Reliability of Performance Instruments," and 6, "Using Performance Test Data," deal with the technical quality and use of tests. One appendix contains a table for program-test comparison, and the other presents a reminder of some common item construction errors. (Contains 20 tables, 16 figures, and 19 references.) (SLD)

Literacy Instruction for Adolescents - Karen D. Wood 2009-03-12

Thorough and accessible, this professional resource and text shows how the latest research in adolescent literacy can be translated into effective practice in middle and high school classrooms. Leading authorities discuss findings on the adolescent learner, addressing such essential topics as comprehension, content-area literacy, differentiated instruction, gender differences in literacy learning, and English language learners. With a focus on evidence-based methods, coverage ranges from techniques for building digital literacy and comprehension skills to strategies for flexible grouping and writing instruction. Ideal for courses in adolescent literacy, each chapter includes guiding questions, discussion questions, and classroom examples.
