**Biodeterioration 7** - D. R. Houghton  
2012-12-06

Because of the magnificent response to the call for papers for the 7th International Biodeterioration Symposium held at Cambridge, UK, some difficulties have been experienced in the editing of these proceedings. The numbers of papers submitted exceeded expectation and because of this it

has been necessary to accommodate those not actually in the proceedings into the International Biodeterioration journal. A small number of papers were not suitable for publication and were therefore eliminated. Many authors disregarded the guidelines laid down for the length of submitted papers. However, every attempt has been made to

accommodate the maximum number of contributions in the proceedings. The original selection included those which most nearly conformed to the length requirement. Even so this has meant, in many cases, cutting down the text, eliminating tables and/or illustrations and pruning the reference list. When references have been trimmed a note has been included to the effect that an extended list may be obtained from the author/senior author. Where it was not possible to carry out these procedures without seriously altering the text and the import of the paper they have been included amongst those to be published in the journal *International Biodeterioration*. The exceptions to the procedures outlined above are the invited review papers which have been presented in full. Happily, the authors have been conscientious in keeping to the guidelines laid down for these contributions.

*Curriculum Theory in Adult and Lifelong Education* - Colin Griffin 2018-10-03

Originally published in 1983. Curriculum studies and curriculum theory have tended to be pursued almost exclusively in the context of the school. Developments in curriculum theory have therefore not found reflections in much theoretical work in adult education. This book points to the necessity of a curriculum theory for adult and continuing education through discussion of both curriculum studies and the principles of adult education. The various ways in which systems of adult education are now developing are reviewed, in social,

political and cultural terms, and recent advances in education theory are related to developments in post-school education.

### **Sustainable Entrepreneurship and Social Innovation** - Katerina Nicolopoulou 2016-11-10

Sustainable entrepreneurship has attracted growing attention in both scholarly and practitioner circles. Focusing on generating social, environmental and business value, the notion has been raised more recently to address the contribution of entrepreneurial activities to sustainable economic and social development. Sustainable Entrepreneurship and Social Innovation builds on a theoretical framework that addresses related topics via a combination of insights from sustainability, policy, managerial, strategic, innovation and

institutional perspectives. Providing empirical casework as well as a conceptual and theoretical framework, the book takes a global, interdisciplinary approach to the emergent field of sustainable entrepreneurship. The book highlights elements of sustainable entrepreneurship which have a societal impact as well as regional relevance and related aspects of innovation are also presented. Definitional issues are further elaborated in order to encompass the main inter-connected fields of study, sustainable entrepreneurship and social innovation. This book is an important resource for academic researchers, and postgraduate and advanced undergraduate students in the fields of entrepreneurship, innovation and sustainability.

### **The Routledge Handbook of Material Culture in Early Modern Europe** -

The Routledge Handbook of Material Culture in Early Modern Europe marks the arrival of early modern material culture studies as a vibrant, fully-established field of multi-disciplinary research. The volume provides a rounded, accessible collection of work on the nature and significance of materiality in early modern Europe – a term that embraces a vast range of objects as well as addressing a wide variety of human interactions with their physical environments. This stimulating view of materiality is distinctive in asking questions about the whole material world as a context for lived experience, and the book considers material interactions at all social levels. There are 27 chapters by leading experts as well as 13 feature object studies to highlight specific items that have survived from this period (defined broadly as c.1500-c.1800). These contributions

explore the things people acquired, owned, treasured, displayed and discarded, the spaces in which people used and thought about things, the social relationships which cluster around goods – between producers, vendors and consumers of various kinds – and the way knowledge travels around those circuits of connection. The content also engages with wider issues such as the relationship between public and private life, the changing connections between the sacred and the profane, or the effects of gender and social status upon lived experience. Constructed as an accessible, wide-ranging guide to research practice, the book describes and represents the methods which have been developed within various disciplines for analysing pre-modern material culture. It comprises four sections which open up the approaches of various disciplines to non-specialists: 'Definitions, disciplines, new directions',

'Contexts and categories', 'Object studies' and 'Material culture in action'. This volume addresses the need for sustained, coherent comment on the state, breadth and potential of this lively new field, including the work of historians, art historians, museum curators, archaeologists, social scientists and literary scholars. It consolidates and communicates recent developments and considers how we might take forward a multi-disciplinary research agenda for the study of material culture in periods before the mass production of goods.

*Medicine's Strangest Cases* - Michael O'Donnell 2016-04-04

*Medicine's Strangest Cases* is a choice prescription of weird and wonderful tales from the history of medicine, featuring the German doctor who fought a duel with a sausage, the Harley Street physician-turned-novelist who invented a disease - and its remedy - to keep his clients happy, and the quiet and cautious Swiss scientist who inadvertently unleashed LSD on the world. The stories in this book are bizarre, fascinating, hilarious, and, most importantly, true. Revised, redesigned and updated for 2016, this book is the perfect gift for medical students, clinicians, hypochondriacs and history fans. Laugh out loud and wince with sympathy with this rundown of the most bizarre medical cases ever. Word count: 45,000

*Architects of Annihilation* - Gotz Aly 2015-09-24

*Architects of Annihilation* follows

the activities of the demographers, economists, geographers and planners in the period between the disorderly excesses of the November 1938 pogrom and the fully-effective operation of the gas chambers at Auschwitz in summer 1942. The authors, both journalists and historians, argue that this group of intellectuals, often combining academic, civil service and Party functions, made an indispensable contribution to the planning and execution of the Final Solution. More than that, in the economic and demographic rationale of these experts, the Final Solution was only one element in a far-reaching programme of self-sufficiency which privileged the German Aryan population.

**Reinventing Prosperity** - Graeme

Maxton 2016-10-08

“An important contribution to the global debate about growth, equality, climate change, and the path to a viable human future.” –David Korten, international bestselling author of *When Corporations Rule the World* The biggest challenges facing human wellbeing today—widening income inequality, continuing global poverty, and environmental degradation—may be simple to solve in theory. But, because we are required to come up with solutions that are acceptable to a political majority in the rich world, they are much harder to solve in practice. Most of the commonly proposed “solutions” are simply not acceptable to most people. Many of these proposed solutions—like stopping the use of fossil fuels—require a sacrifice today in order to obtain an uncertain advantage in the far future. Therefore they are politically infeasible in the modern world, which

is marked by relatively short term thinking. In *Reinventing Prosperity*, Graeme Maxton and Jorgen Randers provide a new approach altogether through thirteen recommendations which are both politically acceptable and which can be implemented in the current period of slow economic growth around the world. *Reinventing Prosperity* solves the forty-year-old growth/no-growth standoff, by providing a solution to income inequality, continuing global poverty and climate change, a solution that will provide for economic growth but with a declining ecological footprint. *Reinventing Prosperity* shows us how to live better on our finite planet—and in ways we can agree on. “An essential guide to those who want to change the world for the better—and for certain.” –Ha-Joon Chang, international bestselling author of *23 Things They Don’t Tell You About Capitalism* “[A] well-argued book . . . explaining complex issues

in a style that is clear, logical, and succinct.” –Publishers Weekly

Inclusive Designing - P. M. Langdon  
2014-07-08

'Inclusive Designing' presents the proceedings of the seventh Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT '14). It represents a unique multi-disciplinary workshop for the Inclusive Design Research community where designers, computer scientists, engineers, architects, ergonomists, policymakers and user communities can exchange ideas. The research presented at CWUAAT '14 develops methods, technologies, tools and guidance that support product designers and architects to design for the widest possible population for a given range of capabilities, within a contemporary social and economic context. In the context of developing demographic changes leading to greater numbers of older people and people with disabilities, the general field of Inclusive Design

Research strives to relate the capabilities of the population to the design of products. Inclusive populations of older people contain a greater variation in sensory, cognitive and physical user capabilities. These variations may be co-occurring and rapidly changing leading to a demanding design environment. Recent research developments have addressed these issues in the context of: governance and policy; daily living activities; the workplace; the built environment, Interactive Digital TV and Mobile communications. Increasingly, a need has been identified for a multidisciplinary approach that reconciles the diverse and sometimes conflicting demands of Design for Ageing and Impairment, Usability and Accessibility and Universal Access. CWUAAT provides a platform for such a need. This book is intended for researchers, postgraduates, design practitioners, clinical

practitioners, and design teachers.

**Analyzing Popular Music** - Allan F. Moore 2003-05-22

How do we know music? We perform it, we compose it, we sing it in the shower, we cook, sleep and dance to it. Eventually we think and write about it. This book represents the culmination of such shared processes. Each of these essays, written by leading writers on popular music, is analytical in some sense, but none of them treats analysis as an end in itself. The book presents a wide range of genres (rock, dance, TV soundtracks, country, pop, soul, easy listening, Turkish Arabesk) and deals with issues as broad as methodology, modernism, postmodernism, Marxism and communication. It aims to encourage listeners to think more seriously about the 'social' consequences of the music they spend time with and is the first collection of such essays to incorporate contextualisation in this way.

**Imperfect Justice** - Stuart Eizenstat 2009-08-05

In the second half of the 1990s, Stuart Eizenstat was perhaps the most controversial U.S. foreign policy official in Europe. His mission had nothing to do with Russia, the Middle East, Yugoslavia, or any of the other hotspots of the day. Rather, Eizenstat's mission was to provide justice—albeit belated and imperfect justice—for the victims of World War

II. Imperfect Justice is Eizenstat's account of how the Holocaust became a political and diplomatic battleground fifty years after the war's end, as the issues of dormant bank accounts, slave labor, confiscated property, looted art, and unpaid insurance policies convulsed Europe and America. He recounts the often heated negotiations with the Swiss, the Germans, the French, the Austrians, and various Jewish organizations, showing how these moral issues, shunted aside for so long, exposed wounds that had never healed and conflicts that had never been properly resolved. Though we will all continue to reckon with the crimes of World War II for a long time to come, Eizenstat's account shows that it is still possible to take positive steps in the service of justice.
