The Old Drift - Namwali Serpell
2019-03-21
**Winner of the Arthur C. Clarke Award
2020** 'The great African novel of the
twenty-first century' Tade Thompson,
author of Rosewater On the banks of the
Zambezi River, a few miles from the
majestic Victoria Falls, there was once a

colonial settlement called The Old Drift. In
1904, in a smoky room at the hotel across
the river, an Old Drifter named Percy M.
Clark, foggy with fever, makes a mistake
that entangles his fate with those of an
Italian hotelier and an African busboy. So
begins a cycle of unwitting retribution
between three Zambian families as they

collide and converge over the course of the century, into the present and beyond.

Savannah Runner - Cody Franklin

2020-01-15

"Savannah Runner" will explore the absurdity of civil war, fall of nations and how even unimportant regions of the world can become simply a game of chess for the biggest empires on Earth. Set with a cast who for the most part, could only care about themselves.

Networking Europe - Erik van der Vleuten
2006

German Colonialism and National

Identity - Michael Perraudin 2010-09-14

German colonialism is a thriving field of study. From North America to Japan, within Germany, Austria and Switzerland, scholars are increasingly applying post-colonial questions and methods to the study of Germany and its culture. However, no introduction on this emerging field of study has combined political and cultural approaches, the study of literature and art, and the examination of both metropolitan and local discourses and memories. This book will fill that gap and offer a broad prelude, of interest to any scholar and student of German history and culture as well as of colonialism in general. It will be an indispensable tool for both undergraduate and postgraduate teaching. .

Countryside - Rem Koolhaas 2020

From animals to robotization, climate change to migration, Rem Koolhaas presents a new collaborative project exploring how countryside everywhere is

transforming beyond recognition. The pocketbook gathers in-depth essays spanning from Fukushima to the Netherlands, Siberia to Uganda - an urgent dispatch from this long-neglected realm, revealing its radical potential for changing everything about how we live

The Prince of Milk - Exurb1a 2018-04-05

All of time is simultaneous. Matter tends towards perfection. Cats can be dicks sometimes. The Prince of Milk is a leisurely stroll from prehistory to the distant future, stopping for tea in the 21st century English countryside. Before the time machine, before the undead mannequins, before the cat with the universe eye, there were the arbiters. They regulated the world and kept reality from banging into itself. All was well in paradise. But even the gods end up in love triangles from time to time. Several galaxies and a dimension away, Wilthail is a small English village alternating between

flower shows and the occasional divorce. Life ambles. Old men and women make peace with their gods. Little do they know three deities walk among them already, biding their time before an ancient grudge rears its head. The world is a garden. The world is a gutter. Which is it? PRAISE FOR THE PRINCE OF MILK: "Please stop contacting me. I'm not going to read your book." - Exurb1a's mother "Sorry, I don't like science fiction." - Woman on the bus "Is that you again? American Front (The Great War, Book One)

- Harry Turtledove 1999-05-01

"This is state-of-the-art alternate history, nothing less."—Publishers Weekly (starred review) When the Great War engulfed Europe in 1914, the United States and the Confederate States of America, bitter enemies for five decades, entered the fray on opposite sides: the United States aligned

with the newly strong Germany, while the Confederacy joined forces with their longtime allies, Britain and France. But it soon became clear to both sides that this fight would be different—that war itself would never be the same again. For this was to be a protracted, global conflict waged with new and chillingly efficient innovations—the machine gun, the airplane, poison gas, and trench warfare. Across the Americas, the fighting raged like wildfire on multiple and far-flung fronts. As President Theodore Roosevelt rallied the diverse ethnic groups of the northern states—Irish and Italians, Mormons and Jews—Confederate President Woodrow Wilson struggled to hold together a Confederacy still beset by ignorance, prejudice, and class divisions. And as the war thundered on, southern blacks, oppressed for generations, found themselves fatefully drawn into a climactic

confrontation . . .

Atlantia - Allyson Braithwaite Condie 2014
"Rio has always dreamed of leaving the underwater city of Atlantia for life in the

Above; however, when her twin sister, Bay, makes an unexpected decision, Rio is left stranded below where she must find a way to unlock the secrets of the siren voice she has long hidden and save Atlantia from destruction"--

The Atlantropa Articles - Cody Franklin
2018-10-15

In this novel by the creator of Alternate History Hub, WWII never happened, all of Europe hails Hitler, and the Mediterranean Sea is a desert. Instead of attempting to take over the world, Adolf Hitler and his Nazi party orchestrate an entirely different, yet equally ambitious plan: draining the Mediterranean Sea. With the promise of fertile new land for settlement, millions of jobs and endless hydroelectric energy, all of Europe signs a treaty called The Atlantropa Articles to bring about this new world. With Hitler hailed as a new Napoleon, fascism becomes a mainstream ideology. Two

millennia later, Europe has been united under the swastika. But the plan of a lush new land was never realized. Instead, the Mediterranean Sea has become a desert basin known only as the Kiln, and southern Europe has been abandoned. This is where Ansel Engel's story begins. Deep in the Kiln, Ansel faithfully serves the Reich—until a shocking discovery leads him to unravel generations of lies and false prophets.

The Saga of Tanya the Evil, Vol. 3 (manga) - Carlo Zen 2018-07-24

At last, the long-awaited days of tranquility are here! Tanya begins attending war college, where she spends her time feasting in leisure. But who would've thought that a conversation with General von Zettour would lead to another turn of events...! Will her days of delicious bread and clean bed sheets come to an end?

Black Empire - George Samuel Schuyler
1991

George Samuel Schuyler, was a noted black satirist of the early 20th century. This book is an intricate tale of black nationalism, science fiction, and incredible feats of derring-do intended to bolster black pride and accomplishment in the uneasy years before World War II. The book originally ran as weekly serialized fiction in the Philadelphia Courier from 1936 to 1938. Principal character Dr. Henry Belsidus is obsessed with releasing blacks from the crushing tyranny of racism and poverty, and he plans to take over the world and enlists black intellectuals to help him. Underlying the story is an attempt to resolve the philosophical, economic, and cultural chasms between blacks and whites. The book reflects the hope and despair felt by blacks during this time--From Library Journal.

Dead Letters - Caite Dolan-Leach
2017-02-21

A missing woman leads her twin sister on a twisted scavenger hunt in this clever debut novel with eccentric, dysfunctional characters who will keep you guessing until the end—for readers of Luckiest Girl Alive and The Wife Between Us. Ava has her reasons for running away to Paris. But when she receives the shocking news that her twin sister, Zelda, is dead, she is forced to return home to her family's failing vineyard in upstate New York. Knowing Zelda's penchant for tricks and deception, Ava is not surprised when she receives her twin's cryptic message from beyond the grave. Following her sister's trail of clues, Ava immerses herself in Zelda's drama and her outlandish circle of friends and lovers, and soon finds herself confronted with dark family legacies and twisted relationships. Is Zelda trying to punish Ava for leaving? Or is she simply trying to write her own ending? Caite Dolan-Leach's debut thriller is a

literary scavenger hunt for secrets hidden everywhere from wine country to social media, and buried at the dysfunctional heart of one utterly unforgettable family. Praise for *Dead Letters* “Dolan-Leach writes like Paula Hawkins by way of Curtis Sittenfeld.”—Amy Gentry, author of *Good as Gone* “A sharp, wrenching tale of the true love only twins know . . . Dolan-Leach nimbly entwines the clever mystery of Agatha Christie, the wit of Dorothy Parker, and the inebriated Gothic of Eugene O’Neill.”—Kirkus Reviews “A smart, dazzling mystery . . . Dolan-Leach revels in toying with both Ava and her audience . . . and the result is captivating.”—Publishers Weekly (starred review) “Draws you in like you are part of the story itself, living and breathing alongside the compelling characters as they uncover the dark secrets of their complicated family.”—Wendy Walker, author of *All Is Not Forgotten*

“Push-pull tension . . . This book is wine-soaked yet lucid, comforting and frightening, asking the big questions about intimacy and loyalty.”—Caroline Kepnes, author of *You*

[The Secret](#) - Sean Kelly & Ted Mann & Byron Preiss 2014-03-18

The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings

and verses of THE SECRET. Are you smart enough? THE SECRET: A TREASURE HUNT was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum. *New Geographies* - Stephen Ramos 2009-09 *New Geographies* journal aims to examine the emergence of the “geographic,” a new

but for the most part latent paradigm in design today—to articulate it and to bring it to bear effectively on the social role of design. Although much of the analysis of this context in architecture, landscape, and urbanism derives from social anthropology, human geography, and economics, the journal aims to extend these arguments to the impact of global changes on the spatial dimension, whether in terms of the emergence of global spatial networks, global cities, or nomadic practices, and how these inform design practices today. Through essays and design projects, the journal aims to identify the relationship between the very small and the very large, and intends to open up discussions on the expanded role of the designer, with an emphasis on disciplinary reframings, repositionings, and attitudes. Third Reich Victorious - Peter G Tsouras 2016-11-30

War is a deadly game of chance where a single detail or decision can have far-reaching consequences. What if Hitler's generals had captured the cream of the British Expeditionary Force at Dunkirk? What if Turkey had sided with Germany and smashed through Russia's back door to claim the prized Caucasus oil fields? What if Rommel had driven the British back into the sea on D-Day and the Luftwaffe had defeated the RAF in the Battle of Britain. The Allies could have lost the Second World War in many ways, and ten noted historians show clearly how in this collection of fascinating, provocative scenarios, based on meticulous research. By turns gripping and chilling, *Third Reich Victorious* offers a fresh insight into the vagaries of war that can make all the difference between the victor and the vanquished.

[Driving Europe](#) - Frank Schipper 2008

Today we can hardly imagine life in Europe

without roads and the automobiles that move people and goods around. In fact, the vast majority of movement in Europe takes place on the road. Travelers use the car to explore parts of the continent on their holidays, and goods travel large distances to reach consumers. Indeed, the twentieth century has deservedly been characterized as the century of the car. The situation looked very different around 1900. People crossing national borders by car encountered multiple hurdles on their way. Technically, they imported their vehicle into a neighboring country and had to pay astronomical import duties. Often they needed to pass a driving test in each country they visited. Early on, automobile and touring clubs sought to make life easier for traveling motorists. International negotiations tackled the problems arising from differing regulations. The resulting volume describes everything from the standardized traffic signs

that saved human lives on the road to the Europabus taking tourists from Stockholm to Rome in the 1950s. *Driving Europe* offers a highly original portrait of a Europe built on roads in the course of the twentieth century.

The Disunited States of America - Harry Turtledove 2013-10-02

Justin's having the worst trip ever. He and his mother are Time Traders, traveling undercover to different alternate realities of Earth so they can take valuable resources back to their own timeline. In some of these worlds, Germany won World War I or the world has been destroyed by nuclear warfare. Justin and his mother are in an America that never became the United States: each state is like a country, and many of them are at war with one another. Their mission takes them to Virginia, which is on the verge of bloody violence with Ohio. Beckie is from California and, like the

rest of her world, is unaware that Time Traders exist. The only reason she's in small-town Virginia is because her grandmother dragged her there to visit old relatives. Beckie is just as horrified by the violence and racism of the alternate Virginia as Justin is, and the two are drawn to each other. But when full-fledged war breaks out between Ohio and Virginia, including a biologically designed plague, will either of them manage to get back home? Forget about home: will they make it out alive?

Marvel Science Stories - VÁRIOS AUTORES 2016-08-02

A FICTION HOUSE PRESS PULP REPLICA: The First Issue, dated August 1938, of MARVEL SCIENCE STORIES featuring "Survival" by Arthur J. Burks, "Avengers of Space" by Henry Kuttner, "The Dark Heritage" by Robert O. Kenyon, "Dictator of the Americas" by James Hall, "Through the

Time-Radio" by Stanton A. Coblenz, and "Monsters of the Mountain" by Leon Byrne. *The Future Is Yours* - Dan Frey 2021-02-09 Two best friends create a computer that can predict the future. But what they can't predict is how it will tear their friendship—and society—apart. "A fantastic page-turner and a future classic."—Peter Clines, New York Times bestselling author of *Paradox Bound* IN DEVELOPMENT AS AN HBO MAX ORIGINAL SERIES If you had the chance to look one year into the future, would you? For Ben Boyce and Adhi Chaudry, the answer is unequivocally yes. And they're betting everything that you'll say yes, too. Welcome to *The Future*: a computer that connects to the internet one year from now, so you can see who you'll be dating, where you'll be working, even whether or not you'll be alive in the year to come. By forming a startup to deliver this revolutionary technology to the world, Ben

and Adhi have made their wildest, most impossible dream a reality. Once Silicon Valley outsiders, they're now its hottest commodity. The device can predict everything perfectly—from stock market spikes and sports scores to political scandals and corporate takeovers—allowing them to chase down success and fame while staying one step ahead of the competition. But the future their device foretells is not the bright one they imagined. Ambition. Greed. Jealousy. And, perhaps, an apocalypse. The question is . . . can they stop it? Told through emails, texts, transcripts, and blog posts, this bleeding-edge tech thriller chronicles the costs of innovation and asks how far you'd go to protect the ones you love—even from themselves.

The Fifth Science - Exurb1a 2019-02-13
The Galactic Human Empire was built atop four sciences: logic, physics, psychology,

and sociology. Standing on those pillars, humans spent 100,000 years spreading out into the galaxy: warring, exploring, partying -- the usual. Then there was the fifth science. And that killed the empire stone dead. The Fifth Science is a collection of 12 stories, beginning at the start of the Galactic Human Empire and following right through to its final days. We'll see some untypical things along the way, meet some untypical folk: galactic lighthouses from the distant future, alien tombs from the distant past, murderers, emperors, archaeologists and drunks; mad mathematicians attempting to wake the universe itself up. And when humans have fallen back into savagery, when the secrets of space folding and perfect wisdom are forgotten, we'll attend the empire's deathbed, hold its hand as it goes. Unfortunately that may well only be the beginning.

The Empty Sea - Ilaria Perissi 2021-02-12

The "Blue Economy" is used to describe all of the economic activities related to the sea, with a special emphasis on sustainability. Traditional activities such as fisheries, but also undersea mining, tourism, and scientific research are included, as well as the phenomenal growth of aquaculture during the past decade. All of these activities, and the irresistible prospect of another new frontier, has led to enthusiastic and, most likely, overenthusiastic assessments of the possibilities to exploit the sea to feed the world, provide low-cost energy, become a new source of minerals, and other future miracles. This book makes sense of these trends and of the future of the blue economy by following our remote ancestors who gradually discovered the sea and its resources, describing the so-called fisherman's curse - or why fishermen have always been poor, explaining why humans

tend to destroy the resources on which we depend, and assessing the realistic expectations for extracting resources from the sea. Although the sea is not so badly overexploited as the land, our demands on ecosystem services are already above the oceans' sustainability limits. Some new ideas, including "fishing down" for untapped resources such as plankton, could lead to the collapse of the entire marine ecosystem. How Neanderthals crossed the sea in canoes, how it was possible for five men on a small boat to kill a giant whale, what kind of oil the virgins of the Gospel put into their lamps, how a professor of mathematics, Vito Volterra, discovered the "equations of fishing," why it has become so easy to be stung by a jellyfish while swimming in the sea, and how to play "Moby Dick," a simple board game that simulates the overexploitation of natural resources are just some of the questions

that you will be able to answer after reading this engaging and insightful book about the rapidly expanding relationship between humanity and the sea.

The People's Flag - Tom Black 2019-08-11
1917. The Kaiser declines to resume unrestricted submarine warfare.1919. France collapses into Syndicalist revolution.1921. Britain signs the 'Peace with Honour', formally ending the Great War.1925. An incident involving Welsh miners leads to a General Strike, which soon becomes the British Revolution...In the opening volumes of this faux-history book, scholars from another timeline come together to write a flowery and officially-sanctioned history of the Union of Britain, a socialist republic on the island of Great Britain. From its fiery birth through to bureaucratic political manoeuvres, this book spans the years 1925 to 1940. Based on notes from early builds of the Hearts of

Iron modification 'Kaiserreich: Legacy of the Weltkrieg', and penned by a former 'Kaiserreich' developer, 'The People's Flag' fleshes out the backstory of the Union of Britain, and offers speculative detail on other radically altered countries in the 'Kaiserreich' universe. Lovers of 'Kaiserreich' and newcomers to the entire setting alike will love Tom Black's ('Agent Lavender', 'Zonen', 'Meet The New Boss') history book from another world.

Answers to Questions You've Never Asked - Joseph Pimenti 2017-11-09

The #1 bestselling trivia collection with bizarre facts to entertain you for hours, from the creator of YouTube's RealLifeLore. Where can I move to so that I'm never tempted by McDonald's again? How far into the Pacific does Trump's wall stretch? If Plato came back to life, what would he think of modern democracy? Why do all empires fail? Who decides what countries are allowed to participate in the Olympics? What makes Finland so great? When you take the most absurd parts of history, science, economics, and geography, you end up with a pretty confusing picture of humanity. Why do we have borders, what's the furthest you can get from the ocean, how do you qualify as a country, and why did Vikings wear those silly helmets? These are just a few of the strange questions that

bounce around the head of YouTube sensation Joseph Piseni, aka RealLifeLore. In his debut book, Piseni explores the nonsensical humor of the universe with in-depth analysis of empires, economies, and ecosystems as he helps answer the ridiculous. Why, you ask? Because someone has to. Using line drawings, graphs, and charts, Piseni not only details the absurd—he also provides explanations on why things are . . . and why they aren't.

New Ways and Needs for Exploiting Nuclear Energy - Didier Sornette
2018-09-29

The history of mankind is a story of ascent to unprecedented levels of comfort, productivity and consumption, enabled by the increased mastery of the basic reserves and flows of energy. This miraculous trajectory is confronted by the consensus that anthropogenic emissions are harmful and must decrease, requiring de-

carbonization of the energy system. The mature field of indicator-based sustainability assessment provides a rigorous systematic framework to balance the pros and cons of the various existing energy technologies using lifecycle assessments and weighting criteria covering the environment, economy, and society, as the three pillars of sustainability. In such a framework, nuclear power is ranked favorably, but since emphasis is often placed on radioactive wastes and risk aversion, renewables are usually ranked top. However, quantifying the severity of the consequences of nuclear accidents on a rough integral cost basis and balancing severity with low core-damage accident probabilities indicates that the average external cost of such accidents is similar to that of modern renewables, and far less than carbon-based energy. This book formulates the overall goal and associated

unprecedented demanding criteria of taming nuclear risks by excluding mechanisms that lead to serious accidents and avoiding extremely long stewardship times as far as possible, by design. It reviews the key design features of nuclear power generation, paving the way for the exploration of radically new combinations of technologies to come up with “revolutionary” or even “exotic” system designs. The book also provides scores for the selected designs and discusses the high potential for far-reaching improvements, with small modular lines of the best versions as being most attractive. Given the ambition and challenges, the authors call for an urgent increase in funding of at least two orders of magnitude for a broad international civilian “super-Apollo” program on nuclear energy systems. Experience indicates that such investments in fundamental technologies enable

otherwise unattainable revolutionary innovations with massive beneficial spillovers to the private sector and the public for the next generations.

Contemporary Megaprojects - Seth Schindler 2021-08-13

Contemporary megaprojects have evolved from the discreet, modernist projects undertaken in the past by centralized authorities to encompass everything from large-scale construction to space exploration. Contemporary Megaprojects explores how these projects have been impacted by cutting-edge technology, the private sector, and the processes of decentralization and dematerialization. With case studies ranging from mega-plantations in Southeast Asia to ocean mapping to sports events, the contributions in this collected volume demonstrate the increasing ambition and pervasiveness of these projects, as well as their significant

impact on both society and the environment.

Has It Come to This? - J.P. Sapinski

2020-11-13

Geoengineering is the deliberate and large-scale intervention in the Earth's climate system in an attempt to mitigate the adverse effects of global warming. Now that climate emergency is upon us, claims that geoengineering is inevitable are rapidly proliferating. How did we get into this situation where the most extreme path now seems a plausible development? Is it an accurate representation of where we are at? Who is this "we" who is talking? What options make it onto the table? Which are left out? Whom does geoengineering serve? Why is the ensemble of projects that goes by that name so salient, even though the community of researchers and advocates is remarkably small? These are some of the questions that the thinkers contributing to

this volume are exploring from perspectives ranging from sociology and geography to ethics and Indigenous studies. The editors set out this diverse collection of voices not as a monolithic, unified take on geoengineering, but as a place where creative thinkers, students, and interested environmental and social justice advocates can explore nuanced ideas in more than 240 characters.

Shadow Heir (Dark Swan 4) - Richelle Mead 2012-02-02

New York Times bestselling author Richelle Mead returns to the Otherworld, a mystic land inextricably linked to our own - and balanced precariously on one woman's desperate courage... Shaman-for-hire Eugenie Markham strives to keep the mortal realm safe from trespassing entities. But as the Thorn Land's prophecy-haunted queen, there's no refuge for her and her soon-to-be-born children when a mysterious

blight begins to devastate the Otherworld... The spell-driven source of the blight isn't the only challenge to Eugenie's instincts. Fairy king Dorian is sacrificing everything to help, but Eugenie can't trust the synergy drawing them back together. The uneasy truce between her and her shape shifter ex-lover Kiyō is endangered by secrets he can't - or won't - reveal. And as a formidable force rises to also threaten the human world, Eugenie must use her own cursed fate as a weapon - and risk the ultimate sacrifice...

Virtual History - Niall Ferguson

2011-06-02

What if Britain had stayed out of the First World War? What if Germany had won the Second? How would England look if there had been no Cromwell? What would the world be like if Communism had never collapsed? And what if John F. Kennedy had lived? In this acclaimed book, leading

historians from Andrew Roberts to Michael Burleigh explore what might have been if nine of the most decisive moments in modern history had never happened.

Last and First Men - Olaf Stapledon

2022-05-17

Last and First Men is a "future history" science fiction novel, describing the history of humanity from the present onwards across two billion years and eighteen distinct human species, of which our own is the first. Conception of history follows a repetitive cycle with many varied civilizations rising from and descending back into savagery over millions of years, as the later civilizations rise to far greater heights than the first. It is an early example of the fictional supermind; a consciousness composed of many telepathically linked individuals.

Aeon Legion - J. P. Beaubien 2016-07-11

Time travel has made the Edge of Time a

dangerous place. To protect the Edge of Time from the disastrous alterations of time travelers, the Aeon Legion seeks the greatest soldiers and warriors from the most bloody, war-torn eras in history. Those they deem worthy gain a chance to compete in the toughest training program ever designed. Terra Mason, a plain eighteen-year-old girl from the modern United States, has an impressive stubborn streak. Her persistence and bravery gains the notice and sponsorship of one of the Aeon Legion's greatest heroines. Now Terra must turn that stubbornness into determination if she is to contend with history's finest soldiers and somehow pass the Aeon Legion's final test, the mysterious Labyrinth. She will not quit. Terra will prove that even someone as average as her can still be a heroine. Hanns Speer is polite, good-natured, charming, a genius inventor of a time travel machine, and a dedicated

member of the Nazi Party. Yet he cannot understand why people from the future regard him and his fellow Nazis as monsters. Now he must use his charisma and cunning to challenge the seemingly invincible Aeon Legion and its monopoly on time travel. He will not quit. Hanns will steal history itself if he has to, mistakenly believing it will prove him to be a hero.

I Am Uncle Sam (Hardcover) - Dean Mosley 2021-12-19

The second half of the twentieth century saw the United States endure a series of paradigm changes on the cultural, political, and social level. Spread out over the span of some fifty years, the population gradually acclimated to those paradigm shifts, but in this alternate timeline, that is not the case. A dramatic change in demographics, overstepping of federal power, and polarization of ideologies all occur within the span of a single decade, giving rise to

religious zealotry, ethnic tribalism, extreme views on authority, and more. I Am Uncle Sam explores the woes and drives of American Nationalism from the perspectives of four disenfranchised young men whose lives become tied to the events of a Second American Civil War; a story that demonstrates how love for homeland becomes hatred for all which threatens it. The Nargun and the Stars - Patricia Wrightson 2008

Winner of the 1974 CBCA Book of the Year When Simon Brent's parents are killed in a car accident he is taken to live with his mother's second cousins, Edie and Charlie, on Wongadilla, their 5000 acre sheep run in the Hunter Valley. Simon, with his city attitudes feels like an outsider, unable even to bring himself to call his cousins by name. But Simon is not the only thing that doesn't belong in Wongadilla. The arrival of heavy machinery intent on clearing the land

brings to life the Nargun, a great rock, older than time itself, that has slowly dragged itself into the valley - and with it, a simmering rage that drives it to kill. Before long, Simon is captivated by the land and by the Potkoorak, the Turongs and the Nyols, mischievous and ancient creatures steeped in the traditions of the land and its inhabitants. As the terror begins, Simon, his cousins and the creatures must use their wit and ingenuity to drive the monster away. Rich in mythology, The Nargun and the Stars evokes an image of this land and its people, and carries an environmental message that is as important and relevant today as it was thirty years ago.

With Hitler hailed as a new Napoleon, fascism becomes a mainstream ideology. Two millennia later, Europe has been united under the swastika. But the plan of a lush new land was never realized. Instead, the Mediterranean Sea has become a desert basin known only as the Kiln, and southern Europe has been abandoned. This is where Ansel Engel's story begins. Deep in the Kiln, Ansel faithfully serves the Reich—until a shocking discovery leads him to unravel generations of lies and false prophets.
