pasiones humanas sin disfraces de ocasian. Los comportamientos cotidianos y las pasiones extremas que se plantean en este libro dejan al lector asumir sus propias conclusiones frente a los hechos a los que es invitado a concurrir como testigo.

Recueil Des Cours, 1989-I - Francois Rigaux 1989-12-21

La calle moderna en 30 autores contemporáneos y un pionero - Angel Martín Ramos 2014

La calle de nuestras ciudades está sometida a controversia al coincidir sobre ella las más diversas dudas acerca de las variaciones que desarrolla, mientras que las innovaciones que provoca y el vigor que despliega no dejan de confi rmar su condición de vivo elemento de nuestra civilización urbana. Sometida a continua mutación, como reveladora forma de la sociedad, baluarte de la seguridad urbana o lugar del intercambio

socializador, la complejidad de los factores que inciden en el proceso de formalización de una vía urbana hace cada vez más difícil acometer su proyecto con seguridad. De ahí la necesidad de diferenciar en ello las cuestiones trascendentes de las contingentes ante el importante peso que la propia constitución material de la calle toma en la satisfacción de las necesidades y en los objetivos que trate de cumplir. La profundidad espacial de la vía, la posición geográfica que ocupa, los efectos semánticos derivados de ella o la condición educativa que desempeña se añaden a la carga que acumula la calle moderna. Un espacio vital de nuestras ciudades en permanente conflicto entre las cuestiones que la realidad suscita y las visiones y señuelos que se entrometen.

A Theory of Constitutional Rights - Robert Alexy 2010

In any country where there is a Bill of Rights, constitutional rights reasoning is an important part of the legal process. As more and more countries adopt Human Rights legislation and accede to international human rights agreements, and as the European Union introduces its own Bill of Rights, judges struggle to implement these rights consistently and sometimes the reasoning behind them is lost. Examining the practice in other jurisdictions can be a valuable guide. Robert Alexy's classic work reconstructs the reasoning behind the jurisprudence of the German Basic Law and in doing so provides a theory of general application to all jurisdictions where judges wrestle with rights adjudication. In considering the features of constitutional rights reasoning, the author moves from the doctrine of proportionality, procedural rights and the structure and scope of constitutional rights, to general rights of liberty and equality and the problem

of horizontal effect. A postscript written for the English edition considers critiques of the Theory since it first appeared in 1985, focusing in particular on the discretion left to legislatures and in an extended introduction the translator argues that the theory may be used to clarify the nature of legal reasoning in the context of rights under the British Constitution. This book will be of central interest to all legal and constitutional theorists and human rights scholars.

The extractive industries (EI) sector occupies an outsize space in the economies of many developing countries. Policy makers, economists, and public finance professionals working in such countries are frequently confronted with issues that require an in-depth understanding of the sector, its economics, governance,

and policy challenges

Theory of Legal Principles - Humberto Avila 2007-09-26

This book examines the distinction between principles and rules so that they can be better understood and applied. It structures the distinction between principles and rules on different foundations than those jurisprudence ordinarily employs. It also proposes a new model to explain the normative species, which includes structured weighing on the application process while encompassing substantive criteria of justice in its argument.

Principles of Operations Management - Jay Heizer 2007

KEY BENEFIT: This text allows students to apply what they've learned to real company challenges and best practices by offering a multitude of problems in the text and integrated case studies on video. KEY TOPICS: Its coverage includes an extensive amount of service applications and firms to give students an in-depth look at operations in the real world. MARKET: For general business students interested in operations management and gaining the fundamental working knowledge of a firm.

The Foundations of Bioethics - H. Tristram Engelhardt 1996

This new, thoroughly recast Second Edition has been acclaimed as "the most important book written since the beginning of that strange project called bioethics" (Stanley Hauerwas, Duke University). Its philosophical exploration of the foundations of secular bioethics has been substantially expanded. The book challenges the values of much of contemporary bioethics and health care

policy by confronting their failure to secure the moral norms they seek to apply. The nature of health and disease, the definition of death, the morality of abortion, infanticide, euthanasia, physician-assisted suicide, germline genetic engineering, triage decisions and distributive justice in health care are all addressed within an integrated reconsideration of bioethics as a whole. New material has been added regarding social justice, health care reform and environmental ethics. The very possibility and meaning of a secular bioethics are re-explored.

Colour Me Beautiful - Carole Jackson 2007

Interaction of Color - Josef Albers 1975

The masterworks of one of the most influential teacher-artists of the twentieth century, originally published as a limited, boxed edition in 1963, was conceived as a guide and teaching aid for artists, instructors, and students. A paperbound edition, containing the unabridged text of the original edition, plus ten representative color plates, chosen from the original silk-screen reproductions and printed by offset lithography, was published in 1971. Since those color plates have now been worn out in repeated reprintings, Mr. Albers has selected ten different color studies, with new comments, for this revised edition. "The text of Interaction of Color provides the careful reader with the content of Josef Albers' famous color course. His teaching is based on learning by direct perception, and not by theories or color systems. There are many books

on color on the market, but no one combines eyesight with such profound insight as Josef Albers does in *Interaction of Color*."—Hannes Beckmann "The publication of this famous book in paperback is an event. . . . It is clearly written and easy to understand. . . . This book ought to be owned by any serious student or teacher, regardless of the kind of painting he does."—The Artist

Feng Shui por Habitaciones. Quiero un Hogar - Isabel Sánchez Rivera 2020-05-27

Crear un HOGAR es posible, descubrir como funciona tu casa, armonizar las diferentes estancias te permite, convertirla en la verdadera aliada de tu ÉXITO, porque el hogar que deseas comienza en TU MENTE. "Feng Shui habitación por habitación" Todo lo que necesitas para conseguirlo a tu alcance, para que vayas a tu rimo, de esa forma irás transformando, decorando y generando ambientes que te harán sentir bien, atrayendo el bienestar y la armonía que buscas. Cuentas además con una plantilla guía para ayudarte a hacer los cambios, de esta forma será mucho más sencillo hacer este viaje al corazón de tu hogar. Desde la entrada a la cocina, el comedor y los baños, el corazón del salón, dormitorio para el amor y por supuesto, las habitaciones de los niños y adolescentes, todos los espacios son parte de tu casa, lleva la magia Feng Shui a cada uno de ellos. Una experiencia diferente, en la que además podrás conocerte mejor, porque tu casa, lo dice todo de TI. "Observa tu hogar y descubre lo que hay dentro de ti." Pequeños cambios = Grandes Transformaciones". Más de 10 años transformando la vida de muchas personas gracias a su forma natural y sencilla de trabajar los espacios.

Goethe's Theory of Colours - Johann Wolfgang von Goethe 1840

This work by Johann Wolfgang von Goethe (1749-1832) was translated into English in 1840 by Sir Charles Eastlake (1793-1865), painter and later keeper of the National Gallery. Goethe's 1810 work was rejected by many contemporary scientists because it appeared to contradict the physical laws laid down by Newton. However, its focus on the human perception of the colour spectrum, as opposed to the observable optical phenomenon, was attractive to, and influential upon, artists and philosophers. As Eastlake says in his preface, the work's dismissal on scientific grounds had caused 'a well-arranged mass of observations and experiments, many of which are important and interesting', to be overlooked. Eastlake also puts Goethe's work into its aesthetic and scientific context and describes its original reception. His clear translation of Goethe's observations and experiments on colour and light will appeal to anyone interested in our responses to art.

Mudéjar - Gonzalo M. Borrás Gualis 2010

El legado andalusí en la cultura española plantea una reflexión sobre el mudéjar recurriendo a las obras de arte como documento plástico primordial para la

construcción de la historia y como elemento material que permite hacer tangibles ideas, conceptos y fenómenos abstractos o complejos. Se han seleccionado unas 150 piezas originales de naturaleza muy diversa: encuadernaciones, cerámicas, muebles, tejidos, yeserías, cerrajería, armas y metalistería, planos, maquetas, fotografías. La muestra cuenta, además, con ambientación sonora, correspondiente a grabaciones de música mudéjar. La delimitación cronológica de las piezas seleccionadas como la del propio arte mudéjar abarca desde el siglo XII hasta el XVII, siendo éste un periodo muy amplio en el arte occidental europeo en el que se suceden los estilos románico, gótico, renacentista y barroco, con los que el mudéjar interrelaciona. En la muestra se incluyen también, para una adecuada contextualización, algunas piezas de arte andalusí que nos muestran cómo el arte mudéjar es pervivencia y desarrollo de esta

tradición artística en la España cristiana.

The Problems of Philosophy - Bertrand Russell 2012-05-04
Accessible, thought-provoking study by Nobel Prize-winner considers distinction between appearance and reality, existence and nature of matter, idealism, inductive logic, intuitive knowledge, many other stimulating subjects.
