*Whips of the West* - David W. Morgan 2007

This book is designed to bring together and record the development of whips in the United

States. It covers the production of buggy whips in Westfield MA, a center for the growth of the Industrial Revolution in New England and carries on to the Diamond Whip Company in Chicago and the handcrafted whips of the far West. The book is liberally illustrated and records essential historical documentation in the appendices.

**Braiding Fine Leather** - David W. Morgan 2002

"Designed to help the beginning leather braider acquire basic skills in a straightforward manner, this book shows readers how to braid simple projects fairly quickly. With close attention to detail and a little practice using the methods

described here, novices can produce attractive and enduring items from either precut lace or from a skin or side of leather. Leather braiding was developed in Australia in whipmaking shops. The craft had been carried to Australia by thongmakers from England, who were familiar with the thongs used on finely braided carriage whips. Kangaroo leather, one of the finest leathers available for braiding, provided the material for high-quality work, and a large and discriminating market in Australia led to improvements in techniques. Using these highly refined techniques and providing complete

instructions and clear closeup photographs showing each step in the process, David Morgan has created an excellent book for those who want to learn to braid leather. A metallurgical engineer by training and occupation, in the 1960s Morgan became interested in Australian braided work made from kangaroo hide. With his wife he set up a part-time mail-order business selling a variety of Australian imports. In the 1980s he made the whips for the Indiana Jones movies, and he has been making them ever since. By 1990 he had abandoned metallurgy to run the mail-order business full time. He is now following an interest

in the historical aspects of cattle-working whips."--

*The Art of Braiding, the Basics* - Gail Hought  
1996-08-01

The Art of Braiding, the Basics, the B&W original edition, is based on a book written for myself and later used as a basic skills guide for my braiding classes. It contains what I call the “must know skills of braiding.” The buttons and plaiting in this publication contain skills a braider needs to know before attempting most braided projects. At the same time, there is information an accomplished braider may be interested in, such as the single string 6 bight long pineapple button. The first in a series of four braiding books, The Art of Braiding, The Basics is an affordable 45 plus page spiral bound book with a vinyl cover. It is filled with high

quality black and white pen and ink illustrations plus more text and buttons not readily available in other publications. The text and illustrations are intermixed to assist understanding and to keep the braider from becoming lost while referring between the book and the work in progress.

Finally, there are instructions for giving braided projects and items that finished professional look.

The Art of Braiding, The Basics is a “must have” for those with braiding interests.

[How to Make Whips](#) - Ron Edwards 2009-07

Ron Edwards was born in Australia in 1930 and brought up in the country where small farmers still

plowed with horses and harvested their half acres with sickles and scythes, and larger properties relied on the annual visit of the steam-driven threshing machines. By the 1940s all this had vanished, and Edwards had realized that the country's traditional crafts also were disappearing. He began making drawings and notes of them and published these materials in his native country. *How to Make Whips* is the American edition of his ninth book. The first section gives instructions for a basic eight-strand whip; the second deals with the making of fine kangaroo hide whips. Other chapters explain the making of

bullwhips, snake whips, and whips made from precut lace. Also included are instructions on plaiting names in whips and using plaiting designs for whip handles.

**Tanned Leather Hand-Made Bags** - Yoko Ganaha  
2018

This book shows how to make 40 bags and miscellaneous goods with very simple, clear-cut instructions that even total beginners can follow.

What makes this book special is that it has patterns with stitch marks at the end of the book.

Leather is usually sewn after piercing holes for stitching, which means that punching the holes is the most important part. If the number of holes and their stitching positions match, all that is left to do is sew the item together along the holes.

Tanned leather gradually softens. In this book, since thick leather is used and linings are not, the shape of your bag may change depending on age and use. This is actually one of the wonders of aged, tanned leather, that you will enjoy.
