Expanding Underrepresented Minority Participation - Institute of Medicine 2011-07-29

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to

achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation

currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive

road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development. *The Artist Project* - Christopher Noey 2017-09-19 Artists have long been stimulated and motivated by the work of those who came before them—sometimes, centuries before them. The Idea of Music in Victorian Fiction -

Nicky Losseff 2016-03-03

The Idea of Music in Victorian Fiction seeks to address fundamental questions about the function, meaning and understanding of music in nineteenth-century culture and society, as mediated through works of fiction. The eleven essays here, written by musicologists and literary scholars, range over a wide selection of works by both canonical writers such as Austen, Benson, Carlyle, Collins, Gaskell, Gissing, Eliot, Hardy, du Maurier and Wilde,

and less-well-known figures such as Gertrude Hudson and Elizabeth Sara Sheppard. Each essay explores different strategies for interpreting the idea of music in the Victorian novel. Some focus on the degree to which scenes involving music illuminate what music meant to the writer and contemporary performers and listeners, and signify musical tastes of the time and the reception of particular composers. Other essays in the volume examine aspects of gender, race, sexuality and class that are illuminated by the deployment of music by the novelist. Together with its companion volume, *The Figure of Music in Nineteenth-Century British Poetry* edited by Phyllis Weliver (Ashgate, 2005), this collection suggests a new network of methodologies for the

continuing cultural and social investigation of nineteenth-century music as reflected in that period's literary output.

Making Religion and Human Rights at the United Nations - Helge Årsheim 2018-07-23

This volume examines the different and sometimes contradictory approaches of four UN human rights committees to the concept of religion. Drawing on critical perspectives from religious studies, the book combines a genealogical assessment of the role of religion in international law with a detailed textual study of the reporting practice of the committees monitoring racial discrimination, civil and political rights, women's rights, and children's rights. Årsheim argues that the role of religion within the rights traditions

monitored by the committees varies to the extent that their recommendations risk contradicting one another, thereby undermining their credibility and potential to bring about real change on the ground: Where some committees view religion singularly as a core individual right, others see religion partly as an inherent threat to the realization of other rights, but also as a potent social force to be reckoned with. In order to remedy this situation, Årsheim proposes the publication of a joint general comment by all the committees, spelling out their approach to the role of religion in the implementation of human rights.

Portrait of a Young Painter - Mary Kay Vaughan 2015-02-16
In *Portrait of a Young Painter*, the distinguished historian Mary Kay Vaughan adopts a biographical approach to understanding the culture surrounding the Mexico City youth rebellion of the 1960s. Her chronicle of the life of painter Pepe Zúñiga counters a literature that portrays post-1940 Mexican history as a series of uprisings against state repression, injustice, and social neglect that culminated in the student protests of 1968. Rendering Zúñiga's coming of age on the margins of formal politics, Vaughan depicts midcentury Mexico City as a culture of growing prosperity, state largesse, and a vibrant, transnationally-informed public life that

produced a multifaceted youth movement brimming with creativity and criticism of convention. In an analysis encompassing the mass media, schools, politics, family, sexuality, neighborhoods, and friendships, she subtly invokes theories of discourse, phenomenology, and affect to examine the formation of Zúñiga's persona in the decades leading up to 1968. By discussing the influences that shaped his worldview, she historicizes the process of subject formation and shows how doing so offers new perspectives on the events of 1968.

Spanish Gothic - Xavier Aldana Reyes
2017-03-16

This book presents the first English introduction to the broad history of the

Gothic mode in Spain. It focuses on key literary periods, such as Romanticism, the fin-de-siècle, spiritualist writings of the early-twentieth century, and the cinematic and literary booms of the 1970s and 2000s. With illustrative case studies, Aldana Reyes demonstrates how the Gothic mode has been a permanent yet ever-shifting fixture of the literary and cinematic landscape of Spain since the late-eighteenth century. He proposes that writers and filmmakers alike welcomed the Gothic as a liberating and transgressive artistic language.

The Globalization of Knowledge in the Iberian Colonial World - Helge Wendt 2016

The Europeanization of National Foreign Policies towards Latin

America - Lorena Ruano
2013-05-07

Who shapes the European Union's policy towards Latin America? How has this EU policy modified individual member states' relations with the region? This book provides a comparative account of seven member states' bilateral links with Latin America since 1945, in the context of their EU membership and based on the concept of 'Europeanization'. It illustrates how and why the main architects of this EU policy have been Spain and Germany. In contrast, Poland, Sweden and Ireland, which had little previous interaction with Latin America, have developed their current relations with that region virtually as a result of their EU membership. The United Kingdom and France lie in the middle: they have been influential in certain

policy-areas and key periods in history, while they have adapted to what is done at the EU level in others. Practitioners, established academic experts as well emerging scholars in the field bring to be bear a novel combination of pioneering research and cutting edge conceptual analysis on this important but neglected area of the EU's foreign relations.

New Digital Worlds -
Roopika Risam 2018-11-15

The emergence of digital humanities has been heralded for its commitment to openness, access, and the democratizing of knowledge, but it raises a number of questions about omissions with respect to race, gender, sexuality, disability, and nation. Postcolonial digital humanities is one approach to uncovering and remedying inequalities in digital knowledge production, which is implicated in an information-age politics of knowledge. *New Digital Worlds* traces the formation of postcolonial studies and digital humanities as fields, identifying how they can intervene in knowledge production in the digital age. Roopika Risam examines the role of colonial violence in the development of digital archives and the possibilities of postcolonial digital

archives for resisting this violence. Offering a reading of the colonialist dimensions of global organizations for digital humanities research, she explores efforts to decenter these institutions by emphasizing the local practices that subtend global formations and pedagogical approaches that support this decentering. Last, Risam attends to human futures in new digital worlds, evaluating both how algorithms and natural language processing software used in digital humanities projects produce universalist notions of the "human" and also how to resist this phenomenon. *Tribal Names of the Americas* - Patricia Roberts Clark 2009-10-21 Scholars have long worked to identify the names of tribes and other groupings in the Americas, a task made

difficult by the sheer number of indigenous groups and the many names that have been passed down only through oral tradition. This book is a compendium of tribal names in all their variants--from North, Central and South America--collected from printed sources. Because most of these original sources reproduced words that had been encountered only orally, there is a great deal of variation. Organized alphabetically, this book collates these variations, traces them to the spellings and forms that have become standardized, and supplies see and see also references. Each main entry includes tribal name, the "parent group" or ancestral tribe, original source for the tribal name, and approximate location of the name in the original source material.

Speaking Private Authority - Roberto J. Flores 2020-05-26
Speaking Private Authority: The Construction of Sustainability in Forests and Fisheries

expands upon current understandings of the emergent global phenomenon that is private authority. As private authority is becoming increasingly important in the conduct of global governance, broadening our collective understanding of it will prove beneficial. Roberto J. Flores argues that private actors are not simply outgrowths of existent social structures or material conditions, rather they are purposive agents strategically pursuing an agenda. Therefore, explaining private authority requires an examination of the constitutive elements that underlie this social phenomenon—to which the author applies an analytical framework that combines social network theory with discourse analysis. The author applies these

tools to two cases taken from the environmental sector—forests and fisheries—and finds that as environmental politics takes on an increasingly networked character the actors that are best able to generate and wield private authority are those that strategically place themselves in-between networks through the construction of discursive nodal points around which competing actors are forced to converge—at the level of identity. The case studies specifically look at how particular actors leveraged construction of the sustainable development concept in order to strategically place themselves in advantageous positions for exercising private authority.

Dear Life - Rachel
Clarke 2020-01-30
Shortlisted for the
Costa Biography Award
'What a remarkable book
this is; tender, funny,
brave, heartfelt,
radiant with love and
life. It brought me
often to laughter and -
several times - to
tears. It sings with joy
and kindness' Robert
Macfarlane From the
Sunday Times bestselling
author of *Your Life in
My Hands* comes this
vibrant, tender and
deeply personal memoir
that finds light and
love in the darkest of
places. As a specialist
in palliative medicine,
Dr Rachel Clarke chooses
to inhabit a place many
people would find too
tragic to contemplate.
Every day she tries to
bring care and comfort
to those reaching the
end of their lives and
to help make dying more
bearable. Rachel's

training was put to the
test in 2017 when her
beloved GP father was
diagnosed with terminal
cancer. She learned that
nothing - even the best
palliative care - can
sugar-coat the pain of
losing someone you love.
And yet, she argues, in
a hospice there is more
of what matters in life
- more love, more
strength, more kindness,
more joy, more
tenderness, more grace,
more compassion - than
you could ever imagine.
For if there is a
difference between
people who know they are
dying and the rest of
us, it is simply this:
that the terminally ill
know their time is
running out, while we
live as though we have
all the time in the
world. *Dear Life* is a
book about the vital
importance of human
connection, by the
doctor we would all want
by our sides at a time

of crisis. It is a love letter - to a father, to a profession, to life itself.

The Value of Preventive Medicine - David Evered

Women Musicians in Victorian Fiction, 1860-1900 - Phyllis

Weliver 2018-02-06

This title was first published in 2000.

Phyllis Weliver investigates representations of female musicians in British novels from 1860 to 1900 with regard to changing gender roles, musical practices and scientific discourses. During this time women were portrayed in complex and nuanced ways as they played and sang in family drawing rooms. Women in the 19th century were judged on their manners, appearance, language and other accomplishments such as sewing or

painting, but music stood out as an area where women were encouraged to take centre stage and demonstrate their genteel education, graceful movements and self-expression. However within the novels of the Victorian were beginning to move away from portraying the musical accomplishments of middle- and upper-class women as feminine and worthwhile towards depicting musical women as truly dangerous. This book explores the reasons for this reaction and the way labels and images were constructed to show extremes of behaviour, and it looks at whether the fiction was depicting the real trends in music at the time.

Regions and Economic Resilience - Raul Ramos
2020-12-14

The term "resilience"

originated in environmental studies and describes one's biological capacity to adapt and thrive under adverse environmental conditions. Regional economic resilience is defined as the capacity of a territory's economy to resist and/or recover quickly from external shocks, often even improving on its prior situation (before the shock). The contributions in this book analyse different channels related to processes of mitigation (resistance–recovery) and adaptive resilience (reorientation–renewal), in a wide variety of geographical settings and scales. While the different chapters include relevant methodological advances in this literature, they also obtain relevant results from a policy perspective. Moreover, the wide spectrum of

topics and analyses among the contributions in this book extend the current framework, to analyse regional economic resilience, from the intersection of several disciplines involving geographers, economists and demographers, as well as environmental scientists.

The Prosecutor - Augusto Roa Bastos 2018-02-20
The Prosecutor is the

third novel of a trilogy written by the internationally famous Paraguayan author Augusto Roa Bastos. It was preceded by the novels *Son of Man* and *I The Supreme*. Together these three works contemplate what the author has termed "the monotheism of power." *The Prosecutor* explores the atrocities of the Alfredo Stroessner dictatorship in Paraguay, which lasted from 1954 to 1989. Through connections with important Paraguayan historical figures, such as Francisco Solano López, the novel links the protagonist to Paraguay's past as he struggles to give meaning to his life by assassinating the dictator and freeing the Paraguayan people. Combining autobiography, detective fiction, historical novel and philosophy, the novel

examines the question of whether one man has the right to judge another. A provocative introduction and comprehensive notes by Helene Carol Weldt-Basson illuminate this translation of one of Roa Bastos's most important works.

Music and British Culture, 1785-1914 -

Christina Bashford 2000

This book takes the

themes and approaches of Professor Cyril Ehrlich's pathbreaking work on British social history in music as its inspiration. In sixteen substantial new essays, all specially commissioned from cultural and musical historians, it embraces the music marketplace, piano culture, musicians work patterns, music institutions and audiences, concert and repertoire history, issues in performance,

criticism and reception, gender, and national and urban identities all with a clear focus on art music traditions (significantly under-treated by music scholars in this area). The cultural importance of serious music, from Belfast to Calcutta, has long been assumed for the period but rarely demonstrated. Here it is central, interwoven with the social and economic realities confronting music people in Britain across the 19th century.
