**Klingsor's Last Summer** - Hermann Hesse  
2013-01-22

This is the first English-language edition of Klingsor's Last Summer, which was originally published in 1920, a year after Demian and two years before Siddhartha. The book has three parts: a story called A Child's Heart, followed by Klein and Wagner and Klingsor's Last Summer, Hesse's two longest and finest novellas. These novellas, along with Siddhartha (the three works were republished in 1931 under the title The Inward Way), are the first fruits of the period that began in the spring of 1919, when Hesse settled in the Ticino mountain village of Montagnola to start a new life without his wife and children. A Child's Heart, written in January 1919, in Basel, concerns the transmutation of a boy's innocence into knowledge of good and evil, and the painful guilt that accompanies this process. Both Klein and Wagner (written in May-June 1919, immediately after the arrival in Montagnola) and Klingsor's Last Summer (written shortly after) are

set in a southern landscape that reflects Hesse's life that summer; both novellas have heroes who are more or less Hesse's age at the time; and in both the hero's death is preceded by a grand vision of unity in which the polarities of life are resolved. Hesse exposes himself mercilessly in Klein and Wagner, a story of escape, wrenching loose, letting go. But the expressionist painter Klingsor is a more direct self-portrait of the Hesse of 1919.

**Representing Others** - Kate Sturge 2014-06-03

Cultural anthropology has always been dependent on translation as a textual practice, and it has often used 'translation' as a metaphor to describe ethnography's processes of interpretation and cross-cultural comparison. Questions of intelligibility and representation are central to both translation studies and ethnographic writing - as are the dilemmas of cultural distance or proximity, exoticism or appropriation. Similarly, recent work in museum

studies discusses problems of representation that are raised by ethnographic museums as multimedia 'translations'. However, as yet there has been remarkably little interdisciplinary exchange: neither has translation studies kept up with the sophistication of anthropology's investigations of meaning, representation and 'culture' itself, nor have anthropology and museum studies often looked to translation studies for analyses of language difference or concrete methods of tracing translation practices. This book opens up an exciting field of study to translation scholars and suggests possible avenues of cross-disciplinary collaboration.

Herlock Sholmes est une copie transparente du héros de Conan Doyle, Sherlock Holmes, qui alors

connaît déjà un très grand succès en France. Cette aventure d'Arsène Lupin, au scénario et au ton humoristiques, tranche avec des œuvres plus sombres de Leblanc. Le baron d'Imblevalle, à qui on a volé une lampe contenant un bijou précieux, fait appel à Herlock Sholmès pour la retrouver. Lupin envoie une lettre au détective, le priant de ne pas intervenir. Sholmès n'en tient aucun compte et se rend à Paris avec Wilson.

## **Data Profiling** - Ziawasch Abedjan 2022-06-01

Data profiling refers to the activity of collecting data about data, {i.e.}, metadata. Most IT professionals and researchers who work with data have engaged in data profiling, at least informally, to understand and explore an unfamiliar dataset or to determine whether a new dataset is appropriate for a particular task at hand. Data profiling results are also important in a variety of other situations, including query optimization, data integration, and data cleaning. Simple metadata are statistics, such as the number of rows and columns, schema and datatype information, the number of distinct values, statistical value distributions, and the

number of null or empty values in each column. More complex types of metadata are statements about multiple columns and their correlation, such as candidate keys, functional dependencies, and other types of dependencies. This book provides a classification of the various types of profilable metadata, discusses popular data profiling tasks, and surveys state-of-the-art profiling algorithms. While most of the book focuses on tasks and algorithms for relational data profiling, we also briefly discuss systems and techniques for profiling non-relational data such as graphs and text. We conclude with a discussion of data profiling challenges and directions for future work in this area.
