Stroke in the Older Person - Sunil K. Munshi 2020-01-09

Stroke is a condition that predominantly affects older people, often leading to death, disability and dependency as well as occupancy of hospital and nursing-home beds. Older stroke patients are similar in many ways to their younger counterparts, but at the same time exhibit several key differences. Their outcome and care are complicated by delayed diagnosis, polypharmacy, difficult

rehabilitation, ageism, false assumptions of poor outcome, multiple co-morbidity, social issues including implications for independent living, ethical dilemmas, and many others. The proportion of older people is increasing every day and with it the burden of disease and disability. The implications this has for health services are immense, especially for long-term conditions. Despite this there is limited literature available to clinicians on stroke with a particular focus on this age group. Traversing the whole stroke pathway, Stroke in the Older Person brings together key discussions on every aspect of the disease as it affects the older person, including its general aspects and those very specific to the older populations. All chapters are written by highly experienced clinicians that offer up-to-date evidence-based information as well as practical tips to promote excellent, empathetic care to older patients. Over 30 chapters, this resource addresses the epidemiology, aetio-pathogenesis, clinical presentation, diagnostic work-up (including imaging), primary and secondary prevention, and rehabilitation of older people. There is a special focus on intracerebral haemorrhage, carotid re-vascularisation, transient ischaemic attack, cognitive impairment, research, ethical and moral dilemmas including DNAR, advanced directives and end-of-life care.

Working with Children and Adolescents - Janet V. DeLany 2009

This book is a valuable resource for directing the clinical reasoning of occupational therapy assistants as they prepare to provide services to children and adolescents. Divided into 4 sections, this book explains best-practice occupational therapy services based on knowledge about occupations, occupation based and non-occupation based conceptual models, and the occupational development of children and adolescents. Through the use of multiple vignettes and case studies, the occupational therapy assistants learn how to implement interventions for children and adolescents who are experiencing specific health and learning challenges. Reflection and application questions at the end of each chapter reinforce text content. Occupational therapy assistant

Occupational Therapy in Australia - Ted Brown 2020-07-16

This ground-breaking text provides a comprehensive guide to occupational therapy in Australia, from its role in the healthcare system to the scope and nature of its practice. The authors begin with an overview of the history of occupational therapy in Australia, the ethical and legal aspects of its practice and its role in population health and health promotion. The values and philosophy of occupational therapy are considered next, together with the roles and responsibilities of practitioners and specific practice features, including client-centred practice, evidence-based practice, research in occupational therapy and clinical reasoning. Key issues, including occupational analysis, the development of occupations across the lifespan, occupational therapy assessment, Indigenous issues, practice in rural and remote areas and advocacy, leadership and

entrepreneurship, are also examined in detail. The first text specifically written for Australian entry-to-practice students by Australian authors, this book is destined to become an essential reference for both students and professionals in the field. 'Truly a valuable resource for all Australian occupational therapy students and practitioners.' Professor Jenny Ziviani, Children's Allied Health Research, The University of Queensland 'This is a text that will have many editions and document the evolution of the profession for decades to come.' Professor Carolyn M. Baum, School of Medicine, Washington University in St. Louis

Occupational Therapy and Physical Dysfunction E-Book - Michael Curtin 2009-10-20
The sixth edition of this classic book remains a key text for occupational therapists, supporting their practice in working with people with physical impairments, stimulating reflection on the knowledge, skills and attitudes which inform practice, and encouraging the development of occupation-focused practice. Within this book, the editors have addressed the call by leaders within the profession to ensure that an occupational perspective shapes the skills and strategies used within occupational therapy practice. Rather than focusing on discrete diagnostic categories the book presents a range of strategies that, with the use of professional reasoning, can be transferred across practice settings. The new editors have radically updated the book, in response to the numerous internal and external influences on the profession, illustrating how an occupational perspective underpins occupational therapy practice. A global outlook is intrinsic to this edition of the book, as demonstrated by the large number of contributors recruited from across the world. Covers everything the student needs within the physical disorders part of their course Links theory of principles to practice and management Written and edited by a team of internationally experienced OT teachers, clinicians and managers Gives key references and further reading lists for more detailed study Written within a framework of lifespan development in line with current teaching and practice Includes practice scenarios and case studies Focuses on strategies Subtitle reflecting the primacy of occupation in occupational therapy practice Inclusion of practice scenarios to illustrate the application of theory to practice Features such as chapter summaries and key points, providing a quick overview of each chapter A focus on strategies rather than diagnostic categories Consideration of individuals, groups and communities An international perspective Language that is person-centred and inclusive New editorial team endorsed by the former editors including Annie Turner

Occupational Therapy in Orthopaedics and Trauma - Madeleine Mooney 2013-05-20

This book fills a gap in providing specialist information on orthopaedics and trauma occupational therapy. Its contributors bring together information on the

aetiology, surgical input and the occupational therapy intervention appropriate to this client group. It is divided into two main sections, the first being orthopaedics and the second orthopaedic trauma. The first part is further subdivided to cover lower limb surgery, upper limb surgery, spinal conditions, and paediatric orthopaedic conditions. In Part two, principles of fracture management are covered, followed by pelvic and acetabular reconstruction, hand injuries and traumatic amputation.

Warlow's Stroke - Graeme J. Hankey 2019-01-28

A practical textbook, based on a problem-oriented workflow, that will improve patients' likelihood of full recovery from stroke and prevent future strokes from occurring. Stroke is the leading cause of adult disability and is in the top five causes of death globally. *Warlow's Stroke: Practical Management, 4th Edition* takes a problem-oriented approach and addresses the questions posed by a stroke patient in the order they are likely to present in clinical practice, for instance, 'Is it a stroke?', 'What sort of stroke?', 'What caused it?', and 'What can be done about it?'. Beginning with chapters phrased as questions, the book walks the reader through a standard clinical workflow, exploring the practical skills and assessment required at each stage of patient management. Early chapters cover: locating the vascular lesion, identifying the involved arterial territory, the role imaging should play, and the application thereof. Subsequent chapters look at what causes a transient or persistent ischemic event, an intracerebral hemorrhage and a subarachnoid hemorrhage. Unusual causes of ischemic stroke and transient ischemic attack are also covered. The book then presents a practical approach to the management of stroke and transient ischemic attack; offers specific treatments for acute ischemic stroke and aneurysmal subarachnoid hemorrhage; provides ways for professionals to prevent first or recurrent stroke; and more. Final chapters of the book discuss rehabilitation after stroke, how patients and carers can be supported in the short term and long term, prevention of recurrent stroke, and the organization of stroke services. *Warlow's Stroke: Practical Management, 4th Edition* Follows clinical workflow for stroke analysis Features evidence-based approach throughout Offers practical application aimed at improving patient outcomes Written and edited by internationally renowned experts in the field An essential resource for all practitioners involved in the care of patients who suffer from cerebrovascular disease, but particularly suitable for neurologists, residents, geriatricians, stroke physicians, radiologists and primary care physicians.

Activity Analysis - Gayle Ilene Hersch 2005

To respond to the renewed focus by the occupational therapy profession upon occupation, the fifth edition of Activity Analysis and Application has been updated and renamed to reflect this latest emphasis. While Activity Analysis: Application to Occupation, Fifth Edition maintains the sequential process of learning activity analysis, this step-by-step approach now helps students analyze activity for the purpose of optimizing the client's occupational performance. Gayle Hersch, Nancy Lamport, and Margaret Coffey successfully guide students through the development of clinical reasoning skills critical to planning a client's return to meaningful engagement in valued occupations. The authors utilize a straightforward teaching approach that allows students to progress developmentally in understanding both the analysis and application of activity to client intervention. The Occupational Therapy Practice Framework: Domain and Process, with a prominent focus on occupation as this profession's philosophical basis for practice, has been incorporated in the updated forms and explanations of the activity analysis approach. Activity Analysis: Application to Occupation, Fifth Edition is a worthy contribution to the professional education of occupational therapists in furthering their understanding and application of activity and occupation. Features: The newly titled Client-Activity Intervention Plan that synthesizes the activity analysis into client application. Objectives at the beginning of each unit. Discussion questions and examples of daily life occupations. A Web site including 5 forms where students and practitioners can download and print information for class assignments and clinical settings.

Acquired Brain Injury - Jean Elbaum 2007-08-08

This book details how medical and clinical teams that are comprehensive and interdisciplinary are able to effectively address the multiple difficulties that can result from an Acquired Brain Injury (ABI). Coverage describes the medical specialists that are integral members of a team and their specialized roles in assessment and treatment. It reviews some of the vital specialty areas that are often overlooked. The book also examines key discipline areas, such as occupational and speech/language therapies, and describes the main behavioral difficulties exhibited by individuals with ABI.

Ryan's Occupational Therapy Assistant - Karen Sladyk 2001

The classic foundation work developed by Sally Ryan, COTA, ROH, has been completely revised and updated to reflect current healthcare trends. The reformulation of Ryan's Occupational Therapy Assistant: Principles, Practice Issues and Techniques, Third Edition includes occupation-based case studies that highlight the didactic material presented in each chapter, along with an updated style of information. Four sections make up the new integrated text. The first section looks at important foundation concepts such as history, uniform technology, and the occupational therapy process. The second section introduces readers to people who are experiencing the challenges of disabilities. The chapters provide general information about the disabilities, as well as essential vocabulary and key concepts. The third section provides information on the "doing" of occupational therapy. Foundation treatment techniques are introduced so readers can master basic skills and continue to research current practice. Lastly, the fourth section focuses on the management aspects of an OTA's professional life.

How-to information, as well as professional development, is the focus of this section.

A Comprehensive Guide to Geriatric Rehabilitation - Timothy L. Kauffman 2014-09-05

Now in its third edition, this trusted clinical guide enables both the busy practitioner and student to review or to learn about a range of pathologies, conditions, examinations, diagnostic procedures, and interventions that can be effectively used in the physical rehabilitation of older people. It presents a broad overview of age-related physiological changes as well as specific professional discipline perspectives. Organized into eleven distinct and interrelated units, the first unit begins with key anatomical and physiological considerations seen with aging which have significant impact on the older person. The second and third units go on to review important aging-related conditions and disorders of the musculoskeletal and neuromuscular/neurological systems respectively. Neoplasms commonly encountered in older people are the focus of the fourth unit; while aging-related conditions of the cardiovascular, pulmonary, integumentary and sensory systems are presented in units five through seven. Unit eight highlights a range of specific clinical problems and conditions commonly encountered with older patients. Critically, all of these units emphasize important examination and diagnostic procedures needed for a thorough evaluation and stress interventions that can be of significant benefit to the older patient. The ninth unit presents select physical therapeutic interventions that are especially important in managing rehabilitative care. Key societal issues related to aging are discussed in the tenth unit. Finally, the concluding eleventh unit focuses on the successful rehabilitation team that includes both professional and non-professional caregiver members. A trusted guide to the conditions and problems faced when evaluating and treating geriatric patients Extensive coverage over 84 chapters, each written by an expert in the field Includes imaging, vision and the aging ear Cross-referenced - providing the complexity and inter-relatedness of co-morbidities common to aging patients Collaborative international perspective Chapters on the aging spine; frailty; safe pilates for bone health; health care for older people Additional renowned editor - Ronald W. Case Studies Through the Healthcare Continuum - Patricia Halloran 2000

This phenomenal new text focuses on assisting students in learning that there can be many possible choices in the clinical decision making process, and that these different choices can lead to many equally successful outcomes. Case Studies Through the Health Care Continuum: A Workbook for the Occupational Therapy Student is an entire book of case studies of adults with physical and psychological deficits. Each case study is followed by questions, organized around performance areas and performance components, treatment planning and discharge planning areas. The questions are designed to encourage clinical thinking about the cases. The cases encompass a variety of diagnoses and take place in a variety of health care arenas. By using case studies, students will begin to, and advance, their thinking process before directly dealing with clients. The cases are comprehensive and well thought out, and the questions provide a good starting point for processing and guiding critical thinking. This exceptional text can be used in almost every course in the curriculum!
