Exploring World Englishes - Philip Seargeant 2012-08-21

Routledge Introductions to Applied Linguistics is a series of

introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies, or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms, and an annotated further reading section. In this book Philip Seargeant

surveys varieties of English existing within the world today, and the debates and controversies surrounding its present forms, functions and status in diverse world contexts. It examines how English has evolved to become a 'global language' and looks at the political and cultural history that has influenced this evolution. Beginning with a discussion of real-life challenges relating to world Englishes that are faced by language professionals – particularly in the contexts of language education and language planning – the book explores and illustrates the ways in which the actual use and management of English, as well as the beliefs and ideologies associated with it, play an increasingly

important role in contemporary globalized society.

Translation as Communication across

Languages and Cultures -
Juliane House 2015-10-30

In this interdisciplinary book, Juliane House breaks new ground by situating translation within Applied Linguistics. In thirteen chapters, she examines translation as a means of communication across different languages and cultures, provides a critical overview of different approaches to translation, of the link between culture and translation, and between views of context and text in translation. Featuring an account of translation from a linguistic-cognitive perspective, House covers problematic issues such as the existence of universals of translation, cases of untranslatability and ways and means of assessing the quality of a translation. Recent methodological and

research avenues such as the role of corpora in translation and the effects of globalization processes on translation are presented in a neutral, non-biased manner. The book concludes with a thorough, historical account of the role of translation in foreign language learning and teaching and a discussion of new challenges and problems of the professional practice of translation in our world today. Written by a highly experienced teacher and researcher in the field, *Translation as Communication across Languages and Cultures* is an essential resource for students and researchers of Translation Studies, Applied Linguistics and Communication Studies.

Transfer and Interference in Language
- Monika Brügge-meier

1984

The topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines. Given these circumstances, the particular associations and connotations of the terms 'transfer' and 'interference' in each of these areas are legion, with resultant differences in meaning in the disparate literature on these subjects. And yet it is, in one way or another, contact and interaction of languages in the speaker/hearer and learner, in language acquisition contexts, as well as in society in general, which is basic to these two concepts throughout the various disciplines. The discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena. In

light of all this, a bibliography cannot at present avoid being highly/ selective in order to demarcate an interdisciplinary area of research in its own right and with its own status. The establishment of such an area is one of our main aims. The focus of interest in this bibliography, admittedly, is directed towards the psycholinguistics of language contact and interaction.

Developing Prototypic Measures of Cross-cultural Pragmatics -

Thom Hudson 1995

Although the study of cross-cultural pragmatics has gained importance in applied linguistics, there are no standard forms of assessment that might make research comparable across studies and languages. The present volume describes the process through which six forms of cross-cultural assessment were developed for second language learners of English. The models may be used for second language learners of other languages. The six forms of assessment involve two forms each of indirect discourse

completion tests, oral language production, and self-assessment. The procedures involve the assessment of requests, apologies, and refusals.
