100 20th-Century Gardens and Landscapes - Twentieth Century Society 2020-04-01

A showcase of Britain's most extraordinary gardens and landscapes from the twentieth century to present day. 100 20th-Century Gardens and Landscapes highlights the evolution of gardens and landscapes over the past century, tracing how these distinctive creations complemented buildings of their period. Entries in this book are grouped in chronological periods, documenting changing styles and techniques in a visual timeline. The

examples chosen take the story from the Arts and Crafts garden and the garden city, through the landscapes created for mid-century housing and the new towns, to the low-maintenance gardens of the 1980s and contemporary trends for community and wildlife gardens. Designed landscapes were often integral to the conception of twentieth-century developments; the inclusion of a handful of particularly successful landscapes for memorial gardens, offices, industry, transport and parks demonstrate a changing attitude to public green space during the century and its increasing importance as private gardens have become ever smaller. Designers and architects such as Piet Oudolf, Charles Jencks, Frederick Gibberd, Geoffrey Jellicoe, Vita Sackville-West and Gertrude Jekyll are all featured, alongside more detailed essays on the history of gardens, planting styles, the importance of modern landscapes, and the career of Geoffrey Jellicoe. The text is written by architectural, landscape and garden historians including Elaine Harwood, Barbara Simms and Alan Powers. Beautifully illustrated throughout with photography, illustrations and garden plans, this book is ideal for gardeners and landscape lovers alike. *Africa's Newest Nation* - United States. Congress. Flexible Ridesharing - Volker Handke 2012-12-14

Individual mobility is one of the most important needs of modern society and an important link between private, public and economic life. In contrast, transport also entails severe environmental and social burdens, foiling

current efforts for sustainable development. As the main source of CO2 emissions, transport is a prominent driver for climate change, and individual car traffic is responsible for nearly a third of the total energy consumption. However, we have to consider that many commuters feel indeed very dependent on their car. Here, ridesharing promises to contribute to environmental protection, while still offering individual mobility. Although ridesharing options have been discussed since many years, internet and smartphones provide completely new opportunities to find ridesharing partners today. Thus, this book deals with current efforts on implementing flexible internet- and phone-based ridesharing services. With a main focus on the users' perspective, their demands and acceptance limits, we aim to explore success factors for non-profit, but also commercial ridesharing concepts.

For the rest of us, the reality might involve smaller, but no less important, lifestyle changes: cutting back on plastic or food waste, growing vegetables, preserving meat and fish, preparing jams and chutneys, baking sourdough bread, making your own plant-based milks, or keeping a chicken or two. Dick and James Strawbridge know what it's like to make these changes. Between them, they've lived on a smallholding, in a terraced house, and even a chateau. In this updated edition of *Practical Self-sufficiency* they share everything they've learned, and give you the tools you need for a more rewarding and

environmentally conscious life.

Masters of War - Michael I. Handel 2005-12-05

This is the first comprehensive study based on a detailed textual analysis of the classical works on war by Clausewitz, Sun Tzu, Mao Tse-tung, and to a lesser extent, Jomini and Machiavelli. Brushing stereotypes aside, the author takes a fresh look at what these strategic thinkers actually said—not what they are widely believed to have said. He finds that despite their apparent differences in terms of time, place, cultural background, and level of material/technological development, all had much more in common than previously supposed. In fact, the central conclusion of this book is that the logic of waging war and of strategic thinking is as universal and timeless as human nature itself. This third, revised and expanded edition includes five new chapters and some new charts and diagrams.
