The Protestant Ethic and the Spirit of Capitalism - Max Weber 2012-04-19

Author's best-known and most controversial study relates the rise of a capitalist economy to the Puritan belief that hard work and good deeds were outward signs of faith and salvation.

Exotic Spaces in German Modernism - Jennifer Anna Gosetti-Ferencei 2011-10-20
Jennifer Anna Gosetti-Ferencei demonstrates that the exotic, as reflected in major works of German literature and in the philosophy and art that inspires it, provokes central questions about the modern self and the spaces it inhabits. Exotic spaces in the writings of such authors as Thomas Mann, Franz Kafka, Stefan Zweig, Robert Musil, Hugo von Hofmannsthal, Gottfried Benn, and Bertold Brecht, along with the thought of Nietzsche, Freud, Levi-Strauss, and

Simmel and the art of German Expressionism, are shown to present alternatives to the landscape and experience of modernity. In an examination of the concept of the exotic and of spatial experience in their cultural, subjective, and philosophical contingencies, Gosetti-Ferencei shows that exotic spaces may contest and reconfigure the relationship between the familiar and the foreign, the self and the other. Exotic spaces may serve not only to affirm the subject in a symbolic conquering of territory, as emphasized in post-colonial interpretations, or project the fantasy of escapism to a lost paradise, as utopian readings suggest, but condition moral, aesthetic, or imaginative transformation. Such transformation, while risking disaster or dissolution of the self as well as endangerment of the other, may promote new possibilities of perceiving or being, and reconfigure the boundaries of a familiar world. As exotic spaces are conceived as mystical, liberating, erotic, infectious, frightening or

mysterious, several possibilities for transformation emerge in their exposure: re-enchantment through epiphany; the collapse of the rational self; liberation of the imagination from the confines of the familiar world; and aesthetic transformation, revealing the paradoxically 'primitive' nature of modern experience. In strikingly original readings of canonical authors and compelling rediscoveries of forgotten ones, this study establishes that exotic experience can evidence the fragility of the European or Germanic self as depicted in modernist literature, revealing the usually unconsidered boundaries of the subject's own familiar world.

Petermanns Mitteilungen, Uniting of Europe - Ernst B. Haas 2020-11-15

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in

the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political

scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

The Improv Handbook for Modern Quilters - Sherri

Lynn Wood 2015-04-28

An exciting new approach for beginning to advanced quilters who want to improvise on their own, with a friend, or with a community of fellow makers. Forget step-by-step instructions and copycat designs. In *The Improv Handbook for Modern Quilters*, Sherri Lynn Wood presents a flexible approach to quilting that breaks free of old paradigms. Instead of traditional instructions, she presents 10 frameworks (or scores) that create a guiding, but not limiting, structure. To help quilters gain confidence, Wood also offers detailed lessons for stitching techniques key to improvisation, design and spontaneity exercises, and lessons on color. Every quilt made from one of Wood's scores will have common threads, but each one will look

different because it reflects the maker's unique interpretation. Featured throughout the book are Wood's own quilts and a gallery of contributor works chosen from among the hundreds submitted when she invited volunteers to test her scores during the making of this groundbreaking work. "Wood offers a series of techniques, guidelines and lessons on color choice for those ready to explore improvisational quilting. Her book is loaded with full-color photos and examples to inspire." —Dallas Morning News "Despite how it may "seam," quilting isn't all about rules! Quilting can be an exhilarating way to channel your creativity and express yourself. This book is focused more on exploration than explanation—a perfect mindset for beginners!" —Powell's Books Staff Pick

Nine Letters on Landscape Painting - Carl Gustav Carus
2002

Carl Gustav Carus (1789-1869)-
-court physician to the king of

Saxony--was a naturalist, amateur painter, and theoretician of landscape painting whose *Nine Letters on Landscape Painting* is an important document of early German romanticism and an elegant appeal for the integration of art and science. Carus was inspired by and had contacts with the greatest German intellectuals of his day. Carus prefaced his work with a letter from his correspondence with Johann Wolfgang von Goethe, who was his primary mentor in both science and art. His writings also reflect, however, the influence of the German natural philosopher Friedrich Wilhelm Joseph Schelling, especially Schelling's notion of a world soul, and the writings of the naturalist and explorer Alexander von Humboldt. Carus played a role in the revolution in landscape painting taking place in Saxony around Caspar David Friedrich. The first edition appears here in English for the first time.

The Inevitable - Kevin Kelly
2016-06-07

A New York Times Bestseller
From one of our leading
technology thinkers and
writers, a guide through the
twelve technological
imperatives that will shape the
next thirty years and transform
our lives Much of what will
happen in the next thirty years
is inevitable, driven by
technological trends that are
already in motion. In this
fascinating, provocative new
book, Kevin Kelly provides an
optimistic road map for the
future, showing how the
coming changes in our
lives—from virtual reality in the
home to an on-demand
economy to artificial
intelligence embedded in
everything we
manufacture—can be
understood as the result of a
few long-term, accelerating
forces. Kelly both describes
these deep trends—interacting,
cognifying, flowing, screening,

accessing, sharing, filtering,
remixing, tracking, and
questioning—and demonstrates
how they overlap and are
codependent on one another.
These larger forces will
completely revolutionize the
way we buy, work, learn, and
communicate with each other.
By understanding and
embracing them, says Kelly, it
will be easier for us to remain
on top of the coming wave of
changes and to arrange our
day-to-day relationships with
technology in ways that bring
forth maximum benefits. Kelly's
bright, hopeful book will be
indispensable to anyone who
seeks guidance on where their
business, industry, or life is
heading—what to invent, where
to work, in what to invest, how
to better reach customers, and
what to begin to put into
place—as this new world
emerges.

Autonomous Driving

Markus Maurer 2016-05-21

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation

and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people

and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Novel Translations - Bethany Wiggin 2011-06-15

Many early novels were cosmopolitan books, read from London to Leipzig and beyond, available in nearly simultaneous translations into French, English, German, and other European languages. In *Novel Translations*, Bethany Wiggin charts just one of the paths by which newness—in its avatars as fashion, novelties, and the novel—entered the European world in the decades around 1700. As readers across Europe snapped up novels, they domesticated the genre. Across borders, the novel lent readers everywhere a suggestion of sophistication, a familiarity with circumstances beyond their local ken. Into the

eighteenth century, the modern German novel was not German at all; rather, it was French, as suggested by Germans' usage of the French word *Roman* to describe a wide variety of genres: pastoral romances, war and travel chronicles, heroic narratives, and courtly fictions. Carried in large part on the coattails of the Huguenot diaspora, these romans, nouvelles, amours secrets, histoires galantes, and histories scandaleuses shaped German literary culture to a previously unrecognized extent. Wiggin contends that this French chapter in the German novel's history began to draw to a close only in the 1720s, more than sixty years after the word first migrated into German. Only gradually did the *Roman* go native; it remained laden with the baggage from its "French" origins even into the nineteenth century.

[Brahms in Context](#) - Natasha Loges 2021-08-19

Brahms in Context offers a fresh perspective on the much-admired nineteenth-century

German composer. Including thirty-nine chapters on historical, social and cultural contexts, the book brings together internationally renowned experts in music, law, science, art history and other areas, including many figures whose work is appearing in English for the first time. The essays are accessibly written, with short reading lists aimed at music students and educators. The book opens with personal topics including Brahms's Hamburg childhood, his move to Vienna, and his rich social life. It considers professional matters from finance to publishing and copyright; the musicians who shaped and

transmitted his works; and the larger musical styles which influenced him. Casting the net wider, other essays embrace politics, religion, literature, philosophy, art, and science. The book closes with chapters on reception, including recordings, historical performance, his compositional legacy, and a reflection on the power of composer myths.
