## **Voice of Nations** - Ajit K. Daniel 1995

This study explores different interpretations of the shaping of international radio "news," using the Voice of America (VOA), All India Radio (AIR), and the British Broadcasting Corporation (BBC) in a comparative case-study. While considering gatekeeping, agenda-setting, and objectivity, the study examines the question: In what ways does the national affiliation of three independent broadcasting systems manifest itself in shaping international radio news? All international broadcasting organizations have distinct functions and distinct visions what "news" is. These distinct visions shape the broadcasting of that "news." This paper assumes that understanding different interpretations or visions of "news" helps one understand the influences which create different portrayals of "news." Most international stations serve primarily as the governmental voices of nations, reflecting the social, political, and cultural values of their respective countries. Such stations provide listeners with a view of culture and politics in their countries through their programming. News broadcasts, being a vital part of this programming, help define images of the world and construct a worldview for a listener. Eventually, such images contribute to matters of "bias" and mold global perceptions, giving new life to the enduring issue of objectivity in news. Two primary factors (editor

types) emerged from the factor analytic solution. Comprised almost entirely of BBC-VOA editors and cast in the mold of Western democracy, Type 1 factor pays great credence to "objectivity." the second factor (Type 2), a near-exclusivity of AIR editors, respects the standard of "objectivity" but tempers it with an acknowledgment that there will be an influence from national policy. A third, weaker factor (Type 3), comprising VOA and BBC editors, appears to express cultural-imperialism cynicism.

*Democracy Without Journalism?* - Victor Pickard 2019-12-02

As local media institutions collapse and news deserts sprout up across the country, the US is facing a profound journalism crisis. Meanwhile, continuous revelations about the role that major media outlets--from Facebook to Fox News--play in the spread of misinformation have exposed deep pathologies in American communication systems. Despite these threats to democracy, policy responses have been woefully inadequate. In *Democracy Without Journalism?* Victor Pickard argues that we're overlooking the core roots of the crisis. By uncovering degradations caused by run-amok commercialism, he brings into focus the historical antecedents, market failures, and policy inaction that led to the implosion of commercial journalism and the proliferation of misinformation through both social media and mainstream news. The problem isn't just the loss of journalism or irresponsibility of Facebook, but the very structure upon which our profit-driven media system is built. The rise of a "misinformation society" is symptomatic of historical and endemic weaknesses in the American media system tracing back to the early commercialization of the press in the 1800s. While professionalization was meant to resolve tensions between journalism's public service and profit imperatives, Pickard argues that it merely camouflaged deeper structural maladies. Journalism has always been in crisis. The market never supported the levels of journalism--especially local, international, policy, and investigative reporting--that a healthy democracy requires. Today these long-term defects have metastasized. In this book, Pickard presents a counter-narrative that shows how the modern journalism crisis stems from media's historical over-reliance on advertising revenue, the ascendance of media monopolies, and a lack of public oversight. He draws attention to the perils of monopoly control over digital infrastructures and the rise of platform monopolies, especially the "Facebook problem." He looks to experiments from the Progressive and New Deal Eras--as well as public media models around the world--to imagine a more reliable and democratic information system. The book envisions what a new kind of journalism might look like, emphasizing the need for a publicly owned and democratically governed media system. Amid growing scrutiny of unaccountable monopoly control over media institutions and concerns about the consequences to democracy, now is an opportune moment to address fundamental flaws in US news and information systems and push for alternatives. Ultimately, the goal is to reinvent journalism.

Fighting for Faith and Nation - Cynthia Keppley Mahmood 2010-08-03

The ethnic and religious violence that characterized the late twentieth century calls for new ways of thinking and writing about politics. Listening to the voices of people who experience political violence—either as victims or as perpetrators—gives new insights into both the sources of violent conflict and the potential for its resolution. Drawing on her extensive interviews and conversations with Sikh militants, Cynthia Keppley Mahmood presents their accounts of the human rights abuses inflicted on them by the state of India as well as their explanations of the philosophical tradition of martyrdom and meaningful death in the Sikh faith. While demonstrating how divergent the world views of participants in a conflict can be, *Fighting for Faith and Nation* gives reason to hope that our essential common humanity may provide grounds for a pragmatic resolution of conflicts such as the one in Punjab which has claimed tens of thousands of lives in the past fifteen years.

**The Final Question** - Saratchandra Chattopadhyay 2010-01-11

Like Dickens, Saratchandra had a bag of wonderful tales'— *The Hindu* *The Final Question* (Shesh Prashna) is one of Saratchandra Chattopadhyay's last novels and perhaps his most radically innovative. The novel caused a sensation when it was first published in 1931, drawing censure from conservative critics but enthusiastic support from general readers, especially women. The heroine, Kamal, is exceptional for her time. She lives and travels by herself, has relationships with various men, looks poverty and suffering in the face, and asserts the autonomy of the individual being. In the process, she tears apart the frame of the expatriate Bengali society of Agra, where she lives. Through Kamal, Saratchandra questions Indian tradition and the norms of nationhood and womanhood. *The Final Question* transcends time and will appeal to readers of all ages. Translated by Department of English, Jadavpur University.
