International Law and the Proliferation of Weapons of Mass Destruction - Daniel H. Joyner 2009-03-05

Proliferation of WMD technologies is by no means a new concern for the international community.

Indeed, since the signing of the Nuclear Non-proliferation Treaty in 1968, tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states, as well as their spread through the increasingly globalised channels of international trade to other states and non-state actors. However, the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention

to this area of law, as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state. Other ongoing disputes between states regarding the character of obligations assumed under non-proliferation treaty instruments, and the effect of international organisations' decisions in this area, form some of the most contentious and potentially destabilising issues of foreign policy concern for many states. This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation. It will serve both as a reference for understanding the law as it currently exists in its political and economic context, as well as an analysis of areas in which amendments to existing law and organisations are needed. Prague Spring - Simon Mawer 2018-08-02

'Prague Spring is a wonderfully atmospheric portrait of the city as well as a political and historical thriller with dashes of espionage. It is as brilliant as anything he has written, which is saying a lot' The Times It's the summer of 1968, the year of love and hate, of Prague Spring and Cold War winter. Two English students, Ellie and James, set off to hitch-hike across Europe with

no particular aim in mind but a continent, and themselves, to discover. Somewhere in southern Germany they decide, on a whim, to visit Czechoslovakia where Alexander Dubcek's 'socialism with a human face' is smiling on the world. Meanwhile Sam Wareham, a first secretary at the British embassy in Prague, is observing developments in the country with a mixture of diplomatic cynicism and a young man's passion. In the company of Czech student Lenka Konecková, he finds a way into the world of Czechoslovak youth, its hopes and its ideas. It seems that, for the first time, nothing is off limits behind the Iron Curtain. Yet the wheels of politics are grinding in the background. The Soviet leader, Leonid Brezhnev is making demands of Dubcek and the Red Army is massed on the borders. How will the looming disaster affect those fragile lives caught up in the invasion?

Rejecting Retributivism - Gregg D. Caruso 2021-04-29
Caruso argues against

retributivism and develops an alternative for addressing criminal behavior that is ethically defensible and practical.

Academic Life and Labour in the New University - Ruth Barcan 2016-03-23

What does it mean to be an academic today? What kinds of experiences do students have, and how are they affected by what they learn? Why do so many students and their teachers feel like frauds? Can we learn to teach and research in ways that foster hope and deflate pretension? *Academic Life and Labour in the New University: Hope and Other Choices* addresses these big questions, discussing the challenges of teaching and researching in the contemporary university, the purpose of research and its fundamental value, and the role of the academy against the background of major changes to nature of the university itself. Drawing on a range of international media sources, political discourse and many years' professional experience,

this volume explores approaches to teaching and research, with special emphasis on the importance of collegiality, intellectual honesty and courage. With attention to the intersection of large-scale institutional changes and intellectual shifts such as the rise of transdisciplinarity and the development of a pluralist curriculum, this book proposes the pursuit of more ethical, compassionate and critical forms of teaching and research. As such, it will be of interest not only to scholars of cultural studies and education, but to all those who care about the fate of the university as an institution, including young scholars seeking to join the academy.

Professional Learning In Nursing - Jenny Spouse

2008-04-15

The way nurses are taught is constantly evolving and changing. Workplace learning is seen as key to developing practitioners. In this book Jenny Spouse discusses how students learn in a range of different clinical settings and

how best to facilitate this process. How do students learn to become nurses? What knowledge and understanding do they need to acquire? How do their preconceptions, beliefs about the learning process, and social needs affect their development? What do they find helpful and unhelpful? What makes clinical settings good for learning? Is it helpful for students to document their learning? What are the best ways for lecturer/ practitioners to facilitate student learning and what other factors influence their progress? The book explores how professional development can be better understood, following the progress of six nurse learners drawn from different parts of nursing and investigating both those difficulties faced by all students and those issues unique to particular students. It places these narratives in the context of nurse education today, exploring the implications of 'Fitness for practice' and 'Making a difference', and looking at the implications for the future

development, organisation and funding of nurse education.

History: A Very Short Introduction - John H. Arnold
2000-02-24

There are many stories we can tell about the past, and we are not, perhaps, as free as we might imagine in our choice of which stories to tell, or where those stories end. John Arnold's *Very Short Introduction* is a stimulating essay about how we study and understand history. The book begins by inviting us to think about various questions provoked by our investigation of history, and explores the ways these questions have been answered in the past. Concepts such as causation, interpretation, and periodization, are introduced by means of concrete examples of how historians work, giving the reader a sense of the excitement of discovering not

only the past, but also ourselves. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
