Progress in Self Psychology, V. 16 - Arnold I. Goldberg 2014-12

Volume 16 of Progress in Self Psychology, How Responsive Should We Be, illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post-Kohutian intersubjectivists' concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity. Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy, subjectivity, and authenticity. Responses to the tension encompass the stance of intersubjective contextualism, advocacy of active responsiveness, and emphasis on the thorough-going bidirectionality of the analytic endeavor. Balancing these perspectives are a reprise on Kohut's concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject. Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self-state regulation and address the self-reparative functions that inhere in the act of dreaming. Like previous volumes in the series, volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations. Here, self psychology is brought to bear on psychotherapy with placed children, on work with adults with nonverbal learning disabilities, and on brief therapy. Rector's examination of twinship and religious experience, Hagman's elucidation of the creative process, and Siegel and Topel's experiment with supervision via the internet exemplify the ever-expanding explanatory range of self-psychological insights.

Ionospheric Radio Wave Propagation - Jules Aarons 1984

Decompression - Juli Zeh 2014-05-20

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--

Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

The Eagle Watchers - Ruth Tingay 2011-01-15

Eagles have fascinated humans for millennia. For some, the glimpse of a distant eagle instantly becomes a treasured lifelong memory. Others may never encounter a wild eagle in their lifetime. This book was written by people who have dedicated years to the study of eagles, to provide an insider's view for all readers, but especially those who have never been up close and personal with these magnificent yet often misunderstood creatures. In their stories, twenty-nine leading eagle researchers share their remarkable field experiences, providing personal narratives that don't feature in their scientific publications. They tell of their fear at being stalked by grizzly bears, their surprise at being followed by the secret police, their embarrassment when accidentally firing mortar rockets over a school gymnasium, and their sense of awe at tracking eagles via satellite. The reader experiences the cultural shock of being guest of honor at a circumcision ceremony, the absurdity of sharing an aquatic car with the Khmer Rouge, and the sense of foreboding at being press-ganged into a frenzied tribal death march through the jungle. The Eagle Watchers covers twenty-four species on six continents, from well known (bald eagle; golden eagle), to obscure (black-and-chestnut eagle; New Guinea harpy eagle), and from common (African fish eagle) to critically endangered (Philippine eagle; Madagascar fish eagle). The diverse experiences vividly described in this book reveal the passion, dedication, and sense of adventure shared by those who study these majestic birds and strive for their conservation. Featuring stunning color photographs of the eagles, information on raptor conservation, a global list of all eagle species with ranges and conservation status, and a color map of the sites visited in the book, The Eagle Watchers will appeal to birders, conservationists, and adventure travelers alike. To further support the conservation programs described in this book, all royalties are being donated to two leading nonprofit organizations for raptor conservation training and fieldwork: Hawk Mountain Sanctuary Intern Program and the National Birds of Prey Trust.
