Camera Lucida - Roland Barthes 2010-10-12
Camera Lucida, Roland Barthes's personal, wide-ranging, and contemplative volume--and the last

book he published--finds the author applying his influential perceptiveness and associative insight to the subject of photography. Commenting on

artists such as Avedon, Clifford, Mapplethorpe, and Nadar, Barthes presents photography as being outside the codes of language or culture, acting on the body as much as on the mind, and rendering death and loss more acutely than any other medium. This groundbreaking approach established Camera Lucida as one of the most important books of theory on the subject, along with Susan Sontag's On Photography.

Anna Atkins: Photographs of British Algæ -
2018-10-31

Shortly after William Henry Fox Talbot announced his invention of photography in 1839, the dedicated amateur botanist Anna Atkins, daughter of a prominent British scientist, began to experiment with the new medium. In 1843 she turned to her friend Sir John Herschel's recently discovered cyanotype process to publish her growing collection of native seaweeds--a daring way to introduce photography into book illustration. At regular intervals over the next decade, Atkins printed and issued these

bracingly modern, deeply-hued photograms to her "botanical friends" in the form of hand-stitched fascicles of a book she entitled Photographs of British Algæ: Cyanotype Impressions . The first book to be illustrated by photography and the earliest sustained application of photography to science, British Algæ is a landmark in the histories of publishing and photography. Of the nearly two dozen substantially complete or partial copies known to exist, each is distinct in its appearance and often in its number and arrangement of plates. The set of 13 parts she gave to Sir John Herschel--now in the Spencer Collection of The New York Public Library--is especially important and was carefully preserved by generations of the Herschel family exactly as Sir John received it. This sumptuous facsimile edition reproduces the recto and verso of each plate, presenting the work as its creator intended: as bound volumes to lingered over, studied and admired, page by extraordinary page.

La mirada de las cosas - Miryam Sas 2019

This hardcover volume presents a tour to Japanese art, from the 1950s to present day, that focuses on photography and the artists that were part of the group Vivo (1957-1961) and the collective responsible for the journal Provoke. Provocative Materials for Thought in 1968, which only had three issues, but managed to change Japanese photography forever. The experimental way in which they showed the images as the result of an era that was marked by important political events, became a phenomenon and a tendency followed many other Japanese artists. The book features works by key photographers such as Shomei Tomatsu, Akira Sato, Yutaka Takanashi and Daido Moriyama, as well as Nabuyoshi Araki, Koji Enkoura, Tamiko Nishimura and Hiroshi Hamaya. It also includes essays by curator Nuria Enguita, as well as experts Miryam Sas and Akihito Yasumi. 200 images

The Photographer's Mind - Michael Freeman 2012-11-12

The source of any photograph is not the camera or even the scene viewed through the viewfinder- it is the mind of the photographer: this is where an image is created before it is committed to a memory card or film. In The Photographer's Mind, the follow-up to the international best-seller, The Photographer's Eye, photographer and author Michael Freeman unravels the mystery behind the creation of a photograph. The nature of photography demands that the viewer constantly be intrigued and surprised by new imagery and different interpretations, more so than in any other art form. The aim of this book is to answer what makes a photograph great, and to explore the ways that top photographers achieve this

goal time and time again. As you delve deeper into this subject, *The Photographer's Mind* will provide you with invaluable knowledge on avoiding cliché, the cyclical nature of fashion, style and mannerism, light, and even how to handle the unexpected. Michael Freeman is the author of the global bestseller, *The Photographer's Eye*. Now published in sixteen languages, *The Photographer's Eye* continues to speak to photographers everywhere. Reaching 100,000 copies in print in the US alone, and 300,000+ worldwide, it shows how anyone can develop the ability to see and shoot great digital photographs.

Shape of Light - Simon Baker 2018

The accompanying catalogue to the first major exhibition to consider the relationship between the photographic medium and the history of abstraction in the twentieth century, on display at London's Tate Modern. The exhibition catalogue will be arranged in a broadly chronological way to tell the story of photography

and its relationship with abstraction from around 1915 to the present day, and will include historic works in a variety of media from painting and sculpture to montage and kinetic installations. Beginning with the works of cubism and vorticism, the catalogue then highlights the key contributions of Bauhaus, constructivist and surrealist artists of the 1920's and 1930's. It then moves into the 'subjective photography' of the 1940's and 1950's, exploring the global scope of this movement through works by artists from Latin America and Asia, before considering the impacts of photography of abstract expressionism, op art and minimalism in Europe and the US. Bringing together iconic as well as rarely seen works, *Photography and Abstract Art* explores the development of photography in relation to abstract art, tracing the key moments of innovation in new techniques and practice. *The Century of Artists' Books* - Johanna Drucker 2004

Rubén Fontana - Rubén Fontana 1993

This series explores architecture; furniture; and interior, graphic, and industrial design with the intention of reflecting the wealth and diversity found in the extensive panorama of contemporary design. Featured designers are chosen on the basis of their originality and their accomplishments. Each book starts with an introductory essay by a well-known critic or designer. The designers themselves stylize the presentation and decide what material will be

included -- therefore presenting not only a reference text, but also exhibiting another aspect of the designer's creative vision.

Tourists with Typewriters - Patrick Holland 2000

The Handbook of Textile Culture - Janis Jefferies
2015-11-05

In recent years, the study of textiles and culture has become a dynamic field of scholarship, reflecting new global, material and technological possibilities. This is the first handbook of specially commissioned essays to provide a guide to the major strands of critical work around textiles past and present and to draw upon the work of artists and designers as well as researchers in textiles studies. The handbook offers an authoritative and wide-ranging guide to the topics, issues, and questions that are central to the study of textiles today: it examines how material practices reflect cross-cultural influences; it explores textiles' relationships to

history, memory, place, and social and technological change; and considers their influence on fashion and design, sustainable production, craft, architecture, curation and contemporary textile art practice. This illustrated volume will be essential reading for students and scholars involved in research on textiles and related subjects such as dress, costume and fashion, feminism and gender, art and design, and cultural history. Women Artists - Flavia Frigeri 2019-04-16

A chronological introduction to women artists throughout history, this book provides a rich understanding of key female artists from the Baroque to the present day. In 1971, in an essay that has now become one of the touchstones of feminist art history, Linda Nochlin raised the question heard round the world: "Why have there been no great women artists?" Since the 1970s, as a result of this kind of consciousness-raising, the feminist discourse around art has expanded, addressing forms of activism, the idea of a feminist aesthetic, the female body, sexuality, and representation more largely. The reframing of female contributions to the history of art is still ongoing, and this new addition to the Art Essentials series draws attention to some of its key dimensions. Focusing on fifty diverse women artists from Artemisia Gentileschi through Judy Chicago, Ana Mendieta, and the Guerrilla Girls to Barbara Kruger, Cindy Sherman, and Mona

Hatoum, this book equips readers with an understanding of feminist art, as well as an appreciation of its most important figures. This latest addition to the Art Essentials series documents women artists in context to offer readers a rich understanding of key female artists from the Baroque to the present day.

Cianotipia - Peter Mrhar 2014-02-28

Cianotipia es un libro novedoso entre la variedad de libros existentes sobre procesos fotográficos tradicionales y alternativos, ya que el autor presenta algunas técnicas antiguas y casi olvidadas que no es posible encontrar en ningún libro reciente. Además, revela algunos «secretos» y nuevos métodos, como por ejemplo, la realización de cianotipias de dos colores, técnicas de doble exposición, etc. El libro guía al lector paso a paso a través de todo el proceso de creación de la cianotipia mediante descripciones detalladas e instrucciones ilustradas y claras. En la primera parte se muestra cómo preparar los productos químicos, la manera de elegir el papel adecuado, cómo realizar negativos digitales, el modo de exponer la imagen a la luz, la forma de extender la emulsión sobre el papel y otras cosas similares. En los capítulos siguientes se describe detalladamente cómo revelar las fotografías, las

técnicas más frecuentes y algunas casi olvidadas para la coloración de cianotipias con uno o dos colores, descripciones de métodos de creación de fotogramas y un capítulo sobre la impresión de cianotipias sobre vidrio, piedra y tejidos. Los lectores más creativos disfrutarán de las mencionadas técnicas de elaboración de imágenes y fotografías a dos colores que se hacen usando la doble exposición y se presentan aquí por primera vez. El libro incorpora ejemplos prácticos de cianotipias para la creación de tarjetas de visita, tarjetas postales, camisetas impresas con diferentes motivos y otros usos. Los años del daguerrotipo - Jeremy Adelman 2009

How to Identify Prints - Bamber Gascoigne 2004
Arranged in self-contained sections the book simplifies accurate identification of any printed image. Included are manual methods, and also the mechanical processes that constitute the vast majority of printed images. Essential aspects

of printing history and the printmaking craft are covered and examples are given of the identifying features that help to reveal the type of print.

19th-century Art - Robert Rosenblum 2005
Originally published twenty years ago, "Nineteenth Century Art, Second Edition" remains true to the original, with its superior survey of Western painting and sculpture presented in four historical parts, beginning in 1776 and ending with the dawn of the new century. This book draws on the historical documentation of the period, tracing the dynamics of the making and viewing of art, and examining the reciprocal influences of art and technology, art and politics, art and literature, art and music. For nineteenth century art enthusiasts.

The SAGE Handbook of Innovation in Social

Research Methods - Malcolm Williams

2011-03-11

Social research is a burgeoning field. Of course it has many traditions and approaches, but there is a high premium upon thinking differently and thinking anew because social life is never static or wholly predictable. The Handbook, edited by internationally recognized scholars, provides a comprehensive, pitch-perfect critical assessment of the field. The main features of the Handbook are: Clear organization into 4 parts dealing with The Social Context of Research; Design and Data Collection; Integrating The Analysis of New Data Types; Sampling, Inference and Measurement Clear, cutting edge chapters on Objectivity; Causation; Organizing Social Research; Correspondence Analysis; Grounded Theory; Conversational Surveys; Mixed Methods; Meta-Analysis; Optimal Matching Analysis; GIS Analysis; Quantitative Narrative Analysis; Longitudinal Studies; SEM; MLM; Qualitative Comparative Analysis; Respondent Driven

Sampling Brings together a glittering assembly of the key figures working in the field of research methods Demonstrates the continuities and productive tensions between classical traditions and real world research. The result is a superbly organized text which will be required reading for anyone interested in the routes and future of social research. It is an unparalleled teaching resource and a 'must have' for serious social researchers.

Cyanotype - Peter Mrhar 2013-09-28

Cyanotype is truly refreshing among the variety of books on historical and alternative photographic processes, since the author presents some old and almost forgotten techniques that are not seen in any recent book, and reveals some of the almost "secret", newer methods, such as production of bi-color cyanotype, double exposure techniques, etc... The book guides the reader with detailed descriptions and clear pictorial step-by-step instructions through the entire process of

creating cyanotypes. At the beginning, we learn how to make chemicals, how to choose right paper, how to make digital negatives, how to expose the image, how to coat the paper with emulsion, and the like. In the following chapters are detailed descriptions on how to develop photographs, a large number of popular and some almost forgotten techniques of a simple one- and two-color toning of cyanotype, descriptions of making photograms, and a bit more challenging chapters of cyanotype printing on glass, stone and fabrics. The book does not lack practical examples of cyanotype for creating business cards, postcards, printed T-shirts and the like.

Encyclopedia of Ephemera - Michael Twyman
2018-10-24

The joy of finding an old box in the attic filled

with postcards, invitations, theater programs, laundry lists, and pay stubs is discovering the stories hidden within them. The paper trails of our lives -- or ephemera -- may hold sentimental value, reminding us of great grandparents. They chronicle social history. They can be valuable as collectibles or antiques. But the greatest pleasure is that these ordinary documents can reconstruct with uncanny immediacy the drama of day-to-day life. The Encyclopedia of Ephemera is the first work of its kind, providing an unparalleled sourcebook with over 400 entries that cover all aspects of everyday documents and artifacts, from bookmarks to birth certificates to lighthouse dues papers. Continuing a tradition that started in the Victorian era, when disposable paper items such as trade cards, die-cuts and greeting cards were accumulated to paste into scrap books, expert Maurice Rickards has compiled an enormous range of paper collectibles from the obscure to the commonplace. His artifacts come from around the world and include such throw-

away items as cigarette packs and crate labels as well as the ubiquitous faxes, parking tickets, and phone cards of daily life. As this major new reference shows, simple slips of paper can speak volumes about status, taste, customs, and taboos, revealing the very roots of popular culture.

A Miraculous Day - Peter Mrhar 2018-07-17
A Miraculous Day There, where a Little Town stands, is a strange land. It is strange because there are no wars, no important people, nor important days, and there are no holidays as we know them. But sometimes come days celebrated by the bees, flowers, meadows, and by the trees. And on those days, the wind blows through your hair, bringing smiles with the magic air. It is called a Miraculous Day.
