*Juergen Teller* - Juergen Teller 2016

One of the world's most sought-after photographers, Juergen Teller bridges the worlds of fashion, advertising, art, music and celebrity with an unmistakable mix of irony, honesty and anti-establishment flair. This magazine-style book, the catalogue to a major exhibition in his native Germany, captures Teller's visual universe to date. Employing portraiture, still-life and landscape photography, Teller's highly intuitive work exposes clichés, champions the everyday, and recasts traditional notions of beauty. Stripped of the glamor of the fashion world, his sitters often find themselves in unexpected, sometimes disturbing contexts where their true selves are revealed. Fascinated by his youth and upbringing, as well as by the role of the photographer today, autobiography is also a strong force in Teller's candid, often humorous, and inevitably endearing photos.

Particular attention is paid to the role of love and death in Kubrick's films, emphasizing his innovative exploration of love and sex, and the portrayal of mortality via masculine violence.

*On Kubrick* - James Naremore 2019-07-25

*On Kubrick* provides an illuminating critical account of the films of Stanley Kubrick, from his earliest feature, *Fear and Desire* (1953), to the posthumously-produced *A.I. Artificial Intelligence* (Steven Spielberg, 2001). The book offers provocative analysis of each of Kubrick's films, together with new information about their production histories and cultural contexts. Its ultimate aim is to provide a concise yet thorough discussion that will be useful as both an academic text and a trade publication. James Naremore argues that in several respects Kubrick was one of the cinema's last modernists: his taste and sensibility were shaped by the artistic culture of New York in the 1950s; he became a celebrated auteur who forged a distinctive style; he used art-cinema conventions in commercial productions; he challenged censorship regulations; and throughout his career he was preoccupied with one of the central themes of modernist art – the conflict between rationality and its ever-present shadow, the unconscious. War and science are key concerns in Kubrick's oeuvre, and his work has a hyper-masculine quality. Yet no director has more relentlessly emphasized the absurdity of combat, as in *Paths of Glory* (1957) and *Full Metal Jacket* (1987), the failure of scientific reasoning, as in *2001* (1968), and the fascistic impulses in masculine sexuality, as in *Dr Strangelove* (1964) and *Eyes Wide Shut* (1999). The book also argues that while Kubrick was a voracious intellectual and a life-long autodidact, the fascination of his work has less to do with the ideas it espouses than with the emotions it evokes. Often described as 'cool' or 'cold,' Kubrick is best understood as a skillful practitioner of what might be called the aesthetics of the grotesque; he employs extreme forms of caricature and black comedy to create disgusting, frightening yet also laughable images of the human body, creating a sense of unease that leaves viewers unsure of how to react.

**Boys in Children's Literature and Popular Culture** - Annette Wannemaker 2012-09-10

*Boys in Children's Literature and Popular Culture* proposes new theoretical frameworks for understanding the contradictory ways masculinity is represented in popular texts consumed by boys in the United States. The popular texts boys like are often ignored by educators and scholars, or are simply dismissed as garbage that boys should be discouraged from enjoying. However, examining and making visible the ways masculinity functions in these texts is vital to understanding the broad array of works that make up children's culture

and form dominant versions of masculinity. Such popular texts as Harry Potter, Captain Underpants, and Japanese manga and anime often perform rituals of subject formation in overtly grotesque ways that repulse adult readers and attract boys. They often use depictions of the abject – threats to bodily borders – to blur the distinctions between what is outside the body and what is inside, between what is "I" and what is "not I." Because of their reliance on depictions of the abject, those popular texts that most vigorously perform exaggerated versions of masculinity also create opportunities to make dominant masculinity visible as a social construct.

*The Language of Pain* - Chryssoula Lascaratou 2007

How is the universal, yet private and subjective, experience of pain talked about by different people in everyday encounters? What does the analysis of pain-related lexico-phraseological choices, grammatical structures, and linguistic metaphors reveal as to how pain is perceived and experienced? Are pain utterances primarily used to express or to describe this experiential domain? This is the first book that investigates such questions from both a functional and a cognitive perspective: it combines two converging usage-based theoretical models in a systematic linguistic inquiry of the construal of pain in everyday language. This work

is based on a specialised electronic corpus of Greek naturally-occurring dialogues in a health care context, the underlying assumption being that in the absence of factual evidence intuition about language cannot reliably detect or predict patterns of usage. Comparing Greek with English data, this book significantly contributes to the development of this research field cross-linguistically.

*Power, Knowledge and Feminist Scholarship* - Maria do Mar Pereira 2017-02-10

Feminist scholarship is sometimes dismissed as not quite 'proper' knowledge – it's too political or subjective, many argue. But what are the boundaries of 'proper' knowledge? Who defines them, and how are they changing? How do feminists negotiate them? And how does this boundary-work affect women's and gender studies, and its scholars' and students' lives? These are the questions tackled by this ground-breaking ethnography of academia inspired by feminist epistemology, Foucault, and science and technology studies. Drawing on data collected over a decade in Portugal and the UK, US and Scandinavia, this title explores different spaces of academic work and sociability, considering both official discourse and 'corridor talk'. It links epistemic negotiations to the shifting political economy of academic labour, and situates the smallest (but fiercest) departmental negotiations within global relations of unequal academic exchange. Through these links, this timely volume also raises urgent questions about the current state and status of gender studies and the mood of contemporary academia. Indeed, its sobering, yet uplifting, discussion of that mood offers fresh insight into what it means to produce feminist work within neoliberal cultures of academic performativity, demanding increasing productivity. As the first book to analyse how academics talk (publicly or in off-the-record humour) about feminist scholarship, *Power, Knowledge and Feminist Scholarship* is essential reading for scholars and students in gender studies, LGBTQ studies, post-colonial studies, STS, sociology and education. Winner of the FWSA 2018 Book Prize competition

*Future War and the Defence of Europe* - John R. Allen 2021

Future War and the Defence of Europe offers a major new analysis of how peace and security can be maintained in Europe: a continent that has suffered two cataclysmic conflicts since 1914. Taking as its starting point the COVID-19 pandemic and way it will inevitably accelerate some key global dynamics already in play, the book goes on to weave history, strategy, policy, and technology into a compelling analytical narrative. It lays out in forensic detail the scale of the challenge Europeans and their allies face if Europe's peace is to be upheld in a transformative century. The book upends foundational assumptions about how Europe's defence is organised, the role of a fast-changing transatlantic relationship, NATO, the EU, and their constituent nation-states. At the heart of the book is a radical vision of a technology-enabling future European defence, built around a new kind of Atlantic Alliance, an innovative strategic public-private partnership, and the future hyper-electronic European force, E-Force, it must spawn. Europeans should be under no illusion: unless they do far more for their own defence, and very differently, all that they now take for granted could be lost in the maze of hybrid war, cyber war, and hyper war they must face.

**Foreign Language and Mother Tongue** - Istvan Kecskes 2000-06-01

This is the first book that discusses the effect of foreign language learning on first language processing. The authors argue that multilingual development is a dynamic and cumulative process characterized by transfer of different nature, and results in a common underlying conceptual base with two or more language channels that constantly interact with each other. Language representation and processing are discussed from a cognitive-pragmatic rather than a lexical-syntactic perspective. This required the review of several crucial issues of L2 acquisition, such as transfer, vocabulary development, conceptual fluency, and pragmatic skills. The authors also reviewed a large body of literature touching on cognitive psychology, linguistics, psycholinguistics, SLA, philosophy, and education in order to explain multilingual development and the positive effect of foreign language learning on the first language. An important read for linguists and language educators alike, this volume: \* attempts to explain multilingual development from a cognitive-pragmatic perspective, \* argues that foreign language learning has a positive effect on the development and use of mother tongue skills, \* relies on research findings of several different disciplines, \* builds on the results of quantitative research conducted by the authors, and touches on a wide range of literature.

**"The Turk and Islam in the Western Eye, 1450?750 "** - JamesG. Harper 2017-07-05

Unprecedented in its range - extending from Venice to the New World and from the Holy Roman Empire to the Ottoman Empire - this collection probes the place that the Ottoman Turks occupied in the Western imaginaire, and the ways in which this occupation expressed itself in the visual arts. Individual essays in this volume examine specific images or groups of images, problematizing the 'truths' they present and analyzing the contexts that shape the presentation of Ottoman or Islamic subject matter in European art. The contributors trace the transmission of early modern images and representations across national boundaries and across centuries to show how, through processes of translation that often involved multiple stages, the figure of the Turk (and by extension that of the Muslim) underwent a multiplicity of interpretations that reflect and reveal Western needs, anxieties and agendas. The essays reveal how anachronisms and inaccuracies mingled with careful detail to produce a "Turk," a figure which became a presence to reckon with in painting, sculpture, tapestry and printmaking.

*The Nazis* - Piotr Ukiński 1999

Piotr Ukiński, a New York based artist, has put together a most surprising and at the same time simple series of pictures. With them he has created an art book consisting of 160 portraits of movie actors playing Nazis. This volume is as much about history as it is about the industry of entertainment. In 1998, *The Observer*, London, wrote about these compelling and at the same time enstranging portraits: "If you are an

actor, chances are that you will play a Nazi, or at least a cruel German officer in the Second World War. How do you make yourself look the part? First comes the matter of expression. Mug up on verbal cliches: 'ice-cold eyes', 'thin, compressed lips', with if possible, 'the hint of cynical smile playing around the corners of the mouth'. An 'air of cold command', rigid jaw muscles denoting 'utter ruthlessness', a tiny flare of nostrils to suggest unspeakable depths of sadism. Fine! Now put on the gear: the tunic with its collar-tabs of SS lightning flashes, the tall black cap with eagle, swastika and death's head. Stunning! Now all you need is that gargling accent unlike any noise ever uttered by a real German."

**The Happiest Baby on the Block** - Harvey Karp, M.D. 2008-11-19

Perfect for expecting parents who want to provide a soothing home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 "S's": the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 "S's" that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point

by their infant's persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

Readers' comments: A Fabulous, Important Book. Jesper Juul provides parents with such an amazing and absolutely vital approach to raising children that it rings true on every page. Some of what he suggests we as parents do is difficult, but all of it is right on about how we can raise confident, healthy, whole humans, right from the start. I was thrilled to have discovered a book that allowed me to see different possibilities with child raising. Anyone with a child will gain immensely from reading this book, seeing themselves in his numerous examples, and learning how to move on from there. I am grateful for this book and highly recommend it. No Parent Should Be Without It. With tremendous wisdom and a warm, pragmatic eye, Mr. Juul helps us redefine the ways we look at a child's behavior and our relationship to our children and ultimately, each other. This is a book that doesn't offer easy answers or 'tricks' to help in the raising of your child. This is a book that helps you see with a child's eye, hear with a child's ear, and feel with a child's heart in ways that feel so natural and obvious, you will wonder why you haven't thought of them before. It is a book that offers day-to-day skills along with the thinking that helps generate them. This groundbreaking book should be on the shelf of all parents everywhere. I cannot recommend it highly enough. If you have children - read this book! This is an amazing book that will surely turn upside down any thoughts you ever had about raising children. Even though you may not agree with all the views in this book, there is so much food for thought and new ideas that you will return to this book again and again for interesting and mind blowing advice.

It has proven an elusive goal, not just because of political opposition but also due to a lack of clarity in how to best frame equality and take account of family-related considerations. This wide-ranging book assembles the most pertinent literature and evidence to provide a critical understanding of how contemporary state policies engage with gender inequalities.

**Fatherland** - Nina Bunjevac 2014-08-28

In 1975 Nina Bunjevac's mother fled her marriage and her adopted country of Canada and took Nina back to Yugoslavia to live with her parents. Peter, her husband, was a fanatical Serbian nationalist who had been forced to leave his country at the end of World War II and migrate to Canada. But even there he continued his activities, joining a terrorist group that planned to set off bombs at the homes of Tito sympathisers and at Yugoslav missions in Canada and the USA. Then in 1977, while his family were still in Yugoslavia, a telegram arrived to say that a bomb had gone off prematurely and Peter and two of his comrades had been killed. Nina Bunjevac tells her family's story in superb black-and-white artwork. Fatherland will be recognised as a masterpiece of non-fiction comics, worthy to stand beside Persepolis and Palestine.

**The Gloria Anzaldúa Reader** - Gloria Anzaldua 2009-01-01

Born in the Río Grande Valley of south Texas, independent scholar and creative writer Gloria Anzaldúa was an internationally acclaimed cultural theorist. As the author of *Borderlands / La Frontera: The New Mestiza*, Anzaldúa played a major role in shaping contemporary Chicano/a and lesbian/queer theories and identities. As an editor of three anthologies, including the groundbreaking *This Bridge Called My Back: Writings by Radical Women of Color*, she played an equally vital role in developing an inclusionary, multicultural feminist movement. A versatile author, Anzaldúa published poetry, theoretical essays, short stories, autobiographical narratives, interviews, and children's books. Her work, which has been included in more than 100 anthologies to date, has helped to transform academic fields including American, Chicano/a, composition, ethnic, literary, and women's studies. This reader—which provides a representative sample of the poetry,

prose, fiction, and experimental autobiographical writing that Anzaldúa produced during her thirty-year career—demonstrates the breadth and philosophical depth of her work. While the reader contains much of Anzaldúa's published writing (including several pieces now out of print), more than half the material has never before been published. This newly available work offers fresh insights into crucial aspects of Anzaldúa's life and career, including her upbringing, education, teaching experiences, writing practice and aesthetics, lifelong health struggles, and interest in visual art, as well as her theories of disability, multiculturalism, pedagogy, and spiritual activism. The pieces are arranged chronologically; each one is preceded by a brief introduction. The collection includes a glossary of Anzaldúa's key terms and concepts, a timeline of her life, primary and secondary bibliographies, and a detailed index.

First published nearly fifty years ago, *A Child Is Born* broke astonishing new ground, bringing the magic of pregnancy and birth to life.
