Facial Magic - Rediscover the Youthful Face You Thought You Had Lost Forever! - Cynthia Rowland

2017-05-10

Once in a while a product line comes along that offers men and women the opportunity to truly reclaim the youthful face they thought they had lost forever. Without drugs, electricity or anything harmful or hurtful millions of people worldwide have successfully and reliably used exercise to trim, lift and tone sagging muscles. Just like muscles in the body can be exercised, the facial muscles can greatly benefit from exercise but not just any exercise will do. Contortions, twists, puckers and funny faces will not shape or contour sagging facial muscles in a mature face. The Facial Magic facial exercise system will lift, tone and tighten sagging facial muscles. These proven, easy-to-execute isometric movements require only minutes a day to perform and most users say they look 5, 10 even 15 years younger in just weeks as eyelids tighten, eye brows lift, the forehead smoothes, jowls and pouches melt away as double chins lessen, dramatically revealing a sculpted jaw line. Facial Magic provides the look of a face lift without surgery, seams or risk of

infection. Using only the thumbs and fingers while wearing special exercise gloves, your "age erasers" will produce immediate lifting and tightening of the facial features. In about three weeks the appearance of fine lines and wrinkles become less apparent as the muscles plump up the skin helping the user's face look refreshed, radiant and younger. This book contains all 18 Facial Magic exercises. Learn two exercises each week - each exercise requires 35 seconds - so in just minutes a day you will feel and see the youthful results you desire.

Classrooms That Work - Patricia Cunningham 2016

Provides practical literacy instruction for students in today's increasingly diverse classrooms, especially students from culturally diverse backgrounds and those struggling with reading and writing. Cunningham and Allington emphasize the importance of promoting the integration of phonics and literature-based process writing and reading instruction to enhance students' learning and reading skills. --From publisher description.

Body Awareness as Healing Therapy - Moshe Feldenkrais 1993-12-20

Body Awareness as Healing Therapy: The Case of Nora is Moshe Feldenkrais' classic study of his work with Nora, a woman who has suffered a severe stroke and lost her neuromuscular coordination, including the ability to read and write. Feldenkrais uses rational and intuitive approaches to help his student relearn basic motor skills. One can observe here the groundwork of Feldenkrais' extraordinary insights which became known as the Feldenkrais Method. We follow his detailed descriptions of the trial and error process which led him to see the ingredients that were needed to help Nora reshape her attention, perception, imagination and cognition.

The Morris Canal - Robert R. Goller 1999

The Morris Canal was not the longest canal in the world, but it did have one superlative to its credit--it climbed higher than any other canal ever built. In its time it was world famous, visited by tourists and technical people from as far away as Europe and Asia. For nearly 100 years it crossed the hills of northern New Jersey, accomplishing that feat with 23 lift locks and 23 inclined planes. From Lake Hopatcong, the canal ran

westward through the Musconetcong valley to Phillipsburg, on the Delaware River, and eastward through the valleys of the Rockaway and Passaic rivers to tidewater at Newark and Jersey City--a little over 100 miles horizontally and a total rise and fall of nearly 1,700 feet vertically. The Morris Canal, once an important soldier in the American Industrial Revolution, has been gone for most of the twentieth century, but its memory lives on in the many photographs, postcards, and other memorabilia that its unique presence inspired.

Pioneers to Partners - Gordon Laman

2021-06

Beginning with Japan's early exposure to Christianity by the very successful Roman Catholic mission to Japan in the sixteenth and seventeenth centuries, and the resultant persecution and prohibition of Christianity, Laman lays the groundwork for understanding the experience of nineteenth-century Protestant missionaries, among whom those of the Reformed Church in America were in the forefront. The early efforts of the Browns, Verbecks, Ballaghs, and Stouts, their failures and successes, are recounted within the cultural and political context of the anti-Western, anti-Christian Japan of the time. Verbeck's service to the government helped bring about gradual change. The first Protestant church was organized with a vision for ecumenical mission, and during several promising years, churches and mission schools were organized. Reformed Church missionaries encouraged and trained Japanese leaders from the beginning, the first Japanese ministers were ordained in 1877, and the Japanese church soon exhibited a spirit of independence, ushering in an era of growing missionary/Japanese partnership. The rise of the Japanese empire, a reinvigorated nationalism, and its progression to militarist ultranationalism brought on a renewed anti-Western, anti-Christian reaction and new challenges to both mission and church. With the outbreak of World War II, the Japanese government consolidated all Protestant churches into the Kyodan to facilitate control. Laman continues the account of Reformed Church partners in mission in Japan in the midst of post-war devastation and subsequent social and political tensions. The ecumenical involvement and continued clarification of mutual mission finds

the Reformed Church a full participant with a mature Japanese church.

The Marine Aquarium Handbook - Martin A. Moe 2009

The Marine Aquarium Handbook is the bestselling saltwater aquarium book of all time, selling more than 250,000 copies since first published in 1982 and launching aspiring aquarists into the marine aquarium hobby. Out of print since 2006, this indispensable resource is now available in a completely updated and redesigned third edition that includes world-class color photography to help guide the reader through setup of their first marine aquarium and then progresses to reefkeeping and breeding of marine fishes. Written by an acclaimed marine biologist and pioneering fish and invertebrate breeder, the book provides sound advice in a clear, readable, and engaging voice. New content exclusive to this edition includes recent advances in biofiltration and energy-efficient lighting, brand new chapters on marine foods and refugia, greatly expanded coverage of fish species and hardy invertebrate species, and information about those species best suited for breeding. Each featured fish has a species profile, behavior notes, native range, maximum size, and essential feeding and husbandry advice. The Marine Aquarium Handbook covers everything a marine hobbyist needs to know to get started and be successful, including aquarium choices, water chemistry, filtration, biological filtration and live rock, setup and maintenance, fish selection, and identification and treatment of common diseases.

The Rural Life - Verlyn Klinkenborg 2007-09-03

The hugely admired author of "The Last Fine Time" preserves and makes new the sights, smells, sounds, and

poetry of country living. Klinkenborg reveals the beauty of the American landscape, not from a scenic overlook, but through a screened-in porch or from the window of a pickup driving down an empty highway in the teeth of an approaching storm.

Instant Boats - Harold Payson 2001
How to build simple, well-designed plywood boats without a complicated building jig, featuring complete scaled-down plans for five easily-built boats designed by Phil Bolger. From a small punt to a 31' daysailer with a schooner rig. The step-by-step example being a 12' double-ended sailing skiff.

Being Dragonborn - Mike Piero 2021-09-28

The Elder Scrolls V: Skyrim is one of the bestselling and most influential video games of the past decade. From the return of world-threatening dragons to an ongoing civil war, the province of Skyrim is rich with adventure, lore, magic, history, and stunning vistas. Beyond its visual spectacle alone, Skyrim is an exemplary gameworld that reproduces out-of-game realities, controversies, and histories for its players. Being Dragonborn, then, comes to signify a host of ethical and ideological choices for the player, both inside and outside the gameworld. These essays show how playing Skyrim, in many ways, is akin to "playing" 21st century America with its various crises, conflicts, divisions, and inequalities. Topics covered include racial inequality and white supremacy, gender construction and misogyny, the politics of modding, rhetorics of gameplay, and narrative features.

Basics of Singing - Jan Schmidt 2003
Suitable for all voices, this comprehensive introductory text uses a variety of pedagogical approaches to introduce students to the art and pleasure of singing. The text is

flexibly organized, presenting the basic principles of voice production, musicianship, song interpretation, and vocal health in a format that can be adjusted to meet the needs of the classroom and the individual. The text consists of two parts. Part One discusses such topics as breathing, basic vocal health, learning to read music, how to learn a song, and performance techniques. Part Two is an anthology of 50 songs - folk, musical theater, art songs, and rounds (for group performance). A companion 2-CD Set includes all the melodies and accompaniments for the song anthology.

Men and Gods - Rex Warner 2008-01-08
This outstanding collection brings together the novelist and scholar Rex Warner's knack for spellbinding storytelling with Edward Gorey's inimitable talent as an illustrator in a memorable modern recounting of the most beloved myths of ancient Greece. Writing in a relaxed and winning colloquial style, Warner vividly recreates the classic stories of Jason and the Argonauts and Theseus and the Minotaur, among many others, while Gorey's quirky pen-and-ink sketches offer a visual interpretation of these great myths in the understated but brilliantly suggestive style that has gained him admirers throughout the world. These tales cover the range of Greek mythology, including the creation story of Deucalion and Pyrrha, the heroic adventures of Perseus, the fall of Icarus, Cupid and Psyche's tale of love, and the tragic history of Oedipus and Thebes. **Men and Gods** is an essential and delightful book with which to discover some of the key stories of world literature.

San Diego Noir - Maryelizabeth Hart 2011-05-17

Southern California is not all sun, sand, and surf in this gripping collection of noir tales from T.

Jefferson Parker, Don Winslow, Maria Lima, and others. San Diego is home to miles of beaches, Balboa Park, a world-famous zoo, and some of the country's most expensive home and resort real estate. Yet the city also houses a few items that aren't actively promoted by the visitor's bureau: a number of the country's most corrupt politicians, border-related crimes, terrorists, and the occasional earthquakes. A noir feast! In the fifty-plus years since Raymond Chandler set *Playback* in Esmeralda, his name for La Jolla, the population has grown by more than a million, and crime has proliferated as well. San Diego of the past and the present offers the book's contributors a rich selection of settings, from the cross on Mount Soledad to the piers of Ocean Beach, and perpetrators and victims from the residents of its wealthiest enclaves to the inhabitants of its segregated barrios. **San Diego Noir** includes stories by T. Jefferson Parker, Jeffrey J. Mariotte, Martha C. Lawrence, Diane Clark & Astrid Bear, Debra Ginsberg, Morgan Hunt, Ken Kuhlken, Taffy Cannon, Don Winslow, Cameron Pierce Hughes, Lisa Brackmann, Gabriel R. Barillas, Gar Anthony Haywood, Luis Alberto Urrea, and Maria Lima. "When it's done right, noir is a darkly delicious thrill: smart, sharp-tongued, surprising. The knife goes in at the end with a twist. **San Diego Noir**, a new 15-story collection by some of the region's best writers, has all that going for it, and the steady supply of hometown references makes it even more fun." —The San Diego Union-Tribune

Leader to Leader (LTL), Enduring Insights on Leadership from the Drucker Foundation's Award-Winning Journal - Frances Hesselbein
1999-02-19

"The manager's job is to make human strength effective and human weakness irrelevant." –Peter F. Drucker "I am often asked by management students and middle managers, 'How can we make the changes you talk about if we are not at the top?' I reply, 'You can begin where you are, whatever your job. You can bring new insight, new leadership, to your team, your group.'" –Frances Hesselbein "As they say, 'None of us is as smart as all of us.' That is good because the problems we face are too complex to be solved by any one person or any one discipline." –Warren Bennis These are just a few of the insights collected in *Leader to Leader*, an inspiring examination of mission, leadership, values, innovation, building collaborations, shaping effective institutions, and creating community. Management pioneer Peter F. Drucker, Southwest Airlines CEO Herb Kelleher, best-selling authors Warren Bennis, Stephen R. Covey, and Charles Handy, Pulitzer Prize winner Doris Kearns Goodwin, Harvard professors Rosabeth Moss Kanter and Regina Herzlinger, and learning organization expert Peter Senge are among those who share their knowledge and experience in this essential resource. Their essays will spark ideas, open doors, and inspire all those who face the challenge of leading in an ever-changing environment. For a reader's guide, see www.leaderbooks.org

The Morris Canal and the Age of Ingenuity - Kevin W. Wright 2016
Hauling Pennsylvania anthracite and backloads of iron ore among mountain mines, inland ports and tidewater cites along its 106-mile route, the Morris Canal (1824-1924) with its water-powered inclined planes performed an engineering feat of worldwide note. *The Morris Canal and the Age of Ingenuity* traces the rise and fall of this hybrid canal-and-railway from technological marvel to quaint curiosity over the course of a century. Built as part of an ambitious network of nineteenth-century "internal improvements," it combined with other canals and railways to solve America's first energy crisis, relieving rising seaboard cities of dependence on depleted woodlots and mud roads. Though superseded by all-season railroads of far greater capacity, the canal fills a formative chapter in the backstory of America's rise from colonial backwater to global economic powerhouse. For those who recognize the importance of innovation to economic growth, the Morris Canal also presents a historical lesson of timely interest.

For the Common Good - John C. Knapp 2007

Against the all-too-familiar backdrop of corporate malfeasance, scandal in our religious institutions, political chicanery to serve ulterior motives, and constant reminders of the corruptive influence of power, *For the Common Good* showcases the insights, reflections, and recommendations of some of today's most forward-thinking and inspiring leaders, applying their expertise in fields such as ecology, education, and conflict resolution. Today's challenges test leaders to their very core, and require a fundamentally new kind of leadership committed to the greater good of society. From Nobel Prize winner, John Hume, to Leader-to-Leader Institute Chair, Frances Hesselbein, Harvard University's Howard Gardner to President Jimmy Carter, the contributors argue that because individuals, institutions, and societies are now so profoundly connected and inter-related, every decision of consequence has a ripple

effect. Leaders of all stripes, including corporate executives, politicians, social activists, scientists, and educators, must display courage, integrity, humility, and the wherewithal to consider the long-term impact of their decisions and actions; most importantly, they must engage in dialogue and recognize that creative solutions to complex problems require collaboration. The result is a provocative and multi-dimensional exploration of leadership in troubled and troubling times—but with a hopeful note that individuals and organizations will rise to the challenges.

Where to Play - Marc Gruber 2017

As an entrepreneur or innovator, you're trained to run fast. But are you running in the right direction? Choosing the right market for your innovation is the biggest, and trickiest, question for innovators. Research has shown that all too often entrepreneurs don't spend enough time identifying and researching their market opportunities - instead they jump at the first opportunity that looks good, and fail to properly evaluate and leverage other opportunities. These common mistakes means that you often choose the wrong market or lock yourself into one specific direction. *Where to Play* helps you to set a promising strategy, by giving a clear, structured and practical framework - the Market Opportunity Navigator- to better identify, evaluate and focus on the right market opportunities. With three dedicated and reusable worksheets covering: - Market Opportunity Set - assess your core strengths and identify which market opportunities exist for your business - Attractiveness Map - evaluate your market opportunities to reveal the most attractive option for focus - Agile Focus Strategy - create a strategic plan for your chosen market

opportunity that keeps you open-minded and agile Get the most value for your innovation with Where to Play! 'Designed to work seamlessly with our Business Model and Value Proposition Canvases, the Market Opportunity Navigator, proposed by Marc and Sharon, will help entrepreneurs and innovators to commercialise technologies. You will enjoy discovering highly practical worksheets, maps and dartboards of tremendous interest if you want to better identify, evaluate and strategise market opportunities. Let yourself be charmed by the toolkit and the case studies, along with the thoughts of Marc and Sharon.' Alex Osterwalder and Yves Pigneur, authors of the bestseller Business Model Generation 'When two internationally-known experts in entrepreneurship write a "how to" book on market opportunities for entrepreneurs, it is bound to be a very valuable book indeed. Marc Gruber and Sharon Tal have created just the right book for first-time and experienced entrepreneurs. It contains both step-by-step plans and very valuable tips on identifying market opportunities - an invaluable complement to both the Lean Start-up Process and the Business Model Canvas!' Eric von Hippel, T. Wilson Professor of Innovation, MIT Sloan School of Management 'Gruber and Tal have crafted a visually exciting way for entrepreneurs to identify and analyse their opportunities, before they dive into execution. This book pairs nicely with the Business Model Canvas and Lean Startup. Best of all, it also tells you how to focus, and what NOT to do!' Henry Chesbrough, UC Berkeley Haas School of Business and author of Open Innovation 'From entrepreneurship thought leaders comes this innovative step-by-step guide to thinking through the market essentials of an opportunity. Rather

than relying on generic examples or others' stories, the authors put the reader in the driver's seat by encouraging him or her to generate, evaluate and prepare to act on their own opportunities. I can't think of a more practically useful entrepreneurship book.' Dean A. Shepherd, Ray and Milann Siegfried Professor of Entrepreneurship, Mendoza College of Business, Notre Dame University 'Using thoughtful research and compelling examples, Where to Play provides important guidance on how to balance focus and flexibility when launching a new venture. It builds on the Lean Startup model by providing meaningful insights on what markets to address first.' Tina Seelig, Professor of the Practice, Stanford School of Engineering 'Where to Play attacks head-on one of the most difficult questions any aspiring entrepreneur must answer: "Which target market should I serve?". It's visual, easy-to-apply, and full of common-sense. If I were starting a business today, I wouldn't leave the starting blocks without it!' John Mullins, Professor, London Business School; best selling authors, The New Business Road Test and The Customer-Funded Business

Buehler's Backyard Boatbuilding - George Buehler 1991-01-05

Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers off Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that's really you, you gotta build it yourself. Backyard boatbuilding has its problems. Building in fiberglass is itchy, smelly, and yields a product that yachting maven L. Francis Herreshoff once called "frozen snot." Ferrocement, once all the rage, has pretty much sunk from favor, if you catch the drift. But there's still wood, right? Ah, wood. Nature's perfect material. You can build in the time-honored traditions of the Golden Age of Yachting, loving crafting intricate joints in rare tropical hardwoods, steaming swamp oak butts to sinuous shapes, holding the whole thing together with nonferrous fastenings that cost a buck or better each. Does that sound like boatbuilding for everyperson? What about the currently fashionable wood/epoxy boatbuilding? You butter

regular old wood with Miracle Whip, stick it together in the shape of a boat, and off you go, right? Epoxy works, but They don't exactly give it away; nor is it exactly a benign substance. Suiting up like Homer Simpson heading for a fun-filled day at the nuclear power plant isn't exactly the aesthetic boatbuilding experience many of us are looking for. Where does that leave us? In the capable hands of George Buehler, who honors the timeless traditions of the sea all right, but those from the other side of the boatyard tracks. Buehler draws his inspiration from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather, not just when it was pleasant. Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. This book contains complete plans for seven cruising boats--from a 28-foot sailboat to a 55-foot power cruiser. All the information you need is here, including step-by-step instructions honed by nearly 20 years of supplying boat plans to backyard builders--and helping them out when they get into trouble. Buehler is anarchic, heretical, and occasionally profane; his book is West Coast counterculture meets traditional hardchine workboat construction, leavened with hardnosed common sense and penny-pinching economy. This book is for those who look around them and see that much of what is done in the world today--whether in yachting or politics or economics or interpersonal relationships--is based not on logic but on conforming and meeting other people's expectations. This book is most definitely NOT about either. It is about the realization of dreams.

If you believe that everyone who wants a cruising boat can have one . . . If you see beauty beneath the fish scales and work scars of a commercial fishing boat . . . If you want to build a simple, rugged, economical, good-looking cruising boat--power or sail--using everyday lumberyard materials and few skills other than perseverance, this is the book for you. Buehler's Backyard Boatbuilding tells you how to build extraordinary boats using the most ordinary skills and materials, with complete plans, instructions, and specifications for seven real cruising boats ranging from a 28-foot sailboat to a 55-foot power cruiser. "Build wooden boats the Buehler way, which is to say inexpensively, yet like the proverbial brick outhouse."
