Pour le Sport - Roxanna Curto 2021-11-03

This edited volume gathers together studies examining various aspects of physical culture in literature written in French from Europe and around the Francophone world. We define “physical culture” as the systematic care for and development of the physique, and interpret it to include not only sport in the modern sense, but also all the athletic activities that preceded it or relate to it, such as bodily forms of exercise, leisure, and artistic creation. Our essays pursue diverse interpretive approaches and focus on texts from a wide variety of periods (medieval to the present) and genres (short stories, novels, essays, poetry) in order to consider the fundamental—yet highly neglected—place of physical activities in literature and culture from the French-speaking world. Some of the questions the essays explore include: Does the genre “sports literature” exist in French, and if so, what are its characteristics? How do governments or other political entities mobilize sports literature? What role do narratives about sports—especially the creation of teams—play in the construction of national, regional and/or local identities? How is physical culture used in literary works for pedagogical or ideological purposes? To what extent do sports performances provide a metaphorical and figurative discourse for discussing literature and culture?

Contexts in Translating - Eugene A. Nida 2002-11-29

Contexts in Translating is designed to help translators understand the varieties of contexts and their importance for understanding a text and reproducing the meaning in another language. The contexts include the historical setting of writing a text, the cultural components that make a text unique, the types of audiences for which the translation is intended, and the most efficient and effective ways of producing a satisfactory representation of the source-language text. The structural levels of language are described, and the principal features of text organization are also explained. In addition, the main features of various books on translation are outlined, and a chapter on basic theories of translation is followed by a selective bibliography.

Cultural Encounters in Translated Children's Literature - Helen Frank 2014-04-08

Cultural Encounters in Translated Children's Literature offers a detailed and innovative model of analysis for examining the complexities of translating children's literature and sheds light on the interpretive choices at

work in moving texts from one culture to another. The core of the study addresses the issue of how images of a nation, locale or country are constructed in translated children's literature, with the translation of Australian children's fiction into French serving as a case study. Issues examined include the selection of books for translation, the relationship between children's books and the national and international publishing industry, the packaging of translations and the importance of titles, blurbs and covers, the linguistic and stylistic features specific to translating for children, intertextual references, the function of the translation in the target culture, didactic and pedagogical aims, euphemistic language and explicitation, and literariness in translated texts. The findings of the case study suggest that the most common constructs of Australia in French translations reveal a preponderance of traditional Eurocentric signifiers that identify Australia with the outback, the antipodes, the exotic, the wild, the unknown, the void, the end of the world, the young and innocent nation, and the Far West. Contemporary signifiers that construct Australia as urban, multicultural, Aboriginal, worldly and inharmonious are seriously under-represented. The study also shows that French translations are conventional, conservative and didactic, showing preference for an exotic rather than local specificity, with systematic manipulation of Australian referents betraying a perception of Australia as antipodean rural exoticism. The significance of the study lies in underscoring the manner in which a given culture is constructed in another cultural milieu, especially through translated children's literature.

Children's Literature in Translation - Jan Van Coillie 2014-07-16

Children's classics from *Alice in Wonderland* to the works of Astrid Lindgren, Roald Dahl, J.K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than 'serious' (adult) literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations and on the translator's (in)visibility, and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of child(hood) images, the 'revelation' of the translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany; questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of 'cultural intertextuality' in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies dealing with character names, and complex translation strategies used in dealing with

the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's *Haroun and the Sea of Stories*.

Ovid, Amores (Book 1) - William Turpin 2016-05-15

From Catullus to Horace, the tradition of Latin erotic poetry produced works of literature which are still read throughout the world. Ovid's *Amores*, written in the first century BC, is arguably the best-known and most popular collection in this tradition. Born in 43 BC, Ovid was educated in Rome in preparation for a career in public services before finding his calling as a poet. He may have begun writing his *Amores* as early as 25 BC. Although influenced by poets such as Catullus, Ovid demonstrates a much greater awareness of the funny side of love than any of his predecessors. The *Amores* is a collection of romantic poems centered on the poet's own complicated love life: he is involved with a woman, Corinna, who is sometimes unobtainable, sometimes compliant, and often difficult and domineering. Whether as a literary trope, or perhaps merely as a human response to the problems of love in the real world, the principal focus of these poems is the poet himself, and his failures, foolishness, and delusions. By the time he was in his forties, Ovid was Rome's most important living poet; his *Metamorphoses*, a kaleidoscopic epic poem about love and hatred among the gods and mortals, is one of the most admired and influential books of all time. In AD 8, Ovid was exiled by Augustus to Romania, for reasons that remain obscure. He died there in AD 17. The *Amores* were originally published in five books, but reissued around 1 AD in their current three-book form. This edition of the first book of the collection contains the complete Latin text of Book 1, along with commentary, notes and full vocabulary. Both entertaining and thought-provoking, this book will provide an invaluable aid to students of Latin and general readers alike. This book contains embedded audio files of the original text read aloud by Aleksandra Szypowska.

Teaching Literature in Modern Foreign Languages - Fotini Diamantidaki 2019-04-04

From plays to poetry, *Le Petit Nicolas* to the Association for Language Learning (ALL) Literature wiki, this book shows trainee teachers of MFL, teachers in schools, teacher educators, how literature can be an essential tool for developing students' cultural awareness as well as language skills. With contributions from Ruth Heilbronn, Jane Jones and other leading scholars, it covers a wide range of approaches including looking at how to support students to develop the skills they need to read and discuss texts, and how to use

stories as a pedagogic tool, rather than just a way to develop reading skills. Examples of teaching French, German, Japanese, Mandarin and Spanish are used throughout, but the book draws together resources and strategies for use in teaching all modern foreign languages. Supporting students to develop into creative, reflective teachers, this book offers support for readers to develop their own tasks for their pupils and questions throughout to keep them engaged and encouraging them to critically engage with the content. Seemingly daunting articles are made much more approachable for readers with windows on research which provide a summary of relevant research papers, with full reference details for follow up.

Going East: Discovering New and Alternative Traditions in Translation Studies - Larisa Schippel 2016-12-23

This volume provides a comprehensive overview of various Eastern European traditions of thought on the subject of translation as well as the discipline of Translation Studies. It sheds a light on how these traditions developed, how they are related to and how they differ from Western traditions. The volume shows nationally-framed histories of translation and Translation Studies and presents Eastern European pioneers and trailblazing thinkers in the discipline. This collection of articles, however, also shows that it is at times hard or even impossible to draw the line between theoretical and/or scientific thinking and pre-theoretical and/or pre-scientific thinking on translation. Furthermore, it shows that our discipline's beginnings, which are supposedly rooted in Western scholarship, may have to be rethought and, consequently, rewritten.

A Victor Hugo Encyclopedia - John Andrew Fey 1999-10-30

Though he wrote more than a century ago, French author Victor Hugo (1802-1885) continues to capture the imagination of contemporary readers both in France and around the world. In the United States, he is best remembered as the author of the novel *Les Misérables* (1862), which has been adapted for the stage, and of *Notre-Dame-de-Paris* (1831), more commonly known to Americans as *The Hunchback of Notre Dame*. But Hugo was also a poet and dramatist, a great religious and social thinker, and one of the most important shapers of French Romanticism. As a poet, he created new verse forms, explored historical and mythological

themes, and criticized social issues of his time. Through his drama, he united prose and poetry and examined the politics of England and Spain. In all of his works, he discussed such theological and social issues as the problem of evil, the nature of war and peace, and the problems of capital punishment. The volume begins with a short biography that places Hugo within the context of 19th-century France. The biography tells of his early years during which he began to form his religious and political views, his maturation as a writer and thinker during the 1830s, and his political exile, during which he wrote some of his finest poetry. The alphabetically arranged entries that follow discuss his works, characters, themes, and ideas, as well as historical persons and places that figured prominently in his life and writings. Many of the entries cite sources of additional information, and the volume closes with a selected, general bibliography.

The Count of Monte Cristo - Vol II. (In Five Volumes) - Alexandre Dumas 2015-06-29

This vintage book contains the second volume of Alexandre Dumas's famous adventure novel, "The Count of Monte Cristo". Set in early nineteenth century France during the time of the Bourbon Restoration, it tells the story of a man's wrongful imprisonment, his escape, and his indefatigable quest for revenge. A masterful tale of hope, justice, vengeance, mercy, and forgiveness, "The Count of Monte Cristo" is rightfully one of the most famous novels of all time, and deserves a place on every bookshelf. Alexandre Dumas (1802-1870) was a famous French writer. He is best remembered for his exciting romantic sagas, including "The Three Musketeers" and "Chicot the Jester". Despite making a great deal of money from his writing, Dumas was almost perpetually penniless thanks to his extravagant lifestyle. His novels have been translated into nearly a hundred different languages, and have inspired over 200 motion pictures. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing this antiquarian book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

Charting the Future of Translation History - Paul F. Bandia 2006-07-28

Over the last 30 years there has been a substantial increase in the study of the history of translation. Both well-known and lesser-known specialists in translation studies have worked tirelessly to give the history of translation its rightful place. Clearly, progress has been made, and the history of translation has become a viable independent research area. This book aims at claiming such autonomy for the field with a renewed vigour. It seeks to explore issues related to methodology as well as a variety of discourses on history with a view to laying the groundwork for new avenues, new models, new methods. It aspires to challenge existing theoretical and ideological frameworks. It looks toward the future of history. It is an attempt to address

shortcomings that have prevented translation history from reaching its full disciplinary potential. From microhistory, archaeology, periodization, to issues of subjectivity and postmodernism, methodological lacunae are being filled. Contributors to this volume go far beyond the text to uncover the role translation has played in many different times and settings such as Europe, Africa, Latin America, the Middle-east and Asia from the 6th century to the 20th. These contributions, which deal variously with the discourses on methodology and history, recast the discipline of translation history in a new light and pave the way to the future of research and teaching in the field.

Transnational Perspectives on Graphic Narratives - Daniel Stein 2013-03-28

This book brings together an international group of scholars who chart and analyze the ways in which comic book history and new forms of graphic narrative have negotiated the aesthetic, social, political, economic, and cultural interactions that reach across national borders in an increasingly interconnected and globalizing world. Exploring the tendencies of graphic narratives - from popular comic book serials and graphic novels to manga - to cross national and cultural boundaries, *Transnational Perspectives on Graphic Narratives* addresses a previously marginalized area in comics studies. By placing graphic narratives in the global flow of cultural production and reception, the book investigates controversial representations of transnational politics, examines transnational adaptations of superhero characters, and maps many of the translations and transformations that have come to shape contemporary comics culture on a global scale.

Comics and Novelization - Benoît Glaude 2023-05-24

This book opens a novel perspective on comics and literature interactions. It claims that the two artistic media have always maintained a mutual emulation, for as long as they have coexisted in media culture. To demonstrate this, the present research does not focus on literary adaptations in comics form but rather on a literary corpus that remains virtually unexplored: comics-related novels. The purpose of this volume is to inventory French comics-related novels and to study them. Within the limits of the French-speaking world, this book pieces together a literary history of bande dessinée through its novels, from the nineteenth to twenty-first

centuries. Although the comic strip – including the aptly named "graphic novel" – has sometimes been regarded as the disciple of an unsurpassable literary model, do these under-studied adaptations in novel form not rather indicate a mutual relationship, or even an emulation, between the two media?

Nicholas - René Goscinny 2005

Nicholas is the first of five books that bring to life the day to day adventures of a young school boy - amusing, endearing and always in trouble. An only child, *Nicholas*, appears older at school than he does at home and his touchingly naive reaction to situations, cut through the preconceptions of adults and result in a formidable sequence of escapades. This first book in the series contains a collection of nineteen individual stories where, in spite of trying to be good, *Nicholas* and his friends always seem to end up in some kind of mischief.

Whether in the school room, at home, or in the playground, their exuberance often takes over and the results are calamitous - at least for their teachers and parents. Whether confusing the photographer hired to take the class picture, dealing with having to wear glasses for the first time, or trying desperately to help the teacher when the school inspector pays a visit, *Nicholas* always manages to make matters worse.

20,000 Leagues Under the Sea Illustrated (original illustrations by Alphonse de Neuville) - Jules Verne 2013-01-25

Twenty Thousand (20,000) Leagues Under the Sea (French: Vingt mille lieues sous les mers) is a classic science fiction novel by French writer Jules Verne published in 1870. It tells the story of Captain Nemo and his submarine *Nautilus* as seen from the perspective of Professor Pierre Aronnax. As the story begins in 1866, a mysterious sea monster, theorized by some to be a giant narwhal, is sighted by ships of several nations; an ocean liner is also damaged by the creature. The United States government finally assembles an

expedition in New York City to track down and destroy the menace. Professor Pierre Aronnax, a noted French marine biologist and narrator of the story, who happens to be in New York at the time and is a recognized expert in his field, is issued a last-minute invitation to join the expedition, and he accepts. This ebook edition contains all 70 original illustrations by Alphonse de Neuville and Édouard Riou.

Translating Fictional Dialogue for Children and Young People - Martin B. Fischer 2012-09-01

Literary and multimodal texts for children and young people play an important role in their acquisition of language and literacy, and they are a flourishing part of publishing and translating activities today. This book brings together twenty-one papers on the particular aspect of the translation of feigned orality. As the link between the literary and the multimodal text, fictional dialogue is the appropriate place for evoking orality, lending authenticity and credibility to the narrated plot and giving a voice to fictitious characters. This is illustrated with examples from narrative and dramatic texts as well as films, cartoons and television series, in their respective modes of mediation: translating, interpreting, dubbing and subtitling. The findings are of interest from the scholarly point of view of contrastive linguistics, for the professional practice of translating, interpreting, dubbing and subtitling and in the educational context.

Children's Literature in Translation - Jan Van Coillie 2020-10-30

For many of us, our earliest and most meaningful experiences with literature occur through the medium of a translated children's book. This volume focuses on the complex interplay that happens between text and context when works of children's literature are translated: what contexts of production and reception account for how translated children's books come to be made and read as they are? How are translated children's books adapted to suit the context of a new culture? Spanning the disciplines of Children's Literature Studies and Translation Studies, this book brings together established and emerging voices to provide an overview of the analytical, empirical and geographic richness of current research in this field and to identify and reflect on common insights, analytical perspectives and trajectories for future interdisciplinary research. This volume will appeal to an interdisciplinary audience of scholars and students in Translation Studies and Children's Literature Studies and related disciplines. It has a broad geographic and cultural scope, with contributions dealing with translated children's literature in the United Kingdom, the United States, Ireland, Spain, France, Brazil, Poland, Slovenia, Hungary, China, the former Yugoslavia, Sweden, Germany, and Belgium.
