Flapping /t/ in Australia. A Development Prognosis in General Australian English - Benjamín Dueñas 2015-12-15

Seminar paper from the year 2015 in the subject English Language and Literature Studies - Linguistics, grade: 1,7, University of Bamberg, course: Australian English, language: English, abstract: This paper will study the flapping /t/ as it is today and its possible evolution in the nearer future in General Australian English. Australian English (AusE), as it is today, is an English accent that counts with own and also shared features when compared to other variants of English. One of the phenomena that can be encountered in AusE is the realization of a flapped or tapped /t/ allophone (Honeybone 3), a tap alveolar, which is a quality that can easily be perceived when hearing Australians speak. After thoroughly revising English linguistic books though, it is remarkable that few authors appoint this phonetical process to also being part of AusE, but rather of American or Irish English nature among others; some do actually talk about this phenomenon as being also present in English spoken in the southern hemisphere, but they usually don't specify in which territories, which does not help the reader to find enough information about this specific subject when needed. Furthermore, Some AusE linguists seem to ignore this phenomenon when writing their research papers. Opportunely, there are a few authors who do correlate this as also being an AusE feature. This being said, their investigation will be taken as a starting point for further research on this subject. The study to follow will target to get enough information about the flapping /t/ in AusE, trying to focus as much as possible in General AusE, by pointing out what it is, how it emerged and what is the current status of the phenomenon, in order to later on be able to compare these pieces of information with an own research on the ongoing situation based on recordings, which will then lead us to answer to the main question of this paper: What possible development can we expect from the flapping /t/

phenomenon in Australia?

Proceedings of the 2nd International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications - Vinit Kumar Gunjan 2022-01-10

This book contains original, peer-reviewed research articles from the Second International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications, held in March 28-29th 2021 at CMR Institute of Technology, Hyderabad, Telangana India. It covers the latest research trends and developments in areas of machine learning, artificial intelligence, neural networks, cyber-physical systems, cybernetics, with emphasis on applications in smart cities, Internet of Things, practical data science and cognition. The book focuses on the comprehensive tenets of artificial intelligence, machine learning and deep learning to emphasize its use in modelling, identification, optimization, prediction, forecasting and control of future intelligent systems. Submissions were solicited of unpublished material, and present in-depth fundamental research contributions from a methodological/application perspective in understanding artificial intelligence and machine learning approaches and their capabilities in solving a diverse range of problems in industries and its real-world applications.

[Dame Joan Hammond](#) - Sara Hardy 2008-01-01

Joan Hammond lived an extraordinary life, as dramatic and deeply moving as any of the operatic roles for which she became famous Tosca, Mimi, Butterfly, Aida, Salome, Rusalka. No stranger to success, in her youth Joan was a golfing champion, excelling at most sports. But it was her voice that took her on a life-changing journey to Europe where the opulent pre-war theatres became her domain. Ever passionate, always generous, and never losing her Australian accent, Joan Hammond was an inspiring character; yet behind the scenes she faced many challenging twists of fortune. Joan's exhilarating performances introduced opera and classical song to millions of people, world-wide. She turned little-known arias into popular hits and pioneered the way for Australian artists on the world stage. When her own performing and recording days were over, she devoted herself to coaxing Australian opera into life not least through teaching young singers. Sara Hardy tells Joan's life story in all its glamour and complexity. Through interviews with family and old friends, she captures Joan's joie de vivre - that wonderful sparkle that never left her eyes.

Meet Me in Venice - Barbara Hannay 2019-08-06

A year after her husband Leo's death, widow Daisy invites her three adult children to join her for a holiday in beautiful Venice. It will be wonderful, her chicks under one roof again in their father's birthplace. But is it possible to recapture the past? Marc's marriage is in jeopardy, but for his mother's sake, he convinces his wife to keep up appearances. Anna's trying to hide the truth about the dismal state of her London acting career; and Ellie, enjoying a gap year and uncertain about her future choices, wants to avoid family pressure to conform. Despite the magic of Venice, family ties are tested to the limit, especially when a shocking secret from Leo's past is revealed. Now everything they value about love, family, commitment and trust must be re-examined. How can one family holiday require so much courage? Will Daisy's sentimental journey make or break them? From multi-award-winning author Barbara Hannay comes a moving and heartfelt family drama about difficult choices and finding happiness in the most unexpected places.

Singing and Teaching Singing - Janice L. Chapman 2021-12-06

Singing and Teaching Singing: A Holistic Approach to Classical Voice, Fourth Edition continues to be a beloved resource for singers and their teachers,

speech-language pathologists, and laryngologists and an adopted text for instructors and students in voice, singing, and performing arts courses. Janice L. Chapman is able to draw on her experiences as a singer with some of the world's leading opera companies to present a teaching technique specifically focusing on voice in the areas of classical and opera singing. Interspersed with the concepts and components of Chapman's methods are vignettes from her life and career, animated by her conversational and vibrant style to guide (and entertain) the reader through the book in a step-by-step fashion. Now expand to include joint authorships with Dr. Ron Morris, the fourth edition draws on his experience as a speech and language therapist, audiologist, and singer, and widens the scope of the book to view current studio teaching practices through a scientific lens. The philosophy of teaching presented combines three main facets: Holistic, Physiological, and Incremental. The Holistic segment emphasizes that the act of singing involves the whole person (i.e., body, mind, spirit, emotion, and voice); the Physiological segment stresses anatomy, muscular function, and effects of muscular interactions so that students and teachers alike can understand and visualize the functional workings of the torso, larynx, and the vocal tract and their impact on good singing practices; and the Incremental section shows that the act of singing and the teaching of singing can be broken down into manageable components that have a natural hierarchy that eventually interact and interlock. This teaching model provides a framework to master one element at a time, with the resulting effect of a complete and integrated mastery of technique. Chapman recommends this framework for rehabilitative work with the dysfunctional singer, for working with the developing singer, and for the ongoing development and maintenance of the technically able professional singer. This highly-readable text includes contributions from renowned voice professionals, case studies, evidence-based and practical examples, exercises, and videos. New to the Fourth Edition: * New editor and co-author, Ron Morris, BSpThy (Hons); MMusStud (Voice), MSPAA, MASA (CC), PhD * The addition of completely new chapters on Laryngeal Registration, Vocal Acoustics and Acoustic Registration * Clarifications and exercises by Dr. Ron Morris on the use of the Accent Method breathing as a highly effective remedial and training technique * Expanded and updated information on Breathing and Support, Vocal Acoustics, Registers (Laryngeal and Acoustic), Teaching and Learning, Hearing and Singing, and Manual Therapy * Exercises have been significantly expanded and now are contained in a chapter of their own, which includes some information on lesson structure and practice * Significant updates reflect the current state of research and the latest advances in voice science and pedagogy have been referenced throughout * A new glossary has been added for ease of reading and clarification of pedagogical terms used in the text

Instrumentalising Foreign Language Pedagogy in Translator and Interpreter Training - Olaf Immanuel Seel 2023-06-15

This volume offers a wide array of cutting-edge original research on the implementation of Foreign Language Pedagogy in translator and interpreter training, a still rather unexplored field of research in Translation Studies. It is divided in two distinct sections. The first section focuses on theoretical approaches to this topic. The chapters of this section will offer the reader valuable new knowledge and thoughts on how to update and enrich academic curricula as well as how to make use of cognitive linguistics and to implement a multicultural approach in the demanding domain of translator and interpreter training. The second practical section comprises a series of diverse methods and didactical means of Foreign Language Pedagogy which are creatively adapted to fit in language and translation/interpreting teaching for translation/interpreting trainees, aiming at fostering their translational sub-competences. The volume's overarching aim is to clearly emphasise that foreign language teaching for translation and interpreting trainees has to be approached and structured differently than conventional language teaching in other academic disciplines. It is useful for scholars and translation/interpreting teachers who want to enrich translator/interpreter training with new interdisciplinary ideas and knowledge which will significantly assist them in enhancing the translation/interpreting competence of their students.

Vocal Projections - Maria Pramaggiore 2018-10-18

Vocal Projections: Voices in Documentary examines a previously neglected topic in the field of documentary studies: the political, aesthetic, and affective functions that voices assume. On topics ranging from the celebrity voice over to ventriloquism, from rockumentary screams to feminist vocal politics, these essays demonstrate myriad ways in which voices make documentary meaning beyond their expository, evidentiary and authenticating functions. The international range of contributors offers an innovative approach to the issues relating to voices in documentary. While taking account of the existing paradigm in documentary studies pioneered by Bill Nichols, in which voice is equated with political rhetoric and subjective representation, the contributors move into new territory, addressing current and emerging research in voice, sound, music and posthumanist studies.

Translating and Interpreting in Australia and New Zealand - Judy Wakabayashi 2021-11-30

This volume explores Australian and New Zealand experiences of translation and interpreting (T&I), with a special focus on the formative impact of geocultural contexts. Through the critical lenses of practitioners, scholars and related professionals working in and on these two countries, the contributors seek a better understanding of T&I practices and discourses in this richly multilingual and multicultural region. Building on recent work in translation and interpreting studies that extends attention to sites outside of Europe and the Americas, this volume considers the geocultural and geopolitical factors that have helped shape T&I in these Pacific neighbours, especially how the practices and conceptualization of T&I have been closely tied with immigration. Contributors examine the significant role T&I plays in everyday communication across varied sectors, including education, health, business, and legal contexts, as well as in crisis situations, cultural and creative settings, and initiatives to revitalize Indigenous languages. The book also looks to the broader implications beyond the Australian and New Zealand translationscape, making it of relevance to T&I scholars elsewhere, as well as those with an interest in Indigenous studies and minority languages.

Computational Intelligence in Analytics and Information Systems - Hardeo Kumar Thakur 2023-09-08

The new book presents a valuable selection of state-of-the-art technological advancements using the concepts of AI and machine learning, highlighting the use of predictive analytics of data to find timely solutions to real-time problems. It helps to identify applicable approaches in order to enhance, automate, and develop effective solutions to challenges in data science and artificial intelligence. The various novel approaches include applications in healthcare, natural language processing, and smart cities. As such, the book is divided into sections that address: Computational Intelligence in Image Processing Computational Intelligence in Healthcare Techniques for Natural Language Processing Computational Intelligence in Smart Cities The very diverse range of topics include AI and machine learning applications for In security: For using digital image processing for image fusion (face recognition, feature extraction, object detection as well tracking, moving object identification), for person re-identification for security purposes. In healthcare and medicine: For diagnosis and prediction of breast cancer, other cancers, diabetes, heart disease; for predicting susceptibility to COVID-19; for prediction of mood and anxiety disorders. In agriculture: For prediction of crop profit; for prediction of cropping patterns and recommendation for crop cultivation. In traffic science/smart cities: For understanding road scene images, for detection of traffic signs, for devising a fog-based intelligent traffic phase timing regulation system In language/speech/text: For automatic text summarization, for document indexing for unstructured data, for speech/accent recognition, for sound separation, for American Sign Language interpretation for nonsigners, for emotional recognition and analysis through speech, body postures with facial expressions, and other body movements (to improve the performance of virtual personal assistants / emotion recognition using speech, body postures with facial expressions and other body movements. This volume offers valuable information for researchers working in interdisciplinary or multidisciplinary areas of healthcare, image analysis, natural language processing, and smart cities. This includes academicians, people in industry, and students with engineering background with research

interest in these areas. These peer-review chapters were selected from the International Conference on Computational Intelligence in Analytics and Information Systems (CIAIS- 2021), held in April 2021 at Manav Rachna University, India. Together with Volume 2: Advances in Digital Transformation, this 2-volume set offers an abundance of valuable information on emerging technologies in computational intelligence in information systems focusing on data science and artificial intelligence.

Sounding Bodies - Ann Cahill 2021-08-26

"In compelling and intricately argued ways, the authors make a resounding case for understanding how vocal sonority is intrinsic to self-identity and self-reception ... Required Reading." - Jane Boston, Principal Lecturer, Voice Studies, Royal Central School of Speech and Drama A new, provocative study of the ethical, political, and social meanings of the everyday voice. Utilising the framework of feminist philosophy, authors Ann J. Cahill and Christine Hamel approach the phenomenon of voice as a lived, sonorous and embodied experience marked by the social structures that surround it, including systemic forms of injustice such as ableism, sexism, racism, and classism. By developing novel theoretical constructs such as "intervocality" and "respiratory responsibility," Cahill and Hamel cut through the static between theory and praxis and put forward exciting theories on how human vocal sound can perpetuate -- and challenge -- persistent inequalities. *Sounding Bodies* presents a powerful model of how the seemingly disparate disciplines of philosophy and voice/speech training can, in conversation with each other, generate illuminating insights about our vocal lives and identities.

Sociolinguistic Variation and Language Acquisition across the Lifespan - Anna Ghimenton 2021-08-16

This volume provides a broad coverage of the intersection of sociolinguistic variation and language acquisition. Favoured by the current scientific context where interdisciplinarity is particularly encouraged, the chapters bring to light the complementarity between the social and cognitive approaches to language acquisition. The book integrates sociolinguistic and psycholinguistic issues by bringing together scholars who have been developing conceptions of language acquisition across the lifespan that take into account language-internal and cross-linguistic variation in contexts of both first and second language acquisition as well as of first and second dialect acquisition. The volume brings together theoretical and empirical research and provides an excellent basis for scholars and students wanting to delve into the social and cognitive dimensions of both the production and perception of sociolinguistic variation. The book enables the reader to understand, on the one hand, how variation is acquired in childhood or at a later stage and, on the other, how perception and production feed into one another, thus building up our understanding of the social meanings underpinning language variation.

American Accent Training - Ann Cook 2000

Directed to speakers of English as a second language, a multi-media guide to pronouncing American English uses a "pure-sound" approach to speaking to help imitate the fluid ways of American speech.

Thinking with an Accent - Pooja Rangan 2023-02-21

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Everyone speaks with an accent, but what is an accent?

Thinking with an Accent introduces accent as a powerfully coded yet underexplored mode of perception that includes looking, listening, acting, reading, and thinking. This volume convenes scholars of media, literature, education, law, language, and sound to theorize accent as an object of inquiry, an interdisciplinary method, and an embodied practice. Accent does more than just denote identity: from algorithmic bias and corporate pedagogy to migratory poetics and the politics of comparison, accent mediates global economies of discrimination and desire. Accents happen between bodies and media. They negotiate power and invite attunement. These essays invite the reader to think with an accent—to practice a dialogical and multimodal inquiry that can yield transformative modalities of knowledge, action, and care.

Make it Australian - Gabrielle Wolf 2008

The Australian Performing Group, or APG, helped to bring about a profound change in Australian theatre and nurtured the talents of a generation of writers and performers who have become household names including Max Gillies, David Williamson, Graeme Blundell, Jack Hibberd, Sue Ingleton and Grieg Pickhaver (aka H G Nelson). Yet to date the only published full-length accounts of the group have been written by former members. "Make it Australian!" gives an outsider's view of this influential group and the social, political and cultural context in which it operated. Through its observation of the personalities, conflicts and ideologies embedded in the APG, it challenges myths, reveals paradoxes and investigates divergences between the professed aims of its members and what the group did. This is the first critical history of APG and the book traces the group's development from its beginnings at La Mama Theatre in 1968 through its flowering at the Pram Factory and to its demise in 1981. It draws on interviews with key members, reviews of productions and an analysis of significant plays.

Human-in-the-Loop Machine Learning - Robert Munro 2021-07-20

Machine learning applications perform better with human feedback. Keeping the right people in the loop improves the accuracy of models, reduces errors in data, lowers costs, and helps you ship models faster. Human-in-the-loop machine learning lays out methods for humans and machines to work together effectively. You'll find best practices on selecting sample data for human feedback, quality control for human annotations, and designing annotation interfaces. You'll learn to create training data for labeling, object detection, and semantic segmentation, sequence labeling, and more. The book starts with the basics and progresses to advanced techniques like transfer learning and self-supervision within annotation workflows.

E-Learning Department of One - Emily Wood 2018-12-11

Master E-Learning Design on Your Own The clock is ticking. The new online training is due next week. You need to tweak a few activity questions, make sure changes to the audio voiceover flow smoothly, and get the subject matter expert to sign off on the final storyboard. To cap it all off, you're on your own. You're an e-learning department of one. As more companies explore the e-learning space for training and development, they often task lone individuals to bear the load. You might be an instructional designer asked to start with e-learning, or an experienced marketer developing a sales support e-learning module, or a classroom trainer taking your content online. E-Learning Department of One can be your lifeline. Learning experience designer Emily Wood knows a thing or two about being an e-learning department of one. In this book, she shares shortcuts to create quality products when faced with limited resources, help, and time. Design and development hacks include how to: Manage complex content with a storyboard. Decide which authoring tool fits your budget. Gather and organize feedback data from pilot tests. Ensure your product meets accessibility requirements. While you might feel like you're stranded on a deserted island, struggling to manage dozens of training requests, remember you're not alone. Welcome to the e-learning community.

Speak More Clearly Australian Accent -

The English Language in Australia and New Zealand - George William Turner 1972

American Accent Drills for British and Australian Speakers - Amanda Quaid 2020

American Accent Drills for British and Australian Speakers provides a comprehensive guide to learning a General American Accent, made specifically for native English speakers. Unlike most American accent guides, which are geared toward ESL learners, this handbook covers only the shifts that English speakers need to make - nothing more, nothing less. In addition to vowel and consonant drills, it covers the finer points of American intonation and elision, features that often elude English speakers of other dialects. Finally, it provides exercises for "owning" the dialect, finding authenticity and making it work for each individual actor in their own way. This is an excellent resource for students of Speech and Dialects courses, actors from the UK, Australia, and New Zealand, and advanced ESL learners who need to use an American accent on screen or on stage. American Accent Drills for British and Australian Speakers also includes access to downloadable audio files of the practice drills featured in the book, to help students practice and perfect their American accent.

Phone Clones - Kiran Mirchandani 2012-04-15

Transnational customer service workers are an emerging touchstone of globalization given their location at the intersecting borders of identity, class, nation, and production. Unlike outsourced manufacturing jobs, call center work requires voice-to-voice conversation with distant customers; part of the product being exchanged in these interactions is a responsive, caring, connected self. In Phone Clones, Kiran Mirchandani explores the experiences of the men and women who work in Indian call centers through one hundred interviews with workers in Bangalore, Delhi, and Pune. As capital crosses national borders, colonial histories and racial hierarchies become inextricably intertwined. As a result, call center workers in India need to imagine themselves in the eyes of their Western clients—to represent themselves both as foreign workers who do not threaten Western jobs and as being "just like" their customers in the West. In order to become these imagined ideal workers, they must be believable and authentic in their emulation of this ideal. In conversation with Western clients, Indian customer service agents proclaim their legitimacy, an effort Mirchandani calls "authenticity work," which involves establishing familiarity in light of expectations of difference. In their daily interactions with customers, managers and trainers, Indian call center workers reflect and reenact a complex interplay of colonial histories, gender practices, class relations, and national interests.

For the Love of Language - Kate Burridge 2015-10-16

This text offers a comprehensive introduction to how language works and the role of linguistics in investigating its fundamental design.

Pronunciation and Phonetics - Adam Brown 2014-03-26

This engaging, succinct text is an introduction to both phonetics and phonology as applied to the teaching of pronunciation to English language learners. Section 1 selectively covers the main areas of phonetics and phonology, without going into any area in more depth than the average English language teacher requires or that the average English language teacher trainee can handle. Section 2 focuses on practical issues related to learners and how they learn languages, and what represents good practice in terms of classroom activities for pronunciation—including aspects such as targets, motivation and priorities. The chapters end with activities to help the reader understand concepts. Section 3 provides innovative sample activities which put into practice the theoretical points covered in the first two sections, answers to the various exercises, recommended further reading (both print and non-print), a glossary of technical phonetic terms, and a bibliography of works on pronunciation teaching. The text is accompanied by a Companion Website with audio recordings of model pronunciations and audio material relating to the activities.

Perfect Pronunciation - Alison Kimble-Fry 2010

This book offers an entirely fresh approach on how to improve the clarity and quality of English pronunciation. Written by a speech pathologist, rather than a language specialist. The DVD is designed on a 'listen and repeat' basis. It allows the student to compare their sound production with that of the coach

across words, phrases and sentences. There is a separate set of exercises for each of the 33 Sound Guides.

Research in Education - 1971

The Odd Body - Stephen Juan 2011-04-29

If you've ever had a question about your body (maybe one you're afraid to ask?), this book is for you. Things like why we yawn, why skin wrinkles after a bath, or even whether it's possible to keep a severed head alive: *The Odd Body* explains these and many other silly, weird, bizarre, and fascinating body mysteries. Dr. Stephen Juan entertains and rivets readers with his detailed answers. Reading *The Odd Body* is like having your doctor patiently answer all your random questions, one by one. But Dr. Juan goes well beyond the usual and ordinary things people wonder about bodies, like why most individuals are right-handed or why you get chills when chalk screeches across a blackboard. He also tells readers how a dead body is made into a mummy, the success rate of those who bore holes in their own heads to relieve headaches, and much, much more. *The Odd Body* is a unique combination of fun and fascinating material that's delivered by an expert who happens to be a great storyteller. The book's question-and-answer format makes it easy to pick up, turn to any page, and immediately become drawn into the intricacies of anatomy and physiology while gaining a better understanding of the human need to know more about ourselves.

Voice Training Programs for Professional Speakers: Global Outcomes - Plural Publishing, Incorporated 2017-05-31

Voice Training Programs for Professional Speakers: Global Outcomes is a professional resource for voice education and training programs used to care for the voice of different professional speakers and occupational voice users. This includes teachers, media reporters, fitness instructors, telemarketers, clergy, speech pathologists, and more. Each chapter is authored by an experienced voice clinician who provides a clear description of a target population and its challenges, as well as a detailed roadmap describing a

unique global experience in developing, implementing, and advocating for these programs in academic institutions, professional unions, and workplaces. This book provides detailed steps and outcomes of globally tested health care and voice training programs for each of the professional speaker populations addressed. *Voice Training Programs for Professional Speakers* can thus be used by phoniatrists, logopedists, speech-language pathologists, and vocal coaches as a comprehensive resource for tailored preventative and management programs. It can also be used by future and current professional speakers as a great self-education resource to help them better care, develop, and advocate for their own voices and careers.

Tall Ships and Tall Tales - Jonathan King 2013-10-28

Over the last 40 years, Jonathan King has brought history to life, re-enacting events such as the First Fleet's voyage across the high seas to Botany Bay, the mutiny against ship's captain William Bligh on the *Bounty*, Matthew Flinders' troubled circumnavigation of Terra Australis, Ernest Shackleton's death-defying dash across the icy waters of the Antarctic Ocean, and Marco Polo's passage from China. Along the way, King has encountered a cast of mavericks, rogues, entrepreneurs, dignitaries, and politicians — a veritable who's who of Australia and beyond. These include bushman R.M. Williams, singers Slim Dusty and Helen Reddy, actor Jack Thompson, media magnate Rupert Murdoch, great train robber Ronnie Biggs, explorer Edmund Hillary, boxer Muhammad Ali, Palestinian leader Yasser Arafat, rock star Sting — and even Queen Elizabeth II. So join this bestselling author and historian as he recounts his spectacular adventures: jackarooing on outback stations; trekking the Amazon to meet a remote tribe; sailing the perilous waters of the Atlantic; riding a traditional junk in the South China Sea; being detained by Spanish border guards; and becoming caught in an Antarctic hurricane, just metres from reaching Shackleton's grave. These extraordinary tales will leave you breathless, dazzled, and inspired by King's persistence and sheer courage in bringing history to life.
