**Frank Films** - Brigitta Burger-Utzer 2009  
Robert Frank turned to filmmaking at the end of the 1950s. Although he has made 27 films, the work is largely a wellkept secret. Frank approaches each film project as a new experience, challenging the medium and its possibilities at every turn. He has amalgamated documentary, fiction, and autobiography, cutting across genres. This book offers a visually unique approach to Frank's films: only new stills taken from videotapes have been used and they add up to a visual essay on Frank's cinema that establishes an engaging dialogue with his photographic work. Each film is introduced with detailed analysis, discussing the history and the aesthetics of Frank's film work. An interview with Allen Ginsberg provides an insider view. Together the texts and images offer an innovative and in-depth approach to the oeuvre of one of the greatest and most restless artists of the 20th century. Robert Frank was born in Zurich, Switzerland in 1924 and went to the United States in 1947. He is best known for his seminal book *The Americans* (1958), which gave rise to a distinct new art form in the photo-book, and his experimental film *Pull My Daisy* (1959) both reproduced by Steidl within *The Robert Frank Project*.

**The Collegians** - Gerald Griffin 1857

**The Color of Rain** - Michael Spehn  
2011-10-04

When unexpected grief brings two families together, how do they start their journey to healing? Join Michael and Gina Spehn-- bestselling authors and founders of the New Day Foundation--as they tell their story of resilience, remembrance, and reliance on their shared faith. Matt Kell and Cathy Spehn had known each other since grade school. As adults, they each got married, lived in their hometown, and attended the same church. Their kids even attended school together. Matt died at home on Christmas Day after a three-year battle with cancer, leaving behind his wife, Gina, and two young boys. After attending Matt's inspirational funeral and reaching out to Gina with offers of support, Cathy was diagnosed with inoperable brain cancer. She died only 17 days later, leaving behind her husband, Michael, and three young children. In her final hours, Cathy instructed Michael to call Gina Kell. *The Color of Rain* illuminates the stepping stones of loss and healing that ultimately led to a joyful new life for Michael, Gina, and their five children. Their path to becoming a modern-day Brady Bunch was paved with grief, laughter, and the willingness to be restored to a new and even better life despite the inevitable resistance they faced. As you learn more about Michael and Gina's story, you'll learn: The importance of keeping God at the center of your marriage How they

navigated becoming a blended family The life-changing power of faith, even on your darkest days As their dual first-person narrative reveals what it is like to walk through loss and love simultaneously, you'll have an intimate look at how Michael and Gina lived, lost, and ultimately persevered through extraordinary circumstances. Praise for *The Color of Rain*: "The Color of Rain is a testament to God's restoration and grace. Even in our suffering, there is beauty. It rarely makes sense, but it's always true: 'He makes all things beautiful, in His time.'" --Katie Davis, *New York Times* bestselling author of *Kisses from Katie* "Michael and Gina Spehn's *The Color of Rain* is not only an instant bestseller but also an instant classic, certain to be pressed into the hands of hundreds of thousands of grieving men and women by their closest friends, for it is a book that is painfully honest about the depths of sorrow but also full of the joy of the hard path back from near despair. It is another reminder that God is there, however dark the day, and that he will comfort those who call on him." --Hugh Hewitt, bestselling author and radio host

[The Four & Twenty Blackbirds Pie Book](#) - Emily Elsen 2013-10-29

**Every True Pleasure** - Wilton Barnhardt 2019-02-07

Some of North Carolina's finest fiction and nonfiction writers come together in *Every True Pleasure*, including David Sedaris, Kelly Link, Allan Gurganus, Randall Kenan, and more. Within the volume—featuring writers who identify as gay, trans, bisexual, and straight—are stories and essays that view the full spectrum of contemporary life through an LGBTQ lens. These writers, all native or connected to North Carolina, show the multifaceted challenges and joys of LGBTQ life, including young love and gay panic, the minefield of religion, military service, having children with a surrogate, family rejection, finding one's true gender, finding sex, and finding love. One of the only anthologies of its kind, *Every True Pleasure* speaks with insight and compassion about living LGBTQ in North Carolina and beyond. Contributors include Jasmine Beach-Ferrara, Brian Blanchfield, Belle Boggs, Emily Chavez, Garrard Conley, John Pierre Craig, Diane Daniel, Allan Gurganus, Minrose Gwin, Aaron Gwyn, Wayne Johns, Randall Kenan, Kelly Link, Zelda Lockhart, Toni Newman, Michael Parker, Penelope Robbins, David Sedaris, Eric Tran, and Alyssa Wong.

[The Vaquita](#) - Aidan Bodeo-Lomicky 2015-02-04

*The Vaquita* is a book about the world's most endangered marine mammal, the Vaquita porpoise. Less than 100 remain, and this book provides information on their biology as well as how to help them. Complete with original illustrations and poetry, this book is great for anyone interested in the natural world.

[Vaquita marina](#) - Brooke Bessesen 2020-01-06

México es hogar de la vaquita marina, el cetáceo más pequeño del mundo. Esta marsopa, de ojos bien delineados y labios que parecen sonreír todo el tiempo, es el único mamífero marino endémico de

nuestro país: habita una pequeña área en el mar de Cortés y hoy está críticamente amenazada por una conjunción de atroces circunstancias, descritas aquí por Brooke Bessesen con pasión y sentido de urgencia. Narrado sobre el terreno, recurriendo a entrevistas con agentes clave y a la observación directa, este libro presenta las características biológicas de la *Phocoena sinus*, su triste condición de pesca incidental en manos de quienes buscan capturar totoaba —un pez cuyo "buche" alcanza precios astronómicos en el mercado negro de Estados Unidos y China—, los esfuerzos científicos y políticos por controlar el declive de esta especie, la colaboración internacional por rescatarla, el conflicto social que se ha desatado en las comunidades de pescadores luego de prohibirse el uso de redes de enmalle. Conservar la riqueza ecológica plantea delicados retos éticos, económicos y técnicos, que exigen la participación de una ciudadanía informada; con su relato sobre el denso tejido de ciencia, política y crimen organizado en el golfo de California, Bessesen hace un firme llamado a no repetir el deplorable destino de las especies hoy extintas por inacción gubernamental y social. "Bessesen aborda la difícil encrucijada que hoy afronta la vaquita marina mezclando la atención al detalle y la curiosidad del científico con la pasión del ambientalista. Es una lectura obligada para quien quiera comprender lo complejo de los esfuerzos por proteger la biodiversidad." Todd L. Capson, *Science* "En esta intrépida historia de detectives sobre la conservación, la bióloga marina Brooke Bessesen explica cómo la especie está a punto de desaparecer y muestra por qué el esfuerzo por conservar a las restantes vaquitas es un desafío tortuoso e incierto." Barbara Kiser, *Nature*

### **Transformations of Social-Ecological Systems** - Tetsu Sato 2018-12-08

Through this book, readers will gain a comprehensive overview of

transdisciplinary knowledge co-production in local contexts as an issue-driven and solution-oriented process, and will come to understand its relationship to societal transformation processes toward sustainability. In a single volume, the theory, approaches and academic implications of this novel type of knowledge production are addressed, together with its societal impacts. In the midst of global anthropogenic impacts that affect various environments, over the past few decades we have observed autonomous initiatives in local communities around the world to tackle these environmental challenges. It is vital that such local actions be scaled up to achieve sustainable societies, which requires societal transformation on larger scales. Thanks to numerous collaborative actions in local communities, transdisciplinary knowledge co-production among diverse stakeholders has successfully been mobilized, resulting in the development of Integrated Local Environmental Knowledge (ILEK); knowledge that can inform and support decisions and actions promoting the sustainable transformation of society. This book uses comparative case studies in communities around the world to illuminate and clarify processes and factors promoting the co-production and utilization of ILEK to facilitate decision-making. In addition, readers will gain deeper insights into the science-society interactions that can contribute to finding collaborative solutions to a wide range of critical environmental problems. Though the book is ideally suited for researchers and students, it also offers a valuable resource for practitioners, government agencies, and stakeholder agencies.

[Mothers and Strangers](#) - Samia Serageldin 2019-02-26

In this anthology of creative nonfiction, twenty-eight writers set out to discover what they know, and don't know, about the person they call Mother. Celebrated writers Samia Serageldin and Lee Smith have curated a diverse and insightful collection that challenges stereotypes about mothers

and expands our notions of motherhood in the South. The mothers in these essays were shaped, for good and bad, by the economic and political crosswinds of their time. Whether their formative experience was the Great Depression or the upheavals of the 1970s, their lives reflected their era and influenced how they raised their children. The writers in *Mothers and Strangers* explore the reliability of memory, examine their family dynamics, and come to terms with the past. In addition to the editors, contributors include Belle Boggs, Marshall Chapman, Hal Crowther, Clyde Edgerton, Marianne Gingher, Jaki Shelton Green, Sally Greene, Stephanie Elizondo Griest, Jacquelyn Dowd Hall, Eldridge "Redge" Hanes, Lynden Harris, Randall Kenan, Phillip Lopate, Michael Malone, Frances Mayes, Jill McCorkle, Melody Moezzi, Elaine Neil Orr, Steven Petrow, Margaret Rich, Omid Safi, James Seay, Alan Shapiro, Bland Simpson, Sharon K. Swanson, and Daniel Wallace.

*Berlin Like a Local* - DK Eyewitness

**Vinny the Vaquita** - Jen Gabler 2016-05-04  
Dive into the ocean to meet a shy but friendly vaquita porpoise, and learn how to

help save the species from extinction. With 40 pages of beautiful and vibrant full-page illustrations, elegant but educational rhyming prose, and 6 pages of additional information about whales, dolphins and porpoises, this book is a hit with nature lovers of all ages.

**A Queer and Pleasant Danger** - Kate Bornstein 2012

Presents the life of a Jewish boy who joined the Church of Scientology and left twelve years later, ultimately transitioning to a woman and becoming a civil rights activist and gender outlaw.

**Deep Oil Spills** - Steven A. Murawski  
2019-06-29

The demand for oil and gas has brought exploration and production to unprecedented depths of the world's oceans. Currently, over 50% of the oil from the Gulf of Mexico now comes from waters in excess of 1,500 meters (one mile) deep, where no oil was produced just 20 years ago. The Deepwater Horizon oil spill blowout did much to change the perception of oil spills as coming just from tanker accidents, train derailments, and pipeline ruptures. In fact, beginning with the Ixtoc 1 spill off Campeche, Mexico in 1979-1980, there have been a series of large spill events originating at the sea bottom and creating a myriad of new environmental and well control challenges. This volume explores the physics, chemistry, sub-surface oil deposition and environmental impacts of deep oil spills. Key lessons learned from the responses to previous deep spills, as well as unresolved scientific questions for additional research are highlighted, all of which are appropriate for governmental regulators, politicians, industry decision-makers, first responders, researchers and students wanting an incisive overview of issues surrounding deep-water oil and gas production.

*The Lucky Years* - David B. Agus  
2016-01-05

Bestselling author David Agus unveils the brave new world of medicine, one in which we can take control of our health like never before and doctors can fine-tune strategies

and weapons to prevent illness. In his first bestseller, *The End of Illness*, David Agus revealed how to add vibrant years to your life by knowing the real facts of health. In this book, he builds on that theme by showing why this is the luckiest time yet to be alive, giving you the keys to the new kingdom of wellness. Medicine is undergoing rapid change. In the old world, you followed general principles and doctors treated you based on broad, one-size-fits all solutions. In this new golden age, you'll be able to take full advantage of the latest scientific findings and leverage the power of technology to customize your care. Only those who know how to access and adapt to these breakthroughs—without being distracted by hyped ideas and bad medicine—will benefit. Imagine being able to get fit and lose weight without dieting, train your immune system to fight cancer, edit your DNA to avoid a certain fate, erase the risk of a heart attack, reverse aging, and know exactly which drugs to take to optimize health with zero side effects. That's the picture of the future that you can enter starting today. Welcome to *The Lucky Years*.

*Origins of Life* - Jen Gabler 2016-04-11

Join the Royal Air Force's Flight Lieutenant Charlie Peters in the Solid State Phased Array Radar Station as she sees a bright light in the night's sky, and then sets off on an emotional and enigma-filled journey that eventually takes her to one of the loneliest corners of the British Isles, and to a discovery of just what it means to be human.

**Ecological Informatics** - Friedrich Recknagel 2006-05-21

Ecological Informatics promotes interdisciplinary research between ecology and computer science on elucidation of principles of information processing in ecosystems, ecological sustainability by informed decision making, and bio-inspired computation. The 2nd edition of the book consolidates the scope, concepts, and techniques of this newly emerging discipline by a new preface and additional chapters on cellular automata, qualitative

reasoning, hybrid evolutionary algorithms and artificial neural networks. It illustrates numerous applications of Ecological Informatics for aquatic and terrestrial ecosystems, image recognition at micro- and macro-scale as well as computer hardware design. Case studies focus on applications of artificial neural networks, evolutionary computation, cellular automata, adaptive agents, fuzzy logic as well as qualitative reasoning. The 2nd edition of the book includes an index with novel evolutionary algorithms for the discovery of multiple nonlinear functions and rule sets as well as parameter optimisation in complex ecological data. *Our Woman in Havana* - Sarah Rainsford 2018-09-06

Graham Greene saw the Castros rise; Sarah Rainsford watched them leave. From the street where Wormold, the hapless hero of Greene's *Our Man in Havana*, plied his trade, BBC foreign correspondent Rainsford reports on Fidel's reshaping of a nation, and what the future holds for ordinary Cubans now that he and his brother Raul are no longer in power. Through tales of literary ghosts and forgotten reporters, believers in the revolution and dissidents, entrepreneurs optimistic about the new Cuba and the disillusioned still looking for a way out, *Our Woman in Havana* paints an enthralling picture of this enigmatic country as it enters a new era.

*Long Live the Free Pericardium !* - Montserrat Gascon Segundo 2012

This book explains in a clear and simple way what life is and how it flows within our cells, between people and through people. It is a practical manual that will help us to "feel" life, to vibrate and breathe the life inside of our bodies and of all living beings. A key focus of this work is how emotional impact affects our pericardium, which is the membrane that envelops, maintains and protects the heart.

**Transformational Analysis** - Noam Chomsky 1968

*If You Were a Parrot* - Katherine Rawson 2006-01-01

Imaginative pictures illustrate how young readers would look and act if they had the same physical characteristics and behaviors as parrots.

*A Heritage of Horror* - David Pirie 1973

*Trey, the Chef* - Kira Parris-Moore  
2019-03-25

Trey the Chef, offers a unique perspective about my son who lives with autism by telling a story about my son's interest in cooking.

**Vaquita** - Brooke Bessesen 2018-09-11  
"Intrepid conservation detective story." -- Nature "A lucid, informed, and gripping account...a must-read." --Science "Passionate...a heartfelt and alarming tale." --Publishers Weekly "Gripping...a well-told and moving tale of environmentalism and conservation." --Kirkus "Compelling." --Library Journal  
In 2006, vaquita, a diminutive porpoise making its home in the Upper Gulf of California, inherited the dubious title of world's most endangered marine mammal. Vaquita have been in decline for decades, dying in illegal gillnets intended for a giant fish, totoaba. Author Brooke Bessesen takes us to the Upper Gulf region in search of answers to a heart-wrenching dilemma. When diplomatic efforts to save the porpoise failed, Bessesen followed a scientific team in a binational effort to capture remaining vaquita and breed them in captivity--the only hope for their survival. In this fast-paced, soul-searing tale, she learned that there are no easy answers when extinction is profitable.

**Ethology and Behavioral Ecology of Odontocetes** - Bernd Würsig 2019-08-02  
This book concentrates on the marine mammalian group of Odontocetes, the toothed whales, dolphins, and porpoises. In 23 chapters, a total of 40 authors describe general patterns of ethological concepts of odontocetes in their natural environments, with a strong bent towards behavioral ecology. Examples are given of particularly well-studied species and species groups for which enough data exist, especially from the past 15 years. The aim is to give a modern flavor of present knowledge of

ethology and behavior of generally large-brained behaviorally flexible mammals that have evolved quite separately from social mammals on land. As well, the plight of populations and species due to humans is described in multiple chapters, with the goal that an understanding of behavior can help to solve or alleviate at least some human-made problems.

**Bear About Town** - Stella Blackstone  
2019-09-01

Walk down to town with Bear and discover all the different businesses and settings. The rhyming text teaches days of the week, and is complemented by a full-spread map of the town at the end.

*Scenarios and Responses to Future Deep Oil Spills* - Steven A. Murawski 2019-07-04  
It has often been said that generals prepare for the next war by re-fighting the last. The Deepwater Horizon (DWH) oil spill was unlike any previous - an underwater well blowout 1,500 meters deep. Much has been learned in the wake of DWH and these lessons should in turn be applied to both similar oil spill scenarios and those arising from "frontier" explorations by the marine oil industry. The next deep oil well blowout may be at 3,000 meters or even deeper. This volume summarizes regional (Gulf of Mexico) and global megatrends in marine oil exploration and production. Research in a number of key areas including the behavior of oil and gas under extreme pressure, impacts on biological resources of the deep sea, and the fate of oil and gas released in spills is synthesized. A number of deep oil spills are simulated with detailed computer models, and the likely effects of the spills and potential mitigation measures used to combat them are compared. Recommended changes in policies governing marine oil exploration and development are proposed, as well as additional research to close critical and emerging knowledge gaps. This volume synthesizes state-of-the-art research in deep oil spill behavior and response. It is thus relevant for government and industry oil spill responders, policy formulators and implementers, and academics and students

desiring an in-depth and balanced overview of key issues and uncertainties surrounding the quest for deep oil and potential impacts on the environment.

*F\*cked* - Krystyna Hutchinson 2018-10-09  
Are You a Dirty, Nasty Slut? Or a Sexually Repressed Nightmare? Regardless of your background or bedroom resume, someone or something has probably made you feel that way at some point. This was what Corinne Fisher and Krystyna Hutchinson discovered when they created the wildly popular Guys We Fucked: The Anti Slut-Shaming Podcast. What started as an outlet to interview— You guessed it!—guys they'd fucked, quickly evolved into an enormous community of Fuckers around the world, and a place to share stories of kinks gone wild, trauma, assault, and the overall confusion among people who don't know what the fuck they are doing (in other words, everyone). F\*CKED brings these raw, ridiculous, and serious conversations from the podcast to the page. It is a guide to love and sex for anyone -- female, male, trans, or undecided—who is fed up with double standards and the stigma surrounding sexual beings. It is for anyone who has ever felt afraid to be their authentic self. Corinne and Krystyna won't talk down to you or coddle you because you're better than that. They won't explain why he's just not that into you, because it doesn't fucking matter. This book will teach you how to deal with shit, brush your shoulder off, and move on. You'll also learn about: Why shame is completely made up and how we can stop giving into it Sexual exploration and how it sometimes ends in a trip to the ER Stuff we should stop doing: Snooping, nitpicking our bodies, and faking orgasms Asking your sexual partner uncomfortable questions Masturbation, threesomes, porn, sex toys, butt stuff, and much, much more Despite what Rom-Coms and magazines tell you, you can handle sexual exploration without the assistance of a man, a glass of rose, and a Xanax. More importantly, you're fine all by yourself. This is the book Bridget Jones should've read instead of writing that shitty diary in the

first place.

**Understanding and Solving Environmental Problems in the 21st Century** - R. Costanza 2002-06-05

The aim of this book is to encourage integration of the natural and social sciences with the policy and design-making community, and thereby develop a deeper understanding of complex environmental problems. Its fundamental themes are: • integrated modeling and assessment • complex, adaptive, hierarchical systems • ecosystem services • science and decision-making • ecosystem health and human health • quality of life and the distribution of wealth and resources. This book will act as a state of the art assessment of integrated environmental science and its relation to real world problem solving. It is aimed not only at the academic community, but also as a sourcebook for managers, policy makers, and the informed public. It deals both with the state of the science and the level of consensus among scientists on key environmental issues. The concepts underlying this book were developed at the 2nd EcoSummit workshop held in Halifax, Nova Scotia, June, 2000, with active participation from all delegates, and attempts to present their collective view.

**A New Ecology** - Sven Erik Jørgensen 2011-08-30  
A New Ecology presents an ecosystem theory based on the following ecosystem

properties: physical openness, ontic openness, directionality, connectivity, a complex dynamic for growth and development, and a complex dynamic response to disturbances. Each of these properties is developed in detail to show that these basic and characteristic properties can be applied to explain a wide spectrum of ecological observations and convections. It is also shown that the properties have application for environmental management and for assessment of ecosystem health. \*

Demonstrates an ecosystem theory that can be applied to explain ecological observations and rules \* Presents an ecosystem theory based upon a systems approach \* Discusses an ecosystem theory that is based on a few basic properties that are characteristic for ecosystems

**Letters to an Incarcerated Brother** - Hill Harper 2013-11-05

A compelling, important addition to Hill Harper's bestselling series, inspired by the numerous young inmates who write to him seeking guidance After the publication of the bestselling Letters to a Young Brother, accomplished actor and speaker Hill Harper began to receive an increasing number of moving letters from inmates who yearned for a connection with a successful role model. With disturbing statistics on African-American incarceration on his mind (one in six black men were incarcerated as of 2001, and one in three can now expect to go to prison some time in their lifetimes), Harper set out to address the specific needs of inmates. A powerful message from the heart, Letters to an Incarcerated Brother provides advice and inspiration in the face of despair along with encouraging words for restoring a sense of self-worth. As the founder of Manifest Your Destiny, a nonprofit outreach program for at-risk teens, Harper has seen firsthand the transformative effect of mentorship and the power of a positive role model. This latest addition to Hill Harper's Letters series delivers visionary, compassionate responses to the real-life circumstances of inmates. As with the other Letters books, Harper

includes moving contributions from top educators, activists, thought leaders, and entertainers. Uplifting and insightful, Letters to an Incarcerated Brother provides the hope and inspiration inmates and their families need.
