**Olga Tufnell's 'Perfect Journey'** - John D.M. Green 2021-04-26

Olga Tufnell (1905–85) was a British archaeologist working in Egypt, Cyprus and Palestine in the 1920s and 1930s, a period often described as a golden age of archaeological discovery. For the first time, this book presents Olga's account of her experiences in her own words. Based largely on letters home, the text is accompanied by dozens of photographs that shed light on personal experiences of travel and dig life at this extraordinary time. Introductory material by John D.M. Green and Ros Henry provides the social, historical, biographical and archaeological context for the overall narrative. The letters offer new insights into the social and professional networks and history of archaeological research, particularly for Palestine under the British Mandate. They provide insights into the role of foreign archaeologists, relationships with local workers and inhabitants, and the colonial framework within which they operated during turbulent times. This book will be an important resource for those studying the history of archaeology in the Eastern Mediterranean, particularly for the sites of Qau el-Kebir, Tell Fara, Tell el-'Ajjul and Tell ed-Duweir (ancient Lachish). Moreover, Olga's lively style makes this a fascinating personal account of archaeology and travel in

the interwar era.

Thank You for Arguing - Jay Heinrichs 2016-07-28

The time-tested secrets this book discloses include Cicero's three-step strategy for moving an audience to action as well as Honest Abe's Shameless Trick of lowering an audience's expectations by pretending to be unpolished. But it's also replete with contemporary techniques such as politicians' use of "code" language to appeal to specific groups and an eye-opening assortment of popular culture dodges including The Yoda Technique, The Belushi Paradigm, and The Eddie Haskell Ploy. Whether you're an inveterate lover of language books or just want to win a lot more anger-free arguments on the page, at the podium, or over a beer, Thank You for Arguing is for you. Written by one of today's most popular language mavens, it's warm, witty, erudite, and truly enlightening. It not only teaches you how to recognize a paralipsis and a chiasmus when you hear them, but also how to wield such handy and persuasive weapons the next time you really, really want to get your own way.

*Wealth And Poverty Of Nations* - David S. Landes 2015-04-20

The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book which exemplifies narrative history at its best.

Figuring Animals - M. Pollock 2016-10-03

This is a collection of fifteen essays which expose weaknesses in western epistemological frames of reference that for centuries have limited our views, and, thus, our experiences of animal being, including our own. The volume contributes to current discussions of new ways

of seeing the other inhabitants of this world and more effective ways of sharing the world with them. The contributors draw on and complement the growing field of ecocriticism, but because the contributors draw on an array of disciplinary and cultural perspectives, it will appeal to a wide audience, ranging from literary scholars, philosophers, art historians, anthropologists, and cultural historians (including graduate and undergraduate students in all these disciplines), to laypersons interested in nature writing and environmental issues.

**Islam Observed** - Clifford Geertz 1971-08-15  
"In four brief chapters," writes Clifford Geertz in his preface, "I have attempted both to lay out a general framework for the comparative analysis of religion and to apply it to a study of the development of a supposedly single creed, Islam, in two quite contrasting civilizations, the Indonesian and the Moroccan." Mr. Geertz begins his argument by outlining the problem conceptually and providing an overview of the two countries. He then traces the evolution of their classical religious styles which, with disparate settings and unique histories, produced strikingly different spiritual climates. So in Morocco, the Islamic conception of life came to mean activism, moralism, and intense individuality, while in Indonesia the same concept emphasized aestheticism, inwardness, and the radical dissolution of personality. In order to assess the significance of these interesting developments, Mr. Geertz sets forth a series of theoretical observations concerning the social role of religion.

language works across the broad spectrum of learners. Contents of the book are: "And the Winner Is...! The Context of the Debate" (Carl B. Smith); "Call Me Teacher" (Susan Ohanian); "Whole Language and Research: The Case for Caution" (Michael C. McKenna and others); "Moderator's Comments" (Carl B. Smith); "The Answer Is Yes..." (Patrick Shannon); "Unlike Patrick, We Do Accept Reality..." (Michael McKenna); "Who the Hell Are You?" **The Narrative Delta Tradition** - Ward Blondé 2021-05-15

This book about the narrative Delta tradition has a dual target audience: first, the layman who likes to read unique fairy tales that - according to the theory in this book - stem from Central and Eastern European warrior clans from the Bronze Age. For them, there are the anger of Achilles, the abduction of Helen, and the compassion of Achilles, stripped of the overloaded presence of Greek oral traditions. Second, the scientist who wants to distinguish the narrative Delta tradition from other oral traditions in Homer's Iliad and Odyssey by

means of 158 Delta characteristics. The scientist and the interested layman also learn how Odysseus has grown over the centuries from a herald - the Bronze Age diplomat - to the cunning hero who endures the most dangerous adventures on his return journey to Ithaca. Like the European Beta tradition, the narrative Delta tradition stems from a society of clans fighting each other to the death on the battlefield. They burn their dead, place the remains in urns, and cast burial mounds above them. Their strongholds are surrounded by ramparts of wood and earth and a ditch. All this points in the direction of proto-Celtic Europe of the Bronze Age, in which the funeral customs of the Urnfield culture merge with those of the Tumulus culture. Chariots and horses sacrificed on the funeral pyre point in the direction of the nomads in Eastern Europe, Russia, and Central Asia.

**Global Warming and Agriculture** - William R Cline 2007-07-30

How will global warming affect developing countries, which rely heavily on agriculture as a source of economic growth? William Cline asserts that developing countries have more at risk, such as their production capacity, than industrial countries as global warming worsens. Using general circulation models, Cline boldly examines 2071-99 to forecast the effects of global warming and its economic impact into the next decade. This detailed study outlines existing studies on climate change; Cline finds the Stern Report for the UK government's estimates most reliable; estimates projected changes in temperature, precipitation, and agricultural capacity; and concludes with policy recommendations. Cline finds that agricultural production in developing countries may fall an average of 16 percent, and if global warming progresses at its current rate, India's agricultural capacity could fall as much as 40 percent. Thus, policymakers should address this phenomenon now before the world's developing countries are adversely and irreversibly affected.

*Inter/View* - Mickey Pearlman 2014-10-17

Twenty-eight powerful and individual voices are heard as Pearlman and Henderson offer a forum for a generous cross-section of the women writing fiction in America today -- writers whose vital statistics cross the borders of race, religion,

ethnic origin, sexual preference, marital status, age, geography, and lifestyle. Each writer is presented in an essay/interview reflecting the dynamic that develops naturally when two vital minds meet to discuss topic of mutual interest. The writers talk about the role of memory, space, and family in their work, about politics, dreams, and race, about their mothers and children and alma maters, about book reviewing and their agents, editors, and publishers, and about each others' work. A bibliography of principal works follows each essay. A valuable contribution to writers both female and male, for above all else, this is a book about writing.

**Why Forests? Why Now?** - Frances Seymour 2016-12-27

Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

**The Polis in the Hellenistic World** - Henning

Börm 2018

After having been for decades the province of a relatively small group of scholars, the Hellenistic polis has become central to the research agenda of Ancient historians more broadly. This development can be traced from the early nineties of the last century, and has picked up pace in a sustained fashion at the turn of the millennium. Recent research has started approaching the Greek polis of the centuries between Alexander and Cleopatra as a specific historical phenomenon, striving to define its most peculiar aspects from as many angles as possible, and to point to new avenues of interpretation that might contribute to recognizing its historical role. In this general framework, this volume attempts to explore new lines of thought, to question established ways of reading the evidence, and to take stock of recent developments. The contributors do not subscribe to any particular shared approach; on the contrary, their approaches and questions stem from many different scholarly traditions and methodologies. Rather than seeking to achieve a complete coverage, the volume provides a selection of current research agendas, in many cases offering glimpses of ongoing projects.
