A User's Guide to the Brain - John J. Ratey, M.D. 2001-11-13

John Ratey, bestselling author and clinical professor of psychiatry at Harvard Medical School, lucidly explains the human brain's workings, and paves the way for a better understanding of how the brain affects who we are. Ratey provides insight into the basic structure and chemistry of the brain, and demonstrates how its systems shape our perceptions, emotions, and behavior. By giving us a greater understanding of how the brain responds to the guidance of its user, he provides us with knowledge that can enable us to improve our lives. In *A User's Guide to the Brain*, Ratey clearly and succinctly surveys what scientists now know about the brain and how we use it. He looks at the brain as a malleable organ capable of improvement and change, like any muscle, and examines the way specific motor functions might be applied to overcome neural disorders ranging from everyday shyness to autism. Drawing on examples from his practice and from everyday life, Ratey illustrates that the most important lesson we can learn about our brains is how to use them to their maximum potential.

Dimensions of Learning Teachers Manual, 2nd Edition - Robert J. Marzano 2009-06

The premise of *Dimensions of Learning* an instructional framework founded on the best of what researchers and theorists know about learning is that five types, or dimensions, of thinking are essential to successful learning. These are (1) positive attitudes and perceptions about learning, (2) thinking involved in acquiring and integrating knowledge, (3) thinking involved in extending and refining knowledge, (4) thinking involved in using knowledge meaningfully, and (5) productive habits of mind. *Dimensions of Learning* is a valuable tool for reorganizing curriculum, instruction, and assessment. The authors discuss each of the five dimensions in detail and describe hundreds of teaching strategies that support them for example, how to help students construct meaning for declarative knowledge, internalize procedural knowledge, and see the relevance of what they are expected to learn. The authors provide many examples at the elementary and secondary classroom levels. Teachers of grades K-12 can use this information to improve teaching and learning in any content area.

The Craftsman - Richard Sennett 2009-02-05

Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. *The Craftsman* shows how history has drawn

fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

Epistemology - Ernest Sosa 2017-01-17

One of the world's leading epistemologists provides a sophisticated, revisionist introduction to the subject In this concise book, one of the world's leading epistemologists provides a sophisticated, revisionist introduction to the problem of knowledge in Western philosophy. Modern and contemporary accounts of epistemology tend to focus on limited questions of knowledge and skepticism, such as how we can know the external world, other minds, the past through memory, the future through induction, or the world's depth and structure through inference. This book steps back for a better view of the more general issues posed by the ancient Greek Pyrrhonists. Returning to and illuminating this older, broader epistemological tradition, Ernest Sosa develops an original account of the subject, giving it substance not with Cartesian theology but with science and common sense. Descartes is a part of this ancient tradition, but he goes beyond it by considering not just whether knowledge is possible at all but also how we can properly attain it. In Cartesian epistemology, Sosa finds a virtue-theoretic account, one that he extends beyond the Cartesian context. Once epistemology is viewed in this light, many of its problems can be solved or fall away. The result is an important reevaluation of epistemology that will be essential reading for students and teachers.

Discourse and Context - Teun A. van Dijk 2010-02-11

How do social situations influence language use, discourse and conversation? This book is a monograph which presents a multidisciplinary theory of context and the way context influences language use and discourse. Unlike in earlier approaches, contexts are not defined as objective social 'variables', such as gender or age. Rather, they are constructs of the participants themselves, that is, 'subjective definitions of the communicative situation' that are made explicit in the sociocognitive notion of context models. These models dynamically control all language use, make sure that discourses are appropriate in the communicative situation and hence are the basis of pragmatics. In this book, context models are studied especially from a (socio) linguistic and cognitive perspective. In another book published by Cambridge University Press, *Society and Discourse*, Teun A. van Dijk develops the social psychological, sociological and anthropological

dimensions of the theory of context.

Seeing - José Saramago 2013-09-20

Despite the heavy rain, the officer at Polling Station 14 finds it odd that by midday on National Election day, only a handful of voters have turned out. Puzzlement swiftly escalates to shock when the final count reveals seventy per cent of the votes are blank. National law decrees the election should be repeated but the result is even worse. The authorities, seized with panic, decamp from the capital and declare a state of emergency. When apathy and disillusionment renders an entire democratic system useless what happens next?

Sophie's World - Jostein Gaarder 2010-07-15

The international bestseller about life, the universe and everything. When 14-year-old Sophie encounters a mysterious mentor who introduces her to philosophy, mysteries deepen in her own life. Why does she keep getting postcards addressed to another girl? Who is the other girl? And who, for that matter, is Sophie herself? To solve the riddle, she uses her new knowledge of philosophy, but the truth is far stranger than she could have imagined. A phenomenal worldwide bestseller, SOPHIE'S WORLD sets out to draw teenagers into the world of Socrates, Descartes, Spinoza, Hegel and all the great philosophers. A brilliantly original and fascinating story with many twists and turns, it raises profound questions about the meaning of life and the origin of the universe.

Between Past and Future - Hannah Arendt 2006-09-26

From the author of *Eichmann in Jerusalem* and *The Origins of Totalitarianism*, "a book to think with through the political impasses and cultural confusions of our day" (Harper's Magazine) Hannah Arendt's insightful observations of the modern world, based on a profound knowledge of the past, constitute an impassioned contribution to political philosophy. In *Between Past and Future* Arendt describes the perplexing crises modern society faces as a result of the loss of meaning of the traditional key words of politics: justice, reason, responsibility, virtue, and glory. Through a series of eight exercises, she shows how we can redistill the vital essence of these concepts and use them to regain a frame of reference for the future. To participate in these exercises is to associate, in action, with one of the most original and fruitful minds of the twentieth century.

Ilustración Española y Americana - 1871

Beginning to Spell - Rebecca Treiman 1992-10-29

This groundbreaking study on the psycholinguistics of spelling presents the author's original empirical research on spelling and supplies the theoretical framework necessary to understand how children's ability to write is related to their ability to speak a language. The author explores areas in a field dominated by work traditionally concerned with the psychodynamics of reading skills and, in so doing, highlights the importance of learning to spell for both psycholinguists and educators, since as they begin to spell, children attempt to represent the phonological, or sound form, of words. The study of children's spelling can shed light on the nature of phonological systems and can illuminate the way sounds are organized into larger units, such as syllables and words. Research on children's spelling leads directly to an understanding of the way phonological knowledge is

acquired and how phonological systems change with the development of reading and writing ability. In addition to this insight concerning cognitive processes, the findings presented here have implications for how spelling should be taught and why some writing systems are easier to master than others. The work will interest a wide range of cognitive and developmental psychologists, psycholinguists, and educational psychologists, as well as linguists and educators interested in psycholinguistics.

Discourse, Communication and the Enterprise - Giuliana Elena Garzone 2019-01-29

This volume presents research studies that investigate various aspects of corporate communication from the viewpoint of language and discourse, giving special attention to emerging issues and recent developments in times of rapid sociotechnical evolutions. The studies included here are diverse in their outlook, analytical procedures, and objects of enquiry, spanning across various areas of corporate communication, both external and internal, such as corporate image and reputation management, various forms of corporate behaviour, branding at different levels including employer branding, recruiting, and consumer reviews. Similarly diversified are the settings, genres and media analysed, from face-to-face interaction to communication through the press, from traditional websites to social networking sites. All the studies presented in this volume are set in a discourse-analytical framework and share the ultimate purpose of providing new insights into the evolution of communication and discourse practices in the corporate environment, taking account of the most important issues that have attracted researchers' interest and are still open to debate.

Teachers as Intellectuals - Henry A. Giroux 1988-08-30

a book for all practitioners and all members of the greater community. Giroux demands reader involvement, transformation, and empowerment. He helps us understand that the political relationship between schools and society is neither artificial nor neutral nor necessarily negative. Rather, school personnel have a positive and dynamic political role to play. Educational Leadership We are fortunate to have these ideas expressed so clearly and in one place. It is a very useful book. . . . Choice Offers educators ways for reflecting critically on their own practices and the relationship between schools and society. The Educational Digest

The Teaching of Grammar - Laura Brackenbury 1908

Epistemic Responsibility - Lorraine Code 2020-11-01

Develops a new kind of epistemological position that highlights virtue over more standard epistemological theories. Having adequate knowledge of the world is not just a matter of survival but also one of obligation. This obligation to "know well" is what philosophers have termed "epistemic responsibility." In this innovative and eclectic study, Lorraine Code explores the possibilities inherent in this concept as a basis for understanding human attempts to know and understand the world and for discerning the nature of intellectual virtue. By focusing on the idea that knowing is a creative process guided by imperatives of epistemic responsibility, Code provides a fresh perspective on the theory of knowledge. From this new perspective, Code poses questions about knowledge that have a different focus from those traditionally raised in the two leading epistemological theories, foundationalism and coherentism. While not rejecting these approaches, this new position moves away from a primary concentration on determinate products and towards an examination of ever-changing processes. Arguing that knowledge never exists as an ungrounded abstraction but rather emerges through dialogue between variously authoritative "knowers" situated within particular social and historical contexts, she draws extensively on examples from lived social experience to illustrate the ways in which human beings have long tried to recognize and meet their epistemic responsibilities. This edition of *Epistemic Responsibility* includes a new preface from Lorraine Code. Lorraine Code is Distinguished Research Professor Emerita of Philosophy at York University, Canada. She is the author of several books, including *Manufactured Uncertainty: Implications for Climate Change Skepticism*, also published by SUNY Press, and *Ecological Thinking: The Politics of Epistemic Location*.

Uncertain Glory - Joan Sales 2014-10-02

SPAIN, 1937. Posted to the Aragonese front, Lieutenant Lluís Rusalleda eschews the drunken antics of his comrades and goes in search of intrigue. But the lady of Castel de Olivo - a beautiful widow with a shadowy past - puts a high price on her affections. In Barcelona, Trini Milmany struggles to raise Lluís' son on her own, letters from the front her only solace. With bombs falling as fast as the city's morale, she leaves to winter with Lluís' brigade on a quiet section of the line. But even on 'dead' fronts the guns do not stay silent for long. Trini's decision will put her family's fate in the hands of Juli Soleràs, old friend and traitor of

easy conscience, a philosopher-cynic locked in an eternal struggle with himself. Joan Sales, a combatant in the civil war, distilled his experiences into a timeless story of thwarted love, lost youth and crushed illusions. A thrilling epic that has drawn comparison with the work of Dostoevsky and Stendhal, *Uncertain Glory* is a homegrown counterpart to classics such as *Homage to Catalonia* and *For Whom the Bell Tolls*.

Knowing Full Well - Ernest Sosa 2010-12-13

In this book, Ernest Sosa explains the nature of knowledge through an approach originated by him years ago, known as virtue epistemology. Here he provides the first comprehensive account of his views on epistemic normativity as a form of performance normativity on two levels. On a first level is found the normativity of the apt performance, whose success manifests the performer's competence. On a higher level is found the normativity of the meta-apt performance, which manifests not necessarily first-order skill or competence but rather the reflective good judgment required for proper risk assessment. Sosa develops this bi-level account in multiple ways, by applying it to issues much disputed in recent epistemology: epistemic agency, how knowledge is normatively related to action, the knowledge norm of assertion, and the Meno problem as to how knowledge exceeds merely true belief. A full chapter is devoted to how experience should be understood if it is to figure in the epistemic competence that must be manifest in the truth of any belief apt enough to constitute knowledge. Another takes up the epistemology of testimony from the performance-theoretic perspective. Two other chapters are dedicated to comparisons with ostensibly rival views, such as classical internalist foundationalism, a knowledge-first view, and attributor contextualism. The book concludes with a defense of the epistemic circularity inherent in meta-aptness and thereby in the full aptness of knowing full well.

Ecological Thinking - Lorraine Code 2006-04-27

Arguing that ecological thinking can animate an epistemology capable of addressing feminist, multicultural, and other post-colonial concerns, this book critiques the instrumental rationality, hyperbolized autonomy, abstract individualism, and exploitation of people and places that western epistemologies of mastery have legitimated. It proposes a politics of epistemic location, sensitive to the interplay of particularity and diversity, and focused on responsible epistemic practices. Starting from an epistemological approach implicit in Rachel Carson's scientific projects, the book draws, constructively and critically, on ecological theory and practice, on (post-Quinean) naturalized epistemology, and on feminist and post-colonial theory. Analyzing extended examples from developmental psychology, from medicine and law, and from circumstances where vulnerability, credibility, and public trust are at issue, the argument addresses the constitutive part played by an instituted social imaginary in shaping and regulating human lives. The practices and examples discussed invoke the responsibility requirements central to this text's larger purpose of imagining, crafting, articulating a creative, innovative, instituting social imaginary, committed to interrogating entrenched hierarchical social structures, en route to enacting principles of ideal cohabitation.

This I Believe - Carlos Fuentes 2007-12-18

In this masterly, deeply personal, and provocative book, the internationally renowned Mexican writer Carlos Fuentes, whose work has been called "a combination of Poe, Baudelaire, and Isak Dinesen" (*Newsweek*), steps back to survey the wellsprings of art and ideology, the events that have shaped our time, and his extraordinary life and fiercest passions. Arranged alphabetically from "Amore" to

"Zurich," This I Believe takes us on a marvelous inner journey with a great writer. Fuentes ranges wide, from contradictions inherent in Latin American culture and politics to his long friendship with director Luis Buñuel. Along the way, we find reflection on the mixed curse and blessing of globalization; memories of a sexual initiation in Zurich; a fond tracing of a family tree heavy with poets, dreamers, and diplomats; evocations of the streets, cafés, and bedrooms of Washington, Paris, Santiago de Chile, Cambridge, Oaxaca, and New York; and a celebration of literary heroes including Balzac, Cervantes, Faulkner, Kafka, and Shakespeare. Throughout, Fuentes captivates with the power of his intellect and his prose. Here, too, are vivid, often heartbreaking glimpses into his personal life. "Silvia" is a powerful love letter to his beloved wife. In "Children," Fuentes recalls the births of his daughters and the tragic death of his son; in "Cinema" he relives the magic of films such as Citizen Kane and The Wizard of Oz. Further extending his reach, he examines the collision between history and contemporary life in "Civil Society," "Left," and "Revolution." And he poignantly addresses the experiences we all hold in common as he grapples with beauty, death, freedom, God, and sex. By turns provocative and intimate, partisan and universal, this book is a brilliant summation of an international literary career. Revisiting the influences, commitments, readings, and insights of a lifetime, Fuentes has fashioned a magnificently coherent statement of his view of the world, reminding us once again why reading Fuentes is "like standing beneath the dome of the Sistine Chapel. . . . The breadth and enormity of this accomplishment is breathtaking" (The Denver Post).

Personal Catholicism - Martin X. Moleski 2020-10-01

"Both Newman and Polanyi rank high among the pioneers in the history of the post-critical movement in epistemology. They pointed out the limitations of the methods that had become current since the time of Descartes and Spinoza. . . . The systems of these two authors are exceptionally useful for dealing with the major issues that trouble the theological climate today."—From the Foreword by Avery Dulles, S.J. "This engaging and lucid study brings into dialogue two thinkers whose methods share much in common despite their different purposes. . . . A principal contribution of Moleski's study is its cultivation of the common ground that religion shares with science."—Theological Studies "An important and utterly engaging study. . . . Those familiar with Newman's Grammar of Assent and Polanyi's Personal Knowledge will appreciate the ways in which Moleski makes sometimes

unexpected connections between the two thinkers, despite Polanyi's critical disposition toward Catholicism. Personal Catholicism is a most welcome contribution to today's rethinking of the relationship between faith and reason."—First Things "There is a wealth of material here that could be applied to issues of faith and reason, science and faith, faith and the nature of reality as they are raised in contemporary society. . . ."—The Gospel and Our Culture *Writing Programs Worldwide* - Chris Thaiss 2012-07-30

WRITING PROGRAMS WORLDWIDE offers an important global perspective to the growing research literature in the shaping of writing programs. The authors of its program profiles show how innovators at a diverse range of universities on six continents have dealt creatively over many years with day-to-day and long-range issues affecting how students across disciplines and languages grow as communicators and learners.

Common European Framework of Reference for Languages : Learning, Teaching, Assessment - Council for Cultural Co-operation Council of Europe (Education Committee, Modern Languages Division) 2003

The Fantastic - Tzvetan Todorov 1975

In *The Fantastic*, Tzvetan Todorov seeks to examine both generic theory and a particular genre, moving back and forth between a poetics of the fantastic itself and a metapoetics or theory of theorizing, even as he suggests that one must, as a critic, move back and forth between theory and history, between idea and fact. His work on the fantastic is indeed about a historical phenomenon that we recognize, about specific works that we may read, but it is also about the use and abuse of generic theory. As an essay in fictional poetics, *The Fantastic* is consciously structuralist in its approach to the generic subject. Todorov seeks linguistic bases for the structural features he notes in a variety of fantastic texts, including Potocki's *The Sargasso Manuscript*, Nerval's *Aurélia*, Balzac's *The Magic Skin*, the *Arabian Nights*, Cazotte's *Le Diable Amoureux*, Kafka's *The Metamorphosis*, and tales by E. T. A. Hoffman, Charles Perrault, Guy de Maupassant, Nicolai Gogol, and Edgar A. Poe.

How to Write a Thesis - Umberto Eco 2015-02-27

Umberto Eco's wise and witty guide to researching and writing a thesis, published in English for the first time. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, *How to Write a Thesis*, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft. Now in its twenty-third edition in Italy and translated into seventeen languages, *How to Write a Thesis* has become a classic. Remarkably, this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. *How to Write a Thesis* is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious. Eco advises students how to avoid "thesis neurosis" and he answers the important question "Must You Read Books?" He reminds students "You are not Proust" and "Write everything that comes into your head, but only in the first draft." Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of

today who may be burdened by Big Data. How to Write a Thesis belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere. Already a classic, it would fit nicely between two other classics: Strunk and White and The Name of the Rose. Contents The Definition and Purpose of a Thesis • Choosing the Topic • Conducting Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft
