The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Understanding Postpartum Psychosis - Teresa M. Twomey 2009-03-20

Offering an understanding of postpartum psychosis, this riveting book explains what happens and why during this temporary and dangerous disorder that develops for some women rapidly after childbirth. Most of us are familiar with the baby blues, a passing sadness that strikes 50 to 75 percent of new mothers after delivery. And most of us understand postpartum depression, a sadness post-delivery that lingers for weeks or months for an estimated one in every 10 new mothers. But a more serious form of disorder that strikes up to one in every 500 is postpartum psychosis - triggering severe agitation, confusion, insomnia, hallucinations, delusions, mania, and possible thoughts of suicide or murder. Every year, women in the United States and around the world kill their babies, children, and themselves as a result of this mental illness. Here, author Twomey, an official with Postpartum Support International, gives us insight into the psychological, personal, medical, legal, and historical perspectives on this little-understood mental illness, which is both preventable and treatable. While most women who suffer postpartum psychosis eventually recover without harming anyone, they most often do so in silence. Paranoia is a common symptom, explains Twomey, and that moves women to hide their

symptoms from everyone around them. The woman can hence appear normal, but be putting both herself and her baby at risk. We can prevent and treat this, but we need to recognize it by better screening of women postpartum, says Twomey.

Nurse as Educator - Susan Bacorn Bastable 2008

Designed to teach nurses about the development, motivational, and sociocultural differences that affect teaching and learning, this text combines theoretical and pragmatic content in a balanced, complete style. --from publisher description.

Labor Arbitration Reports - 1990

Family-centered Nursing in the Community - Barbara Bryan Logan 1986

Concepts and Issues in Nursing Practice - Barbara Kozier 1992

Cardiac Nursing - Debra K. Moser 2007-08-08

Cardiac Nursing: A Companion to Braunwald's Heart Disease is the only comprehensive text available for cardiac nurses. This brand-new reference emphasizes both evidence-based practice and hands-on care in a high-tech, high-touch approach that meets the high-stakes needs of cardiac and critical care nurses. What's more, the book makes the material easily accessible by using clear language, straightforward text, and plenty of illustrations, lists, and tables. This book is the third in a series of companion texts for Braunwald's Heart Disease and the first specifically for nurses. Authored by the widely published, well-known co-editors of The Journal of Cardiovascular Nursing--two leaders in cardiac nursing. Endorsed by the authors of Braunwald's Heart Disease, including Eugene Braunwald, the physician considered by many to be the "father of modern cardiology." Evidence-based Practice boxes highlight research-supported advances in knowledge and care practices. Conundrum boxes helps readers hone their critical thinking skills by tackling tough questions for which there may be no easy answers. Technology boxes keeps readers up to date with the latest technological advances. Genetics boxes helps readers understand connections between genes and heart disease. Pharmacology tables present important drug-related information at a glance. A guide to cardiac abbreviations and acronyms gives nurses quick access to essential information.

West's Annotated California Codes - California 1985

Rethinking Vocationalism - Rebecca Priegert Coulter 1993-01-01
Vocational education can either reinforce or challenge dominant ideology: students can learn to accept and fit into a workplace, or to change it. How we understand the links between knowledge and work will significantly affect our ability to make important political and strategic decisions about education in general and about vocational education in particular. The old questions about education--who controls education? whose interests are served by the education system?--assume new urgency in an era of global restructuring. The contributors to Rethinking Vocationalism examine these questions from a variety of enlightening perspectives. An Our Schools/Our Selves book.

Weekly World News - 2002-11-19

Rooted in the creative success of over 30 years of supermarket tabloid publishing, the Weekly World News has been the world's only reliable news source since 1979. The online hub www.weeklyworldnews.com is a leading entertainment news site. *The Unofficial Nurse's Handbook* - Nina Schroeder 1986

An hilarious examination of the ins and outs of the frenzied, strenuous, and sometimes bizarre world of nursing. Illustrated. National Library of Medicine Current Catalog - National Library of Medicine (U.S.)

All Or Nothing - Edward Trostle Jones 2004

This critical study of Mike Leigh's cinema is a comprehensive assessment of his thirty plus years in film, including his television features, from the first feature-length *Bleak Moments* to *All or Nothing*. Through his own species of tragicomedy and favored thematic content concentrating on relationships, Leigh enlarges the emotional boundaries of cinema for performers and audience alike. His deep and fully realized characters often subvert both decorum and irony traditionally associated with British film and television. Leigh's sense of the reciprocity and interpenetration of the material mundane, the ridiculous, and the humanistic sublime brings respect for the complexity of the ordinary and merits celebration within the democratic and demotic art of film.

Clinical Case Studies for the Family Nurse Practitioner -

Leslie Neal-Boylan 2011-11-28

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

Plain, Plain Melissa Jane - Colleen L. Reece 1990

The summer she turns fourteen, Melissa Jane works hard to keep a stray dog she finds on her farm, strives to improve her personal appearance, and realizes that the acceptance of Jesus gives her inner beauty.

The Parent's Answer Book - Gerald Deskin 1995

How many times do parents have questions about their child's emotional or behavioral health that need explanation? Here is a comprehensive resource for child and adolescent development questions. Answers are descriptive, presented in a user-friendly style, and include information based on more than 50 years of

combined child and family counseling experience. Includes index. *Effective Management in Nursing* - Eleanor J. Sullivan 1988

The Tablet - 1896

The Official Gazette of British Guiana - British Guiana 1903

A Bibliography of Nursing Literature - Frances Walsh 1985
Contains core nursing materials, as well as works that deal with fringe areas, e.g., prevention and social implications. Classified arrangement. Entries give bibliographical information. Author index.

American Association of Industrial Nurses Journal - American Association of Industrial Nurses 1967

West's Annotated California Codes: Constitution - California 1954

Legal Issues in Nursing - Cynthia E. Northrop 1987

Nursing Theorists and Their Work - Ann Marriner-Tomey 2002

This modern classic presents authoritative, up-to-date descriptions and analyses of 28 nursing theories in a clear, succinct format. With the addition of two new international theorists, it now provides a comprehensive presentation of 33 nursing theorists and their work. Extensive, updated bibliographies at the end of each chapter, split into primary and secondary sources, direct the reader to excellent resources for further study. Each chapter guides the reader through an expert overview of a specific theory—some reviewed and validated by the theorists themselves—in a logical chapter organization that makes information easy to follow. Its comprehensive and thorough approach, objective critiques, clear writing style, and consistent organization combine to make this new edition of *Nursing Theorists and Their Work* ideal for theory instruction at both the BSN level and the graduate level.
