Solaris ocean may be a massive brain that creates incarnate memories, but its purpose in doing so remains a mystery . . . Solaris raises a question that has been at the heart of human experience and literature for centuries: can we truly understand the universe around us without first understanding what lies within?

### **Diccionario del español**

Manuel Seco and his dedicated group of language professionals developed this successful project over a thirty-year period. The Diccionario del Español Actual is the first Spanish Dictionary, which includes the vocabulary of the second half of the twentieth-century using real records. All the information has been compiled from more than 1,600 books of all genres and thousands of periodic publications. In over 4,600 pages this dictionary studies 75,000 words, with 141,000 meanings and 200,000 quotes of uses of the actual Spanish language. The distribution of senses and definitions has been done under new criterions to inform the users not only about

the meanings, but also about the functions and places of every word in a sentence. Seco and his group focused and emphasized on two sides of a words content: the semantic value and the syntactic value, making this dictionary one of the most complete and practical works of reference.

**Culture as Praxis** - Zygmunt Bauman 1999-02-22

In this major work, Zygmunt Bauman seeks to classify the meanings of culture. He distinguishes between culture as a concept, culture as a structure and culture as praxis and analyzes the different ways in which culture has been used in each of these settings. For Bauman, culture is a living, changing aspect of human interaction which must be understood and studied as a universal of human life. At the heart of his approach is the proposition that culture is inherently ambivalent. With a major new introduction to this new edition, this classic work emerges as a crucial link in the development of Bauman's thought. By his own admission,

it was the first of his books to grope towards a new kind of social theory, in contrast to the fals

NICOMACHEAN ETHICS - Aristotle 2017-04-20

◆ EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be

better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned. ♦
