Australia, the Greatest Island - 1979

Charming marsupials . . . ancient trees . . . spectacular landscapes. What forces of nature conspired to make Australia unique among continents? Scientists, tourists, and residents alike marvel at its surprises. Australia is Earth's time capsule, harboring geologic and biological relicts, including some of the oldest signs of life on the planet. A companion to the large-screen film of the same name, *Australia: Land Beyond Time* explores the continent's antiquity with more than 300 stunning color photographs of the continent and its breathtaking landforms, plants, and animals. Reg Morrison draws on the expertise of earth scientists and biologists to make sense of Australia's long history. Seventeen chapters, accompanied by timelines and maps as well as Morrison's excellent photographs, lead the reader effortlessly through Australia's four-billion-year journey. A clear presentation of the complex evolutionary processes at work on the island continent is enriched by discussions of its geography and ecology.

Explore Australia - Veronica B. Wilkins 2019-12-15

"In this book, early fluent readers will learn about the unique and defining characteristics of Australia. Vibrant, full-color photos and carefully leveled text will engage young readers as they learn more about this continent's landscape, biomes, climate, wildlife, culture, and more. Strong STEM connections promote multi-subject learning. A Take a Look! infographic aids understanding, sidebars present interesting, supplementary information, maps help readers locate the continent, and an At a Glance summary provides quick facts for easy reference. Explore Australia also

features reading tips for teachers and parents, a table of contents, a glossary, and an index"--

Exploring Australia, Grades 5 - 8 - Michael Kramme
2012-01-03

Take students in grades 5–8 on a field trip without leaving the classroom using Exploring Australia! Instead, you will also learn about the unique animal life that live in Australia and Oceania. This is one interesting read that you would be happy to add in your book collection. Secure a copy today!

Leading the Common Core Initiative - Carl A. Harvey II 2014-11-25

Defining both the Common Core Standards and the school librarian's role in their implementation, this book offers ready-to-use lesson plans and other tools for grades K–5 and identifies opportunities for collaborative teaching. As elementary schools in nearly all 50 states are faced with meeting the Common Core State Standards (CCSS), school librarians need to understand the challenges and have lesson plans ready to

help. This resource introduces the CCSS in English and mathematics to K–5 librarians and aides, helping them to understand the concepts, analyzing the impact on the school library, and providing lesson plans, resources, and other tools for implementation in integrated instruction with other curricula and collaborative teaching with other elementary teachers. Based upon the authors' own experiences in adopting the CCSS in their school, the included exemplar lesson plans and ideas are designed to support school librarians as they begin to collaborate with teachers in using the Common Core Standards in their daily classroom instruction. The book also discusses the opportunities for advocacy that result from the librarian's instrumental role in implementing the CCSS, both as a staff developer and a collaborative partner teacher.

Exploring Australia - Michael Kramme 2003

Students will love exploring Australia in this comprehensive, supplementary resource. Activity information covers maps, climates, resources, industries, people, animal life, cultures, and more! Information is presented through questions, map labeling, research, and writing so that students become engaged learners. It also includes bibliographies and answer keys. The Last Blank Spaces - Dane Kennedy 2013-03-01

For a British Empire that stretched across much of the globe at the start of the nineteenth century, the interiors of Africa and Australia remained intriguing mysteries. The challenge of opening these continents to imperial influence fell to a proto-professional coterie of determined explorers. They sought knowledge, adventure, and fame, but often experienced confusion, fear, and failure. *The Last Blank Spaces* follows the arc of these explorations, from idea to practice, from intention to outcome, from myth to reality. Those who conducted the hundreds of expeditions that probed Africa and Australia in the nineteenth century adopted a mode of scientific investigation that had been developed by previous generations of seaborne explorers. They likened the two continents to oceans, empty spaces that could be made truly knowable only by mapping, measuring, observing, and preserving. They found, however, that their survival and success depended less on this system of universal knowledge than it did on the local knowledge possessed by native peoples. While explorers sought to advance the interests of Britain and its emigrant communities, Dane Kennedy discovers a more complex outcome: expeditions that failed ignominiously, explorers whose loyalties proved ambivalent or divided, and, above all, local states and peoples who diverted expeditions to serve their own purposes. The collisions, and occasional convergences, between British and indigenous values, interests, and modes of knowing the world are brought to the fore in this fresh and engaging study.

[The Geography of Australia and the Pacific Realm](#) -

Shannon H. Harts 2020-12-15

Australia and the Pacific Realm is a region unlike any other in the world. Made up of thousands of islands, from tiny atolls to the continent of Australia, this region is defined by the mighty ocean flowing between neighboring islands and countries. How did people come to inhabit the islands of this region? How do the islands differ from one another? Readers will have the full Oceania tour with this exciting book, which uses photographs, maps, and fact-filled text to paint an inspiring picture of Australia and the Pacific Realm.
