The Ancestors of Scott Wolter - Vol 2 Family Groups - Diana Jean Muir 2018-06-22

Few individuals can document their ancestry back 85 generations. Even fewer can trace their ancestry to the Merovingian, Capetian, and Carolingian Kings, the Sea-Kings of Norway, the Ancient Irish Kings of Tara, and the Grail Fisher Kings of ancient Wales. These ancestry lines extend as far back as 780 BC in the ancient city

of Jerusalem, at Tara Castle in Ireland, and Skarra Brae in ancient Orkney. Family names such as Wolter, Schwartz, Hanke, Kittlesby, Rolefson, Austin, Scott, Thorndyke, Madill, Easley and Russell soon give way to Grunewald and Albrechts from Germany, Brandt from Norway and Allington, Sinclair, Plantagenet, Redmayne, DeGotham, Waldegrave, de La Tour, DeVere, de Coucy of Britain and Normandy - to Rollo, Halfdan Sveidison, Thorfinn of Orkney, Frosti, King of Kvenland and Owain of Wales. Queens, Kings, Earls and Templar Knights, Lords and Barons dominate the lines; all ambitious, powerful and enigmatic leaders of the past who encouraged and fought for the future that we enjoy.

Crossing the Human Threshold - Matt Pope
2017-11-22

When was the human threshold crossed? What is the evidence for evolving humans and their emerging humanity? This volume explores in a global overview the archaeology of the Middle Pleistocene, 800,000 to 130,000 years ago when evidence for innovative cultural behaviour appeared. The evidence shows that the threshold was crossed slowly, by a variety of human ancestors, and was not confined to one part of the Old World. Crossing the Human Threshold examines the changing evidence during this period for the use of place, landscape and technology. It focuses on the emergence of persistent places, and associated developments in tool use, hunting strategies and the control of fire, represented across the Old World by deeply

stratified cave sites. These include the most important sites for the archaeology of human origins in the Levant, South Africa, Asia and Europe, presented here as evidence for innovation in landscape-thinking during the Middle Pleistocene. The volume also examines persistence at open locales through a cutting-edge review of the archaeology of Northern France and England. Crossing the Human Threshold is for the worldwide community of students and researchers studying early hominins and human evolution. It presents new archaeological data. It frames the evidence within current debates to understand the differences and similarities between ourselves and our ancient ancestors.

High Speed Rail and Access Transit Networks -
Lara Rita Brunello 2017-09-02

This book examines the promise of High Speed Rail (HSR) technologies to win market share from carbon-intensive air transport through the strategic optimization of rail productivity and

efficiency. While the positive impacts of HSR at both urban and long-distance levels are well-documented, this resource focuses on what has been a challenging area for HSR deployment historically: the integration of HSR accessibility at the regional level. The author provides tools and methods to better measure the feasibility of integrating regional HSR with existing transport networks, and includes in-depth case studies to demonstrate the contributions of expanded high speed rail access on sustainable development. Shares options for maximizing efficiency and effectiveness of high speed rail transport; Compares strategies for integrating urban, long-distance, and regional high speed rail transport; Explores new dimensions of high speed rail deployment by linking transit networks with increased regional accessibility.

Repeopling La Manche - Matthew Pope 2023-07-31

The current geography of north-west Europe, from the perspective of long term Pleistocene climate change, is temporary. The seaways that separate southern Britain from northern France comprise a flooded landscape open to occupation by hunter-gatherers for large parts of the 0.5 million years since the English Channel's formation. While much of this record is now inaccessible to systematic archaeological

investigation it is critical that we consider past human societies in the region in terms of access to, inhabitation in, and exploitation of this landscape. This latest volume of the acclaimed Prehistoric Society Research Papers provides a starting point for approaching the Middle Palaeolithic record of the English Channel region and considering the ecological opportunities and behavioural constraints this landscape offered to Neanderthal groups in north-west Europe. The volume reviews the Middle Palaeolithic archaeological record along the fringes of La Manche in northern France and southern Britain. It examines this record in light of recent advances in quaternary stratigraphy, science-based dating, and palaeoecology and explores how Palaeolithic archaeology in the region has developed in an interdisciplinary way to transform our understanding of Neanderthal behaviour. Focusing in detail on a particular sub-region of this landscape, the Normano-Breton Gulf, the volume presents the results of

recent research focused on exceptionally productive coastal capture points for Neanderthal archaeology. In turn the long-term behavioural record of La Cotte de St Brelade is presented and explored, offering a key to changing Neanderthal behaviour. Aspects of movement into and through these landscape, changing technological and raw material procurement strategies, hunting patterns and site structures are presented as accessible behaviours which change at site and landscape scales in response to changing climate, sea level and ecology over the last 250,000 years.

The Oxford Handbook of the Radical Right -

Jens Rydgren 2018-02-01

The resurgence of strong radical right-wing

parties and movements constitutes one of the most significant political changes in democratic states during the past several decades, particularly in Europe. The radical right's comeback has notably attracted interest from political scientists, sociologists, and historians, although the majority of past research focuses on party and electoral politics. In contrast, The Oxford Handbook of the Radical Right not only covers existing literature, but also shows how the radical right forms movements rather than parties. Editor Jens Rydren has gathered an international cast of contributors to cover concepts and definitions; ideologies and discourses; and a range of contemporary issues such as religion, globalization, gender, and activism. Further, this volume is one of few to provide a number of cases focusing on areas outside of Europe, including Russia, the US, Australia, Israel, and Japan. By integrating various strands of scholarship on the radical right that covers different regions and different

research perspectives, this Handbook provides an authoritative and state of the art overview of the topic and will set the agenda for scholarship on the radical right for years to come.

The Middle Paleolithic - Harold L. Dibble 2003

Papers originally presented at a symposium on the Middle Paleolithic of Europe and the Near East, organized as part of the annual meeting of the Society for American Archaeology in the spring of 1989. Paleolithic archaeology has entered a period in which new interpretations, based on new finds and revised ideas concerning previously known material, are competing with traditional interpretations. There is an urgent need for continued dialogue among Paleolithic scholars, exemplified by these papers.

Culture, Identity and Nationalism - Timothy Baycroft 2004

This study examines the evolution of national and regional, cultural and political identities in that northern region of France which borders Belgium, over the two centuries which followed the French Revolution. During that time the region was transformed by the development of the industrial economy, population shifts, war and occupation, and numerous changes of political regime. Through an analysis of a wide range of issues, including language, regional and national political movements, educational policy, attitudes towards immigrants and the border, the press, trade unions, and the church - as well as the attitude of the French State - the author questions traditional interpretations of the process of national assimilation in France. At the same time he illustrates how the Franco-Belgian border, originally an arbitrary line through a culturally homogeneous region, became not only a significant marker for the identity of the

French Flemish, but a real cultural division.

Miraculous Realism - Niels Niessen
2020-03-01

An authoritative study of this postsecular film
movement from the French-Belgian border
region that rose to prominence at the turn of the
twenty-first century. At the 1999 Cannes Film
Festival, two movies from northern-Francophone
Europe swept almost all the main awards.
Rosetta by the Walloon directors Jean-Pierre and
Luc Dardenne won the Golden Palm, and
L'humanité by the French director Bruno
Dumont won the Grand Prize; both won acting
awards as well. Taking this “miracle” of Cannes
as the point of departure, Niels Niessen identifies
a transregional film movement in the French-

Belgian border region—the Cinéma du Nord or
“cinema of the North.” He examines this
movement within the contexts of French and
Belgian national cinemas from the silent era to
the digital age, as well as that of the new realist
tendency in world cinema of the last three
decades. In addition, he traces, from a northern
perspective, a secular-religious tradition in
Francophone-European film and philosophy from
Bresson and Pialat, via Bazin, Deleuze, and
Godard, to the Dardennes and Dumont, while
critiquing this tradition for its frequent use of a
humanist vocabulary of grace for a secular
world. Once a cradle of the Industrial
Revolution, the Franco-Belgian Nord faced
economic crisis for most of the twentieth
century. Miraculous Realism demonstrates that
the Cinéma du Nord’s rise to prominence
resulted from the region’s endeavor to reinvent
itself economically and culturally at the
crossroads of Europe after decades of recession.
“This book not only makes a major contribution

to the field but also creates a new area in this field: the opening up of discussion of the Cinéma du Nord in geopolitical, historical, and theoretical terms, through a blend of fine close reading and broader commentary.” — Sarah Cooper, author of *The Soul of Film Theory*

Advances in Quality of Life Research 2001 -
Bruno D. Zumbo 2013-04-17

The knowledge base in the domains of quality of life, well-being, and subjective well-being is continuing to grow at a rapid rate. In light of this

growth, and the interest it reflects on the part of scholars, practitioners, and policy makers internationally, this book will play an important role in bringing scholars and students up to date on diverse topics and promoting and encouraging research in the field of quality-of-life (QOL) studies. Unlike most other similar publications quality of life studies is broadly construed to involve all of the social and health sciences. This volume has much to offer the reader. The papers reflect a diversity of disciplinary and methodological perspectives, it contains material on (a) the monitoring, assessing, and modelling of quality of life, (b) matters of policy, finance, marketing, and business, and (c) papers devoted to the determinants and correlates of well-being and quality of life.

Ancestors of Timothy W Hogan Vol. 2

Family Groups - Diana J Muir 2019-07-16

The ancestors of Timothy Hogan can be traced from Greene County, Tennessee before the Civil War to Haddon Hall in Derbyshire, England where his ancestors were Lords and Ladies of ancient England and Wales. Many lines go back to the ancient leaders of Wales including Rhys ap Griffith and to the Merovingian Kings and Queens of Normandy, France. Timothy's Swedish line, which came to Iowa in the USA, came directly from Sweden where they can be traced back to the sea kings of Uppsala, Sweden in about 500 AD. Continuing back some of his European ancestors, they can be traced to Seleucus Nicator in ancient Syria, the father of Helen of Troy. It is easy to imagine that some of the members of the Hogan Family retained the ambition and traits of their ancient ancestors. Many of his forefathers in Colonial America were

Freemasons and instrumental in forming the burgeoning American Nation. Front cover photo - Margarette Falls, Greene Co., TN Rear cover photo -Haddon Hall in Derbyshire England

*Toward Sustainable Relations Between
Agriculture and the City* - Christophe-Toussaint
Soulard 2018-01-30

This book gives an overview of frameworks, methods, and case studies useful for the analysis of the relations between agriculture and the city, in Europe and the Mediterranean. Its originality lies in the analysis of urban food systems

sustainability from an actors' perspective. All the chapters consider the key role of actors in the definition of innovations and pathways, which enhance sustainability, seen as an ongoing process. Part 1 presents systemic approaches of agricultural-urban interactions at the city-region scale in France, Egypt, Italy and Morocco. Part 2 deals with methods and tools for urban planning and local development, utilized to design and

assess sustainable food systems. The Part 3 inventories the recent changes in urban agriculture and the new forms of governance which are emerging in European cities (Athens, Berlin, Lisbon, Montpellier, Paris and Zurich). These results are useful for students, academics and activists involved in local policies and projects.
