Borders, Fences and Walls - Assoc Prof Elisabeth Vallet 2014-08-28

Twenty years after the fall of the Berlin Wall, the question remains 'Do good fences still make good neighbours'? Since the Great Wall of China, the Antonine Wall, built in Scotland to support Hadrian's Wall, the Roman 'Limes' or the Danevirk fence, the 'wall' has been a constant in the protection of defined entities claiming sovereignty, East and West. But is the wall more than an historical relict for the management of borders? In recent years, the wall has been given renewed vigour in North America, particularly along the U.S.-Mexico border, and in Israel-Palestine. But the success of these new walls in the development of friendly and orderly

relations between nations (or indeed, within nations) remains unclear. What role does the wall play in the development of security and insecurity? Do walls contribute to a sense of insecurity as much as they assuage fears and create a sense of security for those 'behind the line'? Exactly what kind of security is associated with border walls? This book explores the issue of how the return of the border fences and walls as a political tool may be symptomatic of a new era in border studies and international relations. Taking a multidisciplinary approach, this volume examines problems that include security issues ; the recurrence and/or decline of the wall; wall discourses ; legal approaches to the wall; the 'wall industry' and border technology, as well as their symbolism, role, objectives and efficiency.

The Limitless City - Oliver Gillham
2002-03

One of the great debates of our time concerns the predominant form of land use in America today -- the all too familiar pattern of commercial and residential development known as sprawl. But what do we really know about sprawl? Do we know what it is? Where did it come from? Is it really so bad? If so, what are the alternatives? Can anything be done to make

it better? The Limitless City offers an accessible examination of those and related questions. Oliver Gillham, an architect and planner with more than twenty-five years of experience in the field, considers the history and development of sprawl and examines current debates about the issue. The book: offers a comprehensive definition of sprawl in America traces the roots of sprawl and considers the factors that led to its preeminence as an urban and suburban form reviews both its negative impacts (loss of open space, increased pollution, gridlock) as well as its positive aspects (economic development, personal freedom, privacy) considers responses to sprawl including "smart growth," urban growth boundaries, regional planning, and the New Urbanism looks at what can be done to improve and counterbalance sprawl The author argues that whether we like it or not, sprawl is here to stay, and only by

understanding where it came from and why it developed will we be able to successfully address the problems it has created and is likely to create in the future. The Limitless City is the first book to provide a realistic look at sprawl, with a frank recognition of its status as the predominant urban form in America, now and into the near future. Rather than railing against it, Gillham charts its probable future course while describing critical efforts that can be undertaken to improve the future of sprawl and our existing urban core areas. True Vines - Diana Strinati Baur 2012

After the sudden death of her Italian winemaker husband, Meryl Michelli flees to her small hometown in Pennsylvania, looking to slam the door on heartache and trudge forward. But it's never that simple, especially when old family ties have been strained by years of geographic and emotional distance. A chance encounter with a childhood friend brings back betrayal she could never put to rest, and readjusting to life in the States in upper mid-life wears her thin in ways she never could have imagined. Just when Meryl feels she can't go on, Providence steps in and gives her permission to completely fall apart. Only then can she finally manage to grieve both her magnanimous, flawed Francesco and the unforgettable country she left behind. True Vines traverses the manicured rows of northern Italy's majestic wine country and the winding path of the Pennsylvania's Delaware River as Meryl

seeks to reconcile her past and her present. Several people on each side of the Atlantic guide her as she relives her own stories: a spirited sister-in-law, a petulant physician, a strong-willed landlady, a good-guy boss, a determined mother-in-law, an amazing flood survivor, a Senegalese English student, a young co-worker. Each recollection and encounter deepens Meryl's insight into how to make peace with her new reality. Saying goodbye to one existence allows Meryl to swing the door open to another as she weaves a new, uniquely beautiful tapestry that transports her to exactly the place in this short sacred life she is meant to be.

The Hydrogen Economy - Jeremy Rifkin
2003-08-25

The road to global security," writes Jeremy Rifkin, "lies in lessening our dependence on Middle East oil and making sure that all people on Earth have access to the energy they need to sustain life. Weaning the world off oil and turning it toward hydrogen is a promissory note for a safer world." Rifkin's

international bestseller *The Hydrogen Economy* presents the clearest, most comprehensive case for moving ourselves away from the destructive and waning years of the oil era toward a new kind of energy regime. Hydrogen-one of the most abundant substances in the universe-holds the key, Rifkin argues, to a cleaner, safer, and more sustainable world.

around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro,
