## **Emerging Practices in Scholarship of Learning and Teaching in a Digital Era** - Siu Cheung Kong 2017-02-22

In this book, we put forward a holistic conceptual framework for implementing Scholarship of Learning and Teaching (SoLT) in higher education. Unlike previous SoLT

studies, which usually focus on a specific aspect, here various aspects are integrated into a holistic framework. Further, it identifies three main stakeholders, namely, the higher education institution, teaching staff, and students. These stakeholders are in turn connected by

four interlocking themes: staff professional development, enhancement of student learning experiences, assessment, and digital technologies. Presenting chapters that address these four themes, this book supports the advancement of SoLT in higher education in relation to existing theories and emerging practices. By helping academics and leaders in higher education to implement SoLT for the improvement of student learning and teaching practices, it also makes a valuable contribution to the field of teacher education.

**Power, Knowledge and Feminist Scholarship** - Maria do Mar Pereira 2017-02-10

Feminist scholarship is sometimes dismissed as not quite 'proper' knowledge - it's too political or subjective, many argue. But what are the boundaries of 'proper' knowledge? Who defines them, and how are they changing? How do feminists negotiate them? And how does this boundary-work affect women's and gender studies, and its scholars' and students' lives? These are the questions tackled by this ground-breaking ethnography of academia inspired by feminist epistemology, Foucault, and science and technology studies. Drawing on data collected over a decade in Portugal and the UK, US and Scandinavia, this title explores different spaces of academic work and sociability, considering both official discourse and 'corridor talk'. It links epistemic

negotiations to the shifting political economy of academic labour, and situates the smallest (but fiercest) departmental negotiations within global relations of unequal academic exchange. Through these links, this timely volume also raises urgent questions about the current state and status of gender studies and the mood of contemporary academia. Indeed, its sobering, yet uplifting, discussion of that mood offers fresh insight into what it means to produce feminist work within neoliberal cultures of academic performativity, demanding increasing productivity. As the first book to analyse how academics talk (publicly or in off-the-record humour) about feminist scholarship, *Power, Knowledge and Feminist Scholarship* is essential reading for scholars and students in gender studies, LGBTQ studies, post-colonial studies, STS, sociology and education.

*Governance Indicators* - Helmut K. Anheier 2018-10-18

As difficult as it might seem to define governance, it appears to be that much more difficult to measure it. Since the World Bank Institute launched the Worldwide Governance Indicators in the late 1990s, the governance indicators field has flourished and experienced significant advances in terms of methodology, data coverage and quality, and policy relevance. Other major initiatives have added to a momentum that propelled research on

governance indicators seen in few other academic fields in the economic and social sciences. Given these developments and the prominence and policy relevance the field of governance indicator research has achieved, the time is ripe to take stock and ask what has been accomplished, what the shortcomings and potentials might be, and what steps present themselves as a way forward. This volume— the fifth edition in an annual series tackling different aspects of governance around the world— assesses what has been achieved, identifies strengths and weaknesses of current work, and points to issues that need to be tackled in order to advance the field, both in its academic importance as well as in its policy relevance. In short, the contributions to this volume explore the scope of existing governance indices and indicator frameworks, elaborate on current challenges in

measuring and analysing governance, and consider how to overcome them. The Oxford Handbook of Methods for Public Scholarship - Patricia Leavy  
PhD 2019-08-26

The Oxford Handbook of Methods for Public Scholarship presents the first comprehensive overview of research methods and practices for engaging in public scholarship. Public scholarship, which has been on the rise over the past 25 years, produces knowledge that is available outside of the academy, is useful to relevant stakeholders, and addresses publicly identified needs. By involving stakeholders in the entire process, and making the findings accessible, public scholars contribute to a crucial democratization of research. The Oxford Handbook of Methods for Public Scholarship features a wealth of highly respected interdisciplinary contributors, as well as emerging scholars, and chapters include robust examples from real world research in

varied fields and cultures. The volume features ample discussion of working with non-academic stakeholders, coverage of traditional and emergent methods including those that draw from the arts, the internet, social media, and digital technologies, and coverage of key issues such as writing, publicity, and funding.

*Taking English Planning Law Scholarship Seriously* - Maria Lee  
2022-10-24

Planning is at the heart of the response to many of the significant

challenges of our time, from the climate and environmental crises to social and economic inequalities. It is embedded in, as well as partially constituting, our democratic systems, so that the challenges of democratic decision-making in a complex society cannot be avoided when thinking about planning. Planning law raises some of the most fundamental questions faced by legal scholars, from the legitimacy of authority to the relationship between public and private rights and interests. And yet, planning law has been relatively neglected by legal scholars. The objective of *Taking English Planning Law Scholarship Seriously* is to create space for planning law scholarship in all of its variety, and for curiosity about law in all its complexity. The chapters reflect this diversity and complexity, covering a range of the objects of planning (from housing to energy to highways) and a multiplicity of

planning tasks and tools (from compulsory purchase to contracting to planning inquiries).

University Community Engagement and Lifelong Learning - Julia Preece  
2017-07-13

This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities, and makes a compelling argument for the university as a public good, in spite of current trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities, asset-based community development, and the adult learning concept of dialogue, to propose a model whereby the boundary walls of the university become metaphorically

'porous', so that community members feel free to interact with the university as equal members of society. A historical outline of African universities is provided, as well as an exploration of the evolution of terms for community engagement, service learning and learning cities; and an examination of the policy and practice implications for the ideological model of a porous university.

### **History of Ancient Greek Scholarship**

- 2020-06-15

*Applying the Scholarship of Teaching and Learning beyond the Individual Classroom* - Jennifer C. Friberg  
2019-08-29

A survey of exemplary SoTL research projects and the use of their results on a broader scale. When the Scholarship of Teaching and Learning (SoTL) emerged, it often concentrated on individual faculty practice in one classroom; it is now, however, increasingly common to find work in SoTL focused more broadly. SoTL studies may engage with a cluster of courses, a program, a particular population of students, a pedagogical approach, or a field—all of which are represented in the essays collected here by authors from a diverse array of institutions and nations. This volume features examples of SoTL

research conducted in, and applied to, a variety of contexts and disciplines, offering a theoretical framework for an expanded vision of SoTL—one that moves beyond the individual classroom.

**Translation as Scholarship** - Jay Crisostomo 2019-01-14

In the first half of the 2d millennium BCE, translation occasionally depicted semantically incongruous correspondences. Such cases reflect ancient scribes substantiating their virtuosity with cuneiform writing by capitalizing on phonologic, graphemic, semantic, and other resemblances in the

interlingual space. These scholar-scribes employed an essential scribal practice, analogical hermeneutics, an interpretative activity grounded in analogical reasoning and empowered by the potentiality of the cuneiform script. Scribal education systematized such practices, allowing scribes to utilize these habits in copying compositions and creating translations. In scribal education, analogical hermeneutics is exemplified in the word list "Izi", both in its structure and in its occasional bilingualism. By examining "Izi" as a product of the social field of scribal education, this book argues that scribes used analogical hermeneutics to cultivate their craft and establish themselves as knowledgeable scribes. Within a linguistic epistemology of cuneiform scribal culture, translation is a tool in the hands of a knowledgeable scholar.

*Routledge Handbook of University-Community Partnerships in Planning Education* - Megan E. Heim LaFrombois

Downloaded from [id-blockchain.idea.gov.vn](http://id-blockchain.idea.gov.vn) on by guest

2023-10-11

This handbook explores two guiding questions - how can university-community partnerships in planning education work, and how can they be transformative? University-community partnerships - often referred to as service-learning or community-engaged teaching and learning - are traditionally based on a collaborative relationship between an academic partner and a community-based partner, in which students from the academic partner work within the community on a project.

Transformational approaches to university-community partnerships are approaches that develop and sustain mutually beneficial collaborations where knowledge is co-created and new ways of knowing and doing are discovered. This edited volume examines a variety of university-community partnerships in planning education, from a number of different perspectives, with a focus on

transformative models. The authors explore broader theoretical issues, including topics relating to pedagogy, planning theory, and curriculum; along with more practical topics relating to best practices, logistics, institutional support, outcome measures, and the various forms these partnerships can take - all through an array of case studies. The authors, which include academics, professional practitioners, academic practitioners, and students, bring an incredible depth and breadth of knowledge and experience from across the globe - Australia, Canada, Chile, Europe (including Germany, Spain, Slovakia, and Sweden), India, Jamaica, South Korea, and the United States.

**The Future of the Commercial Contract in Scholarship and Law Reform** - Maren

Heidemann 2018-11-02

This book explores commercial contract law in scholarship and legal practice, suggests new research

agendas and provides a forum for debate of typical issues that might benefit from further attention by scholarship and legislatures. The authors from over ten different jurisdictions take an international and comparative approach. Not confined to EU law it re-opens the debate internationally and seeks to reclaim the wider meaning of European law as rooted in geography and cultural legal heritage. There is a need to focus on commercial contracts in more detail in research and legislation. The transactional approach, the role of recent law reform, including the new French Civil Code, cross-border dealings, substantive contract law in public international law and ICSID arbitration as well as current contractual practices like OEM, CSR, contractual co-operation, sustainability and intra-corporate arbitration contribute to a wider regulatory outlook for commercial

transactions.

**Preparing Students for Community-Engaged Scholarship in Higher Education** - Zimmerman, Aaron Samuel 2020-02-01

Community-engaged scholarship is an equitable and democratic approach to scholarship that seeks to identify and solve community-based problems. Community-engaged scholars aim to serve the public good by developing and sustaining community-campus partnerships built on trust, reciprocity, and mutual benefit. As universities orient themselves towards serving the public good, they face a number of challenges: faculty and students may not possess the competencies or commitment to build fruitful community partnerships, graduate and undergraduate students may lack the necessary training and mentorship required to develop their

identity as community-engaged scholars, and institutional leaders may not know how to motivate faculty and students for this ambitious and challenging endeavor. Unless these challenges are addressed, universities will fail to prepare the next generation of community-engaged scholars. Preparing Students for Community-Engaged Scholarship in Higher Education is an essential research book that explores how faculty and academic leaders can create learning opportunities and intellectual cultures that support the development of community-engaged scholars. Additionally, it will examine how university coursework can help undergraduate and graduate students to develop the knowledge, skills, and commitments necessary for productive and responsible community-engaged scholarship. Featuring a range of topics such as mentorship, higher education, and service learning, this book is ideal for

higher education faculty, university leaders, deans, chairs, educators, administrators, policymakers, curriculum designers, academicians, researchers, and students. *The Enlightened College Applicant* - Andrew Belasco 2016-08-30 Deluged with messages that range from "It's Ivy League or bust" to "It doesn't matter where you go," college applicants and their families often find themselves lost, adrift in a sea of information overload. *Developing Digital Scholarship -*

Alison Mackenzie 2016-10-17

This book provides strategic insights drawn from librarians who are meeting the challenge of digital scholarship, utilizing the latest technologies and creating new knowledge in partnership with researchers, scholars, colleagues and students. The impact of digital on libraries has extended far beyond its transformation of content, to the development of services, the extension and

enhancement of access to research and to teaching and learning systems. As a result, the fluidity of the digital environment can often be at odds with the more systematic approaches to development traditionally taken by academic libraries, which has also led to a new generation of roles and shifting responsibilities with staff training and development often playing 'catch-up'. One of the key challenges to emerge is how best to demonstrate expertise in digital scholarship which draws on the specialist technical knowledge of the profession and maintains and grows its relevance for staff, students and researchers. This edited collection spans a wide range of contrasting perspectives, contexts, insights and case studies, which explore the relationships between digital scholarship, contemporary academic libraries and professional practice. The book demonstrates that there are opportunities to be bold, remodel,

trial new approaches and reposition the library as a key partner in the process of digital scholarship. Content covered includes: • the impact of digital scholarship on organizational strategies • an insight into new services and roles, partnerships and collaborations • case studies exploring new technologies to support research and development • new approaches to service delivery • re-visioning of space, physical and virtual. This is an essential guide for librarians and information professionals involved in digital scholarship and communication, who wish to extend their awareness of emerging practices, as well as library administrators and students studying library and information science. *Sharing Milk* - Carter, Shannon K. 2020-10-09

The feeding of human milk to socially and biologically unrelated infants is not a new phenomenon, but the

Euroamerican values of individualism have generated expectations that mothers are individually responsible for feeding their own infants. Using a bio-communities of practice framework, this dynamic new analysis explores the emotional and material dimensions of the growing milk sharing practice in the Global North and its implications for contemporary understandings of infant feeding in the US. Ranging widely across themes of motherhood, gender and sociology, this is a compelling empirical account of infant feeding that stimulates new thinking about a contentious practice.

For example, technology, globalization and commercialization may be the principal trends, but they are not the only trends, Sport researchers have the opportunity to study other trends, including the modernization of sport organizations, changing governance practices, regulatory changes, innovation, merchandising, media and broadcasting technologies, socio demographic influences (i.e. aging populations, change in employment patterns, increasing

**New Horizons for Early Modern European Scholarship** - Ann Blair  
2021-08-10

An illuminating exploration of the new frontiers—and unsettled geographical, temporal, and thematic borders—of early modern European history. The study of early modern Europe has long been the source of some of the most creative and influential movements in historical scholarship. *New Horizons for Early*

Modern European Scholarship explores recent developments in historiography both to exhibit the field's continuing vibrancy and to highlight emerging challenges to long-assumed truths. Essays examine • how key ideas and intellectual practices arose, circulated through scholarly culture, and gave way to subsequent forms • Europe's transforming relationship with Asia, the Americas, Africa, and the rest of the world • how overlooked evidence illuminates vital but obscured people, practices, and objects • connections between disciplines, types of sources, time periods, and places Opening up emerging possibilities, this book demonstrates that early modern European scholarship remains a source for groundbreaking historical insights and methodologies that would benefit the study of any time and place. Scholarship Funds for Education Institutions

**Scholarship Students in Elite South African Schools** - Jennifer Wallace 2022-11-16

This book provides a narrative account of the experiences of twenty former scholarship students from historically disadvantaged communities who attended elite public and private secondary schools. It draws on in-depth, one-on-one semi-structured interviews conducted with former scholarship recipients who were between the ages of 19 and 24 years at the time of the interviews. Various themes are explored, specifically focusing on elite schooling in relation to the experiences and navigational

practices of the scholarship recipients and the adjustments that they felt they needed to make in order to fit into the elite school space. The book analyses and discusses the reflective experiences of students who were awarded a scholarship to attend an elite secondary school. It reveals that accepting the gift of a scholarship is far more complex, multi-layered, and at times harsh and even painful for the individual recipients than is possibly realized by those involved in this practice. This book contributes to academic educational debates within the sociology of education, elite schools and schooling in the post-apartheid South African context.

### **Envisioning Public Scholarship for**

**Our Time** – Adrianna J. Kezar

2023-07-03

This book proposes a new paradigm of public scholarship for our time, one that shifts from the notion of the

public intellectual to the model of the engaged scholar. The editors' premise is that the work of public scholarship should be driven by a commitment to supporting a diverse democracy and promoting equity and social justice. The contributors to this volume present models that eschew the top-down framing of policy to advocate for practice that drives bottom-up change by arming the widest range of stakeholders -- especially members of marginalized communities -- with relevant research. They demonstrate how public scholarship in higher education can increase its impact on practice and policy and compellingly argue that public scholarship should be recognized as normative practice for all scholars and indeed integrated into the curriculum of graduate courses. The chapters describe multiple types of public scholarship and different strategies that move beyond informing policymakers, faculty, and

administrators to engage publics such as students and parents, media, the general public, and particularly groups that may have had little or no access to research. Examples include partnering with a community agency to design a research project and disseminate results; writing for practitioner or policy venues and magazines outside the traditional academic journals; serving on boards for national groups that impact decisions related to your area of research; and the use of social media. Whether scholar, director of graduate education, or graduate student of higher education, this book opens up a new vision of how research can inform practice that promotes the public good.

**Employability via Higher Education: Sustainability as Scholarship** – Alice Diver 2019-09-23

This book discusses the topic of graduate employability from the premise that in this era of ‘massification,’ economic austerity, and political uncertainties, higher education (HE) no longer guarantees a clear ‘work place advantage.’ Divided into three sections, the book offers theoretical and philosophical discourses on the ‘HE quandary,’ whilst taking into account – and critiquing – political, temporal, and national contexts. It culminates in an investigation into specific discipline areas. It offers insights into the way that institutions, decision-makers, academics, and professional support staff can work together towards ensuring that our graduates are able to cope with the varied demands and challenges of modern job markets. It harnesses arguments and reflections on the

breadth and depth of the functions of HE, such as social transformation, promoting principles of social justice, and providing opportunities. It grounds these in a triadic model for enhancing student engagement and holistic learning, namely, the emotional, cognitive, and behavioural aspects. As an anthology, it is forward-gazing in terms of the sustainability debate, whilst still offering evidence-based, research-grounded, practical suggestions to readers looking for tips and tools of the trade.
