**One God** - Stephen Mitchell 2010-04-29

Graeco-Roman religion in its classic form was polytheistic; on the other hand, monotheistic ideas enjoyed wide currency in ancient philosophy. This contradiction provides a challenge for our understanding of ancient pagan religion. Certain forms of cult activity, including acclamations of 'one god' and the worship of theos hypsistos, the highest god, have sometimes been interpreted as evidence for pagan monotheism. This book discusses pagan monotheism in its philosophical and intellectual context, traces the evolution of new religious ideas in the time of the Roman empire, and evaluates the usefulness of the term 'monotheism' as a way of understanding these developments in later antiquity outside the context of Judaism and Christianity. In doing so, it establishes a framework for understanding the relationship between polytheistic and monotheistic religious cultures between the first and fourth centuries AD.

**Ancient Germanic Warriors** - Michael P. Speidel 2004-08-02

Presenting a range of evidence for these diverse styles, from Roman art to early medieval bracteate amulets, and from classical texts to Beowulf, the Edda and Icelandic sagas, Professor Speidel here details seventeen different Germanic warriors styles, including berserks, wolf-warriors, club-wielders, long-hairs, ghost warriors and horse-stabbers, and how they indicate an unbroken continuity of customs, beliefs and battle-field tactics. Ancient Germanic warriors played a decisive role in historical events from 200 BC, when Germanic culture first became identifiable, to AD 1000 when Christianity swept through the Nordic countries. Arising from beliefs and states of mind, a variety of warrior styles manifested themselves in differences of dress, weaponry and fighting technique. Fully illustrated with over fifty photographs, this vivid and fascinating survey adds a colourful new dimension to our understanding of the history of Europe.

**Philosophy and the Novel** - Alan H. Goldman 2013-04-05

Alan H. Goldman presents an original and lucid account of the relationship between philosophy and the novel. In the first part, on philosophy of novels, he defends theories of literary value and interpretation. Literary value, the value of literary works as such, is a species of aesthetic value. Goldman argues that works have aesthetic value when they simultaneously engage all our mental capacities: perceptual, cognitive, imaginative, and emotional. This view contrasts with now prevalent narrower formalist views of literary value. According to it, cognitive engagement with novels includes appreciation of their broad themes and the theses these imply, often moral and hence philosophical theses, which are therefore part of the novels' literary value. Interpretation explains elements of works so as to allow readers maximum appreciation, so as to maximize the literary value of the texts as written. Once more, Goldman's view contrasts with narrower views of literary

interpretation, especially those which limit it to uncovering what authors intended. One implication of Goldman's broader view is the possibility of incompatible but equally acceptable interpretations, which he explores through a discussion of rival interpretations of Ernest Hemingway's *The Sun Also Rises*. Goldman goes on to test the theory of value by explaining the immense appeal of good mystery novels in its terms. The second part of the book, on philosophy in novels, explores themes relating to moral agency—moral development, motivation, and disintegration—in Jane Austen's *Pride and Prejudice*, Mark Twain's *Huckleberry Finn*, John Irving's *The Cider House Rules*, and Joseph Conrad's *Nostromo*. By narrating the course of characters' lives, including their inner lives, over extended periods, these novels allow us to vicariously experience the characters' moral progressions, positive and negative, to learn in a more focused way moral truths, as we do from real life experiences.

**The Republic of St. Peter** - Thomas F. X. Noble 2010-08-03

The Republic of St. Peter seeks to reclaim for central Italy an important part of its own history. Noble's thesis is at once original and controversial: that the Republic, an independent political entity, was in existence by the 730s and was not a creation of the Franks in the 750s. Noble examines the political, economic, and religious problems that impelled the central Italians—and a succession of resolute popes—to seek emancipation from the Byzantine Empire. He delineates the social structures and historical traditions that produced a distinctive political society, describes the complete governmental apparatus of the Republic, and provides a comprehensive assessment of the Franco-papal alliance.

Col. William N. Selig, the Man Who Invented Hollywood - Andrew A. Erish 2012-03-01

All histories of Hollywood are wrong. Why? Two words: Colonel Selig. This early pioneer laid the foundation for the movie industry that we know today. Active from 1896 to 1938, William N. Selig was responsible for an amazing series of firsts, including the first two-reel narrative film and the first two-hour narrative feature made in America; the first American movie serial with cliffhanger endings; the first westerns filmed in the West with real cowboys and Indians; the creation of the jungle-adventure genre; the first horror film in America; the first successful American newsreel (made in partnership with William Randolph Hearst); and the first permanent film studio in Los Angeles. Selig was also among the first to cultivate extensive international exhibition of American films, which created a worldwide audience and contributed to American domination of the medium. In this book, Andrew Erish delves into the virtually untouched Selig archive at the Academy of Motion Picture Arts and Sciences Library to tell the fascinating story of this unjustly forgotten film pioneer. He traces Selig's career from his early work as a traveling magician in the Midwest, to his founding of the first movie studio in Los Angeles in 1909, to his landmark series of innovations that still influence the film industry. As Erish recounts the many accomplishments of the man who first recognized that Southern California is the perfect place for moviemaking, he convincingly demonstrates that while others have been credited with inventing Hollywood, Colonel Selig is actually the one who most deserves that honor.

*Homosexuality and Italian Cinema* - Mauro Giori 2017-11-18

This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

As one of the first comparative studies in conceptual history, this volume focuses on debates about the nature of parliament and parliamentarism within and across different European countries, representative institutions, and genres of political discourse.
