Women's Education in the Third World - Gail P. Kelly 1982-01-01

Gail Kelly and Carolyn Elliott have assembled the latest and best available scholarship from a range of disciplines to illuminate the determinants, nature, and outcomes of women's education in third World nations. This study focuses on the undereducation of women in Africa, Asia, Latin America and the Middle East, delving into its causes, changes in female education patterns and the significance of these changes to societies and to women's lives. Articles in this volume lay the foundation for further research by examining women's schooling from the novel perspective that the social and economic outcomes of women's education are shaped by gender-sex systems that subordinate women to men.

Education and Society in Comparative Context - Eija Kimonen
2015-12-17

"What was the interrelationship between education and society during the twentieth century in the United States and India? What is the essence of the historical development of educational policies and social systems in these two countries? What philosophical views and developmental courses underlie their outdoor-oriented education? What are their aims of outdoor-oriented education? What procedures are connected with their outdoor-oriented education? These questions are examined in this unique volume. This book is divided into three parts. The first part creates a context for the comparison of the issues concerning education and society. The central point of departure used here regards education as being closely related to the totality of culture and human activity. The dialectic process between education and society is realized differently in accordance with the value objectives that provide the background for different societies. This comparative educational study uses a historico-

hermeneutical approach. The second part analyzes the social systems and educational policies of the United States and India following their developmental trends and patterns. The nature of the relationship between education and society for each country is further brought into focus when it is interpreted from the perspective of the philosophical views, pedagogical aims, and procedures of twentieth-century outdoor-oriented education. The case studies provide an interesting insight into how changes in educational policy have been reflected in the every-day pedagogical procedures used in schools in the United States and India. The third part is an analysis and comparison of the phenomena previously presented that are related to education and society through the lenses suggested by sociological theories. It compares the dimensions of the interrelationship between education and society from the standpoint of outdoor-oriented education in the two countries during the twentieth century. This thought-provoking volume is intended for anybody interested in the interplay between education and society in all its complexity. It offers a fascinating journey into the past and present of the issues that have defined the development of education and society in the United States and India."

The Ethics of Teaching - Michael A. Boylan 2017-05-15

Education is at a crossroads. While bureaucrats and teachers fight over the best way to structure and deliver education to students, much of the friction generated relates to the different conceptions of what education is about in the first place. The crisis in education is therefore of key importance and demands careful attention in order to formulate the best possible response. But before policies can be formulated, there needs to be a clear agreement on what education should be about. To this end, this collection of previously published essays facilitates just such discussion. The anthology is designed to give a snapshot of the seminal work in the philosophy of education and the input of ethical issues upon that work. It provides an authoritative tour of the profession and pivotal issues that confront it, written from a variety of international and critical perspectives.
