The Skinny Rules - Bob Harper  
2012-05-15

THE LAST DIET BOOK YOU'LL EVER NEED With so much conflicting weight-loss advice out there to confuse your efforts, it's no wonder you

haven't been successful losing weight and keeping it off. But with Bob Harper, superstar trainer and co-host of NBC's hit show The Biggest Loser as your personal authority and coach, you can and will finally shed the pounds—whether you want to lose two or two hundred! Distilling Bob's vast knowledge of nutrition, weight-loss strategy, and human nature down to twenty simple, nonnegotiable principles, The Skinny Rules will help you step

away from a reliance on processed foods and the need for so much sweet and salt and step into a newly thin lifestyle. And Bob's methods couldn't be more straightforward. Taking the guesswork out of implementing the Skinny Rules, Bob offers a month's worth of menu plans and more than 90 delicious, rule-abiding recipes for breakfast, lunch, dinner, and snacks to keep you cooking and eating skinny for life. You'll be happily astounded to see the variety and volume of the tasty food on your plate! He also includes terrific tips for what to stock in your fridge and what to prepare every weekend in order to set yourself up for success during your too-busy-to-cook weekdays. A virtual GPS to your weight-loss goals, *The Skinny Rules* takes the mystery out of the process, offering the fastest route to your skinny destination. LOSING WEIGHT IS NOW AS SIMPLE AS 1-2-3 . . . AND 3-15-18-20 TOO! Rule #3: Eat protein at every meal, making some kind of fish your go-to

protein as often as you can. Take your weight and divide it by two—that's more or less how much protein you should be eating in grams every day. Rule #15: Eat at least ten meals a week at home (and cook them yourself). Restaurant portions are usually 40 to 50 percent bigger than what you'd serve at home—the more you eat out, the more you overeat. Set yourself up for success by preparing my turkey meatballs, hummus, and roasted vegetables on the weekend so that you will have go-to staples and no excuses! Rule #18: Go to bed slightly hungry. Denied fuel for more than five hours, your body will start burning its own fat and sugar. Make a point not to eat after dinner and you'll be burning fat while you're sleeping. Rule #20: Enjoy a splurge meal once a week. Unlike episodic bingeing, splurge meals are an ingredient in your diet. When you plan something, you are in control.

**Un-Junk Your Diet** - Desiree Nielsen 2017-01-03

We don't need to be instructed to eat apples instead of potato chips. What we need is someone to inspire us to eat well and to show us just how powerful eating that apple can be. This person must be a trusted voice, one that can calm the informational clutter instead of adding yet another discordant voice to the pile. Desiree Nielsen is a registered dietitian, one of the public's most trusted sources of

nutrition information. In *Un-Junk Your Diet*, she teaches readers about anti-inflammatory dieting in a way that's engaging, funny, and approachable. This book begins with a call to action to help shake up perceptions of what food means to our bodies and illuminate all the ways that marketers co-opt healthy eating messages to coerce us into choosing food that is unworthy. In addition, an in-depth look at the fundamentals of nutrition—with a splash of myth busting—strengthens readers' abilities to resist the latest nutrition headline and continue making healthier choices. Because there is no one right way for every individual eater, Nielsen offers a brief exercise in self-discovery before providing four distinct plans for becoming healthier. They range from the gentle and gradual to the two-week kick start that appeals to both detox seekers and vacation slimmers.

[Fast Carbs, Slow Carbs](#) - David A. Kessler, M.D. 2020-03-31

The American body is in trouble. Unprecedented numbers of us suffer from obesity, heart disease, diabetes, and other debilitating illnesses. The root cause is a once-revolutionary idea that seemed to offer so much promise, but instead has become the cause of a global health crisis: processed foods. Over the past seventy-five

years, a number of factors aligned to create a reality in which processed carbohydrates became our main food source. In *Fast Carbs, Slow Carbs*, bestselling author and former FDA Commissioner David A. Kessler explains how the quest to feed a nation resulted in a population that is increasingly suffering from obesity and chronic disease and offers a solution for changing course. For decades, no one questioned the effects of these processed carbohydrates. The focus was on fertile grassland, ideal for growing vast amounts of wheat and corn; an industrial infrastructure perfect for refining those grains into starch; a food production behemoth that turns refined grains into affordable, appealing, and ever-present food items, from pizza to burritos to bagels; and an efficient distribution network that ensures consumption by Americans nationwide. But during those same decades, our bodies quietly contended with the metabolic chaos caused by consuming rapidly

Downloaded from [id-blockchain.idea.gov.vn](https://id-blockchain.idea.gov.vn) on  
by guest

absorbable starch. Slowly but surely, these effects accumulated and became disastrous, leading to the public health crisis in which we find ourselves today. In *Fast Carbs, Slow Carbs*, Kessler explains how eating refined grains such as wheat, corn, and rice leads to a cascade of hormonal and metabolic issues that make it very easy to gain weight and nearly impossible to lose it. Worse still is how excess weight creates a very real link to diabetes, heart disease, cognitive decline, and a host of cancers. We can no longer afford to dismiss the consequences of eating food that is designed to be rapidly absorbed as sugar in our bodies. Informed by cutting-edge research as well as Dr. Kessler's own personal quest to manage his weight, *Fast Carbs, Slow Carbs* reveals in illuminating detail how we got to this critical turning point in our health as a nation—and outlines a plan for eliminating heart disease, allowing us to, finally, regain control of our health.
